September 16, 2015

VIA E-MAIL

The Honorable Daniel Kildee
United States House of Representatives
Washington, DC 20515

Dear Congressman Kildee:

Thank you for your September 9, 2015, letter regarding your concerns for the drinking water in the city of Flint (Flint). The Michigan Department of Environmental Quality (MDEQ) is working closely with Flint's water department as well as the U.S. Environmental Protection Agency (USEPA) to ensure Flint residents have ample water that meets state and federal drinking water standards.

The MDEQ's role is to administer its nearly 40-year-old state drinking water protection program based on federal guidelines. The MDEQ works with approximately 11,500 public water systems in the state to monitor for more than 90 primary drinking water contaminants and ensure that every supply consistently provides safe drinking water.

In Flint, the city made a decision 18 months ago to switch drinking water sources. This change required them to take specific measures under the federal Lead and Copper Rule, which was enacted in 1991 to monitor water as it interacts with lead service connections and home plumbing. Flint's test results were conducted according to the same testing protocols every Michigan community uses and the same protocols Flint has used to test its water every three years for the past 25 years.

While the results from Flint's testing show compliance with the federal action level for lead and copper, on August 17, 2015, the MDEQ instructed the city to move forward expeditiously with developing additional corrosion control treatment to minimize the corrosive effects between drinking water and lead service connections and home plumbing in the Flint service area.

We appreciate and share your concern for the situation, and the MDEQ looks forward to providing you a detailed briefing next week. If you have any additional questions in the meantime, please contact Ms. Maggie Pallone, Deputy Director, Policy and Legislative Affairs, at 517-284-6704 or pallonem@michigan.gov; or you may contact me.

Sincerely,

Dan Wyant

City Administrator Statement Regarding the Possibility of Additional Water Testing

Flint, Michigan – September 21, 2015 – The following is a statement from the City Administrator regarding the possibility of additional testing being conducted on Flint's water.

"The City of Flint has no problem with cooperating in additional testing. In fact, at this time we are already taking the steps necessary to improve Flint's water including a plan to add a corrosion inhibitor into the treatment process in addition to ongoing efforts to fix problems in the distribution system. The City also continues to offer free and independent testing so that all customers understand the water quality in their homes, including any problems with lead. Our focus has been and will continue to be to provide safe, quality water to our customers."

Weekly Critical Issues —September 24, 2015

- **Allen Park**— City Council has appointed Mark Kibby as City Administrator. We have several names for serving on the RTAB that are getting vetted by the Governor's Office. A discussion list will be prepared as to where each could serve. The tender offer has been extended, so far, approximately 30% of bondholders have agreed.
- **Benton Harbor**-The lawsuit with the former Public Safety Director and two former employees is a major issue for the City. Darwin has indicated that it will cost the City $1.7M to settle these three cases. They are only partially insured. I have advised Darwin to seek the City Commission's approval for the Finance Director's Search. The cost is $10,000 for the MML Proposal. If approved, it won't begin until late October. The Assistant City Manager position will be reduced to part-time due to commuting distance. A job posting for this position has been advertised.
- **Ecorse** –they received and filed the Memo from Treasury. The City indicated that if they were to agree to have River Rouge provide fire protection or if they were to go to a paid part-time department the pension liability costs would spike. Their five year financial plan will need to be reviewed once again. We need to determine who will serve on the RTAB position after Joyce leaves.
- **Flint** – Lawsuit on water rates may cause the City to rebate $51M and repay $15.7M. I have offered financial assistance to the City to assist in determining the financial impact of this court. Natasha will make a decision on legal representation assistance this week. A water main break under the Flint River may cost up to $500K to repair. The City has decided to postpone the repair.
- **Hamtramck**-we have several names for the RTAB position to replace Cathy. Segal will develop a work plan for phase 3 of the pension study. The City has hired Alan Young for audit services. Katrina wants to reorganize staff. Overtime last month was $60K, we are asking her to get quotes for a police study. Treasury will pay $25,000 for the study. Eric and I will be meeting with individual members of the City Council in October.
- **Highland Park**-The City has had difficulty finding a collection firm to collect the past due water and sewer bills, Cathy is working with a firm and expects to hire them soon. Hiring a collection firm is a requirement of the loan agreement. Cathy has indicated that the OPEB savings of approximately $750K will be implemented by October 1. We have a number of loan requirements that will be in the draft E-loan document. The City has purchased $300,000 of new water meters as part to the FDCVT grant award and are installing them. The City Council conditionally approved the DWSD agreement and are asking DWSD for an extension on the number of years required for payback. Regular billing of water and sewer customers has begun.
- **Lincoln Park**-Brad is placing a PA 345 request on the November Ballot seeking approval of 6 mills to fund the City's pension system. Some of the City Council members are supporting the millage request. Brad has prepared a four month plan which is being updated. His exit will be in the first week of January. The new city manager, Matt Coppler begins work on Monday. We have met with Brad to discuss the final order.

- **Inkster-** the City won its appeal on the water billing lawsuit. Mark said the city will be discussing its options. The City is negotiating with Wayne County on its $4.9M sewer debt. A judgement levy for several years will be likely be placed on the July 2016 tax roll. Patrick submitted his report on the Benton Harbor Park Conservancy. Mark has indicated that the City is updating its Park and Rec Master Plan. I have encouraged Mark to meet with the ministers.
- **Pontiac-**Jane Di Sessa will become the new Deputy Mayor. Jerry Ambrose will not hired as a transition advisor to the Mayor. The Pontiac RTAB exit plan is nearing completion. The major issues are a deputy mayor ordinance, the Phoenix Center Order and city council action items.
- **River Rouge**—the five year financial plan will have to be balanced in order to discuss an exit from the Consent Agreement, The City's plan for taking over fire service for the City of Ecorse is on hold for now. The Mayor has drafted a revised plan that is even more favorable to Ecorse.
- **Royal Oak Township**— police service proposal from another community has been a problem. We may receive a proposal from Oak Park. Additional discussions with Ferndale and Hazel Park are needed. The Township needs to submit another grant application for police funding. We have received Robert's six month plan. Patrick will be assisting Robert on several items. Montgomery and Co. the accounting firm has submitted an invoice for $17,000. Robert says that they won't have a deficit at the end of the year. The MERS issue has resurfaced, Robert wants to invest these funds with MERS but the market is risky.
- **Miscellaneous Items**—the draft of the October Governor's Memo is almost complete. Staffing update. RTAB candidates are being vetted by the Governor's Office. The draft exit plan for several communities is nearing completion. Vacation request will be October 23 to November 1. Request to produce documents is going well so far. Any other division items that we should discuss?

For Immediate Release

City of Flint Issues Lead Advisory

Flint, Michigan – September 25, 2015 – The City of Flint is issuing a Lead Advisory for residents to be aware of lead levels in drinking water after hearing concerns from the medical community. While the City is in full compliance with the Federal Safe Drinking Water Act, this information is being shared as part of a public awareness campaign to ensure that everyone takes note that no level of lead is considered safe.

The Genesee County Health Department has issued a fact sheet regarding lead precautions for residents. The fact sheet can be found on their website at www.gchd.us. Here are a few of the suggestions the Health Department recommends:

- Flush your cold-water pipes by running the water for approximately 5 minutes
- Use only water from the cold-water tap for drinking, cooking, and especially for making baby formula.
- Install a water filter that is NSF-certified for lead removal.

Lead contamination can leach into water from a home's lead water service lines, lead solder, and leaded plumbing materials including fixtures, faucets, and fittings. Older service lines with pipes and fixtures installed before 1986 can sometimes be more susceptible to lead issues due to materials used in the home such as lead based paint and lead pipes.

This message is meant as a precaution to residents and does not mean that all homes in the City will experience the same issue. Residents with concerns about lead service lines

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

and lead in home plumbing fixtures are encouraged to contact the City's Utilities Division to schedule a free water testing by calling the Water Treatment Plant at 810-787-6537 and pressing #1 after prompted or by emailing flintwater@cityofflint.com.

The City of Flint is working proactively along with the County Health Department, the Michigan Department of Environmental Quality, and the U.S. Environmental Protection Agency to improve the water system throughout the City. An accelerated plan to add a corrosion control agent to our water within 30 to 60 days with expedited approval from the Michigan Department of Environmental Quality is already underway. This will reduce corrosion which can cause lead in old pipes to leach into the water.

This plan is in addition to Mayor Walling's letter requesting $30 Million in water infrastructure assistance funding from the State of Michigan. $10 Million of that request would be for the replacement of lead service lines in households to ensure that lead no longer presents a danger to the drinking water of our residents. As the letter states, "It is the City's position that the abatement of lead through the removal of lead containing pipes and fixtures in homes is the best long term solution to keeping our residents' water safe."

Mayor Walling further stated: "I am extremely concerned about the risks around lead with Flint's children and I will be working tirelessly to ensure the water is safe and all of our families have the information they need. I also will continue to pursue funding for infrastructure improvements and a comprehensive healthy homes initiative that addresses lead in paint and pipes. We have to get the lead out of our community to eliminate the threat of childhood lead poisoning."

The City of Flint continues working proactively with the County Health Department, the Michigan Department of Environmental Quality, and the U.S. Environmental Protection Agency to improve the water system throughout the City. The City remains committed to working with all of our partners in the Water Technical Advisory Committee to address all

Dayne Walling
Mayor

Natasha L. Henderson
City Administrator

issues of public health and quality concerns that face the community. Updates on progress made in addressing this issue will be made during regular public meetings including City Council and other scheduled meetings. Information on this and all related matters will continue to be posted on the City of Flint's website, cityofflint.com.

Gary K Johnson, M.D., M.P.H , Medical Director

How does lead get into my tap water?

Under typical circumstances, lead will dissolve into the water. The concentration of lead in drinking water can vary greatly, depending on the corrosiveness of the water, the type and age of the plumbing materials and the length of time that the water stands in the pipes. The highest levels of lead occur when very corrosive water stands motionless in lead or lead soldered pipe for long periods of time.

How do I know if my tap water is contaminated with lead?

The only way to know whether your tap water contains lead is to have it tested. You cannot see, taste, or smell lead in drinking water. There are different sampling methods for sampling lead in drinking water. To determine your household risk, it is recommended to take a first draw sample.

Does lead in my tap water cause health effects?

Lead can cause damage to the brain, red blood cells and kidneys. The greatest risk is to young children and pregnant women. Amounts of lead that won't hurt adults can slow down normal mental and physical development of growing bodies. Lead in water can be a special problem for infants, whose diets may be mostly liquids, such as baby formulas or concentrated juices mixed with water. Smaller bodies can absorb lead more rapidly than bigger ones. A child's mental and physical growth can be permanently harmed by too much lead. Risk will vary, depending on the individual, the circumstances, and the amount of water consumed.

What can I do to reduce or eliminate lead in my tap water?

Flush your cold-water pipes by running the water for approximately 5 minutes. The longer the water has been sitting in the pipes, the more lead it may contain. You can fill containers for later use, after the flushing process. *Use only water from the cold-water tap for drinking, cooking, and especially for* making baby formula. Hot water is likely to contain higher levels because it dissolves more lead.
You may choose to install a water filter that is NSF-certified for lead removal. If a water filter is installed, replace filters at least as often as recommended by the manufacturer.

Buy a lead-free faucet. The legal definition of "lead-free" still allows brass faucets to contain up to 8 percent lead. However, faucets marked with "NSF 61/9" and/or "California Proposition 65" meet stricter limits. Regularly clean particles from faucet aerators.

Is it safe to take a bath or shower, if my water has high lead levels?

Yes. Bathing and showering should be safe for you and your children, even if the water contains lead over EPA's action level. Human skin does not absorb lead in water. This information applies to most situations and to a large majority of the population, but individual circumstances may vary. Some situations, such as cases involving highly corrosive water, may require additional recommendations or more stringent actions.

Who do I contact for more information?

The local water authority is always your first source for testing and identifying lead contamination in your tap water. You can visit the City of Flint Website at www.cityofflint.com or contact the Flint Water Department at 810-787-6537.

Dave...

See below...from TPs developed last spring. Calling you momentarily..

The City has received significant financial assistance through both grant programs and bond restructuring initiatives administered by the MI Department of Treasury. This financial assistance has allowed the City to replace miles of aged pipeline and begin efforts to install a specialized filter at the Water Treatment Plant.

In February, Flint was awarded a total of $2 million through two *Financially Distressed Cities, Villages, and Townships Grants*. $1.1 million was awarded for water system enhancements through improved waste management while $900,000 was awarded for water system enhancements through leak detection and pipe assessments.

On April 8th, the City announced that it was moving forward with a series of actions to ensure the continued safety of Flint drinking water and address issues of discoloration and odor. The most significant step will be the installation of a Granulated Active Charcoal filter (GAC) at the Water Treatment Plant. The GAC filter will help block or eliminate the formation of TTHM during the filtration process. The $1.5 million project (targeted for completion by mid-July) will be funded with proceeds from the state-approved restructuring of Flint's Drinking Water Revolving Fund loans ($2.24 million).

The City is undertaking a number of other improvements to the water system including the acceleration of valve replacements, targeted hydrant flushing, the replacement of two miles of water main in a critical area of the city, and acceleration of the project to automate plant operations.

Subject: Free Press Request for Comment from DE on Flint Water-RESPONSE FOR REVIEW

Importance: High

Sara, Dave, Terry,

Mr. Earley got a request from Freep's Nancy Kaffer for a comment on the Flint Water situation. She is doing a column for Sunday's paper that is a follow up to the paper's story that ran yesterday on Flint water quality.

She asked for his comment, she said, since water system decisions were made under his term as EM.

The following is the statement that he would like to send to Nancy. Her deadline is, as always, rapidly approaching. Apologies for short turn-around time.

"The decision for Flint to join the Karegnondi Water Authority and to leave the Detroit Water and Sewerage System was made under the authority of previous Flint Emergency Managers prior to my appointment in October 2013. And, while the deal to sell the pipeline had been in process as I assumed my position, it was finalized after thorough review and with the health and well-being of all citizens -- from small children to senior citizens and everyone in between -- taken into consideration. An even bigger concern that we must all be paying attention to is the aging infrastructure and water distribution systems in all of our urban communities -- many of which are more than 100 years old. Where the focus should be placed moving forward is not on what we do in the interim between now and when the new system is complete, but what is done in the long-term to replace the crumbling water distribution system that exits throughout Flint and Genesee County. Iam confident that the city of Flint is following the standards of the State of Michigan's Department of Environmental Quality for safe water compliance, as it should."

Please let me know if you have any issues/edits.

Thanks,

Michelle

OK, with your edit. I will send to Sara and Terry

The decision for Flint to join the Karegnondi Water Authority and to leave the Detroit Water and Sewerage System was made under the authority of previous Flint Emergency Managers prior to my appointment in October 2013. And, while the deal to sell the pipeline had been in process as I assumed my position, it was finalized after thorough review and with the health and well-being of all citizens -- from small children to senior citizens and everyone in between -- taken into consideration. An even bigger concern that we must all be paying attention to is the aging infrastructure and water distribution systems in all of our urban communities -- many of which are more than 100 years old. Where the focus should be placed moving forward is not on what we do in the interim between now and when the new system is complete, but what is done in the long-term to replace the crumbling water distribution system that exits throughout Flint and Genesee County. Iam confident that the city of Flint is following the standards of the State of Michigan's Department of Environmental Quality for safe water compliance, as it should.

Please note this Flint Journal story, at which time a decision about where the city would get its water during the Karegnondi construction had not yet been made. Darnell was EM. Do you need me to send more? There is no shortage of documentation.

City shells out $4 million on plant since Detroit ended water pact

LENGTH: 482 words

URL: http://www.mlive.com/news/flint/index.ssf/2014/01/flint_spends_4_million_on_wate.html
By Dominic Adams
dadams5@mlive.com
The city of Flint has spent $4 million on its water plant in the eight months since Detroit ended its almost 50-year-old contract for selling water to the city.
An analysis by The Flint Journal/MLive.com found the city has spent more than $3.8 million on improvements and other work at the water plant since April, according to figures listed in resolutions posted on the city's website.
Efforts have included paying consultants for studies, paying a public water fee to the Michigan Department of Environmental Quality and spending more than $1.5 million to upgrade the switchgear for the power distribution to the facility's motor control center.
The Detroit Water and Sewerage Department director said it will stop selling water to Flint and Genesee County on April 17.

The move came after Flint agreed to purchase raw water from Lake Huron as a member of the Karegnondi Water Authority. The water will be pumped to Flint and treated at its plant.

"Some of the money that we're spending are on upgrades that are necessary for when we start getting our water from the KWA," City Council President Scott Kincaid said. "There are guidelines as far as the quality of our water."

In July, city officials said they still were trying to figure out whether they would renegotiate a temporary deal with Detroit while the KWA pipeline was built.

Kincaid said a decision about where the city will get its water during the KWA construction hasn't been finalized.

"I'm not concerned that Detroit is going to cut our water off," he said. "We're preparing our water treatment facility for the KWA, and when we do that, of course, that will give us the capability to take water from the Flint River."

Here's a look at five expenditures associated with upgrades at the water plant:

Electrical Distribution Upgrades: Emergency Manager Darnell Earley approved paying McNaughton-McKay Electric $1.51 million to upgrade electrical switchgear at the water plant Nov. 18. On the same day, Earley signed off on paying McNaughton-McKay $505,000 to replace switchgear at the city's Cedar Street pumping station.

New pump: McNaughton-McKay also received $349,710 from the city to replace an obsolete pump at pump station No. 4, according to the resolution.

Design work and construction engineering to use the Flint River: The city spent $1.13 million with Flint-based Lockwood, Andrews & Newnam Inc. on design work, construction engineering and regulatory submissions that will allow the plant to be used to convert raw water from Lake Huron delivered via the KWA pipeline into drinkable water in Flint.

Cleaning up lime: The city paid Young's Environmental Cleanup $6,154.61 to remove inactive lime at the water plant, according to a resolution from Aug. 13.

Please advise asap. I will send the 2 additional letters under separate emails.

"Nancy...

I am sending you a series of documents (3) to help frame the situation regarding Flint water.

The first is a letter Flint officials sent to DWSD in June of 2012, requesting that Flint be allowed to "blend" DWSD water with Flint river water to keep costs for Flint reasonable and affordable. Please note that DWSD was increasing rates by 5-times.

The second letter (Sept. 2012) from the city of Flint to the DWSD again requests written approval for the city to "blend" water, as requested in the June letter.

These letters were sent to DWSD as Flint officials, including the Mayor and city council, considered a move to KWA vs staying with DWSD.

In April of 2013, Flint received the 3rd document, from DWSD, terminating the contract with Flint effective April 17, 2014.

It is my understanding that the City of Flint then worked over the next number of months to upgrade its water facilities, test those facilities for quality and efficient water supply to residents and to gain Department of Environmental Quality approval to use Flint River water until KWA was operational in the spring of 2016.

Given DWSD's decision to terminate Flint's contract...and given that the Flint River had long been the city's backup source, Flint was faced with limited options."

April 17, 2013

RECEIVED
CITY OF FLINT
CITY CLERK'S OFFICE
2013 APR 18 AM 11:33

Via Certified Mail and Electronic Delivery

Ms. Inez M. Brown
City Clerk
City of Flint
2nd Floor, City Hall
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Ms. Brown:

Regarding: Termination of Contract for the Provision of Water Services by the City of Detroit, Water and Sewerage Department

On December 20, 1965, the City of Detroit, through its Board of Water Commissioners, (DWSD) and the City of Flint, Michigan (Flint) entered into a contract for the provision of DWSD treated water to Flint and the distribution by flint of that water to other Genesee County communities. Section 18 of that Agreement[1] provides:

18. The Board [DWSD] shall supply and sell water to the City [Flint] from the water system of the City of Detroit, and the City shall receive and purchase such water in accordance with the terms of this Agreement for an indefinite period of time but at least for a period of thirty-five (35) years from the date hereof. This Agreement may be terminated by either party after expiration of said 35-year period, upon one year's written notice served upon the other party by delivering the same to the Secretary of the Board or to the Clerk of the City as the case may be, or at any time upon mutual consent of both parties.

Please take notice that pursuant to this section, 18, of the above-referenced Agreement, DWSD is terminating this Agreement one year from today's date (April 17, 2014).

Sincerely yours,

Sue F. McCormick
Director

[1] Although the Agreement between DWSD has been subsequently amended, Section 18 remains unchanged and in full effect.

Thanks Terry,

Should we do anything else on this? I think it is misleading for her to say that the decision to go to Flint River water was made under my watch. That was all part of the process already approved by the mayor, council and the state. There was no mechanism nor reason available for me to undo that decision. It made good long-term as well as short term sense.

I would appreciate your thoughts.

I know that I'm a broken record on this one, but I need some specific attention to Flint today. I need you all to reconstruct a timeline of events from the records we have relating to the Flint KWA DWSD controversy as it is becoming unwieldy. Please go back and review the Flint procedures and find the initial decision making process relating to the switchover. The first time I remember it is in 2012 (August I think) when the county started pitching the project at council. Then we instituted Mike Brown as EM and from there on it became to a certain extent our problem. However, if I remember right, this was a Flint idea from the start. Then, if you can trace the financial drivers of the decision to present day it would be important. I think for the most part the explanation you had in the distressed cities reports were helpful...my point being that this was an idea to help the city survive and without drastic changes it wouldn't have, KWA being one of them. We'll take any other ideas that you have.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

DATE: September 28, 2015

TO: Wayne Workman, Deputy State Treasurer

FROM: Eric Cline, Department Manager; Fiscal Responsibility Section

SUBJECT: Flint KWA Timeline

October 31, 2012 – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

November 2012 – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

February 2013 – TYJT issues a final report to Treasury on the comparison between KWA and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

March 2013 – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple offers are provided to the Flint Emergency Manager (EM) Ed Kurtz.

March 26, 2013 – The Flint City Council endorses joining KWA.

April 12, 2013 – KWA issues a press release stating that the State Treasurer has endorsed the City of Flint joining KWA.

April 15, 2013 – DWSD provides a final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

April 16, 2013 – The Flint EM informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

April 17, 2013 – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

June 28, 2013 – Financing Contract between the City of Flint and KWA is approved. Effective September 1, 2013. This document was signed by EM Mike Brown.

February 19, 2014 – The KWA Board of Directors adopts Resolution 2014-01, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

April 17, 2014 – Water service from DWSD officially ends.

April 25, 2014 – Use of Flint River water officially begins in the City of Flint.

Fyi

I was also asked... somewhat related & in terms of the chronology you are working on: i) the City sold that section of pipeline to the County... would that impact an effort to reconnect to DWSD ? ii) confirm when KWA is going to be done. Anyway to pick up the schedule ?

We can cover this when we talk @ 3:00

senjananich@senate.michigan.gov
senatedems.com/ananich

September 28, 2015

State of Michigan
Executive Office of the Governor
P.O. Box 30013
Lansing, MI 48909

Governor Snyder,

Access to safe, affordable drinking water is a basic necessity for every community. It is completely unacceptable that respected scientific experts and our trusted local physicians have verified that the City of Flint's drinking water is dangerous for our citizens, especially our most vulnerable young people.

As a result, I am formally requesting assistance as suggested by the experts on the frontline of this public health crisis. Here are the top priorities we should work together to address:

1. **Swift transfer to a safe source of water until the Karegnondi Water Authority (KWA) project is complete next year.** Your administration has the ability to ensure a financially acceptable and responsible contract between Flint and the Detroit Water and Sewerage Department, particularly in light of the public health implications with the Flint River supply.

2. **Equally urgent is the need for corrosion control as recommended by independent scientific experts.** There are chemical treatment additives that could help reduce this corrosion. I urge you to help the city implement anti-corrosion methods immediately. The current emergency makes the January timeline unacceptable.

3. **Filters and bottled water assistance.** Flint water touches the entire city. Whether it's a person's home, work, school, restaurant or place of worship, access to safe, clean drinking water should not be hindered. Water filters, used in conjunction with corrosion control methods, are necessary to help guard against toxic exposure.

   I have been working with the philanthropic community and private sector to secure donations to acquire filters and water; however, more funds will be necessary to effectively cover the thousands of residents impacted. I would like to formally request emergency funding to help supplement the acquisition of water filters and bottled water. Any and all appropriate state or federal money to help accomplish this feat should be considered.

SENATE MINORITY LEADER
JIM ANANICH

517.373 0142
senjananich@senate.michigan.gov
senatedems.com/ananich

4. **Support for completion of the KWA pipeline.** It is presumed that the upcoming KWA pipeline will solve a number of problems associated with the current sourcing of Flint's water from the Flint River. I am requesting a meeting between representatives from your office, KWA board members and project engineers to discuss any options to expedite the pipeline's construction.

5. **A long-term commitment to addressing outdated infrastructure.** A recent EPA report just outlined the billions of dollars necessary over the next several decades to adequately secure safe water for our entire state. You have the position and opportunity to be a national leader on moving the debate forward on this topic so that we can avoid the type of catastrophe my community is grappling with today.

I look forward to working with you to deliver on these concrete and urgent action items to alleviate the public health crisis facing our residents.

We jeopardize any progress and comeback for our cities and state if we cannot ensure safe, basic necessities for our families or if we cannot come together swiftly to fix an identified, severe threat to the safety of our people.

Sincerely,

Jim Ananich
Senate Democratic Leader
District 27

DRAFT

City of Flint Water System Background

Water Service Land Area 34 square miles
550+ miles of public water mains
250+ miles of water mains 75+ years old
70% of public water mains are unlined cast iron pipe
Service population 99,763
Service connections 32,900
Flint Water System established in 1883
Flint Water Treatment Plant #2 completed in 1954
Connection to Detroit Water and Sewerage Department 1967
Flint Water Treatment Plant #2 rehabilitated 1999 – 2005

City of Flint Timeline

December 2011 – Flint Emergency Financial Manager Appointed by Governor Snyder
April 2013 – Flint rejects DWSD contract and instead joins the Karegnondi Water Authority
April 2013 – DWSD sets termination of Flint water service contract to April 17, 2014
June 2013 – Karegnondi Water Authority groundbreaking
June 2013 – Flint Requests full time use of Flint Water Treatment Plant with Flint River
May 2014 – Flint stops purchasing DWSD. Starts using the City of Flint WTP and Flint River
August 2014 – Flint E.Coli Bacteria violation, Partial System Boil Water Advisory
August 2014 – Disinfection Byproducts, DEQ requests preemptive Operational Evaluation
September 2014 – Flint Total Coliform Bacteria violation, Partial System Boil Water Advisory
November 2014 – Disinfection Byproducts violation begins
January 2015 – 1st 6 month lead and copper sampling completed 100 samples, 90th% = 6 ppb
April 2015 – Flint Financial Emergency Ends
July 2015 – 2nd 6 month lead and copper sampling completed 69 samples, 90th% = 11 ppb
August 2015 – Disinfection Byproducts return to compliance
August 2015 – Flint required by DEQ to recommend and install Optimized Corrosion Control Treatment

January 2016 – Flint plans to have Optimized Corrosion Control Treatment operational
July 2016 – Planned connection to Karegnondi Water Authority (Lake Huron water to Flint WTP)

Subject: DEQ Flint Backgrounder / talking points

Terry, all good and thanks for working these up. Been rebriefed by our staff, so let me throw in some things that are pertinent from that point.

Following the formal approval of Flint into the KWA, DWSD sent Flint a letter saying their contract was thereby terminated (early 2013).
According to our folks, Genesee County has been using DWSD water without a contract since May 2014. But Flint took the letter to imply a water cutoff, and promptly turned to DEQ with a proposal to use the Flint River (their historic backup system).

This proposed shift put the city in the business of water production, where they historically had been in the business of water transmission. DEQ approved the use of the river as a source, based on the treatment plant's past performance as a standby facility and the improvements needed prior to switchover. Several municipalities around the state use surface water supplies (rivers): Blissfield near Monroe, Manistique, and Alma to name a few.

The city completed the upgrades at the water plant the facility and DEQ approved it April 2014.

There were some initial hiccups. Last summer, there were a couple of 'boil water' notices issued. One for a water test that showed e. coli, one for a break in the water main.

The challenge to using the Flint River as a source is that the condition of the water is variable and changes with season and weather. It has substantially more organic matter than deep lake sources like Lake Huron. This organic matter is mobilized by

high water events, and warm weather also can account for more organic material in the water.

The treatment of the organic matter is done with chlorine. One might conclude that the perennial answer is just to use more chlorine to achieve water safety. However, at some point on the continuum, the chlorine and organic matter create TTHM – total trihalomethanes – as a byproduct. When the standard for those is exceeded over several consecutive quarters of testing, the supply is required by law to issue public notice and submit an approved plan for addressing the situation.

You'll note that this regulatory approach means TTHM testing is done quarterly. That means people who use the system are exposed to TTHM for several months before the public notice is required. It's because TTHM is a chronic health threat. Over the long term (measured in decades), continued exposure can contribute to some known health problems. Put in context, the EPA (who established the standard and the rule) estimates this rule prevents an estimated 280 bladder cancer cases each year ... out of more than 330 million people who use public water supplies around the country.

It's not nothing. State and federal law requires quarterly testing for TTHM and that the public be informed of it when the annual average of four quarters' worth of consecutive testing shows TTHM levels exceeding 80 parts per billion. Flint's results managed to exceed the annual average in three quarters, and they must develop a plan to address it. But it's not like an eminent threat to public health. Unlike an e. Coli or even total coliform bacteria maximum contaminant level, which require immediate public notification and response and are part of daily / hourly testing of public water supplies, TTHMs pose a public health concern with chronic, long-term exposure.

It's clear the nature of the threat was communicated poorly. It's also clear that folks in Flint are concerned about other aspects of their water – taste, smell and color being among the top complaints.

The Safe Drinking Water Act requires public water supplies be tested for more than 90 regulated contaminants, including microbial contaminants. The act, and the program here in Michigan, work to ensure that water is <u>safe</u> to drink. The act does not regulate aesthetic values of water. Here are some factors affecting the aesthetics of water in Flint.

1. It's the Flint River. The water supplied by DWSD historically came from Lake Huron. It's softer. With hard water, you get a different flavor and feel. It's why General Motors suspended use of Flint Water – it was rusting their parts. Also, there's the 'organics' factor (discussed previously).

2. The system is old. Flint has more than 500 miles of water pipes. More than half of those pipe miles are more than 75 years old. Much of it is cast iron. Hard water

can react with cast iron and exacerbates the rusty factor, which creates that brown water that angry residents were holding up in jugs for the media cameras last week. Valve failure has also been a key challenge. The system has an estimated 7,500+ valves. When they stick open or stick shut, it affects the hydraulics of the system and increase areas of stagnation. The city has a backlog of valves that need to be addressed. They've done half a dozen or so since November.

3. Flint is old. Many of the homes served by the system are old. Brown water complaints may also be attributable to cast iron pipes in customers' service connection to the city lines. The DEQ has been encouraging people with water coloration concerns to contact the city and see whether it is the service line or the City's line causing the issue. Again, discoloration is not an indicator of water quality or water safety, but we recognize that nobody likes it.

In summary, the City of Flint has tremendous need to address its water delivery system. We are not aware that they have any Capital Improvement funds for preventative maintenance in place, much less line replacement project monies that will require hundreds of millions. The City was approved for a Revolving Fund loan in 2008 or 2009. As a Distressed Community, they qualified for flexible terms and 2 percent interest rate Revolving Fund Loan. After they were notified they were approved for the loan, they declined it. Previous SRF loans from the state to Flint bear an outstanding balance of $20.7 million today.

The DEQ continues working with the city to address the TTHM issue. They can take interim steps – from scrubbing the insides of transmission lines to carefully monitoring the hydraulic challenges in their system – to address customers' aesthetic concerns. Their TTHM numbers already are showing dramatic improvement; the November testing showed only one of seven sample points exceeding the standard. The key now is that the standard is an average of three quarters' worth of results. It will be some time before they are officially "not in violation." However, depending on weather in 2015, it's not unforeseeable that we will be having this conversation again by next Christmas.

The key to the conversation is that TTHM is not a top health concern. That's key because residents need to understand TTHM in context, and it is key because it appears the mayor has seized on the public panic (sparked, frankly, by their poor communication of the violation notice) to ask the state for loan forgiveness and more money for their infrastructure improvement.

Another key thing to remember is that once the city connects to the new KWA system in 2016, this issue will fade in the rearview.

Until then, our top messages:

1. The DEQ Drinking Water program works with communities around the state to ensure that municipalities provide customers with clean, safe drinking water.
2. Municipal water supplies are tested rigorously and regularly for more than 90 regulated contaminants, including microbial contaminants that pose an immediate public health concern.
3. Flint's exceedance of the TTHM standard should reassure residents that the testing program is effective.
4. TTHM is not an immediate health threat. It is a chronic concern, one that can be problematic over the course of several decades of exposure. The public was notified because the law requires the city to make public notification, so that everyone can make informed decisions. This is particularly true for people with infants or those with compromised immune systems.
5. The DEQ is working with the City to address the situation. Recent tests show the TTHM numbers dropping rapidly. The department will continue working with the city in the months ahead, and residents should feel confident that their water is safe to drink unless the DEQ or City notifies them otherwise.
6. The discoloration and odor issues some Flint residents are experiencing are separate issues from the TTHM issue. TTHM is odorless, colorless and measured in parts per billion.
7. Flint water customers who have questions or concerns about their water should first contact the city to get answers and help. They also can contact the Michigan DEQ at ********** (web or phone address?)

Flint City Council approves resolution to buy water from Karegnondi, state approval still needed

FLINT, MI – Flint is one step closer to getting its water from Lake Huron as part of the Karegnondi Water Authority.

The vote, **approved 7-1 at the Flint City Council meeting Monday, March 25**, may have set in motion the end to Flint paying to get its water from Detroit.

Under the proposal, Flint would get 16 million gallons per day of raw water from Lake Huron, pipe it to Flint for treatment and then sell it to customers throughout the city. Another 2 million gallons per day would come from the Flint River and will be treated in Flint.

Mayor Dayne Walling said the Department of Environmental Quality must approve Flint's getting 2 million gallons per day from the Flint River.

Tuesday's meeting followed weeks of discussions and special meetings surrounding the resolution.

"We got there," Councilman Joshua Freeman said. "That's the important thing."

There were more than 50 people at Monday's meeting.

"Going with Karegnondi is the best decision. We have no opinion on the economics of the decision," said Rebecca Fedewa, Flint River Watershed Coalition executive director. "If we start drawing water out of the Flint River, we are at risk of having to start releasing water from our reservoirs."

Genesee County Drain Commissioner Jeff Wright said the decision must still be approved by a county water and waste advisory board. The KWA board will then be reconvened for final approval.

Wright said construction could start in May.

State treasury officials still must approve the city council's move because Flint has an emergency financial manager. All expenditures over $50,000 must be approved.

Genesee County Drain Commissioner Jeff Wright has said that Flint would pay roughly $6.4 million annually for water service if it joined the pipeline – a nearly $4 million savings on what it pays Detroit for water.

Walling previously said the **city would save $19 million over eight years** by getting water from the KWA.

"It's a historic night in the City of Flint," Walling said. "The savings will be less with the capacity level approved by city council because there will be increased treatment cost for the river water."

He said the DEQ told the city it needed to get 18 million gallons per day or there would have to be additional work done at Flint's water plant.

Flint's water plant and the Flint River is currently the backup for Flint and Genesee County, however, the plant only operates four times per year.

Councilman Bryant Nolden was the lone dissenting vote.

"It was a protest vote," Nolden said. "I knew they had enough votes. I just feel like the Flint River is our best option."

Karengnondi is the regional water authority that includes Genesee, Lapeer and Sanilac counties and the cities of Flint and Lapeer.

Massive Karegnondi water project moving forward after state OKs pipeline tap into Lake Huron

Print

Jeff Wright

GENESEE COUNTY, MI -- The state has approved a critical permit that allows the **Karegnondi Water Authority** to tap into Lake Huron with a 1.5-mile underground intake.

But water authority officials are still waiting for Flint to decide if it will be part of it.

Construction on the intake -- estimated to cost $27 million -- might mark the no-turning-back point for the massive project, and county Drain Commissioner Jeff Wright said other developments make it necessary Flint to make a final decision on its involvement in the next few months.

As control of Flint has shifted from mayors and city councils to emergency managers, the city has never committed to buying a minimum volume of water from the KWA.

"The only question at this point really is whether Flint is going to be a partner," said Wright, who has met with emergency financial manager Ed Kurtz and wants to resolve the question **before Kurtz leaves** his position -- something likely to happen soon after the November election.
"I'd say we have a couple of months here," Wright said of Flint's deadline. He described Kurtz as positive about the city's potential involvement but said, "There's still some questions Flint is working on with Detroit and Lansing."

Kurtz said he can't predict what will happen.

"We're looking at all our options," Kurtz said Friday.
County Commissioner Ted Henry, D-Clayton Twp., said regardless of the city's participation, the pipeline can be built by the remaining partners: Genesee, Sanilac and Lapeer counties and the city of Lapeer.

"The answer is yes," Henry said. "It will be a little different but it can go,"

The drain commissioner said construction of the pipeline intake, which has already been designed, is expected to start this year, after the job is put out for bids and borrowing is authorized by the county Board of Commissioners.

Building the intake will be specialized work, part of which must be done from a barge, and will require building tunnels below the sand bottom of the lake and laying an 84-inch pipe below the surface of the water.

In addition to the state Department of Environmental Quality permit to build the intake, the KWA also needs approval from the U.S. Army Corp of Engineers, Wright said.

A 45-day public comment period on the intake permit has passed and county officials said they expect the permit to be approved within two weeks.

Among other recent developments in the pipeline project:

- The Genesee County Water and Waste Advisory Committee, made up of elected and appointed city, township and village officials, has voted unanimously to set a date for accepting public bids to build the intake.
- The same committee has approved negotiating a contract with Wade Trim to act as program manager for the pipeline project once all necessary permits have been received.
- The county has revised its estimate on the cost of the intake portion of the pipeline from $40 million to $27 million.

Wright said his office is ready to negotiate a contract for Wade Trim to oversee the pipeline work, and said he expects six or seven engineering and surveying companies to assist in getting the job done.

County officials count those jobs among the 1,000 that they say will be created by building the pipeline.

"I want to use local (people) wherever possible and keep the money here," Wright said.

The drain commissioner said the selection of Wade Trim is important to the city of Flint because it signals the start of engineering, which includes decisions about the size of pumps, motors and pipes that will be used to build the pipeline.

Flint officials have options, including the use of Flint River water, or continuing to purchase water from the city of Detroit.

Wright said the only choice for the rest of the county is build the pipeline or sign a 30-year contract with Detroit.

A KWA study claims that continuing to buy water from Detroit will cost the region $2.1 billion during the next 25 years. By building a pipeline, that cost would be $1.9 billion over the same period, the KWA Web site says.

After the initial 25-year period, the cost of water would be less than 25 percent of the projected cost of water form Detroit, according to KWA.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

Flint Water Timeline (09-28-15)

June 26, 2012 – Letter from Flint EM Mike Brown to DWSD for permission to begin blending Flint River water with treated water from DWSD. The letter indicates that the DEQ is supporting this option and its implementation would save the City between $2M and $3M annually.

September 20, 2012 – Letter from Flint EM Ed Kurtz to DWSD requesting written permission to implement the blending option. Approval is requested by October 1, 2012.

October 31, 2012 – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

November 2012 – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

November 6, 2012 – Letter from Flint Emergency Manager Ed Kurtz to State Treasurer Dillon that a proposal from DWSD is expected but that the initial assessment is that switching to KWA is in the best interest of the City of Flint.

February 2013 – TYJT issues a final report to Treasury on the comparison between Karegnondi Water Authority (KWA) and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

March 2013 – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple options are provided to the Flint Emergency Manager (EM) Ed Kurtz.

March 26, 2013 – The Flint City Council endorses joining KWA.

April 11, 2013 – State Treasurer Andy Dillon authorizes Flint EM Ed Kurtz, pursuant to Section 12(3) of P.A. 436 of 2012, to enter into a contract with KWA if a final offer from DWSD is either not received for rejected in good faith based upon specific objections.

April 15, 2013 – DWSD provides a best and final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

April 16, 2013 –Flint EM Ed Kurtz informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

April 17, 2013 – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

June 2013 – Groundbreaking for the Karegnondi Water Authority. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

June 28, 2013 – Financing Contract between the City of Flint and KWA is approved. Effective September 1, 2013. This document was signed by EM Mike Brown.

February 19, 2014 – The KWA Board of Directors adopts Resolution 2014-01, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

April 17, 2014 – Water service from DWSD officially ends. The City of Flint also conducts two separate public forums regarding the use of Flint River water, upgrades to the City's water system and the overall cost of the switch to KWA.

April 25, 2014 – City conducts public event marking the transition to the use of Flint River water. DEQ information shows that transition complete by May 2015.

March 3, 2015 – Flint EM Jerry Ambrose provides a memorandum to Deputy State Treasurer Wayne Workman stating that a reconnection to DWSD will cost the City $10.1M/year and that water purchases could be as high as $1M/month.

March 12, 2015 – The City of Flint hires Veolia to conduct an operational evaluation of the City's water system.

Natasha:

As I mentioned on the phone this afternoon, we have been able to review the pleadings and procedural posture of the *Shears* case. Given the work that has been done thus far, I think we can revise our estimates favorably for the City. For your consideration, here is a summary of our revised estimated budget:

1) Motions and appearances before the Circuit Court, prior to trial on damages: $35,000 - $75,000
2) Motions and briefs before the Court of Appeals: $45,000 - $65,000
3) Motion and Briefs before the Supreme Court: $25,000 - $55,000
4) Trial regarding damages before the Circuit Court (excluding experts): $75,000 - $105,000
5) Appeals after trial on

damages: $65,000 - $85,000
Total:
$245,000 - $385,000

Please let me know if you have any questions.

Chris

Subject: RE: Preliminary Budget

Sorry, I forgot to include that. $345 for partners, $305 for associates, $225 for paralegals (depending on the paralegal it can be less). I believe this is consistent with our work on the prior City of Flint litigation.

On Sep 25, 2015 4:54 PM, "Trebilcock, Christopher M." <trebilcock@millercanfield.com> wrote:
Dear Pete and Natasha:

It was a pleasure speaking with you earlier today regarding Miller Canfield's ability to assist you with the *Shears* litigation. We look forward to aggressively defending this matter on your behalf. Per your request, below is a preliminary budget for the various anticipated stages of litigation based on our current understanding of the case:

1) Motions and appearances before the Circuit Court, prior to trial on damages: $55,000 - $135,000
2) Motions and briefs before the Court of Appeals: $65,000 - $95,000
3) Motion and Briefs before the Supreme Court: $35,000 - $55,000
4) Trial regarding damages before the Circuit Court: $100,000 - $175,000 (excluding experts)
5) Appeals after trial on damages: $75,000 - $95,000
Total:
$330,000 - $555,000

Obviously we will do our best to be as efficient as possible. However, it is difficult to be more precise, particularly at the Circuit Court level, because of the Court's unpredictability in adhering

to normal procedural practices. Given the issues and dollars at stake, we do not want to shorthand anything. Also We will be giving this our fullest attention.

Please let me know if you need anything further. I can be reached by email or cell phone at any time.

Regards,

Chris

Governor says he's "working hard" to resolve Flint water problems

Governor Snyder says the state is "working hard" and doing its best to resolve Flint's water issues.

Recent tests have raised alarms about high lead levels in city water — and in some Flint children's blood.

Snyder wouldn't offer specifics about possible action, but he will soon.

"There's actions going on," he said. "But I think we'd rather make sure I can give you a longer list of the comprehensive actions we're taking sometime during the week."

Flint Mayor Dayne Walling said last week the governor should "work harder" to resolve the water issues.

Flint's system has had repeated problems since it switched from Detroit to Flint River water in April 2014.

LT. GOVERNOR

CONTACTS:	FOR IMMEDIATE RELEASE
Sara Wurfel or Dave Murray, Governor's Office 517-335-6397 Terry Stanton, Department of Treasury 517-335-2167	September 29, 2015

Gov. Rick Snyder awards Flint $2 million in Distressed Cities grants for water system infrastructure improvements

Funding to be used for leak detection, waste incinerator replacement

LANSING, Mich. – Gov. Rick Snyder today awarded Flint $2 million in grants for water system infrastructure improvements, part of an overall $8 million plan to help cities through the Financially Distressed Cities, Villages, and Townships Grant Program.

Flint is among six municipalities receiving grants through the program. The city will use the funding to detect leaks in its water lines and replace its Water Pollution Control Facility Incinerator.

"There are opportunities for the state government to assist Flint city leaders as they address issues related to the city's water system," Snyder said. "These grants will help recovering cities improve public services and infrastructure, improving the quality of life for all residents."

The grants to Flint were announced today at the Haskell Community Center by Harvey Hollins, director of the state's Office of Urban Initiatives and Wayne Workman, the state's deputy treasurer. They were joined by Dan Wyant, director of the Michigan Department of Environmental Quality, Flint Emergency Manager Jerry Ambrose, Mayor Dayne Walling, state Senate Minority Leader Jim Ananich, state Reps. Sheldon Neeley and Phil Phelps.

Flint was awarded $900,000 to allow the city to hire a contractor to perform a leak detection survey of the city water lines. The city will receive a map of leak locations and an assessment of leak severity, allowing the city to prioritize leak repair. The project also covers the expense of conducting a water pipe line wall thickness condition assessment on a portion of the city's pipes. The assessment will guide the city's water main replacement program.

The city also was awarded $1.1 million to shut down its current Water Pollution Control Facility incinerator and replace it with new facilities which will allow for the disposal of waste in landfills. The existing facilities are not up to federal Environmental Protection Agency standards.

Municipalities are eligible for the grants of they are experiencing one or more conditions indicative of "probable financial stress," as defined by Public Act 436 of 2012, the Local Financial Stability and Choice Act.

Under the grant program, funding may be used to pay for specific projects, services, or strategies that move a city, village, or township toward financial stability. There was $8 million appropriated for the program with a $2 million cap, per local unit.

Natasha,

I am following up on yesterday's phone call with you.

Angela will contact you to set up a conference call for tomorrow afternoon. Because Wayne is out of town Tom Saxton will participate in the discussion regarding your request. Tom and I would request you, Peter Bade and Howard Croft be on the call.

We have a number of follow-up questions: What is the basis for the estimated $18M cost to temporarily reconnect to the Great Lakes Water Authority? What is the timeline? Why didn't Viola advise the City about the potential for elevated lead levels when using Flint river water? What assurances do you have indicating a temporary reconnection to the Water Authority resolves the elevated lead problem or other system problems? Who are the assurances from? Did the Viola report recommend using Ortho Phosphates to treat the water?

Michigan Gov. Rick Snyder delivers his 2015 State of the State address in this Associated Press file photo *Associated Press file photo*

FLINT, MI -- Gov. Rick Snyder quietly helped deliver **1,500 water filters** to Flint last month -- even as state officials gave assurances that the city's tap water was safe and meeting all regulatory standards.

Dave Murray, a spokesman for Snyder, confirmed that the filters, distributed by the Concerned Pastors for Social Action, came from a "corporate donor that does not wish to be recognized but cares deeply about the community."

The donor "worked with the governor to provide 1,500 faucet filters to be distributed to city homes," Murray said in an email.

The state's involvement in the filter distribution was never publicized and pastors told The Flint Journal-MLive Tuesday, Sept. 29, that they were asked by staffers in the governor's office not to speak about it.

Flint city Councilwoman Jackie Poplar raised the subject during a council committee meeting Monday, Sept. 28, as officials discussed the potential for Flint to reconnect to the Detroit Water and Sewerage Department. Recent testing and studies show lead levels have been rising -- both in water and children's blood.

"Those filters came from the governor," Poplar said. "The governor seems to be the one with the golden key" to make something happen, she said.

Pastors involved with the giveaway of the filters, which were designed to remove total trihalomethanes (TTHM) as well as lead from water, said they accepted the condition that they not discuss the state's role in securing the equipment, said the Rev. Allen Overton.

Overton and the Rev. Alfred Harris said they thought the arrangement was odd, but did not want to jeopardize receiving the water filters, which Flint residents waited in line for and which were given away in just three hours.

"If the water was OK, why would the governor work with someone to provide the filters?" Harris said Tuesday. "I think the state working with the private donor is an admission (that) the people needed some help."

"Our objective was to help the people. (Now) everybody is trying to cover their behinds," Harris said.

Flint took over treatment of its water supply from the city of Detroit in April 2014 and switched its water source from Lake Huron to the Flint River.

In the 17 months since, the city has struggled to keep bacteria out of city water, was found in violation of the Safe Drinking Water Act because of TTHM levels, and last week declared a health advisory after a study showed elevated blood lead levels in children since the transition.

Murray said the governor's office simply "did not want to draw attention to (the state's role in the filter donation), respecting the wishes of the donor."

"Our focus is on helping the people in Flint. We are grateful to the pastors for working with us on this," Murray said in an email.

The Snyder spokesman said Flint water "does meet state and federal safety standards" but said the filters also are a benefit to customers with water quality issues such as discoloration and odor.

"We are talking with other businesses and groups that might be able to expand the (filter) effort," Murray's email says.

Flint Update 9/29

Issues:

- DWSD switch
- Emergency Declaration
- Edwards issue
- Testing protocols

Flint Drinking Water Action Plan

1. **Governor Snyder names Dr. Eden Wells as Flint drinking water Public Health Advisor.**

   Action to date: Dr. Wells has been brought in and is reviewing the Hurley Health information.

2. **All 13 Flint schools water will immediately be tested to ensure that drinking water is safe.** incl Charters + will do Parochs

   Action to date: Phone call with Superintendent and Facilities manager to identify schools. Phone call with Genesee County Public Health, DEQ and Flint schools afternoon of 9/29 to discuss testing protocols and timeline. DEQ has volunteered to pay for testing.
   Checking with MDE on fund availability to replace lead lines if they are identified in the testing.

3. **Advisories will be disseminated recommending citizens flush your cold water pipes, use only water from the cold water tap for drinking, cooking and especially for making baby formula.**

   Action to date: This step has already started to occur.

4. **Convene a safe drinking water "Technical Advisory Committee" to ensure best technology, practices and science is being utilized, including EPA's expertise and assistance from their Office of Research and Development.**

   Action to date: Committee will meet October 7. EPA will have Tom Burke, who heads up EPA's Office of Research and Development, participate on the Committee. Va. Tech Prof will also present possible change in protocol

5. **Implementation of fully optimized corrosion controls in the Flint drinking water system.**

   Action to date: Technical Advisory Committee is meeting October 7 to recommend this. Flint will submit permit application to DEQ October 8. Corrosion control will begin by end of October.

"two paths" Support the mtg of GLWA?

add Jill Wright

6. **Expanded water testing of at risk properties.**

   Action to date: EPA and DEQ have a conference call at 1:45 PM 9/29 to discuss additional testing locations and protocols.

7. **Offer water testing at no cost to Flint residents to assure water is safe.**

   Action to date: City is already offering. DEQ will be discussing cost issues with the City.

8. **Offer bottled water and premixed formula if test results indicate high levels of lead.**

   Action to date: DHHS evaluating.

9. **Accelerate water system improvements to address replacement of lead service lines.**

   Action to date: EPA has indicated that federal Drinking Water Revolving Loan money can be used to replace private service lines. State law needs to be changed to allow this to occur.

10. **Provide filters to residences of Flint.***

    Action to date: Ananich has indicated United Way would supply some. Harvey to follow up with Meijer.

11. **Expedite Completion of KWA.**

    Action to date: DEQ had initial conversation with Drain Commissioner to indicate help in moving any remaining permits.

Next Steps:

Press Conference in Flint - Friday, October 2, 1:30

Participants
Mayor of Flint
Dan Wyant – Michigan Department of Environmental Quality
Nick Lyon – Department of Community Health
Susan Hedman – Region 5 Administrator or EPA
Harvey Hollins – Governor's office
Local Public Health Department

and U.S. Mail

Ms. Natasha L. Henderson, City Administrator
City of Flint
1101 S. Saginaw St.
Flint, Michigan 48502

Dear Ms. Henderson:

Thank you for your inquiry regarding the possibility of reconnecting the City of Flint to the Detroit Water and Sewerage Department's (DWSD) Water Supply system. Director McCormick has asked me to respond to you and provide a brief outline of the basis for that reconnection. However, I want to again emphasize what Ms. McCormick has previously stated to your City Council on this issue: DWSD is willing to sit down and talk with the City of Flint without pre-condition, if that is mutually desirable.

I would be remiss if I did not point out that on June 12, 2015, the City of Detroit and the Great Lakes Water Authority (GLWA) executed a Lease Agreement that provides for the GLWA's operation of the Regional Water Supply System. At present, we are transitioning management of the system from DWSD to the GLWA while certain Conditions Precedent of the Lease Agreement are satisfied. We have made substantial progress towards satisfying these Conditions Precedent with a goal of having GLWA commence full system operations on or before January 1, 2016. I can assure you that, like DWSD, the GLWA is concerned with the challenges Flint's residents have faced in recent months, and will be willing to discuss service to your City.

That said, here is a likely list of issues that would need to be addressed:

1) Rates: In Sue McCormick's January 12, 2015 letter to Flint, she indicated that the rates Flint would pay for the remainder of the then current 2014-2015 Fiscal Year (FY) would be "the same rates Flint was paying as a terminated customer when it left the system but modified to include the 4% increase experienced by all other DWSD wholesale customers in 2014." As we are now in the 2015-16 FY, that offer must be modified to include an additional adjustment similar to that which was received by other customers. In this regard we propose that the rates be adjusted as follows:

a) Starting with the 2013-2014 FY terminated rate; and

b) Adding a 4% adjustment to that rate to account for the 2014-2015 FY increases; and

c) Adding an adjustment equal to the average Suburban Wholesale Charge Adjustment for the current 2015-2016 FY. This rate would remain in place until June 30, 2016, the end of the current 2015-2016 FY.

d) Based upon the above considerations, the resulting rate structure is a fixed monthly rate of $662,100 and a commodity rate of $8.93/Mcf for the current 2015-2016 FY. Please note that this rate structure is designed to be applicable to incremental water sales over and above water sales to the Genesee County Drain Commission. Depending on how water is provided to the combined GCDC/Flint customer, alternative rate structures may be appropriate.

e) Additionally, DWSD recently changed its wholesale customer billing methodology as follows: Flint's calculated share of the FY 2016 Budget is allocated 60% to the Fixed Monthly Charge and 40% to the Commodity Charge, which is consistent with the adopted FY 2015-2016 water wholesale rates

f) In extending this proposal, our assumption is that the service provided is to Flint only and computations are based on data from our previous customer relationship.

g) It is anticipated that under the management of the GLWA, the rates for the 2016-2017 FY will be computed using the same methodology as applied to all other Water Supply System customers.

The proposed rate methodology is intended to ensure that Flint is treated fairly by using the average wholesale customer adjustment in the current Fiscal Year, and the same methodology as all other customers.

2) Term: DWSD understands that Flint's current long-term desire is to receive water service from the KWA. Under these circumstances, Flint would be expected to remain a DWSD customer from the time of reconnection until the time it begins to receive service from KWA. If Flint wishes to consider a longer term relationship with DWSD or GLWA, we would welcome that discussion.

3) Reconnection: As previously indicated by Ms. McCormick in her January 12, 2015, letter, DWSD will not charge an additional fee for Flint to reconnect to the DWSD Water System, and is prepared to immediately take those steps necessary on its end to facilitate a reconnection. Any expenses incurred would be billed at actual cost. Because DWSD lacks sufficient information on the status of the disconnection, we are unable to provide an estimate of those costs at this time. Nonetheless, we will work with you in good faith to develop an expedited plan for reconnection, and to develop a mutually agreed good faith estimate of the costs associated with that plan.

Thank you for raising this issue with us. We hope that this letter addresses the concerns you raised during your recent conversation with Ms. McCormick, and we sincerely appreciate your interest and the opportunity to serve Flint.

Finally, we look forward to the opportunity to meet with you at your earliest convenience to discuss this letter, and how we may best assist Flint in serving its residents' needs. Please contact Ms. McCormick's office at (313) 224-4701 to arrange this meeting.

Best Regards,

William M. Wolfson
Chief Administrative and Compliance Officer/General Counsel, DWSD
Interim General Counsel, GLWA

Flint Weekly Call Notes 09/29/2015 9:00 PM

R. Byrne, E. Cline, R. Widigan, P. Dostine, F. Headen, W. Lamphier, Mayor D. Walling, N. Henderson, Council President J. Freeman

- **Note:** Water advisory's from Genesee County Commissioners, Genesee County Health Department, and the City of Flint are attached.
- **City's Press release on Violence Reduction Network (VRN):** https://www.cityofflint.com/2015/09/28/city-of-flint-selected-to-join-the-department-of-justices-violence-reduction-network/

- **Priorities**:
  - Water: City is looking to CDBG funding to purchase lead filters, Mayors initiative.
    - City has CDBG funding to the tune of $400K, city will start within and use city resources before approaching the Mott Foundation.
    - Working with United Way – they are activity searching for funding.
  - VIEOLIA is finished the contract with the city. City has implemented the recommendations from VIEOLIA.
  - $8.4M outstanding in billing. City cannot keep going on with this issue – state needs to help take some of the responsibility with us.
    - City Admin. argues Flint is a special case with Judge Hayman's order, lead issues, financial issues, etc...
  - Cash on hand: Finance department is estimating how long the city can operate with cash on hand, and what bills are and are not being paid (presentation will be made at the November RTAB meeting).
  - Council is requesting a special meeting on October 21 to have an open discussion regarding water issues. Letters will be sent to 75 individuals, including F. Headen.
    - City Admin. does not agree with the idea and believes it is micromanaging at best.
  - Budget amendments will be presented to Council next week – reduction in revenue for enterprise fund and removing capital improvement projects. Without being able to collect water bills, the city cannot go forward with CIPs.
  - Today is the deadline for the finance department's report required by Judge Hayman's Order.
    - A report was completed and submitted, it was determined not acceptable by attorney Val Washington, the city was then asked to re-submit the report.
    - Will be submitted by 5pm today.

- **KWA**: City Administrator said that they are still on track to hook up June 2016.

- Jeff Wright, Genesee Co. Drain Commissioner is putting together all paperwork, permits, etc. to submit to the state for approval. Trying to stay/get ahead of the project.

- **Water/lead:**
  - The city has issued a lead advisory due to information released from the medical community. Working with the Gen. Co. Health Department as well.
  - Operational standpoint: Working with LAN to tie down a corrosion control plan. Will include adding phosphate to the water, aware of the potential issues with adding phosphate.
  - The city has requested that the state assist the city with possibly re-connecting to DWSD until can connect to KWA.
  - Mayor has spoken with DEQ director, he stated the city's requests are being carefully considered.
    - GOV has met with Congressman Kildee and Senator Ananich.

- **Legal representation for Flint:** City Manager has received additional detail from Miller Canfield and is reviewing it.
  - The City Administrator will send it to Treasury today.
  - Should have engagement by end of week if council works with administration.

- **Crime Rate:** City was named 3rd most violent city in America.
  - City will work to get out in front of it and address the issue.
  - Chief is at a conference by the Violence Reduction Network (VRN) – City will be able to receive additional help from DEA, etc...

- **October RTAB:** City council meeting will be approving a OPRA tax abatements on Oct. 12 and if approved would like to bring it forward to the Oct 14 RTAB meeting. Former Perani Arena (Dort Federal Credit Union Event Center).

> Thanks for the follow-up call. We have been able to review the pleadings and procedural posture of the *Shears* case more closely. Given the work that has been done thus far, I think we can

revise our estimates favorably for the City. For your consideration, here is a summary of our revised estimated budget:

1) Motions and appearances before the Circuit Court, prior to trial on damages: $35,000 - $75,000

2) Motions and briefs before the Court of Appeals: $45,000 - $65,000

3) Motion and Briefs before the Supreme Court: $25,000 - $55,000

4) Trial regarding damages before the Circuit Court (excluding experts): $75,000 - $105,000

5) Appeals after trial on damages: $65,000 - $85,000

Total: $245,000 - $385,000

Also, for your internal discussion, here is the additional detail on our immediate pleadings we would file in the next week:

1) We will file an appearance in *Shears* in GCCC on Wednesday (or upon engagement)

2) We will file a motion for 30-day adjournment in GCCC on Wednesday (or upon engagement)

3) If our Motion for a 30-day adjournment is denied, which is likely, we will immediately file the next day:

a) Supplemental brief on Motion to Change Venue based on fact that GCCC is member of the class

b) Motion to Recuse Hayman based on status of Chief Judge and that GCCC is member for the class.

4) File a Motion to Dissolve the TRO in GCCC based on federal court finding on Kincaid TRO (if supported after closer review of pleadings). This would be an Emergency Motion filed as soon as possible.

5) File a Motion to Consolidate Case with Kincaid in GCCC. Since the Kincaid Plaintiffs are also member of the class the more technically correct way to go is dismiss the Kincaid case, but the real point would be to keep the action before Judge Yiuule which apparently can't happen if he is conflicted (e.g., if he is a member of the class as a Flint resident). We would recommend filing this Motion in the next 7 days.

6) We will also look at the Kincaid Ct. App. decision and see if we can supplement the motion to dismiss with any law of the case argument (i.e., the pooling issue, the Emergency Manager's decision. We will also consider whether there are other arguments for dismissal by comparing the Kincaid state and federal pleadings and the Shear pleadings. We are still trying to figure out how Val got to file a second suit on the same claims in the same court; seems to go against every principle of judicial economy.

Once these are resolved, we will likely file Expedited Motions for Application to Leave to the Court of Appeals. This is especially true for the Motion to Consolidate. But would be for all the

rulings – we might want to shoot for peremptory reversal. This would be filed as soon as Judge Hayman issues his rulings on the various motions above.

I think this is largely the work that we will need to do in the next 30-45 days. We may want to meet with witnesses and spend time with decision makers, especially if we get adjournment.

Let me know if you need anything else.

Thanks.

Sorry, I forgot to include that. $345 for partners, $305 for associates, $225 for paralegals (depending on the paralegal it can be less). I believe this is consistent with our work on the prior City of Flint litigation.

On Sep 25, 2015 4:54 PM, "Trebilcock, Christopher M." <trebilcock@millercanfield.com> wrote:

Dear Pete and Natasha:

It was a pleasure speaking with you earlier today regarding Miller Canfield's ability to assist you with the *Shears* litigation. We look forward to aggressively defending this matter on your behalf. Per your request, below is a preliminary budget for the various anticipated stages of litigation based on our current understanding of the case:

1) Motions and appearances before the Circuit Court, prior to trial on damages: $55,000 - $135,000

2) Motions and briefs before the Court of Appeals: $65,000 - $95,000

3) Motion and Briefs before the Supreme Court: $35,000 - $55,000

4) Trial regarding damages before the Circuit Court: $100,000 - $175,000 (excluding experts)

5) Appeals after trial on damages: $75,000 - $95,000

Total: $330,000 - $555,000

Obviously we will do our best to be as efficient as possible. However, it is difficult to be more precise, particularly at the Circuit Court level, because of the Court's unpredictability in adhering to normal procedural practices. Given the issues and dollars at stake, we do not want to shorthand anything. Also We will be giving this our fullest attention.

Please let me know if you need anything further. I can be reached by email or cell phone at any time.

Regards,

Chris

Flint mayor to state: Approve plan "as fast as humanly possible" to help keep lead out of water

BY LINDSEY SMITH · 16 HOURS AGO
Share Twitter Facebook Google+ Email

Flint leaders issued a water advisory last week after health officials raised concerns about lead levels in children's blood tests.

Credit Steve Carmody / Michigan Radio

Flint hasn't been using any corrosion-control method since it switched from Detroit's water system in April 2014. Corrosion-control treatment helps keep lead out of drinking water. Since the switch, more kids are showing up with elevated levels of lead in their blood.

Flint Mayor Dayne Walling says he wants to put corrosion-control treatment back in place, but he needs state approval first. The state says it's going to take a little while to implement.

"One of my requests to (Michigan's) Department of Environmental Quality director is that (approval) be accelerated as fast as humanly possible," Walling said.

"Whatever decisions are coming next, we need that corrosion control in the water treatment process that we have now," he said.

Walling was a guest today on Stateside with Cynthia Canty.

Listen

Listen

Listening...

0:00

16.01

Listen to Flint Mayor Dayne Walling on Stateside.

Flint spokesman Jason Lorenz says MDEQ made the recommendation to put corrosion-control treatment into the water supply last month. But, he says, it needs MDEQ Director Dan Wyant's official approval.

There's been some debate over whether Flint should have had corrosion control in place the entire time. MDEQ officials have argued to the U.S. Environmental Protection Agency that corrosion control is not technically required yet, because the Flint River is a new water source.

"You have to have to do a full year of studying" the water chemistry as it behaves across the system before implementing corrosion control, MDEQ spokesman Brad Wurfel said. He says that's the only way to know what corrosion-control treatment to use.

That period of study was to be completed by June 30.

As the DEQ reads federal regulations, Flint technically has up to two years after the study to install treatment. But Wurfel says an announcement on the state's decision will come by the end of this week, and "the prescription for optimizing the system for corrosion control is going to be done in Flint by the end of this year."

"If I handed you a bag of chocolate chips and a sack of flour and said 'make cookies,' you'd still need a recipe right? They need to get the results from that testing to understand how much of what to put in the (new water source)," Wurfel said.

"We have a plan to expedite this with the city ... and folks can take some comfort in that," Wurfel said.

It's not clear yet how much the treatment will cost, but Wurfel says "this won't break the bank." A state-appointed emergency manager made the interim switch to the Flint River to save the city money.

Related: Have you missed parts of the Flint water story? Here's a quick rundown.

The U.S. Environmental Protection Agency has not yet answered this question: Was Flint required to have some form of corrosion-control treatment the whole time?

At face value, the EPA rules are clear, all water systems that serve more than 50,000 people must have some kind of corrosion control.

But when you switch water sources, there is apparently some room for interpretation.

In approving updates to this federal regulation in 2000, the EPA noted that "water systems need to make treatment changes, on occasion, to react to changing circumstances."

In these cases, the rule does not "prevent a state from approving treatment changes," but it's not entirely clear if the state can approve having zero corrosion-control treatment.

One key section of the rule change reads:

"One commenter requested that EPA clarify in the rule language that (large water) systems are not required to have (corrosion-control treatment) physically present. EPA disagrees that this is appropriate."

"For large water systems, (the federal rule) does not eliminate the need to have any (corrosion-control treatment) in place, unless the water system can demonstrate to the satisfaction of the State that such treatment will have no effect on reducing the levels of lead and copper at the tap ... EPA expects few, if any, large water systems can make this demonstration without (corrosion-control treatment)."

Flint residents can be sure about one thing: This period of study and approval won't happen the next time the city switches water sources.

The city expects to stop using the Flint River when a new regional water system in Genesee County is completed, slated for the end of 2016. According the MDEQ's Brad Wurfel, that's because they won't need to study the nature of the new water source – Lake Huron. Because Detroit's water system uses water from Lake Huron, Flint will be able to use the same corrosion-control treatment it did when it was hooked up to Detroit's system.

Subject: RE: FDCVT - Flint

Tom,

Below are the answers to your questions. If you have any further questions, let us know. Thank you.

Do we know whether Flint has yet applied for any of these (FDCVT) $s ?
ANSWER: We received an application from the City of Flint on September 17th. The amount requested for the project is $2M (the limit for a local unit) and it is estimated to take $3.1M to complete the entire project. They also indicated that if full funding is not awarded, it is doubtful that they will be able to move forward with the project. The proposed project is:

"The city proposes to hire a qualified contractor to provide property assessing services. Specifically, this contractor will create digital property sketches of all improved properties, evaluate existing property conditions and improvements by providing real property data verification, and conduct a comprehensive appraisal valuation study. This process will take place over a period of 3 years, from June 1, 2016 to July 1, 2019."

Do we know if they have plans to?
ANSWER: Since they asked for the entire $2M for the above project, we would assume they are not submitting any further projects, however we are not sure.

And have they asked (& rec'd) $s from this program previously i.e., last year, and If so, what did they use those $s for?

ANSWER: Treasury awarded Flint two grants in FY 2015 under the FDCVT program. Treasury has not yet received any reimbursement requests from the City. Therefore, we have not distributed any of the FDCVT grant related funds to the City. The two grants are:

Awarded	Project Name	Brief Description
$1,100,000	Water Pollution Control Incinerator Shutdown	Water system enhancements thr improved waste management
$900,000	Water Main Leak Detection Survey and Condition Assessment	Water system enhancements thr leak detection and pipe assessme

this program previously i.e., last year. [knowing that it hasn't been going that long]. If so, what did they use those $s for.

Finally, if they hadn't applied yet... given the current Flint water situation;
Could they use these grant funds to purchase filters for individual residents for use in their homes ?

If you can get back to me quickly I would appreciate it. Thanks

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

August 19, 2015

FOR IMMEDIATE RELEASE
www.michigan.gov/treasury

Contact: Terry Stanton
(517) 335-2167

$5 million in grants available for local governments facing financial distress

Money for special projects to free up funds for services

Municipalities experiencing financial struggles can apply for a $5 million grant program that can help fund special projects and free up tax dollars for important services.

Applications for the Financially Distressed Cities, Villages, and Townships grant program are now available. Municipalities interested in applying for an award must submit applications to the Department of Treasury by 11:59 p.m. on Thursday, Oct. 15, 2015.

All cities, villages, and townships, experiencing at least one condition of "probable financial distress" as outlined in Public Act 436 of 2012, the Local Financial Stability and Choice Act*, are eligible to apply.

"This program offers critical assistance to municipalities facing significant financial difficulties," Gov. Rick Snyder said. "Grant dollars can help troubled cities, villages, and townships fund projects which, in turn, frees up valuable tax dollars for other critical services that benefit residents and taxpayers in those communities."

Grant funding may be used to pay for specific projects, services, or strategies that move the city, village, or township toward financial stability. Preference will be given to applicants from local units in which:

- A financial emergency has been declared in the past five years;
- An approved Deficit Elimination Plan for the General Fund is currently in place; or,
- Two or more conditions indicating "probable financial distress" currently exist.

For more information about FDCVT grants, including the application for cities, villages, and townships, visit www.michigan.gov/revenuesharing.

*Conditions of "probable financial distress" relating solely to school districts are not included as conditions for FDCVT, as school districts are not eligible.

Subject: Fw: Use of SRF to replace lead service lines

Tom,

Below is the e-mail Dan received from EPA regarding the use of SRF to replace lead service lines. I talked with Sonya Butler and she reached out to Susan and Steve below to obtain the actual cite in the EPA guidelines. I will follow up tomorrow.

John

Subject: Use of SRF to replace lead service lines

Hi Dan –

Here's a quick answer to your question about using SRF to replace lead service lines. Under the federal SRF program, SRF funds can be used to replace lead service lines on both public and private property. (We don't know if Michigan rules allow for the use of SRF funding on private property, but presumably you know whether that's the case.) If you have additional questions, your staff can follow up with Steve Marquardt, Chief of the R5 Water Division State and Tribal Program Section. His number is 312-353-3214.

Please keep me posted on the time for the event later this week.

Thanks,

Susan

Cc: Murray, David (GOV)
Subject: RE: Grant

I don't recall either grant being related to "the existence of lead and copper pipes, and the impact...of Flint River water" (Nancy's words) as neither had surfaced as an issue that I am aware of. Brad?

The grants...which the City submitted applications for (which I do not have access to tonight)...were to be used for exactly what was described in the Gov's release:

$1.1 million for water system enhancement through improved waste management and $900k for system enhancement through leak detection and pipe assessments.

The other $2.24 million you are asking about came from the state-approved (Treasury & DEQ) restructuring of Flint's Drinking Water Revolving Fund loans. The restructuring saved the city the $2.24m...with $1.5m used to pay for the installation of a Granulated Active Charcoal filter (GAC) at the Water Treatment Plant.

Below is a section from the Flint Water TPs distributed in late January-early February 2015.

The City has received significant financial assistance through both grant programs and bond restructuring initiatives administered by the MI Department of Treasury. This financial assistance has allowed the City to replace miles of aged pipeline and begin efforts to install a specialized filter at the Water Treatment Plant.

In February, Flint was awarded a total of $2 million through two Financially Distressed Cities, Villages, and Townships Grants. $1.1 million was awarded for water system enhancements through improved waste management while $900,000 was awarded for water system enhancements through leak detection and pipe assessments.

On April 8th, the City announced that it was moving forward with a series of actions to ensure the continued safety of Flint drinking water and address issues of discoloration and odor. The most significant step will be the installation of a Granulated Active Charcoal filter (GAC) at the Water Treatment Plant. The GAC filter will help block or eliminate the formation of TTHM during the filtration process.

A contract for the filter installation was approved by the State Treasurer with the project targeted for completion by mid-July. The $1.5 million project will be funded with proceeds from the state-approved restructuring of Flint's Drinking Water Revolving Fund loans ($2.24 million).

The City is undertaking a number of other improvements to the water system including the acceleration of valve replacements, targeted hydrant flushing, the replacement of two miles of water main in a critical area of the city, and acceleration of the project to automate plant operations.

Subject: RE: Grant

I'm a little confused about this press release ... it sounds like the majority of that grant is to replace an incinerator, and $900k is create a map of leaks in pipes so that the city can prioritize repair, and provide a pipe thickness assessment that will contribute to the city's water main replacement program ... was any of this directly prompted by the existence of lead and copper pipes, and the impact to those pipes of the more-corrosive Flint River water?

The Quarterly Water Quality Report provides important information about your drinking water. This report includes information about the water source, current drinking water issues, lead information, water filters, 3rd quarter work accomplished, and a water timeline of events. The City of Flint Department of Utilities is dedicated to providing quality drinking water to the residents of the community. The Flint Water Plant operates and maintains a certified drinking water laboratory to assure compliance with all state and federal regulations, and is committed to prompt and thorough notification to the consumers if there is any reason for concern about the quality of the drinking water. Information about your drinking water is available on the City of Flint web page at www.cityofflint.com or by calling the City of Flint Water Plant at **(810) 787-6537**. The Safe Drinking Water Hotline at **(800) 426-4791** is a resource for health related questions and water quality issues. General drinking water information can also be found on the U.S. Environmental Protection Agency (EPA) web site at www.epa.gov/safewater/.

Water Source

The City of Flint began using the Flint River as a water source in May of 2014. After 16 months of treating water from the Flint River, the City became aware that the level of corrosiveness found in Flint River water could result in more lead leaching from service lines and household plumbing. Reports of elevated blood lead levels in children and expert analysis resulted in the City's Technical Advisory Committee making a recommendation to return to the previous source of water while waiting for the KWA to provide water from Lake Huron.

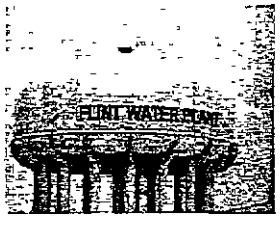
On Friday October 16th, 2015, with the consent of Governor Snyder, the City returned to Detroit as the primary source of drinking water. The decision, along with the Technical Advisory Committee's recommendation followed two consecutive lead and copper test periods that exceeded 5ug/L which calls for additional action. In addition to the switch, the City has submitted a final corrosion control design to the DEQ for comments and approval. The City has requested to use the corrosion control as an additive to treated water it will be required when the city begins treating raw water from the Karegnondi Water Authority which is anticipated to begin in the summer of 2016.

In order to make the transition possible, the City contributed $2 Million dollars, the Mott Foundation contributed $4 Million dollars, and the State of Michigan contributed $ 6 Million dollars.

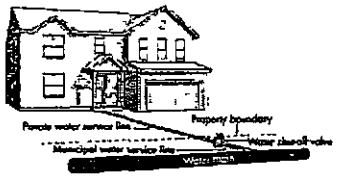
Current Drinking Water Issues & Lead Information

There has been a heightened awareness of lead leaching into drinking water through service lines and household plumbing. The City's Technical Advisory Committee has enlisted the support of EPA lead experts and is working with State of Michigan representatives to increase testing, rebuild public confidence, and implement long-term solutions to lead. It is recommended that everyone get their water tested, obtain a water filter, and check with a plumber to evaluate the type and condition of your household plumbing. The City is currently mapping all of its lead service lines and working to develop a program to get lines changed over time.

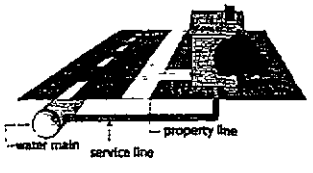
If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. The City of Flint is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 5 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead.



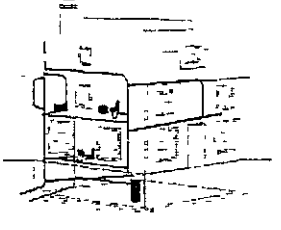
No lead in water leaving the Treatment Plant.



Little or **no lead** in water in the transmission mains.



Lead can leach into water through service lines.



Lead can leach into water through household plumbing.

2015 3rd Quarter Regulated Detected Contaminants – **Flint River as Source**

Inorganic & Organic Chemicals, Metals, and Pesticides – Monitored at treatment plant						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Inorganic Chemicals						
Fluoride	mg/L	4	4	0.84	0.64 – 0.84	No
Nitrate	mg/L	10	10	N.D.	N/A	No
Metals						
Barium	mg/L	2	2	0.02	N/A	No

More than 100 other chemicals were monitored from July through September that were not detected.

The various classification groups of these chemicals include metals, carbamates, herbicides, pesticides, organics, and radiologicals.

Total Organic Carbon, TOC - Monitored at treatment plant			
Regulated Contaminant	Required Monthly % Removal	Minimum Monthly % Removal	Monthly % Removal Ranges
Total Organic Carbon	50	60	60 - 87

Turbidity - Monitored at treatment plant		
Highest Single Measurement (Cannot exceed 1NTU)	Lowest Monthly % of Samples Meeting Turbidity Limit (0.3 NTU in 95% of samples)	Violation
0.18	100 %	No

Disinfectant Residuals – Monitored in the distribution system						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Total Chlorine Residual	mg/L	4.0	4.0	4.0	0.2 – 4.0	No

Microbiological Contaminants - Monitored in the distribution system				
Regulated Contaminant	MCLG	MCL	Highest Number detected (in 1 month)	Violation
Total Coliform bacteria	0	The presence of coliform bacteria in > 5% of monthly samples	1	No
E. coli Bacteria	0	0	0	No

Lead & Copper – Monitored from consumers tap					
Regulated Contaminant	Unit of Measure	MCLG	Action Level AL	Number of samples over AL	Total # of Samples Tested from January - September
Lead	ug/L	0	15	16	189
Copper	mg/L	1.3	1.3	0	189

Disinfection By-Products - Monitored in the distribution system and from treatment plant						
Regulated Contaminant	Unit of Measure	MCLG	MCL	Highest Level Detected	Range of Detection	Violation
Total Trihalomethanes (TTHM)	ug/L	n/a	80	90.3	42.6 – 90.3	N/A*
Haloacetic Acids (HAA)	ug/L	n/a	60	15.0	2.0 – 15.0	N/A*
Bromate	ug/L	10	10	N.D.	N/A	N/A*

*Violation based on locational running annual average for TTHM & HAA5, violation for bromate based on yearly average.

Key to the Detected Contaminant Tables		
Symbol	**Abbreviation for**	**Definition/Explanation**
>	Greater than	
AL	Action Level	The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements which a water system must follow.
HAA5	Haloacetic Acids	HAA5 is the total of bromoacetic, chloroacetic, dibromoacetic, dichoroacetic, and trichloroacetic acids. Compliance is based on the total
LRAA	Locational Running Annual Average	
MCL	Maximum Contaminant Level	The highest level of a contaminant that is allowed in water. MCLs are set as close to the MCLG's as feasible using the best available treatment technology
MCLG	Maximum Contaminant Level Goal	The level of contaminant in drinking water below which there is no known or expected risk to health
mg/L	Milligrams per Liter	A milligram = 1/1000 gram 1 milligram per liter is equal to 1ppm
MRDL	Maximum Residual Disinfectant Level	The highest level of disinfectant allowed in drinking water There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
MRDLG	Maximum Residual Disinfectant Level Goal	The level of a drinking water disinfectant below which there is no known or expected risk to health. MRLDG's do not reflect the benefits of the use of disinfectants to control microbial contaminants
n/a	Not Applicable	
ND	Not Detected	
NTU	Nephelometric Turbidity Units	Measures the cloudiness of water.
pCi/L	Picocuries per Liter	A measure of radioactivity. Picocurie (pCi) means the quantity of radioactive material producing 2.22 nuclear transformations per minute.
ppb	Parts Per Billion (one in one billion)	The ppb is equivalent to micrograms per liter. A microgram = 1/1000 milligram.
ppm	Parts Per Million (one in one million)	The ppm is equivalent to milligrams per liter. A milligram = 1/1000 gram.
RAA	Running Annual Average	
TT	Treatment Technique	A required process intended to reduce the level of a contaminant in drinking water
TTHM	Total Trihalomethanes	Total Trihalomethanes is the sum of chloroform, bromodichloromethane, dibromoochloromethane and bromoform. Compliance is based on total.
ug/L	Micrograms per Liter	A microgram = 1/1,000,000 gram 1 microgram per liter is equal to 1ppb

Water Timeline

A timeline of events, beginning with signing the KWA contract leading up to the current status of switching back to our previous source of water is available on the City website and can be found by visiting the "water" page located under "residents". Please email flintwater@cityofflint.com with your questions or to request a water test or, call the Water Plant at (810)-787-6537.

3rd Quarter Events

July

- Completed the evaluation of over 8000 valves in the system and identified over 2300 that are currently inoperable. The repair of these valves will be budgeted and worked into our multi-year Capital Improvement Plan.

August

- Successfully completed the installation of Granulated Activated Carbon at the water treatment plant which reduced the TTHM level in the water and helped bring the City back into compliance with the Safe Drinking Water Act.

September

- Leak Detection on all 600 miles of the distribution system has started and is over halfway complete. Several dozen leaks have been identified and repairs continue as more leaks are found. This has decreased the amount of water loss existing in the system.
- Construction of a load out facility at our wastewater plant is on target for completion by November and will allow the City to eliminate the use of the incinerator resulting in significant annual savings.
- Over 3500 new water meters have been installed this year creating better accuracy, accountability, and decreasing the number of estimated reads on water & sewer bills.

Contact Information

Water Treatment Plant - (810)-787-6537
Request a water test.
Request a tour of the Plant.
Ask questions about water quality.

Water Service Center - (810)-766-7202
Report a water leak or other system issues.

Water Pollution Control - (810)-766-7210
Inquiries related to wastewater treatment.
Inquiries related to converting methane gas into energy.

Customer Service – (810)-766-7015
Questions about your water & sewer bill.

Water Filters – 211
Questions about water filters.

Water Filters & Testing

Free water filters have been made available to current Flint residents at several locations. The MDHHS and the Genesee County Community Action Resource Department (GCCARD) are providing Free National Sanitation Foundation certified water filters at the following locations.

Residents receiving MDHHS assistance are encouraged to visit either the **125 E. Union St.** or **4809 Clio Rd. MDHHS** office location to obtain a free, certified home water filter. Residents who are not currently enrolled in MDHHS assistance programs should visit the (GCCARD) offices located at **2727 Lippincott** and **601 N. Saginaw** in Flint.

Staff will be onsite at all four locations from **9 a.m. to 4 p.m., Monday through Friday**, to distribute filters and assist residents who have questions about proper installation.

If you want more information on obtaining a water filter, please call 211.

Other suggestions related to water safety and testing:

- We recommend that everyone get their water tested. Call us at (810)-787-6537.
- Contact the Health Department about having your child's blood tested (810)-257-3612.
- It is advisable to have a plumber check your household plumbing.
- Check your faucet aerator (large lead solder particles can occasionally get lodged in here).

Temporary issues to be aware of when Changing Water Sources

Changing water sources back to Detroit will not fully eliminate the lead concerns. The potential for lead to leach off of certain water service lines or household plumbing will continue to exist regardless of the water source. The City is committed to increased testing, better communication, and developing a lead service line map to identify all of the City owned lead service lines.
As the city changes water sources you can expect the following:

- It could take up to three weeks for the switch in water source to reach all taps in the City.
- Over the next several weeks, we will be winterizing our hydrants which will result in discoloration of the water but will also help accelerate the water flowing through the system.
- Lead will continue to leach off of certain service lines and household plumbing.
- Main breaks could result as a change in source water occurs.
- Water could have discoloration or cloudiness, if this happens, run your faucet until the water clears, if this lasts longer than 20 minutes please report it to our water service center at (810)-766-7202.

Subject: FW: Time Sensitive: FAQs Needed

Hello again everyone. We really only need to hear back from DEQ, DHHS and Education on the request below, as those are the primary program areas impacted by Flint. If you work in another department and feel like you have some FAQs that should be included, please feel free to send them to me, but it's primarily DEQ and DHHS and Education that the FAQ request is directed to. Thank you!

Subject: Time Sensitive: FAQs Needed

Good afternoon,

In preparation for announcing additional appropriation measures related to the Flint water emergency in the upcoming FY 17 budget presentation, we'll be preparing a briefing document for legislators. As part of this effort, we want to include a Frequently Asked Questions document. This is where we really need your help.

Your budget staff should have a breakdown of each potential spending item related to your agency (both pending FY 16 supplemental items and FY 17 items). Please work with your budget folks and your communications team to develop any FAQs that you anticipate the public or legislators might ask, related to each item assigned to your agency.

Outreach to the Legislature has already begun, so having these responses back from you quickly is very important. Please send our PIO, Kurt Weiss, and me your FAQ lists no later than 5:00 p.m. this Tuesday, February 2.

Please let me know if you have any questions or concerns, or feel free to have your communications staff touch base with Kurt. I apologize for the short time window, but we really appreciate your help.

150955 Special Order/Mayor Karen Weaver

A special order to allow for remarks by Mayor Karen Weaver.

Presented

150966 Declaration of State of Emergency/Mayor Karen W. Weaver/City of Flint, Michigan/County of Genesee/Michigan Emergency Management Act 390 of 1976

A Declaration of a State of Emergency for the incorporated boundaries of the City of Flint, effective December 14, 2015, by Mayor Karen W. Weaver (In accordance with Michigan Emergency Management Act 390 of 1976) to protect the health, safety and welfare of the citizens of Flint as the City of Flint has experienced a man-made disaster by switching to the use of the Flint River before connecting to the KWA (Karegnondi Water Authority), AND, Flint children have experienced increased blood lead levels since the switch to the Flint River, AND, this damage to children is irreversible and can cause effects to a child's IQ which will result in learning disabilities and the need for special education and mental health services and an increase in the juvenile justice system, AND, this damage will increase the need for foster and adoptive parents as a result of social services needed due to the detrimental effects of the high blood lead levels.

A motion was made by Councilperson Freeman, seconded by Councilperson Kincaid, that this matter be Placed on File. The motion carried by the following vote:

Aye: 8 - Councilperson Mays, Councilperson Poplar, President Nelson, Councilperson Freeman, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

Absent: 1 - Councilperson Davis

150966.1 Extension Authorization/Declaration of State of Emergency/Mayor Karen W. Weaver/City of Flint, Michigan/County of Genesee/Michigan Emergency Management Act 390 of 1976

An authorization to extend for thirty (30) days the Declaration of a State of Emergency for the incorporated boundaries of the City of Flint, effective December 14, 2015, by Mayor Karen W. Weaver (in accordance with Michigan Emergency Management Act 390 of 1976) to protect the health, safety and welfare of the citizens of Flint as the City of Flint has experienced a man-made disaster by switching to the use of the Flint River before connecting to the KWA (Karegnondi Water Authority), AND, Flint children have experienced increased blood lead levels since the switch to the Flint River, AND, this damage to children is irreversible and can cause effects to a child's IQ which will result in learning disabilities and the need for special education and mental health services and an increase in the juvenile justice system, AND, this damage will increase the need for foster and adoptive parents as a result of social services needed due to the detrimental effects of the high blood lead levels. [NOTE: The Flint City Council voted to authorize Mayor Karen W. Weaver to extend for 30 days the State of Emergency in the City of Flint, as declared by Mayor Weaver, to January 14, 2016.]

This item, an Authorization to Extend a Declaration of State of Emergency, was entered into the legislative system as an Official Communication from the Administration. As such, Placed on File was one of only two available actions for voting details. The vote by the City Council was on a motion to authorize Mayor Weaver to extend the Declaration of State of Emergency for thirty (30) days.

A motion was made by Councilperson Mays, seconded by Councilperson Winfrey, that this matter be Placed on File. The motion carried by the following vote:

Aye: 8 - Councilperson Mays, Councilperson Poplar, President Nelson, Councilperson Freeman, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

Absent: 1 - Councilperson Davis

SUMMARY FOR 1-11-2016 CITY COUNCIL AGENDA

150967 Acknowledgment, Approval, Ratification and Confirmation/Transfer of Funds/Sewer Fund/Sewer Claim Settlements

Resolution resolving that the Flint City Council hereby acknowledges, approves, ratifies, and confirms the transfer of $15,700,000.00 from the Sewer Fund to the Self Insurance Fund/Suits and Settlements (677) for the sole purpose of settlement payments previously made, to the extent necessary to resolve the specific requirements of the ongoing litigation matter Larry Shears and Margaret Fralick v. City of Flint, et al, Case No. 14-103476-CZ. [NOTE: Over the course of several years, the City Administration and City Council had numerous executive sessions regarding the settlement of several sewer litigation matters and, ultimately, $15.7 million dollars was transferred from the Sewer Fund to the Self Insurance Fund/Suits and Settlements (677) to facilitate settlement payments to various plaintiffs.] [City Administrator Submission No. CA1332015]

A motion was made by Councilperson Freeman, seconded by Vice President VanBuren, that this matter be Adopted. The motion carried by the following vote:

Aye: 6 - Councilperson Mays, President Nelson, Councilperson Freeman, Councilperson Davis, Councilperson Winfrey and Vice President VanBuren

Absent: 3 - Councilperson Poplar, Councilperson Galloway and Councilperson Kincaid

150968

CA1322015

Presented: 12-18-15

Adopted:

Resolution authorizing a contract between MTA and the City of Flint for police officer services.

BY THE CITY ADMINISTRATOR:

The Mass Transportation Authority, also refer to as MTA, has negotiated an agreement with the City of Flint Police Department for police officer services at their downtown transportation station through June 30, 2018.

A contract shall be authorized and executed between the City of Flint and MTA for police services through June 30, 2018, becoming effective as of the date of execution of said agreement. Budgeted amounts would be as follows: $68,282.55 – FY16, $127,597.81 – FY17, and $131,372.71 – FY18 for an aggregate cost of $327,253.07. Funding for said services will come from accounts; 101-315.100-702.000, 101-315.100-719.100, 101-315.100-719.150, 101-315.100-719.200, 101-301.200-863.900 and 101-315.100-677.000.

THEREFORE BE IT RESOLVED, That the appropriate City Officials, Upon City Council's approval, are hereby authorized to enter into a contract with Mass Transportation Authority for police services, in the amount of $68,282.55 for FY16, $127,597.81 for FY17, and $131,372.71 for FY18 for a total aggregate amount of $327,253.07

BE IT FURTHER RESOLVED, That the appropriate City Officials, Upon City Council's approval, are hereby authorized to recognize said revenues in FY16 and the aforementioned amounts for following budget years FY17, and FY18.

APPROVED AS TO FORM:

Peter M. Bade, Chief Legal Officer

Natasha L. Henderson, City Administrator

Kerry L. Nelson, Council President

APPROVED AS TO FINANCE:

Jody N. Lundquist, Chief Finance Officer

Staff Recommendation: Recommend Approval

Staff Person: James W. Tolbert, Chief of Police

MASS TRANSPORTATION AUTHORITY

CONTRACT AGREEMENT

This Agreement made this 19th day of November, 2015, between the Mass Transportation Authority, herein called the "Authority" and/or "Buyer" and The City of Flint herein called the "Contractor" and/or "Seller".

In consideration of the mutual promises and agreements hereinafter set forth, the parties agree to undertake, carry out and perform this Contract in accordance with the terms and conditions as set forth herein, and as follows:

1. The Contract Documents:
   The Contract Documents consist of this Agreement, the engagement letter between the City of Flint Police Department and the Mass Transportation Authority dated September 11, 2015, the cost proposal provided by the Flint Police Department, and the Mass Transportation Authority's Board Resolution #15-63. These form the Contract and all are fully a part of the Contract as if attached to this Agreement or reported herein. If there is a conflict between the contract and any of the referenced documents, the order of precedence shall be the order as listed in this paragraph.

2. The Performance:
   The Contractor shall furnish pursuant to the terms and conditions of this Contract labor and material as listed in the attached Letter of Engagement between the City of Flint Police Department and the Mass Transportation Authority. The parties acknowledge that the services provided pursuant to this Agreement are subordinate to the emergency needs of the City that may occur from time to time. The FPD Chief of Police, or his/her designee, shall have the sole discretion to determine if an emergency exists. Should the FPD Chief of Police, or his/her designee, determine that an emergency exists, services provided pursuant to this Agreement shall cease immediately until the conclusion of such emergency.

3. Time of Commencement and Completion:
   The Contractor shall perform under this Contract from December 6, 2015 until June 30, 2018 at a total contract cost of $327,253.07 based on one uniformed Officer working 40 hours per week from the hours of 10:00AM to 6:00PM Monday through Friday with a City of Flint patrol vehicle at the MTA Downtown Transportation Center, 615 Harrison Street. This contract may be extended to a later date only by mutual consent of the parties.

4. Independent Contractor:
   The Contractor is employed by the Authority as an independent Contractor and has and retains the right to exercise full control and supervision of the services including compliance with Social Security, withholding and all other regulations governing such matters. The contractor agrees to indemnify, defend and save harmless the Authority, its agents, officers and members of the Board of the Mass Transportation Authority against any and all loss, damage or expense which the Authority may suffer by reason of liability imposed by law upon the Authority or Contractor for damages because of bodily injury, including death at any time resulting there from sustained by any person or persons, or on account of damage to property are due to the fault of the Contractor, its sub-contractors or their employees, agents or any other person under the direct or indirect Contract of the Contractor.

5. Contractor's Financial Responsibilities:
Any costs due to the fault of the Contractor, sub-contractor, or anyone directly employed by them either for making good of defective work, disposal of material wrongly supplied, making good of damage to property, or excess costs from material or labor, or otherwise shall be borne by this Contractor, and the Authority may withhold money due the Contractor to cover any such costs.

6. Assignment:
The Contractor shall not assign or transfer any interest in this Agreement or delegate its performance of duties except on prior written approval of the Authority, which approval shall not be unreasonably withheld. Consent to assign, transfer or delegate any interest or performance of this Contract shall not be construed to relieve the Contractor of any responsibility for the fulfillment of this Agreement.

7. Payments:
The Authority shall pay the Contractor for the performance of work in current funds per price stated in the cost proposal provided by the City of Flint Police Department upon completion and acceptance by the Mass Transportation Authority. The Contractor shall invoice each item against an Authority Purchase Order and all invoices for the calendar month shall be payable by the fifteenth day of the following month.

No payment will be made to the Contractor for material not delivered upon the Authority premises, unless otherwise agreed to in writing by the Authority.

Neither payment made under the Contract or used by the Authority of the labor and material provided shall be evidence of performance of the Contract, either in whole or in part, nor shall such payment, final or otherwise, be construed to relieve the Contractor from its obligation to make good any defects arising or discovered in its performance within the period of its guarantee, nor shall the Authority be deemed to waive any specific obligation the contractor may assume as to its performance.

8. Testing:
At any time if it is determined by an independent testing firm analysis that equipment delivered and installed is substandard, the Authority reserves the right to discontinue shipments and shall not be obligated to pay for such substandard shipment already delivered. The Contractor agrees to pay all costs incurred by the Authority to provide test on equipment delivered and installed found not meeting the specification.

9. Termination for Convenience:
The Authority may terminate this contract, in whole or in part, at any time by written notice to the Contractor when it is in the Authority's best interest. The Contractor shall be paid its costs, including contract close-out costs, and profit on work performed up to the time of termination. The Contractor shall promptly submit its termination claim to the Authority to be paid the Contractor. If the Contractor has any property in its possession belonging to the Authority, the Contractor will account for the same, and dispose of it in the manner the Authority directs.

10. Termination for Default:
The Authority reserves the right to cancel all or any part of the work covered by this Agreement and/or Purchase Order, if Seller does not make deliveries as specified in the schedules or so fails to make progress as to endanger performance of the work and does not correct such failure after receipt of written notice from the Authority specifying such failure, or if Seller breaches any of the terms hereof, including the warrants of Seller. Should cancellation be made for cause, the

Authority reserves the right to purchase elsewhere and if additional costs are incurred, such costs are to be at the Seller's expense. The Seller shall be liable for any other damages suffered by the Authority as a result of any breach by the Seller in the performance of this Agreement.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be executed by their respective duly authorized representatives, as of the day first above written.

ADOPTED: _____

RESOLUTION AUTHORIZING APPROPRIATE CITY OF FLINT OFFICIALS TO AMEND EME3412014 AND ACCEPT A GRANT INCREASE IN THE AMOUNT OF $280,114.00 FROM MDOT FOR RECONSTRUCTION OF STEWART AVENUE AND ANDREW STREET RESULTING IN A GRANT AWARD IN THE AMOUNT OF $2,591,182.00

BY THE CITY ADMINISTRATOR:

On June 25, 2014, the Emergency Manager approved resolution EME3412014 authorizing the City of Flint to accept a grant in the amount of $2,311,068.00 for the reconstruction of Stewart Avenue (Dort Highway to James P. Cole Boulevard) and Andrew Street (Stewart Avenue to Wager Avenue) through a grant from the State of Michigan's Department of Transportation's (MDOT) Economic Development Fund Category A funding.

In an effort to offset an anticipated increase in project costs, MDOT awarded additional TEDF grant funds in the amount of $280,114.00. The Department of Public Works requests authorization to accept the additional MDOT grant and to do all things necessary to comply with the terms of the grant. Implementation of the grant will be performed by the MDOT Davison Transportation Service Center.

IT IS RESOLVED, that appropriate City of Flint officials are authorized to do all things necessary to accept a grant increase of $280,114.00, resulting in a cumulative grant award of $2,591,182.00 for the Category A funding from MDOT, to comply with the terms of the funding award, and perform any necessary revenue and expenditure appropriations for MDOT Job No. 124371.

RESOLUTION STAFF REVIEW

DATE: January 11, 2016

Agenda Item Title: RESOLUTION AUTHORIZING APPROPRIATE CITY OF FLINT OFFICIALS TO AMEND EME3412014 AND ACCEPT A GRANT INCREASE IN THE AMOUNT OF $280,114.00 FROM MDOT FOR RECONSTRUCTION OF STEWART AVENUE AND ANDREW STREET RESULTING IN A GRANT AWARD IN THE AMOUNT OF $2,591,182.00

Prepared By: Shawanda Roebuck for Kay Muhammad

Background/Summary of Proposed Action: EME3412014, adopted June 25, 2014, accepted a grant from MDOT in the amount of $2,311,068.00 from Michigan's Transportation Economic Development Fund (TEDF) Category A funding, which is restricted for transportation needs that are critical to eligible economic development projects. The American Spiralweld Pipe Company, LLC was awarded the contract to supply steel pipe for the Karegnondi Water Authority (KWA) pipeline. The company has built a new manufacturing facility on the site of the former Buick City complex, however the access roads to the site are in extremely poor condition.

In an effort to offset anticipated increased project costs, MDOT increased the grant award amount resulting in a cumulative grant award of $2,591,182.00. Department of Public Works is requesting that the new cumulative grant award amount of $2,591,182.00 be accepted so that execution of the much-needed project can begin.

Financial Implications: No cost to the City, this grant is meant to cover the entire cost of the construction and engineering costs (preliminary and construction). The 20% match requirement has been waived.

Budgeted Expenditure? Yes ☐ No ☒ **Please explain if no:**

Grant Summary

Date: 01/09/2019

Grant Type: TED - Category A
Grant Number: 1166

Section	Applicant	Description (rpt)	Current Grant Amount	Total Match	Grant Percentage	Status	Grant Year
01	Flint	Stewart Ave. and Andrew St. reconstruction	$2,591,182.00	$231.13	99.99%	Approved	2014
Total:			**$2,591,182.00**	**$231.13**	**99.99%**		

Section **Grant Section Description**

01 This project includes the reconstruction of two streets in the city of Flint: Stewart Avenue from Dort Highway to James P. Cole Boulevard and Andrew Street from Stewart Avenue to Wager Avenue. These improvements will improve the structural capacity for the proposed commercial traffic due to the new American SpiralWeld Pipe Co. facility. Work elements include a full reconstruction of the existing roadways with drainage improvements. Total costs for this project are $2,591,413. A portion of these funds will be used for preliminary and construction engineering.

Project Summary

American Cast Iron Pipe Company is a manufacturer of pipes, valves, pumps, castings, and hydrants for the waterworks and oil and gas industries. One of its subsidiaries, American SpiralWeld Pipe Company, was recently awarded the contract to supply spiral-welded steel pipe for the Karegnondi Water Authority (KWA) pipeline. The 67-mile KWA project will extend from Lake Huron to Flint and supply 60 million gallons of water a day to Sanilac, Lapeer, and Genesee counties. American SpiralWeld is building a new 180,000 square foot manufacturing plant on the site of the old Buick City complex in Flint. Buick City, which closed operations in 1999, was the largest General Motors complex in the world. The entire 450 acre site is currently vacant. American SpiralWeld Pipe Company is the first new company to break ground at the site since it was vacated.
Access to the American SpiralWeld Pipe Company plant will come primarily from I-475 via Stewart Avenue and Andrew Street. The heavy industrial traffic along this route has left these two roadways in poor condition. The increase in traffic generated by American SpiralWeld will accelerate this deterioration. To ensure continued access to the plant, the city of Flint will reconstruct Stewart Avenue from Dort Highway to James P. Cole Boulevard and reconstruct Andrew Street from Stewart Avenue to Wager Avenue. The increased structural capacity will extend the life span of the roadway and accommodate the increase in employee and commercial traffic.

ADOPTED: _____

RESOLUTION AUTHORIZING APPROPRIATE CITY OF FLINT OFFICIALS TO ENTER INTO MDOT CONTRACT No. 15-5514, Job No. 124371A, STEWART AVENUE (DORT HIGHWAY TO JAMES P. COLE BLVD) AND ANDREW STREET (STEWART AVE TO WAGER AVENUE) PROJECT USING THE MICHIGAN TRANSPORTATION ECONOMIC DEVELOPMENT FUND (TEDF) GRANT AWARD

BY THE CITY ADMINISTRATOR:

On June 2015 EM No. EME3412014 authorized proper City of Flint officials to accept a grant from MDOT for the reconstruction of Stewart Avenue and Andrew Street in the amount of $2,311,068.00 through Michigan's Transportation Economic Development Fund (TEDF) Category A funding. Category A funding is restricted for transportation needs that are critical to eligible economic development projects. The American Spiralweld Pipe Company, LLC was awarded the contract to supply steel pipe for the Karegnondi Water Authority (KWA) pipeline. The company has built a new manufacturing facility on the site of the former Buick City complex, however the access roads to the site are in extremely poor condition. Increased industrial traffic in the area generated by American Spiralweld will accelerate road deterioration of the local roads in the Stewart Avenue and Andrew Street area.

Road reconstruction of Stewart Avenue (Dort Highway to James P. Cole Boulevard) and Andrew Street (Stewart Avenue to Wager Avenue) will increase the structural capacity, extend the life span of the roadway, and accommodate the increase in residential and commercial traffic.

The grant was revised and The City of Flint was awarded the TEDF grant in the amount of $2,591,182.00 for the reconstruction of Stewart Avenue (Dort Highway to James P. Cole Boulevard) and Andrew Street (Stewart Avenue to Wager Avenue). Grant funds, which will be retained by MDOT, are expected to cover all costs of the project. Department of Public Works is requesting authorization to enter into MDOT contract No.15-5514 for the purpose of fixing the rights and obligations of the City and MDOT in agreeing to the construction improvements and performance of the project work.

IT IS RESOLVED, that the appropriate City of Flint officials are authorized to do all things necessary to enter into MDOT contract No. 15-5514, accept and utilize TEDF grant funds totaling $2,591,182.00 to fund MDOT contract No. 15-5514, and comply with all terms of the contract.

RESOLUTION TO TSP ENVIRONMENTAL FOR REMOVAL OF SEVEN (7) UNDERGROUND STORAGE TANKS

BY THE CITY ADMINISTRATOR

RESOLUTION

The Finance Department, Purchasing and Supplies Division, solicited a bid for the removal of seven (7) underground storage tanks and TSP Environmental, 2500 Capitol, Redford, MI was the lowest bidder to submit a bid; and

On September 29, 2015, the Mayor approved for the Proper City Officials to enter into a contract with TSP Environmental for said tank removal project in an amount not to exceed $59,889.00; and

The Purchasing and Supplies Division is requesting the issuance of change order #1 to said contract in an amount not to exceed $20,097.04 in order to pay for unanticipated work that was discovered upon unearthing the work site. Funding will come from the following account: 591-545.300-801.000; and

IT IS RESOLVED, that the Mayor and City Administrator do all things necessary to enter into change order #1 to the contract with TSP Environmental in order to pay for unanticipated work that was discovered upon unearthing the work site in an amount not to exceed $20,097.04 for a revised contractual amount of $79,986.04. RESOLUTION STAFF REVIEW

January 20, 2016

Agenda Item Title: TSP Environmental

Submitted By: Purchasing Div. & Water Plant

Background/Summary of Proposed Action:
In November 2014, the City's underground storage tanks were inspected. As part of the inspection, it was discovered that the City had to maintain a number of items in order for tanks to be in compliance. In doing a review, it was determined that the tanks would be removed. The Purchasing Division solicited bids to have said work done, and TSP Environmental was the lowest bidder. The initial contract was approved for an amount not to exceed $59,889.00 and the vendor began unearthing the tanks at the Water Plant. Upon excavation, it was discovered that a tank that the City thought would be 250 gallons subsequently was 20,000 gallons. With the additional size of the tank and the additional amount of back fill needed to cover the hole, the City is requesting a change order in the amount of $20,097.04. This change order will also pay for the hauling and disposing of dirt that had been exposed to some of the product contained in the tanks.

Financial Implications:

RESOLUTION APPROVING THE TRANSFER OF OBSOLETE PROPERTY REHABILITATION EXEMPTION CERTIFICATE FOR THE CAPITOL THEATRE

BY THE CITY ADMINISTRATOR:

The City awarded an OPRA certificate for the Capitol Theatre located at 140 E. Second Street, Flint, MI. The purpose of this resolution is to request the transfer of said certificate from the current building owner, Capitol Theatre Building, LLC to the Friends of the Capitol Theatre, LLC (FOTCT); and

FOTCT is a subsidiary of the non-profit Uptown Reinvestment Corporation (URC) and will be the owner of the building. The Flint Cultural Center Corporation (FCCC), through The Whiting, has agreed to a partnership with URC. URC will spearhead the development and restoration of the building and FCCC/The Whiting will operate and handle programing in the venue once activated; and

Final due diligence and investigation are ongoing, but the approximately $30 million project is expected to begin construction in late spring or early summer of 2016, and take 12 to 15 months to complete.

IT IS RESOLVED that City officials are authorized to transfer the Obsolete Property Rehabilitation Exemption Certificate from Capitol Theatre Building, LLC to Friends of the Capitol Theatre, LLC.

RESOLUTIONS - MAY BE REFERRED FROM COMMITTEE-OF-THE-WHOLE

150989 CO#1/Contract/TSP Environmental/Removal/Seven (7) Underground Storage Tanks

Resolution resolving that the Mayor and city Administrator do all things necessary to enter into change order #1 to the contract with TSP Environmental in order to pay for unanticipated work that was discovered upon unearthing the work site, in an amount NOT-TO-EXCEED $20,097.04, for a revised contractual amount of $79,986.04, as requested by the Water Plant [Water Fund Acct. No. 591-545.300-801.000]. [NOTE: Initial contract resolution was not received by the Council office.] [City Administrator Submission No. CA1362016.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150990 Transfer/Obsolete Property Rehabilitation Exemption Certificate/Friends of the Capitol Theatre (FOTCT), LLC

Resolution resolving that city officials are authorized to transfer the Obsolete Property Rehabilitation Exemption Certificate from Capitol Theatre Building, LLC (Jerusalem Capitol Theatre Building, L.L.C.) to Friends of the Capitol Theatre, LLC., as requested by the Department of Community and Economic Development (DCED). [NOTE: FOTCT is a subsidiary of the non-profit Uptown Reinvestment Corp. (URC), which will spearhead the development and restoration of the building. The Flint Cultural Center and The Whiting will operate and handle programming.] [City Administrator Submission No. CA1372016.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

ADD-ON RESOLUTIONS

150992 CO#1/Increase/2015-16 Annual Action Plan of the Consolidated Plan/Contract/Genesee County Land Bank

Resolution resolving that the appropriate City Officials are hereby authorized to do all things necessary to execute Change Order #1 and increase the Genesee County Land Bank Contract #15-054 by $400,000.00, for a new total contract amount NOT-TO-EXCEED $1,000,000.00, as requested by the Department of

Community and Economic Development (DCED). [NOTE: Genesee County Land Bank received Community Development Block Grant (CDBG) funds for a residential and commercial demolition program. The change order is to fund the demolition of the Glen Acres apartment complex.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150993 Adoption/FY2017-FY2021 Vision, Mission, and Goals/City of Flint Strategic Plan

Resolution resolving that the City of Flint FY2017-FY2021 Vision, Mission, and Goals of the Strategic Plan are hereby approved as set forth in the attached document. [NOTE: The Mayor and City Council, working with the City Administrator and city staff, have created the City of Flint FY2017-FY2021 Vision, Mission, and Goals of the Strategic Plan, which is attached.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

150994 Establishment/Safe Water, Safe Home Campaign Fund/Community Foundation of Greater Flint

Resolution resolving that the City of Flint hereby requests the Community Foundation of Greater Flint to create a Safe Water, Safe Home Campaign Fund to receive gifts intended for the maintenance and restoration of the City of Flint's water distribution infrastructure as it relates to the provision of safe, clean water for Flint water customers. [City Administrator Submission No. CA1402016.]

This Matter was ADOPTED BY THE MASTER RESOLUTION on the Consent Agenda.

Passed The Consent Agenda

A motion was made by Councilperson Kincaid, seconded by Councilperson Poplar, including all the preceding items marked as having been adopted on a Consent Agenda. The motion carried by the following vote:

Aye: 8 - Councilperson Poplar, President Nelson, Councilperson Fields, Councilperson Davis, Councilperson Winfrey, Councilperson Galloway, Vice President VanBuren and Councilperson Kincaid

Absent: 1 - Councilperson Mays

ADJOURNMENT

This regular City Council meeting was adjourned at 9:08 p.m.

Dave-

I will work up a draft response and share w you for thoughts etc.

Begin forwarded message:

> **From:** Ryan Felton <ryanfelton13@gmail.com>
> **Date:** February 1, 2016 at 12:12:46 PM EST
> **To:** Terry Stanton <stantont@michigan.gov>
> **Cc:** "Murray, David (GOV)" <MurrayD1@michigan.gov>
> **Subject: Questions for story**
>
> Hi Terry and David,
>
> I'm working on a story about the negotiations between Flint and Detroit in 2013 and 2014. I had some questions for the both of you:
>
> -- According to a letter sent in February 2014 by DWSD to Flint's EM, the utility "to date" had received no official confirmation on Flint's plans for a water source, despite months of negotiations. This has been explained to me as an attempt to confirm what Flint actually planned to do after its 1965 contract with DWSD expired in April 2014 - and to either to strike a short-term deal until the KWA was online, or strike a new long-term deal with Detroit. As it was explained to me, DWSD was essentially still "in the dark" about the city's plans at this point.
>
> The governor's timeline says Flint made the decision to use the river in June 2013. Can you explain what that means, and how that decision was made? Was that decision ever officially conveyed to DWSD? Why or why not?
>
> -- Despite the commitment of Flint and Genesee County to use a new system, negotiations were clearly still ongoing until a final letter was sent by Darnell Earley in March 2014 to DWSD, saying the city's plan was to use the river. Discussions over regionalizing DWSD were ongoing at the time. Do you have any comment on why DWSD was "left in the dark" about Flint and Genesee's plan going forward, even though it represented a substantial customer base for the system?
>
> -- Emails released this week indicate DWSD offered a nearly 50% discount to Flint in April 2014 to stay with Detroit. That deal was ultimately rejected by Flint's emergency manager. As you've explained to me previously, Treasury was aware of the negotiations. Did this deal ever come across then-Treasurer Dillon's desk? If so, why was it rejected?

And the decision to use the KWA was painted as a cost-cutting measure. If DWSD's estimates of $800m in savings over 30 years is accurate, is that still an accurate description?

I appreciate your time and look forward to your response.

Best,

Ryan Felton

Credit Challenges Tied To The Flint Water Crisis Run Deep For Michigan

The water crisis in Flint, Mich has presented serious humanitarian concerns, with the greatest social and economic costs borne by Flint residents, and the repercussions will likely affect the region for years. At the state level, political costs for Michigan have been greater than financial costs at this point. However, we could see financial pressures on the state deepen as answers to the financing of infrastructure replacement and social services, coupled with potential legal settlements, unfold. Thus, for now, it is too early to determine the magnitude of the Flint water crisis' credit implications for the state. We do not expect that the solution to the water crisis will play out in fiscal 2016-2017 budgets alone, and we anticipate that the economic and social costs, on top of the financial responsibility, will unfold over a long time.

In response to the unfolding crisis, Gov. Rick Snyder declared a state of emergency on Jan. 5 and directed the National Guard to assist with water and filter distribution. Michigan has also approved $28 million in emergency assistance to Flint. The funds will assist with the purchase of bottled water, water filters, treatment for children with high blood lead levels, work being done by the Michigan National Guard, and plumbing replacements among other items. In October 2015, the legislature approved $9.35 million to help Flint reconnect to the Detroit water system and to finance bottled water. Relative to Michigan's fiscal 2016 general fund budget of $9.87 billion, the financial costs have so far been minimal. The Senate Fiscal Agency reported that as of December 2015, general fund collections were down $214.9 million compared with levels based on May 2015 estimates, with the largest declines in sales taxes. If state revenues continue to decline compared with budgeted expectations, additional costs related to Flint could become a bigger challenge.

Overview

- So far, the costs to the state from the Flint water crisis have been minimal.
- The crisis could contribute to a reversal of the state's recent efforts to rebuild its reserves.
- The situation in Flint is emblematic of the state's broader economic challenges.

We anticipate that the governor will include further assistance for Flint when he releases his fiscal 2017 budget proposal on Feb. 10, although the ultimate costs of the Flint water crisis are still unknown. Cost estimates to replace Flint's water infrastructure alone have ranged between $700 million to $1.5 billion. Genessee County has guaranteed $220 million of Karegnondi Water Authority bonds, and given the current debt obligations, coupled with a 40% poverty rate for the city of Flint, issuance of substantial additional debt would be a large burden on residents. Given the local tax base limitations, coupled with the fact that the drinking water was contaminated with lead starting when the city was under the control of a state-appointed emergency manager, we expect that there will be a state role in financing the cost of fixing the city's water infrastructure. On top of waterline replacement costs, Flint is facing rising health and social service needs tied to the lead contamination that will likely persist for years, and political pressure for the state to contribute to these costs is mounting. Various class action lawsuits have been filed alleging that the state is

responsible in part for the water crisis, and related legal costs to the state are uncertain. Federal financial support thus far has been limited, and we expect that the state and local governments will be responsible for financing the majority of the costs. Currently, the U.S. Senate is considering legislation that would provide up to $400 million in emergency federal funding, but with the caveat that it must be matched by the state.

The Flint water crisis could contribute to a reversal of the state's recent measures to build reserves. To add to recent assistance for Flint, mid-fiscal 2016 shortfalls or help to additional distressed local credits, such as Wayne County or Detroit Public Schools, could cause the state to draw down its balances. On Jan. 28, the Detroit Federation of Teachers filed a lawsuit not only asking the district to repair existing building code violations, but also asking the court to remove the district's state appointed emergency manager. As a result, we could see more pressure on the state to provide additional aid to the district. The governor must address other challenges in the fiscal 2017 budget, such as general aid increases for schools and measures to improve the state's pension funding.

Business closures and population losses will likely have considerable economic effects on Flint and the region. Spillover from the crisis could affect the area's general economic reputation including that of the surrounding local governments. While it's difficult to quantify the financial impacts, the reputational damage with negative economic implications to other communities in Genessee county could also persist for some time. As developments of this type arise, Standard & Poor's will continue to monitor any potential impact to the credit quality of these surrounding governments.

The water crisis in Flint is not on its own likely to determine statewide economic performance, but it is emblematic of Michigan's broader economic challenges. In cities once dominated by manufacturing, there is a longer-term trend of shrinking employment opportunity and declining populations. For Flint, the recent water crisis only exacerbates this existing pattern. Many of these municipalities, however, even if they do not confront the type of immediate crisis that Flint does, face legacy costs not easily supported by their currently contracting economic bases. The fiscal crises unfolding among some of Michigan's local governments illustrate how toxic—from both a credit and humanitarian perspective—the combination of persistent economic weakness, financial mismanagement, and infrastructure neglect can be. It also illuminates that short-term solutions to communities' fiscal stresses can have unintended long-term costs.

We have determined, based solely on the developments described herein, that no rating actions are currently warranted. Only a rating committee may determine a rating action and, as these developments were not viewed as material to the ratings, neither they nor this report were reviewed by a rating committee.

February 1, 2016

The Honorable Governor Rick Snyder
P.O. Box 30013
Lansing, Michigan 48909

Dear Governor Snyder:

Thank you for the opportunity to serve the Flint community as a member of the Receivership Transition Advisory Board (RTAB). It is with regret that I am writing to inform you of my decision to resign from the Board effective immediately.

After considerable thought, I have decided that my work commitments and obligations during this crucial period in Flint's history are too great for me to be able to fulfill the requirements of my position on the RTAB.

If I can be of any assistance or service in the future, please do not hesitate to contact me.

Looking Forward,

Beverly Walker-Griffea, Ph.D.

Flint Water Daily Update
Updated Feb. 1

Current Issues Talking Points

Governor and DEQ stress importance of home water testing

- The health and safety of Flint residents remains a top priority. It is essential that all Flint residents have the water in their homes tested as soon as possible.
- While water filters will eliminate lead in most homes, those with levels above 150 parts per billion will need to take extra precaution.
- If levels are above 150 ppb, residents should not drink water from the filtered faucet and use bottled water only.
- DEQ and DHHS will visit homes found to have lead levels over 150 ppb for additional testing.
- To date, less than one percent of Flint homes have been identified as having lead levels of this amount. Results showing lower levels indicate residents should continue following established protocols.
- Pregnant and nursing mothers and young children should continue to drink bottled water as a precaution.
- Free water testing kits are available at Fire Stations 1, 3, 5, 6, and 8. Water Samples should be returned to the fire stations for testing.
- Anyone who is unable to get to a Fire Station to pick up a free testing kit should call United Way 2-1-1 for assistance.

Federal denial of WIC expansion for Flint children

- On Saturday, the federal government denied the Governor's request to use supplemental nutrition funding for Flint children up to 10 years of age who may have been exposed to high lead levels in the water.
- The governor has continually stated that the Flint water issue is the result of government failure at all levels. All levels of government should be committed to supporting Flint's families along their road to recovery.

- It is understood that WIC funding is generally meant for children five years old and younger, however this disaster calls for a waiver of this rule. Expanded nutritional support for children under 10 is essential to their long-term well-being.
- The Governor is urging the federal government to re-evaluate their denial of this funding.
- The state has provided more than $28 million for a short-term solution in Flint, but additional funding and collaboration is necessary to implement a successful long-term solution.

The only funding that we have specific to Flint is the funding that is provided to OFR. That would be the funding they are using for vendor services. We also could use FIT funding potentially if the Flint schools are also a part of the problem. The funding for that is overseen by Brian Carpenter for OFR and by Phil Trapp for FIT spending.

The only Flint specific funding that we ever got was in FY 15 for City of Flint Police and Fire Safety Grant. We got a one-time $1.1 million grant for them. They were supposed to use the funding to hire new fire fighters and police offices. I do not believe that they actually hired additional staff but used this funding for existing staffing costs. In FY 16 we have nothing specific to it.

Hi Cindy...sorry you aren't feeling well.

Yesterday, I noted that per Kurt Weiss (my counterpart at SBO), they needed only Flint-related talking points from DEQ, MDE, and DHHS.

That said, of course, there are always caveats...

If there is something specifically "Flint-related" in Treasury's budget...can I get the amount...what it's for...and which area of Treasury is responsible for it? If we do not have anything specifically Treasury-related...then I believe we can stand down...for now.

Terry I have added Julie Walsh and Kat Kratz to this e-mail. Unfortunately I am at home not feeling well. I am sorry but even after reading what Scott said I am not clear what we are doing FAQ's on. Is it our role in the Flint water issue or something else? I am not sure what to look at. If this is about any assistance that we have provided to Flint Brian Carpenter might be able to provide more detail. I know we had a special approp for them for public safety but I just want to make sure we are looking at what we are being asked to do. If you would reply all on this so that Julie and Kat can also see your response that would be great. I am going to try and get some sleep so I won't be on e-mail all day. Thanks

Subject: Time Sensitive: FAQs Needed

Good afternoon,

In preparation for announcing additional appropriation measures related to the Flint water emergency in the upcoming FY 17 budget presentation, we'll be preparing a briefing document for legislators. As part of this effort, we want to include a Frequently Asked Questions document. This is where we really need your help.

Your budget staff should have a breakdown of each potential spending item related to your agency (both pending FY 16 supplemental items and FY 17 items). Please work with your budget folks and your communications team to develop any FAQs that you anticipate the public or legislators might ask, related to each item assigned to your agency.

Outreach to the Legislature has already begun, so having these responses back from you quickly is very important. Please send our PIO, Kurt Weiss, and me your FAQ lists no later than 5:00 p.m. this Tuesday, February 2.

Please let me know if you have any questions or concerns, or feel free to have your communications staff touch base with Kurt. I apologize for the short time window, but we really appreciate your help.

Flint Water Daily Update
Updated Feb. 2

Current Issues Talking Points

Flint Mayor calls for immediate replacement of Flint pipes

- In a press conference today, Flint Mayor Karen Weaver called for immediate replacement of Flint's water infrastructure.
- Immediately removing pipes could potentially add to the infrastructure problem and result in higher costs for the city.
- Both Senate Minority Leader Jim Ananich and Virginia Tech water treatment expert Marc Edwards advise first mapping the city's pipes to determine the location of lead infrastructure.
- Edwards also says the state is taking the correct actions to make Flint's water safe again. Adding phosphate to the water to coat the pipes is a necessary first step toward ensuring safe drinking water for Flint residents.
    - Flint's damaged pipes spark debate on fix (Detroit Free Press)
    - Prof. Marc Edwards discusses pipes in Flint (video)
- The Governor continues to work with Edwards and the Flint Water Interagency Coordinating Committee to identify and implement a successful long-term solution for Flint families.

Senate Minority Leader sends Governor Flint action letter

- The Governor's senior staff has been in close communication with state Sen. Jim Ananich and have met with him frequently to provide updates, answer questions and get feedback.
- The Governor remains committed to providing Flint residents with the resources needed to implement both short and long-term solutions and will continue to work closely with Ananich.
- The Governor will announce a long-term funding proposal in his formal budget presentation next week to further address Flint water.

DPS Emergency Manager Darnell Earley resigns

- Today, Detroit Public Schools Emergency Manager Darnell Earley resigned, effective February 29.

- The Governor will appoint a transition leader before the end of the month to help guide DPS through a plan that will help address the district's academics and finances giving students and teachers the learning environment they deserve.
- The Governor is encouraging the Legislature to pass a bill package that will help address the $515 million debt faced by DPS. With that support the district should be better able to manage its business and educational goals.

Governor continues to stress importance of home water testing

- A video with instructions on how to properly test home water is available to share: https://www.youtube.com/watch?v=QTER-DiK64o
- The health and safety of Flint residents remains a top priority. It is essential that all Flint residents have the water in their homes tested as soon as possible.
- While water filters will eliminate lead in most homes, those with levels above 150 parts per billion will need to take extra precaution.
- If levels are above 150 ppb, residents should not drink water from the filtered faucet and use bottled water only.
- DEQ and DHHS will visit homes found to have lead levels over 150 ppb for additional testing.
- To date, less than one percent of Flint homes have been identified as having lead levels of this amount. Results showing lower levels indicate residents should continue following established protocols.
- Pregnant and nursing mothers and young children should continue to drink bottled water as a precaution.
- Free water testing kits are available at Fire Stations 1, 3, 5, 6, and 8. Water Samples should be returned to the fire stations for testing.
- Anyone who is unable to get to a Fire Station to pick up a free testing kit should call United Way 2-1-1 for assistance.

Stanton, Terry A. (Treasury)

To: Burr, Richard
Subject: RE: Why did Darnell Earley replace Ed Kurtz in Flint as EM?
Attachments: Flint_Brown Earley 9-11-13.pdf

Richard,

Mike Brown was initially appointed under PA4 in November 2011. When PA4 was done away with through the statewide referendum PA72 was revived. Under 72 a former city employee could not serve as EM so Mr. Kurtz was appointed in August of 2012.

It is my recollection that in July of 2013 Mr. Kurtz wanted to retire, so he was replaced by Mike Brown...who by that time could serve as EM as PA436 was in effect and it carried no prohibition on former city staff serving.

Mr. Earley replaced Mr. Brown when he stepped down in October 2013.

I have attached the press release from that appointment.

It was not mentioned in the release, **and I would not want it attributed to me** but, a member of Mr. Brown's immediate family had fallen ill and he wanted to spend time with that family member.

Hope this helps...

Terry

Gov. Snyder accepts Brown resignation as Flint emergency manager; names Darnell Earley successor

Appointment to be effective October 1st h

Gov. Rick Snyder today accepted the resignation of Mike Brown as the city of Flint's emergency manager, effective Oct. 31, 2013. Gov. Snyder has tapped current Saginaw City Manager Darnell Earley as successor-emergency manager in Flint. His appointment will be effective Oct. 1, 2013. Brown and Earley will work collaboratively during the month-long transition period.

"Mike Brown has worked hard for the city of Flint," Gov. Snyder said. "He offered a calm hand in the face of turbulent times, and was continually willing to push forward in addressing the financial emergency, while keeping the needs of Flint residents as his focus. I thank him for his service."

Darnell Earley, who will become successor-emergency manager Oct. 1, has been city manager in Saginaw for the last eight years, first joining the city as deputy city manager and interim director of fiscal services in August of 2004. Prior to that, Earley served as city administrator in Flint and also did a six-month stint as temporary mayor during a vacancy in 2002.

"Darnell Earley has extensive experience in municipal government and his familiarity with the city of Flint and its finances will be an essential asset as he transitions into the role of emergency manager," Gov. Snyder said. "I am certain he will work together with the mayor, other elected officials, residents, and community leaders to resolve the city's fiscal crisis with the goal of returning Flint to local control as quickly and efficiently as possible."

For more information regarding the city of Flint and other Local Government Fiscal Health issues visit the Local Government Fiscal Health page on Treasury's website.

Gov. Rick Snyder: Budget recommendation will include $30 million for Flint water bill repayments

Consumption and Consumer Use Credit provides relief to residents who cannot drink their water

Funding is on top of $39.3 million in relief already allocated in last year

LANSING, Mich. – Gov. Rick Snyder today said he will ask the Legislature to approve a $30 million water payment relief plan for the residents of Flint that will keep their water service on and eliminate the need to pay for water they cannot drink.

The governor's proposal will be part of the 2016-2017 Fiscal Year budget he will present to lawmakers next week, and calls for a Consumption and Consumer Use Credit the city of Flint can apply to residents' water bills until state and federal officials certify the water is safe for consumption.

"Flint residents will not have to pay for water they cannot drink," Snyder said. "My budget recommendation will include the request that the state make payments to the city's water system for residential bills going back to April 2014 and alleviate the need for residential water shutoffs."

Under the plan, the city will credit residential bills going back to April 2014 for the cost of drinking water residents could not use. Because the city-issued water bills include sewage charges, residents should not plan to receive the exact amount they originally paid. Prior residents of Flint who paid water bills between April of 2014 and now will be able to submit their bills to the city for reimbursement. The city also will receive funding for unpaid residential bills to help maintain the financial integrity of the public water system.

The funding to the city is meant to ensure no resident will have their water shutoff for nonpayment until the water is certified safe for consumption.

"As an American who sympathizes with the plight of Flint residents, it's hard to find moral justification in having them pay for water that is not fit for human consumption or bathing," said Marc Edwards, Charles P. Lunsford Professor of Environmental and Water Resources Engineering at Virginia Tech University. "This essentially refunds all the money associated with consumption or consumer use. I think it's an amazing gesture of common sense and good will and it corrects an injustice. I don't think there's a precedent for this. I feel so encouraged by the direction this is going."

On Friday, Snyder signed supplemental spending for Flint in the amount of $28 million that will:

- Supply free bottled water, faucet filters, and testing kits for Flint residents;
- Put nine nurses in local schools to monitor student health and well-being;
- Provide better nutrition for students and infants through WIC and in-school nutrition programs;
- Replace fixtures in schools, daycares, nursing homes and hospitals;
- Provide for an infrastructure study using independent experts;
- Treat any children who have high lead levels in the blood, using diagnostic testing, nurse visits and environmental assessments in the home;
- Provide additional community education opportunities within the Genesee County Health Department;
- Compensate the Michigan National Guard's work to support water distribution;
- Assist with home lead abatement costs;
- Help the City of Flint with utility issues;
- Provide operational funding for the Flint Interagency Advisory Committee.

The $28 million is in addition to $2 million allocated for improvements to Flint's water system in February of 2015 and $9.3 million in October of 2015 to move back to Detroit's water system, test drinking water and provide wraparound services for children.

The governor will formally present his Fiscal Year 2016-2017 budget recommendation on Feb. 10 in Lansing.

Flint Water
1 Week Deliverable

Questions to address:

1) How will we implement the Consumption and Consumer Use Credit program?

2) Will the water system run out of cash?

   18 month cash flow statement

   1. Without consumer use proposal
   2. With consumer use proposal

   Understand underlying assumptions

   Revenues--

   Usage
   Rates
   Collection ratio

   Expenditures

   Detroit System fees
   KVA connection costs

3) If necessary, what levers do we have to manage a cash shortfall?

<u>Deliverables</u>

- Summary of Customer Use plan
- Q&A on implementation details
- 18 month Flint Water/Sewer Cash flows – with / without credit program
- List of options to manage cash flow deficits (if necessary)

Total minimum lease payments	63,184,254
Less amount representing interest	(28,184,254)
Present value	$ 35,000,000

Note 7 - Water Supply Contract Operating Subsidy

Understanding that the goal of the Authority is to provide water to both the City of Flint and Genesee County Drain Commision (local units), the local units have agreed to pay the Authority a good faith payment equal to $32,300 per unit of water that the local unit has contractually agreed to purchase once the pipeline is fully operational. The City of Flint and Genesee County Drain Commission have contractually agreed to purchase 18 and 42 units, respectively, on a yearly basis. The yearly good faith payment will be paid through monthly installments and is expected to bring cash flows of $1,938,000 to the Authority. When the pipeline becomes fully operational, the monthly payments will be suspended and the contract with the local units indicates that a credit will be given on their monthly bills to return the funds contributed to the Authority. The terms of the repayment will be decided by the Board of Directors at the time that the pipeline is operational; however, the funds must be repaid within a maximum of 40 years.

We may take calls and requests for comment etc. from Nick (specifically how they developed the 65% mark)...but I'm not so sure.

In any case, may need your help coordinating interviews if we get any requests.

Thanks, TS

FYI:

During this morning's weekly Local Government conference call with Flint officials, the City Administrator mentioned this letter and then forwarded a copy of it. I believe she also indicated she or the Mayor had provided a copy to Rich. I had not previously seen it. Oddly, the letter makes no mention of the State Treasurer's January 4, 2016, letter stating that Treasury would reimburse the City 75 percent of *Shears* related legal expenses up to $300,000 incurred by the City.

CITY OF FLINT

Dr. Karen W. Weaver
Mayor

January 27, 2016

Treasurer Nick A. Khouri
Michigan Department of Treasury
Lansing, Michigan 48922

Re: ***Water Related Civil Litigation***

Dear Treasurer Khouri:

In our letter of December 10, 2015, we requested the State of Michigan's financial assistance with the cost of defending the *Shears, et al v City of Flint, et al* lawsuit. As stated in that letter, if plaintiffs were to be successful in that litigation, the financial impact on the City of Flint (City) would be catastrophic.

As you are aware, the City hired the law firm of Miller Canfield to aid in its defense. Since the firm became involved defending this suit, the City has won favorable rulings before Circuit Court Judge Archie Hayman. These rulings included an amendment scaling back the scope of the August 17, 2015, preliminary injunction. Prior to this ruling the City was forecasting financial insolvency as early as this summer. Now, the City is permitted to charge water and sewer rates consistent with the Revenue Bond Act and the biennial budget adopted by former Emergency Manager Gerald Ambrose. Additionally, Judge Hayman has acknowledged that the City is not obligated to repay 15.7 million dollars from its general fund to its water and sewer fund. Put simply, while the costs to retain Miller Canfield have not been insubstantial, it has been money well spent.

These rulings are clear victories for the City. They are a key step in ensuring Flint's overall financial health and stability – both now and in the future. While these triumphs are important, the City has also moved to have the case dismissed. Although Judge Hayman denied the motion, the City believes it has strong grounds for appellate review. That appeal is currently pending before the Michigan Court of Appeals, and the City expectantly awaits a favorable ruling.

Despite the successes in *Shears*, the City must still overcome significant economic challenges. Our City is confronting the most dire water related emergency faced by a municipality in recent memory. This is not hyperbole. Both Governor Snyder and President Obama have declared states of emergency in the City because of the water. What is more, our City's infrastructure, reputation, and people have been irreparably damaged.

As a result of this situation, the City is facing a significant amount of civil litigation. Several lawsuits have already been filed against the City. These include two class action suits. The first, *Mays v Snyder, et al* was brought in the Eastern District of Michigan; the second, *Collins v Snyder*, was brought against the City in Genesee County Circuit Court. The City expects to incur significant legal

fees and costs in defending these two suits. Moreover, we believe these suits are only the first wave of suits to be filed. It is very likely that additional plaintiffs will file suits against the City in the future.

As is the case with the *Shears* litigation, if the plaintiffs in any water related lawsuits are successful, the financial impact on the City would be catastrophic. Certainly, the financial progress and accomplishments achieved by emergency managers over the last four years are at risk. Avoiding this catastrophic result must be a priority. And, given the potential liability posed by these cases all funds expended on competent, qualified legal counsel will be money well spent.

We again acknowledge that under Public Act 436, the State does not assume liability for the actions of an emergency manager. However, without State assistance, the City simply cannot cope with the voluminous number of lawsuits it will soon be facing. Our City needs the resources and expertise of proven legal counsel, such as Miller Canfield. Unfortunately, the City cannot afford these costs. Therefore, we are asking the State to provide the necessary funding for outside legal counsel.

The City and its residents have sacrificed much to attain fiscal stability and end the financial emergency. Our budget, which is already thin, has been stretched to the breaking point by the water crisis. Again, we need the State's help. We would ask that you provide us with the financial assistance necessary to deal with all water related litigation both now and in the future.

Respectfully submitted,

Karen W. Weaver

Mr. Baird,

This request was drafted and in submission process before the Mr. Earley issue and was not intended to be included in this request specifically. We were made aware of Mr. Earley's situation on Friday evening of last week and worked on a resolution over the weekend. Anthony Chubb, Chief Legal Counsel, will talk to you about this specifically to clarify.

Your agreement to pay for costs to represent Mr. Earley in yesterday's meeting did not solidy your response to the request to this letter, so I hope we continue to be on the same page as relates to cases arising out of Emergency Manager actions after departure.

Thanks,

Natasha L. Henderson, City Administrator

Hi Terry,

The Washington Post is looking for some technical questions about Darnell – start dates, salary and so on. Do you have that handy, or is it on the website? I can tackle the last one about the governor.

Thanks!

Dave

Janell Ross here I am a reporter on the Washington Post's National Political Desk who is working on a piece about Emergency Manager Darnell Earley's plans to resign To that end, I have a few factual questions with which I am hoping that you can help me ASAP this afternoon Please note I have read the statement released yesterday Here are my questions **A specific response to each is needed by 2:30 pm EST today.**

1. When was Earley appointed emergency manager in Flint? (a date or a month and year would do)
2. What was Earley's salary while emergency manager in Flint? Please share his final salary while serving in this role.
3. When did Earley leave his role as Flint's emergency manager? (a precise date would be idea, but again a month and year will do)
4. What is the proper way to describe his departure from the Flint emergency manager post. Did he resign. Did his term reach some sort of natural or goal-related end?
5. On what date was Earley appointed emergency manger of Detroit Public Schools?
6. On what date did he begin his job as the emergency manger of Detroit Public Schools?
7. What is Early's current salary?
8. Did the governor have any reservations or concerns about the events surrounding Flint's water and the way that complaints were managed when he appointed Earley to oversee Detroit Public Schools? If so please describe them, what was conveyed to Earley and when.

Sincerely,

Janell Ross

Treasury Purchasing,
The attached memo regarding purchases related to Flint water was distributed at today's Procurement Leadership Team meeting. Please read it and let me know if you have any questions. The memo references an attachment which lists the SEOC contact (this isn't attached and I'm working on getting a copy). I believe the attachment lists each agency Emergency Management Coordinator (EMC). Treasury's EMC is Ann Luepnitz and her backup is Jacob Poynter.

I wanted to make sure you see this ASAP. I'm going to get with Terry Stanton to determine the appropriate distribution in Treasury.

Thanks,
Bruce

STATE OF MICHIGAN

RICK SNYDER
GOVERNOR

DEPARTMENT OF TECHNOLOGY, MANAGEMENT & BUDGET
LANSING

DAVID B. BEHEN
DIRECTOR

February 2, 2016

TO: State of Michigan Procurement Leadership

FROM: DTMB Procurement

SUBJECT: Genesee County Water Emergency Response - Purchasing Guidance

Thank you to all who are working to support the State of Michigan's Genesee County, City of Flint water emergency response.

Given the complexity and variety of the needs of this emergency effort, the purchasing support required is complex as well Purchasing protocols have some differences under this declared state of emergency, and meticulous tracking of expenditures is imperative.

The Michigan State Police (MSP) is the lead agency overseeing the situation and managing the State Emergency Operations Center (SEOC). Flint related purchases must **first** be routed through the appropriate SEOC contact (see attached for an agency roster) to include the SEOC State Director This is required for all Flint- related purchases without exception. The SEOC financial team is responsible for tracking all expenditures in connection with the emergency efforts

Each agency is responsible for its own purchasing transactions. This includes p-card transactions and purchase orders, the tracking of all such transactions, and reporting of those transactions to the appropriate SEOC representative. Failure to properly inform the SEOC financial team of any transaction may result in a forfeiture of any potential reimbursement anticipated by the agency.

Agency purchasing managers are responsible to supply their agency's SEOC representative with a 24/7 phone number for agency purchasing staff support and request that the SEOC representative involves them in every purchase. (Note: SEOC hours are 8 am to 8 pm, seven days a week at this time.)

Emergency Purchasing Procedure:
Public Act 431 of 1984 provides an exception to competitive bidding during a state of emergency. However, responsible purchasing procedures are still the expectation for all procurement professionals (agency purchasing staff).

In addition to the notification and reporting expectations set forth above, transactions should be conducted and/or overseen by procurement professionals, with rare exception, in accordance with the following:

- Each agency makes their own determination when an emergency purchase order is required, and is then responsible for the supporting documentation
- Utilize existing State contracts where possible. Contact DTMB Procurement for help negotiating bulk rates or expedited shipments if needed, and for any concerns related to availability of funds on a contract

- Obtain three quotes whenever reasonably practicable
- Post bids online to the extent practicable
- Please escalate any questions to DTMB Procurement before executing a buy
- DTMB Procurement will assist any agency upon request to address supply chain issues (e.g. working with a national supplier to ensure a high volume supply of water filters are available)
- DTMB-Financial Services is not responsible for issuing emergency purchase orders on behalf of agencies with the exception of information technology related goods and services
- Maintain documentation supporting all transactions. Establish internal protocols to support this such as a single spreadsheet to track agency-wide transactions. Report your agency's expenses to the SEOC Finance team via your SEOC representative.

Flint Water Daily Update

Updated Feb. 3

Current Issues Talking Points

Governor proposes $30M to cover Flint water bills

- The Governor announced a proposed plan to request $30 million as part of the Fiscal year 2017 budget proposal to cover Flint residents' water bills because he believes they should not pay for water that wasn't suitable for consumption.
- The proposal calls for a Consumption and Use Credit the city could use to relieve families of a portion of their water bills from April 2014-April 2016.
- Under the plan, the funding would cover water used for drinking, cooking and bathing which is approximately 65 percent of a resident's water bill.
- Residents would still be responsible for covering sewer costs as well as water not used for consumption (i e. water heaters, outside water use, etc)
- The Governor's proposal would allow Flint to relieve residents of their water bills or provide payment credits for future use.
- The request will be part of the Governor's official budget presentation next week on Feb 10.
- The $30 million recommendation builds on the previous $37.3 million in emergency funding already allocated to Flint by the state.
- The recommendation must go through the formal state budget process and be approved by both the House and Senate.

Congressional Hearing

- A Congressional hearing on Flint water took place today in Washington D C.
- Interim DEQ Director Keith Creagh and Virginia Tech Professor of Environmental and Water Resources Engineering Marc Edwards testified in the hearing of the Reform and Oversight Committee
- To date, the Governor has not been invited to testify before Congress
- The Governor remains focused on fixing the problem in Flint. He is committed to establishing both a short and long-term solution to ensure clean, safe drinking water for Flint families.
- He was in Flint today meeting with local community leaders and discussing the Consumption and Use Credit $30 million budget proposal with local media outlets

Democratic Presidential Debate coming to Flint

- It was confirmed today that a Democratic Presidential debate will take place in Flint in early March
- To date the Federal Government has provided only $5 million in funding to assist residents in Flint while the State has allocated $37.3 million in emergency funding to support Flint families.
- The Governor also proposed a plan to dedicate an additional $30 million as part of his upcoming formal budget presentation to assist Flint residents with water bill payments.
- What will help Flint more than a presidential debate is working together to implement concrete solutions that will aid the city along its road to recovery now and into the future
- It is important we draw on all available resources to help meet both the immediate and long-term needs of Flint residents.

Importance: High

Dick and Darin,

Senate R's have asked if Nick could come over and brief them on the water rate credit issue. He is more than willing to do that, and I am coordinating with the Senate. But I had heard that some information had been shared with Senate Dems, just checking if that was the case and what document that was. So we can make sure we are using the same documents.

Subject: Water Use Determination for Flint

Senator and Representatives;
Attached are

1) The way in which we determined that 65% of the water usage (not including sewer) is cooking, drinking and bathing.
2) Applying that stat to the aggregate costs of water in Flint, how we came up with $30M for credits

Dick

Household Water Use Distribution Rates

There appear to be a number of online resources (including online calculators) that indicate the distribution of water used for cooking, drinking, and bathing. A good example is the pie chart in this EPA document: http://www3.epa.gov/watersense/pubs/indoor.html. Flushing the toilet and washing clothes, alone, make up about 48% of the average indoor use. Add in leaks, and you're at 62%. Also, keep in mind that this is only indoor use, so any outdoor use would further dilute the percentage used in cooking, drinking, and bathing. So on this scale cooking, drinking, and bathing range from 38% to 52%. So reimbursing for 65% of total water used (not sewer costs) should cover almost anyone's cost for those items.

Another way to check this is using a fairly detailed calculator (http://wecalc.org/calc/#) to map consumption. Here are the stats that we entered, which are aimed at generating an atypically high ratio of refundable uses to other uses:

Single person
Relatively modern dishwasher, washing machine, toilet
1 toilet
7 showers/wk (avg is 4.7)
1 bath per week
4 flushes/day (avg is 5)
No aerators and old faucets
Energy star dishwasher used 0.7 times/week (that's the avg. per person, though a single person is likely to run the dishwasher at least once, and probably twice, per week—I'm assuming hand washing would use even more water)
2 loads of laundry/week (avg is 11 loads/month)
No apparent leaks
No outside water use

With all of that, the combined faucet*, shower, and bath percentage was 70% of household usage.

If we only change the shower and toilet figure to reflect average use, that percentage goes down to 65%.

If we plug in a 4-person household that uses the dishwasher, washing machine, toilet, and shower the average number of times, and I also allow for 2 baths per week, keeping all of the other parameters the same, the percentage goes down to 64%.

*It's important to note, however, that in all of these calculations we are using "faucet" as a proxy for cooking and drinking. The default faucet statistic allows for 8.1 minutes of use per person per day. That's much more water than would be used for those two purposes. If we change that one stat to allow for a total of 8 minutes of water use per day for drinking and cooking, the above percentage plummets to 50%. And if we don't count the water we waste while waiting for it to heat up (this is a toggle that is in addition to the 8 minutes noted above), the percentage drops to 48%. If we assume that the home doesn't have a washing machine at this point (and that laundry is done at a laundromat), the percentage use for faucet, shower, and bath is 64%.

That's a fair amount of detail, but the point is that even with all of the variables at play, we think that a 65% refund would cover the cost of water used for drinking, cooking, and bathing for most, and possibly all, Flint residents.

DRAFT - For Discussion Purposes and Subject to Revision

EVENTS

Water Switch Over Date	4/30/2011
Current Consumption Data Available Date	11/30/2015
Planned Rate Increase Date	5/31/2016
Clean Water Certification Date	5/31/2016
Months Between Switch Over and Current Consumption Date	56
Months Projected Prior to Planned Rate Increase	6
Months Projected till Clean Water Certification Date for Rate Incr	6

NOTES / COMMENTS

• Water billed by the "Bill Read Dates" in the Historical Data tabs reflects water consumption from the prior month (i.e. billing transactions with a Bill Read Date of July 2014 reflects "water consumption" from June 2014)

• Projected water costs are computed by using the average amounts for water transactions for Billed Dates July 2014 till August 2015 to reflect rates at which the City of Flint is legally authorized to bill customers

• Due to absence of actual water reads for the month of January 2015 and February 2016 (i.e. water consumed in December 2015 and January 2016 respectively), "Current Date" is set at November 30, 2015. As such an additional two months of water consumption (December 2015 and January 2016) for which actual reads are currently unavailable are included in the projected costs

Projected cost includes estimation up to June 2016 using the average monthly historical cost from July 2014-August 2015. Estimated projections beyond June 2016 incorporates a 5% increase against the historical costs from July 2014 to August 2015. The 5% increase reflects the increase the City would otherwise have implemented effective July 1, 2016 until the "safe date". This rate increase was adopted in the Biennial FY15/FY17 budget by the City's Emergency Manager

STATE OF MICHIGAN

In the Matter of:

CITY OF FLINT

RECEIVERSHIP TRANSITION ADVISORY BOARD

_____/

Proceedings had in the above-entitled matter, taken by Claudia M. Weekly, CSR-2963, and Notary Public, on Friday, January 22, 2016, at 1101 South Saginaw Street, Council Chambers, Flint, Michigan, commencing at or about 2:11 P.M.

APPEARANCES:

FRED HEADEN, Chair

MICHAEL FINNEY, Member

MICHAEL TOWNSEND, Member

DAVID McGHEE, Member

BEVERLY WALKER-GRIFFEA, Member

ERIC CLINE

Friday, January 22, 2016

Flint, Michigan

1:09 P.M.

CHAIRPERSON HEADEN: Meeting will be in order, please. Let the record reflect that all five members of the RTAB are present. We have a quorum.

I would like to, before conducting further business, acknowledge two new additions to the Board, both to my right, Mr. Michael Townsend and Mr. Michael Finney. We look forward with working with both of you. Both of you will be a great addition to the Board. If either one of you have a desire to make any comments now please feel free.

MEMBER FINNEY: No.

MEMBER TOWNSEND: No.

CHAIRPERSON HEADEN: The next item is the approval of the agenda. Are there any additions to the agenda? Mr. McGhee?

MEMBER McGHEE: Yes. Mr. Chair, thank you. I would like to make a motion that public comment be moved toward the beginning, so moved after the minutes.

CHAIRPERSON HEADEN: Is there support?

MEMBER WALKER-GRIFFEA: Support.

CHAIRPERSON HEADEN: Without objection, the agenda is so amended.

The next item of business is the approval of the RTAB minutes of January 13. Those are previously distributed. Are there corrections or additions to those minutes?

If not, I'll entertain a motion that the minutes from January 13 be approved.

MEMBER WALKER-GRIFFEA: So moved.

MEMBER McGHEE: Support.

CHAIRPERSON HEADEN: Those in favor of the motion please say aye.

MEMBER FINNEY: Aye.

MEMBER TOWNSEND: Aye.

MEMBER McGHEE: Aye.

MEMBER WALKER-GRIFFEA: Aye.

CHAIRPERSON HEADEN: Opposed?

The motion is adopted.

There is no unfinished business pending.

The next item based upon the amended agenda is public comment.

Mr. Cline, has anyone signed in to provide public comment?

MR. CLINE: Good afternoon. At the moment we have six individuals that have signed in for public comment. Start off with A. Dumas.

MR. DUMAS: Good afternoon. My name is A.C.

Dumas and I reside at 533 East Rankin Street in the City of Flint. I've been a resident of the City of Flint for my entire life. And I do want to say, according to the agenda, hopefully that this RTAB Board will give the Mayor Karen Weaver her powers back to govern as Mayor of the City of Flint.

Now, every one knows that I am anti, I want to repeat that, anti Emergency Managers, anti Emergency Managers appointees, anti this Board, because I don't believe in Emergency Managers.

And I'm going to say this as I go to my seat. I'm going to say what God told Moses. The difference, we had one preacher up there. God told Moses tell Pharaoh to let my people go, that they may serve me. And I'm going to say to this RTAB Board I would appreciate if you go to the Governor and tell the Governor to let the people of the City of Flint go so we can be governed by our Bible, which is our own City charter, Constitution of the United States and the State of Michigan.

Just to recant, that I am not in favor of Emergency Manager style, a takeover. I do believe in strong government. As you know, strong city governments, as you know, many of you don't know, that last night when we had our city charter review commission meeting that 100 percent of the people, residents were there in that

packed house say they want a strong mayor form of governor, government that will be able to appoint their own executive staff. And so, I hope that you can send that message to the Governor.

You know, water is very important. And you do know that God destroyed the whole world with water. Don't get caught in the judgment of water.

CHAIRPERSON HEADEN: Next, please.

MR. CLINE: Keith Pemberton.

MR. PEMBERTON: Good afternoon.

CHAIRPERSON HEADEN: Good afternoon.

MR. PEMBERTON: I worked for 25 years being a mental health aide. My job was to watch people, watch their nonverbals, hear what they had to say. And hear what they were saying, words that what they meant by what they said instead of what they wanted you to hear. I don't know if you understood what I just said, but it's double-talk. And all we've gotten from Lansing since all this problem started is double-talk. That's all we get from any of the politicians is double-talk.

I hope that you guys, reading your nonverbals, I don't believe it, but I hope that you guys will stop this theft of the people's government and give the government back to the people. We didn't do anything to deserve this. Bad politicians did it and bad politicians

made the mess we're in now. The people should be able to live freely.

CHAIRPERSON HEADEN: Thank you.

MR. CLINE: Pastor Gilbert.

PASTOR GILBERT: Good evening to all.

CHAIRPERSON HEADEN: Good evening.

PASTOR GILBERT: Pastor Alvin Gilbert. I live at 1906 McPhail Street in the City of Flint. I've been in the City of Flint for 42 years.

And I want to say to this Board you look real nice, but nice is not good enough. I want Mayor Weaver to get all the power that the charter has granted her because she deserves it. She has been elected by the city, she is the voice of this city and she is our leader.

But I have one problem. I'm nonprofit. You know I'm not Jesus Christ. I'm just nobody. But I have paid taxes. I worked 33 years for General Motors and I paid my taxes. I can't stand Public Act 436, Executive Order 3 or 20 or any other order because it wasn't the order of the people.

I'm just a voice crying in the wilderness like John the Baptist. I don't care if you like me. I'm not trying to be popular. I don't want nothing from Mayor Weaver. I don't want nothing from any of her consultants

or anybody else. But I am sick and tired of being trampled on by democracy and my rights. I speak for all of the people that can't get down here. Mayor Weaver deserves it. She was elected by the people.

But also, I want to know who is going to check Mayor Weaver? Who's going to watch her? No one gets off the hook anymore. We've been mistreated. We've been downtrodden, but we rising up, we going to fight back. Because I ain't running for office. I don't have no big mega church.

General Motors sends me my pension every month, and I'm so grateful to God that they do. So, I'm not for sale. You can't buy me. You don't have enough money.

So, what I recommend that you do is that you remember that if you do not give this council some power because the council represents the people and their voices must be heard as well. So, give Mayor Weaver her power. She deserves it, she earned it, and the people love her. But we are watching her as well and we are watching you.

So, remember Pastor Alvin Gilbert. I live at 1906 McPhail Street on the south side of Flint. Anytime you're welcome to come to my home and we can discuss it further or we can talk about it later. I hope that you take what I said to heart because I meant every single

word of it. And I intend on driving every demon in this city out in the name of Jesus. God bless you.

CHAIRPERSON HEADEN: Thank you. I would like to acknowledge I believe the Mayor is on the phone, so she's listening in.

Next, please?

MR. CLINE: Tony Pelladono.

MR. PALLADENO: Palladeno.

MR. CLINE: Palladeno. My apologies.

MR. PALLADENO: Hi, everybody. Tony Palladeno, east side of Flint. Mayor Weaver, I haven't seen you in a while. How are you doing?

Just to touch on a little bit, we fought our butts off to get her where she's at, and I say we, a lot of us have. She's got to have her job back. We've got to have this council. And other than that, the citizens, themselves, have got to have someplace to go when they have a complaint. And I don't mean the sidekicks or whatever. We need somebody in here that will listen to us and do something about it.

We need our Mayor. We didn't vote for her to listen to somebody else. We've been pounding them streets, you know. And I don't have no hidden agenda. I'm not no church. As far as taxes, we're getting beat up, you guys, the ones that are trying to pay.

Mayor Weaver, if you see me right now, I've been trying to meet with you now for two weeks, I've been trying to see you. Please, guys, we got to have our Mayor, honestly, from east side all over the city. Thank you.

CHAIRPERSON HEADEN: Thank you.

MR. CLINE: Arthur Woodson.

MR. WOODSON: How you doing?

CHAIRPERSON HEADEN: Good afternoon.

MR. WOODSON: My name is Arthur Woodson. I live at 402 West Stewart. I'm up here today. I hate that you all are giving her her powers back right now. She need her powers, but the thing is if you look at Hurricane Katrina, if you don't cross your Is, I mean cross your Ts and dot your Is they're going to try to get you for corruption, bribery.

I wish they would have cleaned up this mess before they did because I see them trying to put her under the gun and say I told you that she couldn't do it. And they going to try to put every obstacle in her way.

If we didn't have this RTAB we would have been on Detroit water because the council voted, along with the Emergency Manager with the RTAB, the council voted to go back to Detroit. But they stopped it by Emergency Manager Jerry Ambrose. So, if we didn't have him here we

would have been all right.

Mr. McGhee, you know I'm a veteran and you know I fight all day, you know. So, my problem is, Mr. Townsend, you sued the City, so how would you work for the City and you sued the City? Mr. Finney, this is my first time seeing you, but I saw you at the press conference with Snyder.

So, we have a lot of puppets sitting up here that will not work for the City. And I'm just saying like I see it because it's agents of the State. RTAB is the agent of the State.

Me, myself, I would have never accepted it. I'm unbought and I'm un-bossed, so I'm going to be shouting out doing research all day. I'm not here to pull -- I'm not here to fill up pulpits. I'm not running for political office. And I tell it like it is. If I see you doing wrong, I don't care if you're Democrat or Republican, I'm going to let everybody know. Because this situation we're in right now we shouldn't even be in. Thank you very much.

CHAIRPERSON HEADEN: Thank you.

MR. CLINE: Monica Galloway.

MS. GALLOWAY: Monica Galloway, 7th Ward City Council member. I want to thank you guys for serving. I do thank you for hearing the voice of the people, giving

the power and the leadership back to the Mayor. But I do want to hold this Board accountable because since the council is not going to be the checks and balances of the legislative, my hopes are that we won't go back to politics as we've done in the past.

I want to thank this leadership team that has worked very hard in very difficult times. And I understand that the Mayor has the ability to appoint leaders. But I think that it's irresponsible of any leader to come into a situation in a city that is so devastating, and yet, there are still more years ahead in which the devastation hasn't stopped. It doesn't stop because we're in national media about the water. We got some budget issues.

And I just ask that the Mayor would take a real good look at the leadership that's in place that has been working through this situation and that you don't always need to reappoint somebody. And I'm asking this Board to make sure that those that come up as an appointee are not the political agenda as usual.

One thing I appreciated about the administrator and the way that the order was written is that they didn't have to get caught into the political ties of a mayoral race. They could do the services of the city every day without the hanging over them that because the

leadership has changed I might get a notice today. And so, it gives you the freedom to serve and do everything you can for this community. And I'm asking that this Board will still allow that to happen. Thank you so much.

CHAIRPERSON HEADEN: Thank you.

MR. CLINE: That concludes public comment.

CHAIRPERSON HEADEN: The next item, new business, consideration of resolution, RTAB resolution 2016-1. For discussion purposes only is there a motion that the resolution be approved?

MEMBER FINNEY: Mr. Chairman, I would move for approval.

CHAIRPERSON HEADEN: Is there support?

MEMBER TOWNSEND: Support.

CHAIRPERSON HEADEN: Motion has been made and seconded. Any discussion?

MEMBER WALKER-GRIFFEA: I believe that the Mayor would like to discuss this point.

CHAIRPERSON HEADEN: Madam Mayor, are you still with us?

Madam Mayor, are you still with us?

Dr. Weaver?

MAYOR WEAVER: Okay. It keeps going out.

CHAIRPERSON HEADEN: Do you have comments to

offer regarding the proposed resolution?

MAYOR WEAVER: Can you hear me?

MEMBER WALKER-GRIFFEA: Yes.

MEMBER McGHEE: Yes.

MAYOR WEAVER: Okay. Well, first of all, I really wanted to thank you for having this special meeting. And it's another great day to help bring Flint back, and I want to thank the Governor and his staff to help make this possible, I really do.

I need to thank my transitional team as well for their help in the negotiations. And I really want to think the media, both the local and the national, who helped us get our story out.

And, you know, I recognize and we recognize that we have a lot of work yet to do. I thank the Board for stepping forward and I appreciate it. I really wish I was there in person, to be perfectly honest, but there's a snowstorm here and I've been up since 4:00 o'clock trying to get my reservation changed and I haven't had any luck doing it.

But I do just want people to know that I will continue to be responsible and thoughtful about how I entertain moving forward. So, I just wanted an opportunity to express that to you and thank you for calling the meeting today.

CHAIRPERSON HEADEN: Thank you, Madam Mayor.

I want to also acknowledge I believe Council President Nelson is here. President Nelson, do you have any comments you'd like to offer with regard to the resolution?

MR. NELSON: Good evening to this Board and to the new faces on this Board. I am in support of returning the Mayor her power, but I want it to be clear that this Governor needs to understand that this is a two-way street and this is not a one-way street. And I support him giving the Mayor her power, but he really needs to consider that the people voted for us as elected officials, also. And so, we have that right to have our power back.

I won't stop the train from running on the track, but the Governor needs to know that on November the 3rd the people elected me, also, as they did Mayor Weaver. And so, we want to have a fair playing field, level playing field. We want to make sure that we're able to make our own decisions for the people that elected us to do so.

And so, I'm in support of Mayor having all her power. But the day must come, as council president I must take a stand and say that we serve, all nine of us, and we share responsibilities to be the check and the

balance, and you just can't write a check and do what you want with it.

And so, to you, and to all of us here today, I appreciate you for being here. I appreciate you for letting me have words to say. But I, as council president, was elected, too, and I need the power, also, to do what the people elected me to do.

CHAIRPERSON HEADEN: Thank you. Before adopting the resolution is there further discussion?

MEMBER McGHEE: Yes.

CHAIRPERSON HEADEN: Mr. McGhee.

MEMBER McGHEE: Thank you. For any American city the Democratic process is one that is vitally important, especially for Flint where since 2002 there have been so many inconsistencies at the municipal level. I mean we're sitting at a point in time in our community's history where we could be facing, we could be known as the largest catastrophe in the state.

When you look at similar communities or if you just look at any neighboring community, the financial restructuring of the City of Detroit, they had the control back in addition to an abundance of resources that helped them get through the tough times. And I think, I know I accepted this role on the Transition Advisory Board, as a resident born and raised here, lived

here all my life, to see what I could do and assist in transitioning back to local control. And even though whatever decision is made today, this could be a step in the right direction.

However, we are leaps away from where we need to be as a city and where we need to be as a community and where the Governor needs to be in supporting us through this particular process. We just need to make sure that we move forward and that we take steps, not laterally leaning on the wrong house.

As I understand it, and as the Governor told me when I had a conversation with him earlier, he stated as if he was committed to helping the city through this. And my hope and my desire is as we navigate through these difficult times he works with the City of Flint as a partner and not in a continued form of dictatorship or anything like that.

I'm sad that this particular piece didn't happen in a different way. There were conversations -- I made the conversation and the comment and the request to the Governor personally that if he saw fit that the Mayor was in a position to have powers back why wouldn't he just hand over the keys completely, use the charter completely and dismiss the RTAB. That was my recommendation to the Governor.

But this could be a start. But if it is to be, so we need to be partners. The state needs to be transparent. They need to give this particular Board information in a timely manner and make decisions based on what's in the best interest of the people and not just what's in the best interest of politics.

And the City of Flint and its residents, you've heard, have been here for quite some time. We are resilient people, so we need to make sure that decisions, that all of them are being made based on what's in the best interest of the people as a whole and not just what's in the best interest of individuals.

CHAIRPERSON HEADEN: Further comment or discussion?

MEMBER WALKER-GRIFFEA: Mr. Chair?

CHAIRPERSON HEADEN: Yes.

MEMBER WALKER-GRIFFEA: I believe that we were appointed as RTAB members to be thoughtful, reflective and decisive for the community. Each one of us has the ethical responsibility to the Flint community to make fully informed decisions. And I know that the original RTAB members really worked hard to embrace our positions and make decisions that we hoped would make our community stronger and better.

I've had deep concerns, and I've spoken with

the Governor as well, about the deep concerns during the last month and-a-half that we've been called to make decisions without any time to seek clarifying information and support for the decision. I believe to approve any resolution that RTAB needs the opportunity to hear the rationale for the request and the impact on the community and other city functions. My concerns have fallen on process and communication of information.

As we consider this new resolution I appreciate that the Governor and his cabinet members this week gave RTAB members insight into the rationale. It helps to clarify the intentions of the resolution and to allow me to fulfill my obligations as an RTAB member. So, I understand, as was presented to me, that Mayor Weaver has shown dramatic growth in her ability to run the local government. That it is viewed that our city is coming together.

I certainly understand with the water crisis that it is not a normal time for Flint, and so, we have to accelerate in our processes in order to make our decisions. I know that it is a challenging time and progress is required immediately. And above all, I know that Mayor Weaver needs to have the appropriate skill set and resources to move the community forward.

So, as the Board moves forward I'm requesting,

Mr. Chair, that RTAB is given the requisite information in a timely manner to do our jobs and that transparency is at the utmost for every issue that befalls RTAB in the future. We cannot be perceived as puppets.

Thank you for your consideration of my concerns.

CHAIRPERSON HEADEN: Thank you. Questions on the adoption of the resolution? Is there further discussion, comments?

Under our Rules of Procedure, because this is a resolution, a record roll call vote is required. We'll proceed in alphabetical order.

Mr. Finney, how do you vote?

MEMBER FINNEY: Aye.

CHAIRPERSON HEADEN: Mr. Finney votes aye.

Mr. McGhee?

MEMBER McGHEE: Yes.

CHAIRPERSON HEADEN: Mr. McGhee votes aye.

Mr. Townsend?

MEMBER TOWNSEND: Aye.

CHAIRPERSON HEADEN: Mr. Townsend votes aye.

Dr. Walker-Griffea?

MEMBER WALKER-GRIFFEA: Support.

CHAIRPERSON HEADEN: Dr. Walker-Griffea votes aye.

The Chair votes aye.

There are five yeas and no nays. The resolution is adopted.

Is there further business before this Board? If not, is there a motion that we adjourn?

MEMBER WALKER-GRIFFEA: So moved.

MEMBER FINNEY: Seconded.

CHAIRPERSON HEADEN: Motion is made and seconded without objection. We are adjourned. Thank you.

(Meeting adjourned at 2:38 PM.)

G. AMENDMENT NO. 4

Senator JONES offered the following amendments to Senate Bill No. 136:

1. Amend page 1, line 6, by striking out the remainder of section 101 and inserting

"APPROPRIATION SUMMARY

GROSS APPROPRIATION	$30,000,000
Total interdepartmental grants and intradepartmental transfers	0
ADJUSTED GROSS APPROPRIATION	$30,000,000
Total federal revenues	0
Total local revenues	0
Total private revenues	0
Total other state restricted revenues	0
State general fund/general purpose	$30,000,000

Sec. 102. DEPARTMENT OF TREASURY

(1) APPROPRIATION SUMMARY

GROSS APPROPRIATION	$30,000,000
Interdepartmental grant revenues:	
Total interdepartmental grants and intradepartmental transfers	0
ADJUSTED GROSS APPROPRIATION	$30,000,000
Federal revenues:	
Total federal revenues	0
Special revenue funds:	
Total local revenues	0
Total private revenues	0
Total other state restricted revenues	0
State general fund/general purpose	$30,000,000

(2) GRANTS

Flint declaration of emergency	$30,000,000
GROSS APPROPRIATION	$30,000,000
Appropriated from:	
State general fund/general purpose	$30,000,000"

2. Amend page 2, line 9, after "is" by striking out the balance of the line and inserting "$30,000,000.00 and state appropriations".

3. Amend page 2, following line 13, by inserting

"DEPARTMENT OF TREASURY

Sec. 301. (1) From the funds appropriated in part 1 for Flint declaration of emergency, $30,000,000.00 shall be allocated to help cover the cost of water bills for residents of the city of Flint.

(2) The department shall report quarterly to the chairs of the senate and house appropriations committees on the distribution of the funds allocated pursuant to part 1.".

January 22, 2016 AMENDMENT 3 3RD

Senator Stirkey offered the following amendment to Senate Bill No. 136:

1. Amend page 2, following section 301, by inserting (A)

"Sec. 302. (1) There shall be no administrative charges, from any entity, removed or expended from the appropriation in part 1.

(2) There shall be no expenditures from the funds appropriated in part 1 without specific authorization from the state treasurer.

(3) All unexpended funds, as of September 30, 2016, from the appropriations in part 1 shall be returned to the department of treasury.

(4) Any allocation to an entity receiving funds from the appropriations in part 1, other than a specific water and sewer customer, must be specifically approved by the state treasurer in each instance."

Greetings All,

If you have not done so already, please confirm your director's attendance at the Flint Water Interagency Coordinating Committee meeting tomorrow in Flint. The agenda is under final review and will be sent later this afternoon.

Attached are the other documents for tomorrow's meeting (item 4 was passed out as a hard copy at last week's meeting).

1. FWICC Contact List
2. FWICC Subcommittees Draft
3. Flint Water Advisory Task Force Letters (3)
4. EO No. 2016 -1 FWICC Summary

December 7, 2015

Dear Governor Snyder:

On Wednesday, November 18, 2015, the Flint Water Advisory Task Force met with representatives of the Michigan Department of Environmental Quality (MDEQ) and the Michigan Department of Health and Human Services (MDHHS) to discuss elements of the 10-point Action Plan designed to address various issues related to the ongoing public health protection challenges precipitated by lead in the Flint water supply. These discussions were held at our request as part of our task to make recommendations to prevent a similar occurrence in Flint or elsewhere, and also to monitor ongoing mitigation efforts.

Subsequent to those meetings, on Tuesday, November 24, 2015, members of the Task Force participated in a conference call with yourself, members of the Administration, and representatives of these agencies to discuss the progress to date on the 10-point Action Plan, as well as several other related issues.

We want to acknowledge the steps that have already been taken to implement the action plan, specifically in the areas of outreach efforts to facilitate blood lead testing for children, communication with health care providers in the Flint community about the importance of testing children for lead, and the training of additional public health nurses in the Genesee County Health Department. We do believe, however, that additional steps need to be taken to reach additional children for blood lead testing, assure proper follow-up with children found to have elevated blood lead levels, and to continue water testing. We will continue to assess state and local efforts and make recommendations regarding specific steps that we believe are warranted.

One primary concern we have at this point is that the current efforts appear to be taking place in the absence of a larger project coordination framework that measures results and clearly delineates responsibilities for continuing actions to protect public health. We believe the state is best positioned to facilitate this larger framework, which should address the following:

1. The need for MDHHS and MDEQ—and, possibly, other state agencies--to set **goals** for actions in collaboration with local and federal agencies and organizations.
2. The need for a set of corresponding **timelines** for the goals.
3. The need to establish **responsibility** for meeting the goals in a timely fashion and for **contingency plans** for the state if the goals are not being met.
4. The need for clear, regular **communication** with the Flint community and stakeholder groups regarding action steps and updates.

We also believe it important that a single person or entity—potentially independent of any one particular state agency and mutually agreeable to this Task Force and you, Governor—be established to provide effective coordination of ongoing activities and reporting on the status of mitigation measures. For this, we also believe a readily understood "dashboard" should be developed that reports on the goals, timelines and assignments. This will enable members of the Flint community, public health providers, and state agencies to know about the status of the Flint water crisis mitigation program, as

well as promote coordination and accountability. The Task Force is prepared to assist in the development of that dashboard.

We believe it is vitally important that trusted members of the Flint community be engaged in communication on this issue, as well as the distribution of information conveyed by our suggested dashboard reporting. Accordingly, in advance of our final report, we would like to ensure the independent coordinator suggested above engage trusted community groups to begin rebuilding community trust in state actions.

We appreciate your personal interest in this issue, commitment to assisting the Task Force in our review, and—most importantly—commitment to ensuring that the full measure of state resources are brought forward to protect the public health in Flint and throughout the state.

Respectfully yours,

Flint Water Advisory Task Force:

Dr. Matt Davis

Chris Kolb

Dr. Larry Reynolds

Eric Rothstein

Ken Sikkema

January 22, 2016

Governor Rick Snyder
Office of Governor
P.O. Box 30013
Lansing, Michigan 48909

Dear Governor Snyder:

The Flint Water Advisory Task Force (FWATF) appreciates your recent efforts to secure federal and mobilize state emergency response resources to address the immediate water supply issues in Flint.

This letter is to encourage a similarly robust response to the challenges of re-establishing a reliable, trusted potable water distribution system in Flint. This is required as soon as possible to replace the unsustainable and expensive bottled water and filter distribution program that has been necessitated, but which clearly must serve as an interim, emergency response.

Consistent with the priorities identified in the Safe Drinking Water Emergency Order issued by the EPA on January 21, 2016, we recommend the following actions to address scientifically grounded concerns that the water system in Flint remains unsafe because of lead contamination and Legionella. Public trust in the safety of the water supply may only begin to be re-established through the state's forthright engagement of the scientific experts who overcame state and federal agency intransigence to expose the lead poisoning.

Our recommendations are:

- Engage US EPA staff experts versed in Lead and Copper Rule (LCR) requirements – specifically Miguel del Toral, Darren Lytle and Michael Shock. These individuals should be empowered to guide implementation of a comprehensive LCR sampling program in Flint that will monitor lead levels now and throughout the conversion to raw water supply by the Karegnondi Water Authority (KWA) and full-time use of the Flint Water Treatment Plant.
- Establish an inter-disciplinary work group comprising subject matter experts drawn from respected public utility associations and institutions of higher learning in Michigan and elsewhere (including Marc Edwards of Virginia Tech), to oversee the conversion to KWA-supplied raw water.
- Commission and/or contract with an unbiased third-party organization or consortium (hereafter: Flint water safety scientific assessment team [FWSSAT]) that will be responsible for assessing the quality and safety of drinking water in residences, schools and child care settings in Flint, and hospitals and other healthcare facilities served by the

Flint water system. The explicit focus of FWSSAT activities will be lead and Legionella; however, the FWSSAT may include other considerations in its work.

The FWSSAT will be invested with the responsibility of declaring when the public water supply in Flint is safe for routine consumption. The FWSSAT will employ the most rigorous scientific standards, using a sampling strategy that is designed to optimize detection of water contamination in home, school, and child-care settings, and healthcare environments. All schools and healthcare facilities must be included in the sampling approach. Rigorous sampling of residences and child-care settings (whether centers or in-home) will also be implemented, using any and all available information about lead water service lines. In addition, if a homeowner or renter whose dwelling has not been included in sampling wishes to have the dwelling included, they will also be sampled. The sampling efforts and reporting process of the FWSSAT will be fully transparent to the public; results of testing should be published on local, state, and federal (EPA) websites.

- To assure the re-building of community trust and assure sufficient expertise for future water quality and safety, the FWSSAT should partner with local (Flint Water Treatment) and state (MDEQ) personnel in its activities. The FWSSAT should have an inter-disciplinary advisory committee that includes local community leaders, local and state officials, national scientific authorities regarding water quality and safety and public health, and the leader of the interagency state effort regarding the Flint water crisis. When the FWSSAT advisory committee is satisfied that the FWSSAT scientific procedures have thoroughly assessed water quality and safety in Flint residences, schools and child care settings, and healthcare facilities and found the water to be sufficiently free of contamination, then the committee will advise the public of the findings. The FWSSAT will then organize the transfer of responsibility to local and state authorities to sustain the sampling and reporting methods thereafter, including the conversion to KWA raw water in the future.

We also believe that a forthright response to the Legionella outbreak must similarly engage trusted, scientific experts drawn from independent institutions. Accordingly, we recommend:

- The Michigan Department of Health and Human Services (MHHS) should make a formal request to the federal Centers for Disease Control and Prevention (CDC) for assistance in assessing the outbreak of Legionnaire's disease in Flint, if they have not already done so. MHHS, working with CDC, should develop a strategy for improving prevention, rapid detection, and timely treatment of cases of Legionellosis in Michigan in 2016 and beyond. While the MDHHS evaluation of the dozens of cases of Legionellosis in 2014 and 2015 has strongly suggested a link to the shift to drinking water from the Flint River in 2014, further and more intensive evaluation of clinical isolates (i.e., samples from infected patients) is necessary to understand the route(s) of transmission from contaminated water to humans. The unique set of outbreak circumstances in the setting of a change in water source strongly indicates that support from federal public

health authorities would be a welcome way to amplify the public's collective understanding of risk of contracting Legionella in residences served by the Flint water system, and in Flint healthcare facilities.

- The state should specifically request federal support from the CDC – and, as appropriate, additional federal experts and agencies – to advise and assess Flint healthcare facilities and Flint-based healthcare providers regarding: (a) appropriate application and timely re-application of biocides to air treatment systems and cooling towers in all healthcare facilities in Flint, in order to prevent colonization with Legionella; and (b) proper assessment and timely diagnosis of Legionella among patients in Flint who present with characteristic signs and symptoms and have a history of potential exposure to contaminated water. Of note, the risk of resurgent Legionellosis in Spring 2016 is on the horizon; the first cases of Legionellosis in the 2014 and 2015 outbreaks were diagnosed in June and May, respectively, and Legionella is known to be much more common in the spring, summer, and fall than in the winter months. Time is of the essence.

- MDHHS should work with its federal partners to assure that investigative efforts related to Legionella regarding quality and safety of water are conducted in coordination with the FWSSAT described above. Furthermore, MDHHS should regularly communicate its findings to the Flint community regarding its efforts to prevent, detect, and treat cases of Legionella until case levels return to pre-2014 levels.

We expect that these measures will provide members of the Flint community with assurance that the quality of their tap water is being appropriately monitored and that forthcoming announcements that Flint's tap water is safe to drink are well-founded. Notwithstanding earnest state agency actions, we believe that the engagement of independent subject matter experts, whether to assess drinking water quality or public health concerns, is critical to overcome, over time, the understandable skepticisms that prevail in the Flint community.

We hope that you will receive these recommendations in the same spirit with which they are offered – to advance the recovery and reinvigoration of the Flint community.

Respectfully,

Matthew Davis, M.D.
Chris Kolb
Lawrence Reynolds, M.D.

Draft Subcommittee Recommendations for FWICC

- Incident Action Plan

- Water Quality
  - ✓ Response tactics and flow process
  - ✓ Testing
    - Lead and Cooper
    - Other Contaminants and Disease Transmission
  - ✓ Monitoring and reporting entry of contagions

- Water Infrastructure Integrity
  - ✓ Reliability Study
  - ✓ Infrastructure upgrade/replacement
  - ✓ Lead Line Replacement

- KWA
  - ✓ Benefit-Cost Analysis
  - ✓ Transition
  - ✓ Safety
  - ✓ Flint Water Treatment Plant Upgrade
  - ✓ Rate Structure

- Health
  - ✓ Health and Safety Plan
  - ✓ Responder Medical Plan
  - ✓ Nutrition
  - ✓ Post Exposure Actions

- Education
  - ✓ Public education and awareness
  - ✓ Secondary education materials

- Policy
  - ✓ Intra-agency Protocols
  - ✓ Statewide Policy
  - ✓ Lead and Cooper Rule Change Recommendations

- Communication Protocols and Transparency

DRAFT

December 29, 2015

Dear Governor Snyder:

The Flint Water Advisory Task Force, which you appointed on October 21, 2015, has devoted considerable effort and countless hours to our review of the contamination of the Flint water supply: what happened, why it occurred, and what is needed to prevent a recurrence in Flint or elsewhere in the state. We have also been assessing ongoing mitigation efforts to help assure that short- and long-term public health issues and water management concerns will be properly addressed to safeguard the health and well being of the Flint community.

Shortly after we began our work, we recognized the immediate need for better coordination of the state's response to the ongoing public health issues in Flint, and for assignment of a single person to provide this coordination. We addressed these concerns in a letter to you on December 7, 2015, and you responded with immediate adoption of these recommendations. We thank you for the commitment your response demonstrates.

In our continuing efforts, we have now interviewed numerous individuals at state and local levels; reviewed many documents, articles, and emails; and deliberated repeatedly as a group. Both individually and as a group, we have visited Flint several times during the past several weeks to meet with citizens, public health officials and healthcare providers, individuals who have water management responsibilities at the city and county levels, and other public officials.

It is clear to us, particularly as we listen to the people of Flint, that it is both critical and urgent to establish responsibility for what happened in their community and to ensure accountability. This is a first step in a long process to re-establish the trust they no longer have in their government and the agencies whose responsibility it is to protect their health. It is urgent because this deep distrust of government continues to compromise the effective delivery of protective services designed to address ongoing public health issues. It is for these reasons that we are sending this letter at this time.

We believe the primary responsibility for what happened in Flint rests with the Michigan Department of Environmental Quality (MDEQ). Although many individuals and entities at state and local levels contributed to creating and prolonging the problem, MDEQ is the government agency that has responsibility to ensure safe drinking water in Michigan. It failed in that responsibility and must be held accountable for that failure.

The Safe Drinking Water Act (SDWA) places responsibility for compliance with its requirements on the public water system. In this instance, the City of Flint had the responsibility to operate its water system within SDWA requirements, under the jurisdiction of the MDEQ. The role of the MDEQ is to **ensure** compliance with the SDWA through its regulatory oversight as the primary agency having enforcement responsibility for the Flint water system.

The MDEQ failed in three fundamental ways.

Regulatory Failure

We believe that in the Office of Drinking Water and Municipal Assistance (ODWMA) at MDEQ, a culture exists in which "technical compliance" is considered sufficient to ensure safe drinking water in Michigan.

This minimalist approach to regulatory and oversight responsibility is unacceptable and simply insufficient to the task of public protection. It led to MDEQ's failure to recognize a number of indications that switching the water source in Flint would—and did—compromise both water safety and water quality. The MDEQ made a number of decisions that were, and continue to be, justified on the basis that federal rules "allowed" those decisions to be made. ODWMA must adopt a posture that is driven not by this minimalist technical compliance approach, but rather by one that is founded on *what needs to be done to assure drinking water safety.*

A culture change must occur within ODWMA. It must be driven by a mission that is aspirational regarding the role of the MDEQ in ensuring the safety and the quality of Michigan's drinking water. We believe, and have expressed to MDEQ Director Dan Wyant, that as a Great Lakes State, Michigan should aspire to have the safest drinking water in the nation, rather than merely aiming for technical compliance with regulatory requirements.

Failure in Substance and Tone of MDEQ Response to the Public

Throughout 2015, as the public raised concerns and as independent studies and testing were conducted and brought to the attention of MDEQ, the agency's response was often one of aggressive dismissal, belittlement, and attempts to discredit these efforts and the individuals involved. We find both the tone and substance of many MDEQ public statements to be completely unacceptable. In a real way, the MDEQ represents the public, including the very individuals it treated dismissively and disrespectfully in public statements. We recognize that the agency might disagree with the opinions of others on a variety of issues, including testing protocol, interpretation of testing results, the requirements of federal law and rules, and other matters. What is disturbing about MDEQ's responses, however, is their persistent tone of scorn and derision. In fact, the MDEQ seems to have been more determined to discredit the work of others—who ultimately proved to be right—than to pursue its own oversight responsibility.

Failure in MDEQ Interpretation of the Lead and Copper Rule

The federal Lead and Copper Rule (LCR) is central to what happened in Flint, because that rule, at least theoretically, is designed to prevent lead and copper contamination of drinking water. The federal LCR calls for "optimized corrosion control treatment," which the MDEQ did not require in the switch to the Flint River. Prior to the switch, MDEQ staff instructed City of Flint water treatment staff that corrosion control treatment (CCT) was not necessary until two six-month monitoring periods had been conducted. The need for CCT would be evaluated after the results from those two monitoring periods were reviewed. The decision not to require CCT, made at the direction of the MDEQ, led directly to the contamination of the Flint water system.

The MDEQ seems to have taken different positions on whether it faithfully followed the LCR in the Flint situation. It first maintained that it followed the LCR, then stated that it did not follow the rule properly, and most recently claimed that a federal memorandum issued by the US EPA in early November 2015 suggests that the original MDEQ interpretation was possibly correct.

We are not convinced. Even the MDEQ's latest interpretation of the US EPA's November memorandum is overly legalistic and misunderstands the intent of the LCR, which is to minimize risks of lead and copper exposure for human health.

We believe ODWMA's single-minded legalistic focus is the heart of the problem, and it is part of the "technical compliance" culture described above. ODWMA should not be basing its actions solely on a

legally possible interpretation of the LCR. It should be focusing on how to protect Michigan's citizens from lead in drinking water.

We met with MDEQ Director Wyant on December 16, 2015, to discuss these issues, as well as many others. We note his substantial agreement with many of our conclusions, particularly as it relates to the regulatory failure and the abysmal public response of his agency. It is our understanding that he has drawn similar conclusions in his own evaluation of the MDEQ's role in the Flint water crisis. At the same time, it was disappointing to hear his weak defense of the CCT decision based on the EPA's November 2015 memorandum.

We are not finished with our work. Other individuals and entities made poor decisions, contributing to and prolonging the contamination of the drinking water supply in Flint. As an example, we are particularly concerned by recent revelations of MDHHS's apparent early knowledge of, yet silence about, elevated blood lead levels detected among Flint's children. We also feel it important to further review local government decision processes under emergency management. Our final report will highlight and discuss those concerns, among many others, to provide some context to a comprehensive series of recommendations. **As stated earlier in this letter, however, we believe that establishing responsibility is a critical and urgent need, and one that should not wait for our final report in 2016. Individuals and agencies responsible must be held accountable in a timely fashion.**

It is our hope that the heightened awareness of the dangers of lead poisoning can be an opportunity to make Michigan safer, particularly for its children. Drinking water must be recognized as a potential source of health risk exposure when water lines and fixtures containing lead are disturbed or compromised. Proper testing, not only in high-risk areas but also in facilities serving children (e.g., schools), must be considered. Facilitating long-term financing of a model public health program, and also replacement of lead-containing water service lines and fixtures, would enable Michigan to realize a positive lasting legacy from the tragedy of the Flint water crisis. Our final report will address some of these issues.

The City of Flint's water customers—fellow Michigan citizens—were needlessly and tragically exposed to toxic levels of lead through their drinking water supply. They deserve a commitment to properly assess responsibility and ensure accountability. They also deserve a commitment to needed mitigation in both the short and long term. The Flint water crisis never should have happened. Having failed to prevent it, state government should coordinate a sustained, public-health-focused response to remedy, to the fullest extent possible, the impacts on the Flint community.

Respectfully yours,

Flint Water Advisory Task Force:

Matt Davis
Chris Kolb
Larry Reynolds
Eric Rothstein
Ken Sikkema

Notes on Executive Order 2016-01
Creating the Flint Water Interagency Coordinating Committee

1 Purpose of the FWICC

The first section of Executive Order 2016-01 explains that the goal of the FWICC is to facilitate collaboration and communication between state departments, local governments, and subject matter experts to (1) ensure safe drinking water and (2) address the consequences of elevated lead levels in drinking water. Three key "whereas" clauses are highlighted below:

> WHEREAS, multiple state departments and local authorities share the responsibility for ensuring safe drinking water and the coordination of efforts to address the consequences resulting from the presence of elevated lead levels in drinking water; and
>
> WHEREAS, ensuring safe drinking water and addressing the consequences of elevated lead levels in drinking water will require collaboration and communication between state departments, local governments, and subject matter experts; and
>
> WHEREAS, the establishment of a Flint Water Interagency Coordinating Committee within the Michigan Department of State Police will facilitate the collaboration and communication between state departments, local governments, and subject matter experts necessary to effectively coordinate a response and recovery effort;

2. Administrative Location of the FWICC

Under the Michigan law, executive functions generally must occur within one of the principal departments of the executive branch. Accordingly, the FWICC was created within the Department of State Police (MSP). All administrative matters like budget and staffing fall under the MSP umbrella. Colonel Kriste Etue is the department director of MSP.

> **I. A.** The Flint Water Interagency Coordinating Committee ("Coordinating Committee") is created as an advisory body within the Michigan Department of State Police (the "Department").
>
> ****
>
> **III. A.** The Coordinating Committee shall be staffed and assisted by personnel from the Department as directed by the Department Director. Any budgeting, procurement, and related management functions of the Coordinating Committee shall be performed under the direction and supervision of the Department Director.

An advisory committee does not make policy; rather, it provides advice to policy makers. As such, the committee is not subject to the specific statutory requirements Open Meetings Act. This gives the committee maximum flexibility to hold meetings in private or in public as the committee decides. This also gives FWICC flexibility to allow all or some participants to join meetings by telephone or send votes by email, as you decide to be appropriate.

3. Composition of the FWICC & Length of Terms

Section I of the Executive Order addresses the composition of the committee. The FWICC consists of seven state government officials (Office of Urban Initiatives, EMHS, DEQ, DHHS, LARA, Treasury and MDE), seven local officials (selected by the Mayor and the county commission), and three subject matter experts. The initial terms of service end on 12/31/18, the last full day of the Governor's term.

Directors may send a designee to attend and vote at meetings. It generally works best if the designee is the same person each time, but that is not a strict requirement.

Executive orders carry over from one administration to the next unless they are rescinded or amended. The next Governor will have the option of keeping the FWICC in place and making new appointments. Your appointment will last as long as you remain eligible or until a new person is appointed after the expiration of your term. You may be appointed to successive terms. The FWICC will exist until a Governor decides that the FWICC should be terminated.

I. C. A vacancy on the Coordinating Committee occurring other than by expiration of a term shall be filled in the same manner as the original appointment for the balance of the unexpired term. A member may continue serving until his or her successor is appointed. A member may serve successive terms if reappointed.

4. Charge to FWICC

Section II of the Executive Order lays out the responsibilities of the FWICC:

1. Create an incident action plan designed to assist state and local authorities in ensuring safe drinking water for the residents of the City of Flint and addressing the consequences of elevated lead levels in drinking water.
2. Review recommendations made by the Flint Water Advisory Task Force and propose statutory, regulatory, or contractual actions necessary for implementation of such recommendations.
3. Identify staff with competencies in emergency planning, operations, logistics, and finance as outlined under the National Incident Management System (NIMS) to work with the Coordinating Committee to track resource requests and document progress on the incident action plan.
4. Establish a standard process for sharing pertinent information between all members including use of the NIMS and Unified/Incident Command as appropriate.
5. Establish routine communications protocols at the local, executive, and legislative levels as appropriate.
6. Establish a public information protocol to effectively inform the community.
7. Make recommendations for acceptable standards for potable water.

8. Make recommendations regarding the health impacts for the affected population.

9. Assess the status of infrastructure and determine feasible actions to upgrade the water system.

10. Establish subcommittees among its members to specifically address, at a minimum, each of the three following topic areas: Water Quality, Community Health, and Education.

11. Assist the Governor and the Department in implementing appropriate operations permitted under the Michigan Emergency Management Act or the federal Stafford Disaster Relief and Emergency Assistance Act, including local emergency operations plans and guides.

12. Explore any avenues of funding for response and recovery efforts including federal grants, legislative appropriations, and private partners.

Highlights include: Creating an incident action plan, reviewing recommendations of the Flint Water Advisory Task Force, working with EMHS on the emergency response, facilitating communication within and outside of government, forming at least three subcommittees (Water Quality, Community Health, and Education), making various recommendations to the Governor based on the knowledge and expertise of the FWICC, and exploring funding options.

Not all of these tasks are not the *sole* responsibility of the FWICC. A number of the state and local offices that are part of the FWICC also share responsibility. The FWICC will help to ensure that the various responsible bodies at the state and local level are collaborating and communicating with each other.

5. Operations of the FWICC

Section III of the Executive Order addresses how the FWICC will operate. It is designed to give the FWICC maximum flexibility.

As Statewide Coordinators, Harvey Hollins and Captain Kelenske will be responsible for running the meetings and ensuring that the FWICC completes its required functions:

III. B. The Director of Office of Urban Initiatives within the Executive Office of the Governor and the Deputy State Director of Emergency Management and Homeland Security shall together serve as the Statewide Coordinators responsible for the administrative functions of the Coordinating Committee.

****

III. E. The Coordinating Committee shall meet at the call of either of the Statewide Coordinators and as may be provided in procedures adopted by the Coordinating Committee.

The FWICC has a great deal of freedom to consult with or work with outside experts, members of the public, and government officials:

> **III. C.** The Coordinating Committee may utilize subcommittees and advisory panels composed of its members to assist in completing the functions of the Coordinating Committee. The Coordinating Committee may request public participation on advisory panels as the Coordinating Committee deems necessary.
>
> ****
>
> **III. F.** The Coordinating Committee may, as appropriate to perform its duties, make inquiries, conduct studies, consult with outside experts and federal agencies, and receive comments from the public.
>
> ****
>
> **III. H.** The Coordinating Committee may accept donations of labor, services, or other items of value from any public or private agency or person. Any donations shall be expended in accordance with applicable laws, rules, and procedures.
>
> ****
>
> **IV. A.** All departments, committees, commissioners, or officers of this state or of any political subdivision of this state may give to the Coordinating Committee, or to any member or representative of the Coordinating Committee, any necessary assistance required by the Coordinating Committee, or any member or representative of the Coordinating Committee, in the performance of the duties of the Coordinating Committee so far as is compatible with its, his or her duties.

Any recommendations to the Governor must be supported by a majority of currently serving FWICC members:

> **III. D.** When making recommendations to the Governor, a majority of the serving members of the Coordinating Committee must concur.

Committee members are not compensated but may be reimbursed for travel expenses (e.g., mileage and parking) according to the normal state expense rules. These reimbursements would occur through MSP, which houses the FWICC.

> **III. G.** Members of the Coordinating Committee shall serve without compensation but may receive reimbursement for necessary travel and expenses according to relevant statutes and the rules and procedures of the Civil Service Commission, and the Department of Technology, Management and Budget, subject to available funding.

Any media inquiries, legislative inquiries, and legal inquiries should be handled through MSP. If the FWICC needs legal representation or assistance, it would be provided by an assistant attorney general through MSP:

> **III. I.** Members of the Coordinating Committee shall refer all legal, legislative, and media contacts to the Department.

6. The Freedom of Information Act

The FWICC is a "public body" within the department of state police in the executive branch. Accordingly it is subject to FOIA. For purposes of clarity, this is spelled out in the Executive Order:

> **III. J.** A writing prepared, owned, used, in the possession of, or retained by the Coordinating Committee in the performance of an official function is subject to the Freedom of Information Act, 1976 PA 442, as amended, MCL 15.231 to 15.246.

Any FOIA requests to FWICC should be referred to the FOIA coordinator for MSP, who will work with you to handle the response.

Michigan's FOIA law covers the public records of public bodies (such as MSP and the FWICC).

A "public record" means "a writing prepared, owned, used, in the possession of, or retained by a public body in the performance of an official function, from the time it is created. Public record does not include computer software." The definition of "writing" is very broad, including any "means of recording or retaining meaningful content."

In short, this means that your notes taken at FWICC meetings, e-mails between FWICC members about FWICC business, and any documents created or used by FWICC are subject to FOIA and could be released to the media. There are a number of exemptions to FOIA. These are listed at MCL 15.243, and include—among other things—personal information and information that is subject to a legal privilege like that attorney-client privilege.

Subject: RE: Treasury approvals regarding Flint WTP

Sarah,

Pursuant to your request for Treasury approvals regarding the Flint water treatment plant, please see the list of requests/approvals below. Please note that this list does not include requested purchases/contracts of more than $50,000 if those purchases/contracts were competitively bid (per PA 436 of 2012).

Let me know if you need any additional information.

Howard

Department of Treasury – Related Contract and Purchase Approvals

Flint Water System

1. **December 15, 2011** – Requesting approval to contract with Amwell for the purchase of wastewater treatment repair parts - **$236,100.00**
2. **April 11, 2013** – Requesting authorization to proceed with adopting of the resolution and entering into a contract with KWA - **No cost estimate included in our records**

3. **May 23, 2013** – Requesting approval to contract Ace-Saginaw Paving for replacing of parking lot at water service center - **$98,459.00**
4. **June 24, 2013** – Requesting approval to contract with JWC for emergency repairs to Flint's northwest pump station - **$275,000.00**
5. **June 24, 2013** – Requesting approval to contract with Lockwood, Andrews & Newman, Inc. to implement Phase I and develop Phase II of placing the Flint Water Plant into operation - **$171,000.00**
6. **July 31, 2013** – Requesting approval to contract with Titus Welding Company for secondary clarifier installation (water pollution control) - **$274,488.00**
7. **August 27, 2013** – Requesting approval to contract with Ace-Saginaw for Paving at the Water Service Center - **$124,236.00**
8. **August 27, 2013** – Requesting approval to contract with Rowe Engineering for Engineering Services - **$149,600.00**
9. **September 24, 2013** – Requesting approval to contract with Ace-Saginaw for Asphalt Paving Materials - **$194,062.00**
10. **October 04, 2013** – Requesting approval to contract with SLC Meter for water service couplings/connectors and hydrant repair parts - **$75,000.00**
11. **October 04, 2013** – Requesting approval to contract with Sorensen Gross Construction Services for removal of old and installation of new bar-screen at East Pumping Station for water pollution control - **$395,000.00**
12. **October 04, 2013** – Requesting approval to contract with Sorensen Gross Construction Services for removal of old and installation of new bar-screen at Northwest Pumping Station for water pollution control - **$165,000.00**
13. **October 11, 2013** – Requesting approval to contract with Metrom-Farnier for Polymer water meters - **$89,000.00**
14. **October 16, 2013** – Requesting approval to contract with Kennedy Industries for Torrey Road pump station mechanical equipment upgrade - **$65,260.00**
15. **October 25, 2013** – Requesting approval to contract with McNaughton-McKay Electric for Cedar Street pumping station switchgear upgrades - **$482,000.00**
16. **November 14, 2013** – Requesting approval to contract with McNaughton-McKay Electric for variable frequency drive - **$349,710.00**
17. **November 14, 2013** – Requesting approval to contract with McNaughton-McKay Electrical for Variable Frequency Drive - **$349,710.00**
18. **November 15, 2013** – Requesting approval to contract with McNaughton-McKay Electric for electrical distribution upgrades - **$1,512,000.00**
19. **November 15, 2013** – Requesting approval to contract with McNaughton-McKay Electric for Cedar Street pumping station switchgear upgrades - **$505,000.00**
20. **November 15, 2013** – Requesting approval to contract with Lockwood, Andrews, & Newman contract for the implementation of water plant operations - **$1,133,800.00**

21. **November 15, 2013** – Requesting approval to contract with McNaughton-McKay Electrical for Cedar St. Pumping Station Switchgear Upgrades - **$505,000.00**
22. **November 15, 2013** – Requesting approval to contract with McNaughton-McKay Electrical for Water Plant Electrical Distribution Upgrades - **$1,512,000.00**
23. **November 15, 2013** – Requesting approval to contract with Lockwood, Andrews and Newnam for Water Plant Operations implementation - **$1,133,800.00**
24. **November 21, 2013** – Requesting approval to contract with Wachs Valve and Hydrant Services for year one of a three year valve exercising/maintenance agreement - **$60,000.00**
25. **November 21, 2013** – Requesting approval to contract with Wachs Valve and Hydrant Services for Water Valve Exercising/Maintenance Program - **$60,000.00**
26. **November 21, 2013** – Requesting approval to contract with HD Supply Waterwork for water and sewer distribution parts - **$200,000.00**
27. **November 21, 2013** – Requesting approval to contract with HD Supply Waterwork for Water Distribution Parts - **$200,000.00**
28. **December 06, 2013** – Requesting approval to contract with McNaughton-McKay Electrical for outdoor lighting upgrade at water pollution control facilities - **$159,063.00**
29. **December 16, 2013** – Requesting approval to contract with McNaughton-McKay for Water Plant Transformer Upgrade - **$238,306.00**
30. **February 20, 2014** – Requesting approval to purchase of High Voltage Distribution equipment for the Water Plant - **$225,000.00**
31. **February 25, 2014** – Requesting approval to contract with McNaughton-McKay for electrical distribution upgrades at the Water Plant. Amendment to the original contract. Original approval was for $1,528,850 - **$16,850.00**
32. **February 25, 2014** – Requesting approval to contract with Xylem Water Solution for a pump and large motor purchase - **$277,000.00**
33. **February 25, 2014** – Requesting approval to contract with Newkirk for replacement of obsolete electrical equipment at the Water Plant - **$852,000.00**
34. **February 25, 2014** – Requesting approval to contract with Zito Construction for lime residual disposal at the water plant (it was determined that no Treasurer approval was required because the City had requested bids from several firms) - **$1,442,720.00**
35. **March 11, 2014** – Requesting approval to contract with Metron-Farnier for water meter purchases - **$199,645.00**
36. **March 16, 2014** – Requesting approval to contract with Zito Construction for emergency underground utility excavation and repair in the 716 W. Pierson Road area - **$82,500.00**
37. **March 18, 2014** – Requesting approval to contract with Zito Construction for initial water main cut-in at the Water Plant - **$676,300.00 (Verification still needed)**

38. **March 28, 2014** – Requesting approval to contract with Mersino Dewatering for emergency pumping/bypass services for the sewer repair in the 716 W. Pierson Road area - **No cost estimate included in our records**
39. **April 24, 2014** – Requesting approval to contract with Ozonia North America for Water Plant ozone generators - **$55,815.00**
40. **May 30, 2014** – Requesting approval to sell a 72" pipeline - **$3,987,700.00**
41. **August 28, 2014** – Requesting approval to purchase water testing supplies from Idexx Distribution - **$70,000.00**

Subject: Treasury approvals regarding Flint WTP

Howard,

My understanding is that Treasury had to sign off on any purchases in Flint over $50,000 while it was under the control of an Emergency Manager. Is it possible for me to get either a list of purchases with respect to the Water Treatment Plant that were presented to Treasury and whether each was signed off on or rejected? Alternatively, documentation related to each would also be helpful.

Thank you,
Sarah Studley

Subject: Flint water credit

Adam Carlson in Pscholka's office asked if we could have someone walk them through how the proposal would work at 3 p.m. today. This would just be staff, but they want to be prepared for action next week and asked that someone who could walk through it in a pretty detailed fashion be available. Adam, Josiah Kissling, Hassan Beydoun from HRPO expected to attend along with SBO.

Subject: Questions for Sundays call
Attachments: 2.6.2016 Questions for Michigan Officials kd.docx; ATT00001.htm

Erik – thank you for your time and assistance in this important matter. Attached, please find the questions we would like to discuss during tomorrow's call. These questions are only intended to facilitate our discussion; we are not seeking written responses.

Questions for Michigan Officials

Federal Funding

- The Administration recently announced that it would provide $82 million in funding to the State of Michigan to help deal with the situation in Flint. It is our understanding that the money is the State's allotment of FY 2016 Clean Water and Drinking Water State Revolving Fund dollars.
  - Of the $82 million, how much is the State planning to allot to Flint specifically?
  - What is the timeframe under which Flint's allotment can be disbursed?

- Upon the President's emergency declaration for Flint, FEMA made $5 million available for immediate use for items like potable water and testing kits. What is the timeframe for disbursing these federal dollars?

- What is the difference in federal funding that could be made available under the disaster declaration that Michigan sought, and the emergency declaration that the Obama Administration ultimately issued?

- Does the State have an accurate assessment of how much federal assistance would be needed within the next 12 months and for what purpose (please see below)?

State Funding

- Does the State have any funds available from its FY 2015 allotment from the State Revolving Fund that it can dedicate to Flint?

- How much funding does the State of Michigan have available over the next 12 months to work on fixing this problem?

- Is it accurate that to-date, Michigan has provided $37.3 million for Flint relief?

  - Last week the Governor signed a supplemental bill to provide $28 million to Flint to supply free bottled water, faucet filters, and testing kits; place nurses in local schools for monitoring purposes; and enhance WIC services. What is the timeframe for disbursing these funds?

  - In Oct. 2015, the State provided $9.3 million to move Flint back to Detroit's water system, test drinking water, and provide other services. Has this funding already been disbursed?

- There is currently a measure pending in Michigan that would provide another $30 million in order to credit citizens' water/sewer bills. Is this expected to pass? Is this $30 million entirely the state's money or is it tied to a federal program in some way?

Focus of Needed Work

- Is the State's goal to restore the corrosion control system or to replace the lead pipe infrastructure?

- How much actual, on the ground work can be completed in Flint in the next 12 months and what is the cost to complete that work?

- At a briefing for Congressional staff yesterday, the combined federal agencies (HHS, EPA, CDC, USDA, and OASH) said the key issue right now is to restore the corrosion control system. Does the State agree with this assessment?

- What is the most accurate estimate for the cost to fix the corrosion control system?

- Also at that briefing, EPA relayed a non-federal estimate that replacing Flint's lead service lines would cost about $75 million.
    - EPA said Flint contains 14,000 to 15,000 lead service lines (combined public/private figure) and that it would take $3000 to $5000 per line to replace. Does the State agree with this assessment?
    - Does the State have a breakdown of the number of public lines versus private lines?

- What is the most accurate estimate for the cost to fix the water infrastructure in Flint and what type of work is required to fix the water infrastructure? Does this include replacing both public and private pipes?

To: Stanton, Terry A. (Treasury)
Subject: Update

Late breaker Terry. As part of the 16 supplemental that's announced Wednesday (not the 17 budget), governor will be announcing creation of a new fund within treasury set aside for statewide infrastructure. Total of $165 million. Below is how I currently have it written up:

The supplemental request also includes $25 million for infrastructure needs specific to Flint and another $165 million to be set aside for statewide infrastructure needs in a newly created Michigan Infrastructure Fund. Michigan's infrastructure was given a D grade by the American Society of Civil Engineers. The new Michigan Infrastructure Fund will be used to make strategic improvements and provide local governments with financial assistance in making necessary improvements to known high-risk lead and copper service lines.

Subject: Supplemental
Attachments: FY16 Supplemental Recommendations by Agency FINAL pdf

Hey Caleb and Terry,

Ball still bouncing a bit and wanted to make sure I looped both of you in on some items that will be part of a new FY 16 supplemental that is announced on Wednesday along with the 2017 budget recommendation . I just emailed Terry reference a new statewide infrastructure fund within Treasury with a recommended $165 million set aside for pipe replacement for communities in need across the state. Another $25 million on top of that specific to Flint for pipe replacement. Other supplemental items of interest for you two are listed below. Note $50 million in transition funding within Treasury...Terry, I believe this is to continue to keep DPS afloat while the longer term solution recommended by the governor is worked on by the Legislature. Note the $50 million reserve within DTMB for Flint....Caleb, this is reserved funding for Flint to be used if needed this fiscal year. All Flint stuff is going through Bill Nowling, so I don't think you two will need to speak to it, just wanted you to be aware that what's in your budget from the supplemental. Thanks guys.

City of Flint
Consumption and Consumer Use Credit Program
February 8, 2016

1. Introductions

2. Discuss implementation details required to execute the program

   a. Broad Parameters
      i. Relief from April 2014 to April 2016
      ii. Water only
      iii. Both fixed and variable portions of the water bill
      iv. 65 percent reduction for residential, 20 percent reduction for commercial

Res comm
- 65+A
- proleptl

   b. Implementation Details
      i. How will we handle "start/stop" i.e., customers that have left system
      ii. How will delinquent accounts be handled?
      iii. Resumption of collection enforcement
      iv. Timing of future bill credit for current ratepayers
      v. Are late fees included?
      vi. Timing of the distribution of state dollars to Flint
      vii. Other?

3. Underlying Cash Flow of the Flint water and sewer system
   a. 18 month cash flow without the Credit program
   b. With the Credit program
   c. Options to address potential cash flow deficits

4. Next Steps and Timing

Fred,
Attached is the latest cash flow. The major difference is in the October disbursements in that it includes a $7 million bond payment to KWA There were also some adjustments in other disbursement accounts. Forgive some of the highlights and lines. I have marked it up a little.

Please see attached. Version 2

CITY OF FLINT
WATER FUND
18-MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH DECEMBER 31, 2016
Actual Activity Reported through December 31, 2015

Assumptions Outlined Below

REVENUE ASSUMPTIONS:
1 User Charges for the period January 2015 December 2015 were based on YTD billing activity and collection rates.
2 Rate increase assumptions effective March 1 2015 and July 1, 2016 may be modified in the grey box below
3 Restoring the FY16 Master Fee Schedule rates per the amended preliminary injunction order would result in a rate increase of approximately 23% and would impact collections beginning in March 2016.
4 If the Master Fee Schedule rates are restored in FY16, then any rate increase assumption for FY17 must also include 23%.
5 Issuance of shut off notices and disconnection of services has a tremendous impact on the City's ability to enforce payment for services rendered In August prior to the Preliminary Injunction Order the City's average monthly collection rate was 98%. The average collection rate for the period August through December 2015 has fallen to 83%, with a low point in October of 70%

EXPENDITURE ASSUMPTIONS:
1 Expenditure activity for the period January 2016 June 2016 reflect amounts funds as of December 31 2015 divided equally over the remaining 6 months of the fiscal year
2 Expenditure activity for the period July 2016-December 2016 assumes the FY17 budget projection as included in the Blended FY16 & FY17 Budget as adopted by emergency manager order
3 The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17 An amount for illustrative purposes is shown

	Until 6/30/2016	After 7/1/2016
Average Monthly Collection Rate	83%	88%
Rate Increase	0%	0%
DWSD Water Purchases	$ 3,333,333	

- Regarding Rate Increases:
FY15 has been set such that an increase would impact bills beginning in March 2016
Any rate increase assumption for FY17 must also include any rate assumption made for FY16
For Example FY16 restoration of Master Fee Schedule equals approximately 17% Budgeted FY17 projection of 5% must be covered as 22%

Kurt...

Attached is the piece we discussed briefly this afternoon. We crafted this as a run-up to possible SoS pieces.

Also, below is some information I am going to be sharing with a writer with Pew Charitable Trust's "State and Local Fiscal Health" section shortly.

The unfortunate situation in Flint is not an indictment of Public Act 436. Discussions about the possible development of a Flint-area/Genesee County water system had been on-going since the early 2000's, long before a manager was appointed (Dec. 2011). Additionally, it was not a situation where elected officials (Mayor & City Council) wanted to utilize one system with the EM reversing course. All involved in the decision-making process agreed KWA was the best long-term option for the City of Flint. Unfortunately, once the City was cut-off from DWSD, the correct anti-corrosives (or amount of anti-corrosives) were not added to the water as it was treated, which allowed lead to leach into the system.

As for DPS, emergency manager statutes have had less success in addressing the financial emergency there, than in municipalities. A significant decline in enrollment over the last decade has made the situation very difficult. That's why Governor Snyder has proposed a comprehensive restructuring of education in Detroit, to address both academic and financial struggles. The plan would get DPS out from under crushing debt and drive academic success at all schools in Detroit. The MI Legislature has begun hearings on the Governor's proposal.

As for municipalities, there has been real progress: In mid-2015, six cities in Michigan had emergency managers. With the departure of Brad Coulter as manager in Lincoln Park in December, **no Michigan City** is being run by an emergency manager for the first time in some 15 years. In those communities, deficits have been eliminated, sound accounting practices have been restored, and advisory boards are in place to ensure a smooth transition to full home rule.

Certainly, the City of Detroit is a success story. There is work yet to do, but, for the first time in many years, optimism about Detroit's future has returned. Another success story is Wayne County's decision to address critical financial issues through cooperative county leadership and avoid further State intervention.

RICK SNYDER
89 (Rev 11-13) GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

R. NICK KHOURI
STATE TREASURER

State of the State
2015 Treasury/Local Government Highlights
DRAFT

Municipalities

- We know some of our local communities have experienced financial difficulties over the years. In some extreme cases, it has been necessary for the State to step in to address financial emergencies. Today, we can report real progress: Eighteen months ago, six cities in Michigan had emergency managers. With the departure of Brad Coulter as manager in Lincoln Park in December, **no Michigan City** is being run by an emergency manager.

- In all of those communities, deficits have been eliminated, sound accounting practices have been restored, and advisory boards are in place to ensure a smooth transition to full home rule. We look forward to a day when state oversight in these communities is no longer necessary.

- The City of Detroit is a success story. Yes, there is a lot of work yet to do, but, for the first time in many years, optimism about Detroit's future has returned. (insert positive data telling the Detroit success story)

- Another success story is the decision by Wayne County to address critical financial issues through cooperative county leadership and avoid further State intervention. Our preferred model in situations like this, is to work collaboratively with local communities and leaders to overcome local financial challenges with limited state intervention.

- In the coming year, we will be working to gather data from communities throughout Michigan in order to develop a proactive early warning system to identify critical factors of financial stress. We know other communities in Michigan may run into financial difficulties. Our goal is to act sooner when certain factors arise, in cooperation with local communities and interested participants.

- As an extra boost to communities facing serious financial challenges, the legislature appropriated $5 million in fiscal year 2016 to provide special funding to our hardest hit communities as they provide and support critical services.

Schools

- State involvement continues in five Michigan school districts (Detroit, Highland Park, Muskegon Heights, Pontiac, & Benton Harbor) and we look forward to the same success in restoring local management as quickly and efficiently as possible.

- The Office of School Review and Accountability (within Treasury) continues to work with several school districts experiencing potential financial stress to determine whether an Enhanced Deficit Elimination Plan (EDEP), which provides for additional financial monitoring, oversight and on-site review of business office practices, can address district financial difficulties before they become full-blown financial emergencies.

Subject:	FWICC Priorities, Objectives, Tasks and Updated Committee List
Attachments:	Flint Water Interagency Coordinating Committee Subcommittees.docx; FWICC Objectives Tasks.doc

Greetings,

Please see the attached updated FWICC subcommittees and the subcommittee worksheets. Each subcommittee can provide its own **priorities** and **objectives**. You may use, eliminate or expound upon the suggested **tasks** after you have identified your subcommittee's priorities. Each subcommittee has three priority sheets and can add more if you choose.

The goal is to have a first draft priority sheet from each committee for discussion at this Friday's meeting. Please feel free to email FWICC co-chairs Harvey Hollins or Capt. Kelenske if you have any questions.

Lastly, we are asking that each subcommittee co-chair email their priority list to me no later than 10am on Thursday.

Thank you,
~Stacie

Flint Water Interagency Coordinating Committee Subcommittees

Incident Action Plan Subcommittee
Chair - Capt. Chris Kelenske
Harvey Hollins

Water Quality Subcommittee
Chair – Keith Creagh
Nick Lyon
Dr. Laura Sullivan
Dr. Marc Edwards
Dr. Yanna Lambrinidou
Mark Valacak
EPA

Suggested Tasks

- ✓ Response tactics and flow process
- ✓ Testing
  - Lead and Copper
  - Other Contaminants and Disease Transmission
- ✓ Monitoring and reporting entry of contagions

Water Infrastructure Integrity Subcommittee
Chair – Keith Creagh
Jim Koski
Dr. Laura Sullivan
Dr. Marc Edwards
Jamie Curtis
Natasha Henderson
American Water Works Association
EPA

Suggested Tasks

- ✓ Reliability Study
- ✓ Infrastructure upgrade/replacement
- ✓ Lead Line Replacement

KWA Subcommittee
Chair – Khouri
Keith Creagh
Harvey Hollins
Natasha Henderson
Jamie Curtis
Larry Steckelberg
EPA

Suggested Tasks

- ✓ Benefit-Cost Analysis
- ✓ Transition
- ✓ Safety
- ✓ Flint Water Treatment Plant Upgrade
- ✓ Rate Structure

Health and Education Subcommittee
Chair - Nick Lyon
Mayor Karen Weaver
Dr. Mona Hanna-Attisha
Dr. Lawrence Reynolds
Superintendent Brian Whiston
Deputy Superintendent Kyle Guerrant
Sue Moran
Dr. Eden Wells
Dr. Jane Turner
Stan Bien (WIC)
Dawn Sweeney (SNAP)

Suggested Tasks

- ✓ Health and Safety Plan
- ✓ Responder Medical Plan
- ✓ Nutrition
- ✓ Post Exposure Actions
- ✓ Pre-K and Secondary education materials

Policy Subcommittee
Chair – Mike Zimmer
Nick Khouri
Larry Steckelberg
Dr. Marc Edwards
Keith Creagh
Nick Lyon
Dr. Lawrence Reynolds
Mark Valacak

Suggested Tasks

- ✓ Intra-agency Protocols
- ✓ Statewide Policy
- ✓ Lead and Copper Rule Change Recommendations

Communication Protocols and Transparency Subcommittee
Chair – Hollins
Nick Lyon
Meegan Holland
Melanie Brown

Suggested Tasks

- ✓ Public education and awareness

Information for Flint Water Interagency Coordinating Committee Subcommittees

Establishing Initial Incident Priorities

Clear initial priorities are important to establishing unity of effort early in the incident response process. When the members of the team clearly understand the intent behind instructions, they are equipped to act decisively and make better decisions. While many things vie for attention, especially in the immediate aftermath of a disaster or emergency, not everything can be a priority. The axiom that if everything is a priority, then nothing is a priority clearly applies to incident management.

Objectives

Good objectives:

- Are concise and stated in the form of a command
- Begin with an action verb (but not "continue" or "maintain")

Tasks

Tasks define specific actions to be performed to achieve a planned outcome. Tasks specify who, what, where, and when for implementing strategies to achieve incident objectives. Tasks describe the deployment and direction of resources, based on the strategy to accomplish the incident objectives.

In this case, tasks or tactics can be developed by those personnel at lower levels who will be implementing the priorities and objectives.

Steckelberg, Larry (TREASURY)

To: Jody Lundquist
Subject: my notes from the meeting

Jody,

We can talk in the morning, but from my notes, I have the following on water bill relief that need to come first:

1. Engage BSA in developing the implementation plan in their billing system to provide the 65/20 relief
2. Find a way to pay the costs for BSA work (Treasury)
3. Determine methodology and cost for pulling debts back from county to be reworked in light of 65/20 relief. On this one, let me know if this hits any snags. I

We also have to figure out how to handle starts/stops, the legal issues, penalties, and reimbursements but it all depends on the ability of BSA to work their system to generate billing adjustments. I suspect we will know a lot more about this once they get started.

My notes indicate you are updating water and sewer cash flow with the latest information including the KWA connection costs.

Sally

Flint is going to take a bigger part of my time

We need to think about what this means for our internal efficiency and employee engagement projects

Clearly, I'll have a lot less time and more will fall to you and Deb

Not my choice, but nothing I can do

Subject: FWICC Priorities, Objectives, Tasks and Updated Committee List

Greetings,

Please see the attached updated FWICC subcommittees and the subcommittee worksheets. Each subcommittee can provide its own **priorities** and **objectives**. You may use, eliminate or expound upon the suggested **tasks** after you have identified your subcommittee's priorities. Each subcommittee has three priority sheets and can add more if you choose.

The goal is to have a first draft priority sheet from each committee for discussion at this Friday's meeting. Please feel free to email FWICC co-chairs Harvey Hollins or Capt. Kelenske if you have any questions.

Lastly, we are asking that each subcommittee co-chair email their priority list to me no later than 10am on Thursday.

Thank you,
~Stacie

Subject: RE: Question from Pew please

Stephen...

For background, I thought I would share the link for the Local Financial Stability and Choice Act, PA 436 of 2012.
http://www.legislature.mi.gov/(S(f5uawwsqvl0pse5k32cqdrpn))/mileg.aspx?page=GetObject&objectname=mcl-act-436-of-2012

On Treasury's website, you can also find "how a financial emergency works":
http://www.michigan.gov/treasury/0,4679,7-121-1751_51556-198770--,00.html

The most recent updates on local units under some piece of PA 436.
http://www.michigan.gov/treasury/0,4679,7-121-1751_51556_64472---,00.html

The unfortunate situation in Flint is not an indictment of Public Act 436. Discussions about the possible development of a Flint-area/Genesee County water system had been on-going since the early 2000's, long before a manager was appointed (Dec. 2011). Additionally, it was not a situation where elected officials (Mayor & City Council) wanted to utilize one system with the EM reversing course. All involved in the decision-making process agreed KWA was the best long-term option for the City of Flint. Unfortunately, once the City was cut-off from DWSD, the correct anti-corrosives (or amount of anti-corrosives) were not added to the water as it was treated, which allowed lead to leach into the system.

As for DPS, emergency manager statutes have had less success in addressing the financial emergency there, than in municipalities. A significant decline in enrollment over the last decade has made the situation very difficult. That's why Governor Snyder has proposed a comprehensive restructuring of education in Detroit, to address both academic and financial struggles. The plan would get DPS out from under crushing debt and drive academic success at all schools in Detroit. The MI Legislature has begun hearings on the Governor's proposal.

As for municipalities, there has been real progress: In mid-2015, six cities in Michigan had emergency managers. With the departure of Brad Coulter as manager in Lincoln Park in December, **no Michigan City** is being run by an emergency manager for the first time in some 15 years. In those communities, deficits have been eliminated, sound accounting practices have been restored, and advisory boards are in place to ensure a smooth transition to full home rule.

Certainly, the City of Detroit is a success story. There is work yet to do, but, for the first time in many years, optimism about Detroit's future has returned. Another success story is Wayne County's decision to address critical financial issues through cooperative county leadership and avoid further State intervention.

Finally, I am not aware of any thoughts, discussions, etc. about amending PA 436.

I hope this is helpful.

Terry

Subject: Question from Pew please

Terry, you have helped us before with answering questions about Michigan's EM system. I wanted to reach out to you again. My boss has asked me to put together this week a brief report (5 pages) on the Michigan EM system in light of current news events in Flint and Detroit public schools. The idea is to explain to people what the EM system is and link to our previous work. I guess I need to ask you a few obvious questions:

1. What, if anything, do the setbacks in Flint and Detroit schools say about the effectiveness of the EM system?
2. Will Michigan now re-evaluate whether the EM system is worth keeping?
3. Depending on how you answer #1 and #2: Is the EM system something other states should consider implementing to assist distressed local governments?

Thanks for your help. I am around all week.

Subject: Re: emergency managers

I would agree schools are more challenging because of the 'academic side' and the way they are funded... While it may be a pretty low bar in terms of gauging success I would say Muskegon Hts & HPS could be mentioned... The schools have stabilized. There was not the disruption associated with a dissolution. There is community support. The reason we have had to keep EMs place is somewhat tied to the fact they are psa districts. Pontiac schools has been a 'success'. Again, when we first got involved they were a week or two from making payroll. That situation involves a consent agreement not a EM. The 'jury' is still out on BHS. DPS is in a category by itself.

> Not in my view. The school districts that have had EFMs/EMs (Detroit, Highland Park, Inkster, and Muskegon Heights) have not fared well. Inkster was dissolved and the other school districts have had multiple EMs.
>
> Prior to 2011, I would have said the reason was that Act 72 drew an artificial distinction between fiscal matters and instruction/academics and granted EFMs authority only over the former. However, under both Acts 4 and 436, EMs have had control over both fiscal matters and

instruction/academics and it appears to have made little difference in regards to lack of long-term success. It may be that because school finances are tied so closely to enrollments, that once enrollments begin a downward spiral, even an EM cannot cut enough, or quickly enough, to keep up.

Subject: RE: emergency managers

Here are three possibilities:

1. Village of Three Oaks. The EFM was appointed on December 1, 2008 and exited after only one year. The EFM resolved all financial issues (including cash flow and accounts payable), while working cooperatively with local officials. Indeed, so positive was the working relationship between the EFM and Village officials that for a number of years after the EFM's departure, Village officials invited her back for annual events.

2. City of Detroit. The EM was appointed on March 25, 2013 and was succeeded by a FRC on December 9, 2014, after guiding the City through the largest municipal bankruptcy in U.S. history in only 18 months. In doing so, the EM addressed three primary issues: first, a cash crisis that was projected to reach a cumulative deficit in excess of $100.0 million by June 30, 2013; second, recurring general fund deficits (the City had not experienced a positive year-end fund balance since fiscal year 2004); and third, long-term liabilities, including unfunded actuarial accrued pension liabilities and other post-employment benefits, that exceeded approximately $14 billion as of June 30, 2012.

3. City of Hamtramck. The EM was appointed on July 1, 2013 and was succeeded by an RTAB on December 18, 2014. The EM addressed general fund operating deficits. In addition, unfunded liabilities (pension and other post-employment benefits) posed significant obstacles to long-term fiscal health. Actuarial evaluation had indicated the pension plan had $98.4 million in actuarial accrued liabilities, but only $55.8 million in pension assets (i.e., a funding ratio of only 56.8 percent).

I'm testifying tomorrow on DPS, and I know the topic of EM's is going to come up

Can you give me one or two great success stories of locals or schools with an EM?

When has it worked really well?

Why?

Emergency Manager Accomplishments

Receivership Communities – Emergency Manager Option
Source: Emergency Manager Exit Letters

Allen Park – Exit Date - September 24, 2014

- The city's structural and cumulative deficits were eliminated and FY14 ended with a positive General Fund balance of $3.2M.
- Employment contracts and/or Emergency Manager (EM) Orders were in place with all bargaining units. Additional cost savings had resulted from the implementation of a 10% reduction in pay for active employees, the elimination of vacant positions, the consolidation of healthcare plans from five to two), an increase in co-pays and deductibles, and the implementation of other pension related changes. These savings amounted to approximately $54M.
- The establishment of the Allen Park Advisory Committee to assist with engaging the community and the development of a Visionary and Strategic Plan.

Benton Harbor – Exit Date - March 10, 2014

- The city's structural and cumulative deficits were eliminated and FY14 ended with a positive General Fund balance of $2.3M.
- The city met its recommended pension contribution during FY14 for the first time in 10 years.
- Through the use of Data Driven Policing, crime had fallen while arrests and closure rates had increased.

Ecorse – Exit Date - April 26, 2013

- The city eliminated a $14.6M cumulative deficit and a $5M structural deficit. Also, the city reduced operating costs by $4.3M and increased revenue by $2.3M.
- The city reorganized several city departments to combine the Police and Fire departments into a Public Safety Department, and privatizing Emergency Medical Services. Included in the reorganization plans are the Public Works Department, the Controller's Office, and the Building Department.
- The city worked with State Legislature to develop special legislation that allowed the city to re-enter the bond market to borrow money to pay off outstanding judgment levies against the city. The special legislation increased the city's bond rating from a "junk" rating to an "A" rating.

Flint – Exit Date - April 28, 2015

- The Water Fund deficit was addressed and the Water Fund is solvent but not at the level indicated by city policy.
- The $7M General Fund deficit was eliminated by June 30, 2015, through a loan authorized by the Emergency Loan Board.
- Long-term liability costs had been reduced significantly. Approximately, $850M in OPEB liabilities have been reduced to $240M, and new employees were given a contribution towards future healthcare costs at retirement instead of the promise of retiree healthcare.

Hamtramck – Exit Date - December 18, 2014

- Savings were made in healthcare for current employees and retirees, and by eliminating non-contracted payments to healthcare retirement and savings accounts. In addition, drastic pay cuts were negotiated with both union and department heads at the city that resulted in substantial savings. Included was the elimination of minimum staffing requirements and some services, such as EMS, which will allow the city more flexibility in managing its financial and personnel resources. These cuts totaled $1M.
- Jobs previously outsourced were brought back into City Administration, including the City Controller and the City Assessor.
- The sale of surplus vacant land and tax reverted properties totaled $358k.

Lincoln Park – Exit Date - December 21, 2015

- In July 2014, the city had an unassigned General Fund deficit of $1,007,245 for the fiscal year ending as of June 30, 2014. The unassigned fund General Fund balance, upon the EM departure, is a positive $186,901.
- A contract with firefighters was renegotiated to eliminate minimum manning and place restrictions on the number of staff per day that can take time off. Restrictions on sick time were also put in place to stem sick time abuse. As a result, overtime dropped from over $600k per year to a budgeted $50k in FY16. In addition, the Fire Chief and Fire Marshall positions were combined for a payroll savings of $65k per year.
- In FY15, the city spent $4.3M in retiree health insurance. With the move to a monthly stipend, in FY16, the city was spending $600k per year on the retiree healthcare. Of the savings, $3M per year was shifted to funding the pensions systems while the remaining $700k provided cost savings to the General Fund, Water Fund, and Road funds.

Pontiac – Exit Date - August 16, 2013

- With the implementation of healthcare and benefits reform by consolidating 87 benefit plans into one, the city no longer pays retiree health insurance.
- Selling excess capacity in the sewage treatment plant to Oakland County for $55M allowed the city to significantly reduce its debt of $87M and eliminate its structural deficit of $9.2M.
- By creating a regional fire department (merger with Waterford Township), the cost of fire services had been reduced by $3.6M annually.
- General Fund expenditures were reduced by nearly $30M from six years prior by closing the defined-benefit pensions systems, contracting nearly all city services, eliminating money losing enterprise activities, consolidating departments, and hiring qualified employees.
- The city contracted with the Oakland County Sheriff's office for police services, which saved the city $2.2M annually.

Dave:
I've attached an email from March 2015, which was sent by the Genesee County Health Department to a number of officials from the city and the state regarding an outbreak of Legionnaires' disease and the potential connection to the Flint River.
I've also requested comment form the state treasurer's office and Jerry Ambrose in an effort to determine whether this information was ever shared by the emergency manager – either with treasury, the governor's office, or other state agencies.
I wanted to see if you would want to comment on the fact that the governor's appointee had knowledge of this outbreak and possible connection to the Flint River 11 months ago.
Thanks for help,

Subject: Information Request and Documentation

Hello everyone,

The Genesee County Health Department has made several written and verbal requests for specific information since October, 2014, including a Freedom of

Information Act Request on January 27, 2015. The information still has not been received and the city's lack of cooperation continues to prevent my office from performing our responsibilities.

The Genesee County Health Department has the responsibility to conduct illness investigations and consider all potential sources, this is not optional. In 2014, Genesee County experienced a significant increase of confirmed Legionella illnesses relative to previous years. Legionella can be a deadly, waterborne disease that typically affects the respiratory system.

The increase of the illnesses closely corresponds with the timeframe of the switch to Flint River water. The majority of the cases reside or have an association with the city. Also, McLaren Hospital identified and mitigated Legionella in their water system. This is rather glaring information and it needs to be looked into now, prior to the warmer summer months when Legionella is at its peak and we are potentially faced with a crisis.

This situation has been explicitly explained to MDEQ and many of the city's officials. I want to make sure, in writing that there are no misunderstandings regarding this significant and urgent public health issue. The Trihalomethane issues "pale in comparison" to the potential public health risks of Legionella.

I am submitting the attached FOIA request again and requesting that the legal obligations of the request are met. If the information is not available, please let me know. In the past, I have requested to meet with the water plant staff and MDEQ regarding Legionella concerns. I did not receive a response from the water plant staff and MDEQ declined. I think it is in the best interest for all stakeholders that we meet and discuss the issues.

Respectfully,

Jim

Hi Wayne,

I hope you are enjoying your last days before "retirement".
After our call last week, we thought it would be a good idea to send you a few slides (attached) covering the areas in which we think EY could be helpful to the Flint situation:

1. **Disaster recovery services:** assisting in oversight (funds spent appropriately), grant and contract management, compliance, documentation, reimbursement process and loss prevention
2. **Feasibility of infrastructure solution:** teaming up with the engineering firm to identify and assist in the selection of viable projects to address emergency and performing the financial analysis
3. **Construction management:** conducting a risk assessment to identify issues, develop process controls for construction project, develop project status and progress reviews
4. **Financial analysis and projections:** assist in identifying alternative funding sources, modeling the financial impact on Flint's financial situation and completing a rate analysis

Please feel free to share this document with others at Treasury and the other departments and let us know when is a good time to connect again over the phone or in person.

Have a great weekend.

Juan

Subject: FWICC Policy Subcommittee

Good Morning:

I have been asked to chair the FWICC Policy Subcommittee on which you have all been selected to serve.

Our subcommittee has been assigned three general priorities/tasks:

1) Interagency Protocols
2) Statewide Policy
3) Lead and Copper Rule Change Recommendations

Of these, I think the Lead and Copper Rule Change Recommendations is the more straightforward - although certainly not the simplest. Interagency Protocols may prove more multifaceted as it could include protocols between state agencies, between state and local agencies, and between state and federal partners. The last, Statewide Policy, is at this point a holding category that could review implementation of policies requested by other work groups or items of interest to the committee members.

We have been asked to get our finalized list of priorities to Harvey by Thursday morning at 10:00. Given the short time frame and the fact that many of you serve on multiple subcommittees, at this point I am asking that you get back to me by COB tomorrow (Wednesday) indicating whether you agree with my reading of our assignments or would like any changes or modifications. Also, if there are any items on our list that are of particular interest to any of you, please note that.

I will be having my assistant, Diane Burton, reach out to you so that we can set up a telephone conference early next week to discuss scoping out our priorities and assign specific tasks, metrics, and timelines.

I look forward to working with all of you.

Mike

KAREGNONDI WATER AUTHORITY FINANCING CONTRACT

THIS CONTRACT, dated as of August 1, 2013, by and among the Karegnondi Water Authority, a municipal authority and public body corporate of the State of Michigan (hereinafter referred to as the "Authority"), the City of Flint in the County of Genesee and the County of Genesee (collectively, the "Local Units" and each a "Local Unit").

WITNESSETH:

WHEREAS, the Authority has been incorporated under the provisions of Act No. 233, Public Acts of Michigan, 1955, as amended (hereinafter referred to as "Act 233"), for the purposes set forth in Act 233; and

WHEREAS, the Authority will acquire, construct and operate a water supply system to be known as the Karegnondi Water Supply System that provides untreated water to the Local Units, each of which is a constituent municipality of the Authority; and

WHEREAS, it is immediately necessary and imperative for the public health and welfare of the present and future residents of each of the Local Units that a certain water supply system, as more fully described on Exhibit A hereto, together with all necessary interests in land, appurtenances and attachments thereto (the "System") be acquired, installed and constructed; and

WHEREAS, plans and an estimate of cost of the System have been prepared by the Authority's consulting engineers, Wade Trim (the "Consulting Engineers"), which said estimate of aggregate cost totals an amount not to exceed $300,000,000; and

WHEREAS, each of the Local Units is desirous of having the Authority acquire and own the System in order to continue to operate the System in order to furnish the Local Units with untreated raw water; and

WHEREAS, the parties hereto have determined that the System is essential to the general health, safety and welfare of each of the Local Units; and

WHEREAS, the Authority and each of the Local Units are each agreeable to the execution of this Contract by and among themselves which provides, among other things, for the financing of all or a portion of the cost of the System; and

WHEREAS, this Contract contemplates the issuance of bonds in one or more series by the Authority to pay all or part of the costs of the System; and

MILLER CANFIELD PADDOCK AND STONE PLC

WHEREAS, each of the Local Units has or will approve and authorize the execution of this Contract by resolution of its governing body; and

WHEREAS, each of the Local Units has published or will publish, individually or jointly, a notice of intention to enter into this Contract in a newspaper of general circulation in the territory encompassed by each Local Unit; and

WHEREAS, this Contract will become effective for each Local Unit upon expiration of a period of forty-five (45) days following publication by each Local Unit of its notice of intention without filing of a petition for referendum on the question of its entering into this Contract, or if such referendum election be required, then upon approval by the qualified electors of the Local Unit.

NOW, THEREFORE, IN CONSIDERATION OF THE PREMISES AND THE COVENANTS MADE HEREIN, THE PARTIES HERETO AGREE AS FOLLOWS:

SECTION 1 The Authority and the Local Units hereby approve the acquisition, construction and operation of System, together with all necessary interests in land, appurtenances and attachments thereto.

SECTION 2 Each of the Local Units hereby consents to the use by the Authority and any parties contracting with the Authority of the public streets, alleys, lands and rights-of-way in each Local Unit for the purpose of constructing, operating and maintaining the System including any improvements, enlargements and extensions thereto.

SECTION 3 The System is designed to provide and transport untreated raw water to each of the Local Units and the System is immediately necessary to protect and preserve the public health.

SECTION 4 The Authority and each of the Local Units hereby approve and confirm the plans for the System prepared by the Consulting Engineers and the total estimated cost thereof in the sum of not to exceed $300,000,000. Said cost estimate includes all surveys, plans, specifications, acquisition of property for rights-of-way, physical construction necessary to acquire and construct the System, the acquisition of all materials, machinery and necessary equipment, and all engineering, engineering supervision, administrative, legal and financing expenses necessary in connection with the acquisition and construction of the System and the financing thereof.

SECTION 5. The Authority shall not enter into any final contract or contracts for the acquisition and construction of the System if such contract price or prices will be such as to cause the actual cost thereof to exceed the estimated cost as approved in Section 4 of this Contract unless the Authority has sufficient funds to cover such excess, or, each of the Local Units, by resolution of its respective legislative body, (a) approves said increased total cost, and (b) agrees to pay such excess over the estimated cost, either in cash or by specifically authorizing the maximum principal amount of bonds to be issued, as provided in Sections 9 and 14 of this Contract, to be increased to an amount which will provide sufficient funds to meet said increased cost, and approves a similar increase in the installment obligations of each Local Unit, if any, pledged under the terms of this Contract to the payment of such bonds.

MILLER CANFIELD PADDOCK AND STONE P.L.C.

SECTION 6 The System shall be acquired and constructed by the Authority substantially in accordance with the plans and specifications therefor approved by this Contract. All matters relating to engineering plans and specifications, together with the making and letting of final construction contracts, the approval of work and materials thereunder, and construction supervision, shall be in the control of the Authority. All acquisition of sites and rights-of-way, if any, shall be done by the Authority. Each Local Unit's share of the costs of such acquisition in each Local Unit, if any, shall be paid from the Local Unit's share of bond proceeds and, in addition, any costs incurred by any Local Unit in connection with the acquisition or construction of the System, including, but not limited to, engineering expenses, shall be promptly reimbursed to the Local Unit by the Authority from the proceeds of the Authority's Bonds with the approval of the Authority board.

SECTION 7 The Authority shall operate, maintain and administer the System for and on behalf of the Local Units. The System shall be maintained in good condition and repair. The Authority shall provide insurance as part of its obligation to operate the System. The Authority will furnish reports to the Local Units at periodic intervals corresponding with the reporting periods of the Local Units in detail sufficient to inform the Local Units of the operations of the System and to permit the Local Units to meet their financing requirements hereunder.

SECTION 8 To provide for the construction and financing of the System in accordance with the provisions of Act 233, the Authority shall take the following steps:

(a) The Authority will take steps to adopt a resolution or resolutions providing for the issuance of its bonds in one or more series in the principal amount of not to exceed $300,000,000 (except as otherwise authorized pursuant to Section 5 of this Contract) to finance all or part of the costs of the System. Said bonds shall mature serially or be subject to mandatory sinking fund redemption as authorized by law, and shall be secured by the contractual obligations of each Local Unit in this Contract. After due adoption of the resolution or resolutions , the Authority will take all necessary legal procedures and steps necessary to effectuate the sale or sales and delivery or deliveries of said bonds.

(b) The Authority shall take all steps necessary to take bids for and enter into and execute final acquisition and construction contracts for the acquisition and construction of the System as specified and approved hereinbefore in this Contract, in accordance with the plans and specifications therefor based on the plans as approved by this Contract.

(c) The Authority will require and procure from the contractor or contractors undertaking the actual construction and acquisition of the System necessary and proper bonds to guarantee the performance of the contract or contracts and such labor and material bonds as may be required by law.

(d) The Authority, upon receipt of the proceeds of sale of each series of bonds, will comply with all provisions and requirements provided for in the resolution authorizing the issuance of such series of bonds and this Contract relative to the disposition and use of the proceeds of sale of such series of bonds.

MILLER CANFIELD PADDOCK AND STONE PLC

(e) The Authority may temporarily invest any bond proceeds or other funds held by it for the benefit of each Local Unit as permitted by law and investment income shall accrue to and follow the fund producing such income. The Authority shall not, however, invest, reinvest or accumulate any moneys deemed to be proceeds of the bonds pursuant to §148 of the Internal Revenue Code of 1986, as amended, and the applicable regulations thereunder (the "Code"), in such a manner as to cause the bonds to be "arbitrage bonds" within the meaning of Code § 103(b)(2) and §148, or otherwise as may jeopardize the tax status of the bonds

SECTION 9. Each Local Unit irrevocably covenants and agrees to pay to the Authority its Local Unit share of each series of bonds to be issued by the Authority pursuant to this Contract. The share of each Local Unit shall be determined as set forth on Exhibit B hereto.

The cost of the System to be financed with the issuance of bonds of the Authority in the aggregate principal amount of not to exceed $300,000,000 shall be paid in annual installments on the dates and in the amounts as established in the Authority's bond authorizing resolution.

Each Local Unit covenants that it will make or cause to be made its payments as required by this Contract not less than 3 days prior to the dates on which the Authority is required to make payments on the bonds described herein to the transfer agent for the bonds.

It is understood and agreed that the bonds of the Authority hereinbefore referred to will be issued in anticipation of the above contractual obligation, with principal maturities on the dates established by the Authority corresponding to the principal amount of the installments then coming due, and there shall also be paid in addition to said principal installments, on such dates as shall be determined by the Authority, commencing on such date as determined by the Authority, as accrued interest on the principal amount remaining unpaid, an amount sufficient to pay all interest at an interest rate not to exceed ten percent (10%) per annum, due on the next succeeding interest payment date on the bonds from time to time outstanding.

It is further understood and agreed that the bonds of the Authority may be secured by a debt service reserve fund or funds to provide additional security for the timely payment thereof if the Authority determines, in consultation with its financial advisor, that the provision of such debt service reserve fund or funds is advisable. If the bonds of the Authority are secured by a debt service reserve fund or funds, each Local Unit covenants and agrees to provide for the replenishment of such debt service reserve funds as described in Exhibit B.

From time to time as the Authority is billed by the transfer agent for its services for the bonds, and as other costs and expenses accrue to the Authority from handling of the payments made by the Local Units, or from other actions taken in connection with the System, the Authority shall promptly notify the Local Units of the amount of such paying agent fees and other costs and expenses, and the Local Units shall promptly remit to the Authority sufficient funds to meet such fees and other costs and expenses in the proportions hereinabove provided to the extent sufficient funds are not available to the

MILLER, CANFIELD PADDOCK AND STONE P.L.C.

Authority. Each Local Unit warrants and represents that the amount of its obligations under this Contract, when taken together with other indebtedness of such Local Unit, will not cause its obligations under this Contract to exceed any constitutional, statutory or charter debt limitation applicable to such Local Unit.

The Authority shall, within thirty (30) days after the delivery of each series of the bonds of the Authority hereinbefore referred to, furnish each Local Unit with a complete schedule of installments of principal and interest thereon, and the Authority shall also at least sixty (60) days prior to each principal and/or interest installment due date, advise the Local Units, in writing, of the exact amount of principal and interest installments due on each series of bonds on the next succeeding bond principal and/or interest due date, and payable on the first day of the month immediately preceding, as hereinbefore provided. Failure of the Authority to notify the Local Units of any such payment shall not relieve the Local Units of the obligation to make such payment.

If any principal installment or interest installment is not paid when due, the amount not so paid shall be subject to a penalty, in addition to interest, of one percent (1%) thereof for each month or fraction thereof that the same remains unpaid after the due date.

SECTION 10. Each Local Unit states its intention to pay its obligations under this Contract from sources of moneys as are provided by Act 233 and applicable law, including the levy and collection of rates and charges to users of its respective water supply system for operating and maintaining its system provided by each Local Unit to customers in the Local Unit. Nevertheless, pursuant to the authorization contained in Act 233, each Local Unit hereby irrevocably pledges its full faith and credit for the prompt and timely payment of its obligations pledged for bond payments as expressed in this Contract, and, subject to the provisions of the last sentence of this paragraph, shall each year, commencing with the first tax levy after issuance of the bonds by the Authority, levy an ad valorem tax on all the taxable property in the Local Unit in an amount which, taking into consideration estimated delinquencies in tax collections, will be sufficient to pay such obligations under this Contract becoming due before the time of the following year's tax collections. Such annual tax levies shall be subject to applicable constitutional, statutory, and charter tax limitations. Nothing herein contained shall be construed to prevent a Local Unit from using any, or any combination of, the means and methods provided in Section 7 of Act 233, as now or hereafter amended, for the purpose of providing funds to meet its obligations under this Contract, and, if at the time of making the annual tax levy there shall be either other funds on hand earmarked and set aside, or funds provided in the annual budget of the water supply system of the Local Unit, for the payment of the contractual obligations due prior to the next tax collection period, then such annual tax levy may be reduced by such amount.

In the event a Local Unit shall fail for any reason to pay to the Authority at the times specified the amounts required to be paid by the provisions of this Contract, the Authority shall immediately give notice of such default and the amount thereof, to the Treasurer of each Local Unit, the Treasurer of the State of Michigan, and such other officials charged with the disbursement to such Local Unit of funds returned by the State and now or hereafter under Act 233 available for pledge as provided in this Section and in Section 12a of Act 233, and if such default is not corrected within ten (10) days after such

MILLER CANFIELD PADDOCK AND STONE P.L.C.

notification, the State Treasurer, or other appropriate official charged with disbursement to such Local Unit of the aforesaid funds, is, by these presents, specifically authorized by the Local Unit, to the extent permitted by law, to withhold from the aforesaid funds the maximum amount necessary to cure said deficit and to pay said sums so withheld to the Authority, to apply on the obligations of the Local Unit as herein set forth. Any such moneys so withheld and paid shall be considered to have been paid to the Local Unit within the meaning of the Michigan Constitution and statutes, the purpose of this provision being voluntarily to pledge and authorize the use of said funds owing to the Local Unit to meet any past-due obligations of such Local Unit due under the provisions of this Contract. In addition to the foregoing, the Authority shall have all other rights and remedies provided by law to enforce the obligations of the Local Unit to make its payments in the manner and at the times required by this Contract, including the right of the Authority to direct the Local Unit to make a tax levy to reimburse the Authority for any funds advanced.

SECTION 11 Each Local Unit may pay in advance any of the payments required to be made by this Contract, in which event the Authority shall credit the respective Local Unit with such advance payment on future due payments to the extent of such advance payment, or use such advances to call bonds without credit to the extent provided in relevant series of bonds.

SECTION 12. Each Local Unit may pay additional moneys over and above any of the payments specified in this Contract, with the written request that such additional funds be used to prepay installments, in which event the Authority shall be obligated to apply and use said moneys for such purpose to the fullest extent possible. Such moneys shall not then be credited as advance payments under the provisions of Section 11 of this Contract.

SECTION 13. It is specifically recognized by each Local Unit that the debt service payments required to be made by each pursuant to the terms of Section 9 of this Contract are to be pledged for and used to pay the principal installments of and interest on with respect to the bonds to be issued by the Authority as provided by this Contract and authorized by law, and each Local Unit covenants and agrees that it will make all required payments to the Authority promptly and at the times herein specified without regard to whether the System is actually completed or placed in operation

SECTION 14. If the proceeds of the sale of the bonds in one or more series in aggregate amount not to exceed $300,000,000 to be issued by the Authority are for any reason insufficient to complete each Local Unit's share of the cost of the System, subject to each Local Unit's approval required by Section 5 hereof, the Authority shall automatically be authorized to issue additional bonds in an aggregate principal amount sufficient to pay the cost of completing the System and to increase the annual payments required to be made by each Local Unit in an amount so that the total payments required to be made as increased will be sufficient to meet the annual principal and interest requirements on the bonds herein authorized plus the additional bonds to be issued. It is expressly agreed between the parties hereto that the Authority shall issue bonds pursuant to this Contract and each Local Unit shall be committed to retire such amount of bonds as may be necessary to pay each Local Unit's share of the costs of the System whether or not in excess of those presently estimated herein. Any such additional

MILLER CANFIELD PADDOCK AND STONE P.L.C.

bonds shall comply with the requirements of Act 233 and any increase in the annual payments shall be made in the manner and at the times specified in this Contract. In lieu of such additional bonds, each Local Unit may pay over to the Authority, in cash, sufficient moneys to complete each Local Unit's share of the cost of the System.

SECTION 15 After completion of the System and payment of all costs thereof, any surplus remaining from the proceeds of sale of bonds shall be used by the Authority for either of the following purposes: (a) for improvements or enhancements to the System or for other projects of the Authority undertaken on behalf of the Local Units, subject to approval of the Authority; or (b) credited by the Authority toward the next payments due the Authority by said Local Units hereunder.

SECTION 16. The obligations and undertakings of each of the parties to this Contract shall be conditioned on the successful issuance and sale of the first series of bonds pursuant to Act 233, and if for any reason whatsoever the first series of bonds are not issued and sold within three (3) years from the date of this Contract, this Contract, except for payment of preliminary expenses and ownership of engineering data, shall be considered void and of no force and effect.

SECTION 17. The Authority and each Local Unit each recognize that the owners from time to time of each series of bonds issued by the Authority under the provisions of Act 233 to finance the cost of the System will have contractual rights in this Contract, and it is, therefore, covenanted and agreed by the Authority and each Local Unit that so long as any of series of bonds shall remain outstanding and unpaid, the provisions of this Contract shall not be subject to any alteration or revision which would in any manner materially affect either the security of such series of bonds or the prompt payment of principal or interest thereon. Each Local Unit and the Authority each further covenant and agree that each will comply with its respective duties and obligations under the terms of this Contract promptly at the times and in the manner herein set forth, and will not suffer to be done any act which would in any way impair the said bonds, the security therefor, or the prompt payment of principal and interest thereon. It is hereby declared that the terms of this Contract insofar as they pertain to the security of any such bonds shall be deemed to be for the benefit of the owners of said bonds.

SECTION 18 This Contract shall remain in full force and effect from the effective date hereof (as provided in Section 21) until each series bonds issued by the Authority are paid in full, but in any event not to exceed a period of thirty (30) years for each series of bonds. At such time within said 30-year term as any of the series of said bonds are paid, this Contract shall be terminated. In any event, the obligation of each Local Unit to make payments required by this Contract shall be terminated at such time as all of said bonds are paid in full, together with any deficiency or penalty thereon.

SECTION 19 This Contract shall inure to the benefit of and be binding upon the respective parties hereto, their successors and assigns.

SECTION 20. This Contract shall become effective upon (i) approval by the legislative body of each Local Unit, (ii) approval by the Board of the Authority and (iii) due execution by authorized officers of each Local Unit and by the Chairman and Secretary of the Authority.

MILLER CANFIELD, PADDOCK AND STONE PLC

SECTION 21. This Contract may be executed in several counterparts.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed as of the day and year first above written.

MILLER CANFIELD PADDOCK AND STONE, P.L.C.

EXHIBIT A

SYSTEM

The Karegnondi Water System is a raw water supply system. It will deliver untreated Lake Huron water 65 miles inland to the population centers of Lapeer and Genesee Counties, including the Cities of Lapeer and Flint, and the County Agency of Genesee County with 17 local municipal systems. The system will also be capable of delivering water along the route to customers in Sanilac and Lapeer County, as well as future customers in Saint Clair County

The system will consist of a lake intake, two pumping stations, and over 65 miles of large diameter transmission watermain. The system will include fire hydrants, metering stations, reservoirs, and the appurtenances necessary to operate the system efficiently. The lake intake portion of the project and the land where the two pumping stations are located will be acquired, constructed, designed and financed by the County of Genesee and made available for use by the Karegnondi Water System.

All land and required right-of-ways and easements have been acquired.

MILLER CANFIELD, PADDOCK AND STONE P.L.C.

EXHIBIT B

LOCAL UNIT ESTIMATED SHARE OF IMPROVEMENT COST

The following is a breakdown of the percent each Local Unit is required to pay of the aggregate debt service, including the obligation to replenish a debt service reserve fund(s), if any, on the Authority's bonds authorized by this Contract:

Local Unit	Bond Issue
County of Genesee	65.8%
City of Flint	34.2%

In the event the City of Flint fails to fulfill its payment obligations under this Contract, the County of Genesee irrevocably covenants and agrees to make such missed payment within 1 day of being notified of the missed payment. Further, the Authority covenants and agrees to undertake all legal action and make use of all remedies available under this Contract to enforce the payment obligations of the City of Flint under this Contract. The Authority also covenants and agrees to undertake all legal action and make use of all remedies available to it under the Raw Water Supply Contract between the Authority and the City of Flint dated as of June 28, 2013 ("Raw Water Supply Contract"), as amended, specifically sections 7.08 and 7.09 of such contract. If the County of Genesee is required to make a payment for the City of Flint under this Contract and the Authority recovers any funds from the pursuit of such remedies described above, the Authority shall reimburse the County of Genesee from such funds for any payments made. To the extent permitted by law, the capacity that the City of Flint acquired in the System pursuant to the Raw Water Supply Contract shall be transferred to the County of Genesee until the City of Flint has repaid the County of Genesee for any additional payments made hereunder. The City of Flint shall also pay a penalty of one percent (1%) thereof for each month or fraction thereof that the same remains unpaid after the due date of the amount paid by the County of Genesee as a result of the failure of the City of Flint to fulfill its payment obligations hereunder. Further, if a Local Unit fails to pay its contractual obligation causing a shortfall and the debt service reserve fund(s) is drawn upon to pay the Authority's bonds, the replenishment of such debt service reserve fund shall be an obligation of the Local Unit that failed to pay, as provided in the resolution authorizing the bonds. Provided, however, if the City of Flint fails to fulfill its debt service reserve fund replenishment obligation, as with other payment obligations under the Contract, the County of Genesee agrees to make such payments.

Additionally, if the Authority sells raw untreated water capacity to other parties, to the extent funds are available from payments received from those parties, each Local Unit shall be credited on each day payment is due hereunder as agreed to by the Authority and the Local Units towards each Local Unit's payment obligations hereunder.

The year-long extension ended up costing the city more than $80,000 for the two of them. So, even if we separate them and they individually don't hit the $50,000 threshold, was there any requirement for Earley to sign a resolution or order to make this extension? He did so for the original 9 month contract, but not for the 1-year extension. It just seems odd that city money could be spent without any record on the city's end.

Gary...

It is my understanding that this issue wouldn't have come to Treasury for approval. Under PA 436, only requested purchases/contracts of over $50,000 need approval by Treasury, if they were not competitively bid.

The statutory provision is below:

141.1552 Additional actions by emergency manager; suspension of power of administrative officer and governing body; contracts subject to competitive bidding; sale or transfer of public utility; limitation.

Sec. 12.

(3) Except as otherwise provided in this subsection, any contract involving a cumulative value of $50,000.00 or more is subject to competitive bidding by an emergency manager. However, if a potential contract involves a cumulative value of $50,000.00 or more, the emergency manager may submit the potential contract to the state treasurer for review and the state treasurer may authorize that the potential contract is not subject to competitive bidding.

Subject: Help finding EM orders on water investigator

Terry,
I'm working on a story over here and I'm hoping you could help me out.

Flint Emergency Manager Darnell Earley apparently gave two Flint water investigators a contract extension, but I have been unable to find any actions by him approving the expenditure on the city side. Below, is an email I sent to city attorney Tony Chubb on the issue for your reference.

I have a copy of the initial order appointing them for 9 months, copies of the county's motions to extend the contract and the eventual approval. However, I cannot find anything involving Earley approving these extensions (although I found multiple other resolutions/orders from the same time frame extending and/or modifying extensions for other contracts.)

So, I'm trying to figure out if there is anything with the state approving this extension? Also, could you clarify the rules for me that Mr. Earley was required to follow in terms of approving such extensions?

Thanks.

Subject: Help finding EM orders on water investigator

Tony,

Per our conversation, I am seeking the EM order/resolution authorizing the extension of the contract with the county employing Marcus Mahan and Daniel Mata as special water investigators.

What I have:

1) EM Earley's resolutions allowing the entrance of the contract (EM submission nos: EME3262014 and eME5992014)
2) Requests to the county's gov. operations board on March and May 2014, asking for an extension until Jan. 2016 on the contract. http://www.gc4me.com/departments/board_of_commissioners_1/docs/GOC_032315.pdf http://www.gc4me.com/departments/board_of_commissioners_1/docs/GOC_051115.pdf

3) Documents showing the county approved the extensions (attached)

What I need:

The EM's order/resolution authorizing the city to enter into the extension proposed in item no. 2 above. I couldn't find it on the resolution/order list on the city's website.

Also, if you could provide the running list you referenced of their investigations it would be much appreciated.

Thanks.

It is my understanding that this issue wouldn't have come to Treasury for approval. Under PA 436, only requested purchases/contracts of over $50,000 need approval by Treasury, if they were not competitively bid.

The statutory provision is below:

141.1552 Additional actions by emergency manager; suspension of power of administrative officer and governing body; contracts subject to competitive bidding; sale or transfer of public utility; limitation.

Sec. 12.

(3) Except as otherwise provided in this subsection, any contract involving a cumulative value of $50,000.00 or more is subject to competitive bidding by an emergency manager. However, if a potential contract involves a cumulative value of $50,000.00 or more, the emergency manager may submit the potential contract to the state treasurer for review and the state treasurer may authorize that the potential contract is not subject to competitive bidding.

Subject: Help finding EM orders on water investigator

Terry,
I'm working on a story over here and I'm hoping you could help me out.

Flint Emergency Manager Darnell Earley apparently gave two Flint water investigators a contract extension, but I have been unable to find any actions by him approving the expenditure on the city side. Below, is an email I sent to city attorney Tony Chubb on the issue for your reference.

I have a copy of the initial order appointing them for 9 months, copies of the county's motions to extend the contract and the eventual approval. However, I cannot find anything involving Earley approving these extensions (although I found multiple other resolutions/orders from the same time frame extending and/or modifying extensions for other contracts.)

So, I'm trying to figure out if there is anything with the state approving this extension? Also, could you clarify the rules for me that Mr. Earley was required to follow in terms of approving such extensions?

Thanks.

Subject: Help finding EM orders on water investigator

Tony,
Per our conversation, I am seeking the EM order/resolution authorizing the extension of the contract with the county employing Marcus Mahan and Daniel Mata as special water investigators.

What I have:

1) EM Earley's resolutions allowing the entrance of the contract (EM submission nos: EME3262014 and eME5992014)
2) Requests to the county's gov. operations board on March and May 2014, asking for an extension until Jan. 2016 on the contract. http://www.gc4me.com/departments/board_of_commissioners_1/docs/GOC_032315.pdf http://www.gc4me.com/departments/board_of_commissioners_1/docs/GOC_051115.pdf

3) Documents showing the county approved the extensions (attached)

What I need:

The EM's order/resolution authorizing the city to enter into the extension proposed in item no. 2 above. I couldn't find it on the resolution/order list on the city's website.

Also, if you could provide the running list you referenced of their investigations it would be much appreciated.

Thanks.

Subject: Re: FWICC Policy Subcommittee

I would defer to Miguel DelToral for background on the initial LCR, revisions, and implementation.
Interagency protocols;
Start with a commitment to protect the health and safety of people and the environment being primary when developing programs and policies .
Then allowing meaningful opportunities for participation (voice)
to be heard in a neutral forum where people are treated with dignity and respect
That benefits and liabilities from decisions will be shared equitably by all parties concerned . That the authorities are trustworthy (seeTyler 2000:121)
Recognition that adherence to procedure is only one aspect of fairness.
Where there is overlap in responsibility or management of potential outcomes - good or bad , those agencies must submit written opinions for evaluation by the governor's cabinet and published online in a format accessible to the public before a final decision is made.Additionally , there must be a monitoring plan that will published in the same manner.
That an independent ombudsman be appointed to assure that these policies are followed.

On Tuesday, February 9, 2016, Zimmer, Mike (LARA) <zimmerm@michigan.gov> wrote:

Good Morning:

I have been asked to chair the FWICC Policy Subcommittee on which you have all been selected to serve.

Our subcommittee has been assigned three general priorities/tasks:

1) Interagency Protocols

2) Statewide Policy

3) Lead and Copper Rule Change Recommendations

Of these, I think the Lead and Copper Rule Change Recommendations is the more straightforward - although certainly not the simplest. Interagency Protocols may prove more multifaceted as it could include protocols between state agencies, between state and local agencies, and between state and federal partners. The last, Statewide Policy, is at this point a holding category that could review implementation of policies requested by other work groups or items of interest to the committee members.

We have been asked to get our finalized list of priorities to Harvey by Thursday morning at 10:00. Given the short time frame and the fact that many of you serve on multiple subcommittees, at this point I am asking that you get back to me by COB tomorrow (Wednesday) indicating whether you agree with my reading of our assignments or would like any changes or modifications. Also, if there are any items on our list that are of particular interest to any of you, please note that.

I will be having my assistant, Diane Burton, reach out to you so that we can set up a telephone conference early next week to discuss scoping out our priorities and assign specific tasks, metrics, and timelines.

I look forward to working with all of you.

Mike

I already weighed in by phone on this one. Let me know if you need anything. I think an impact analysis around the switching process is the right approach. GC should not panic nor should anyone conclude without reason that anything is "off the table" if reasoned experts conclude it makes no sense.

Rich and Harvey

Similar to Zimmer's email, I was going to send this to the FWICC KWA subcommittee (including Jamie Curtis)

Does this capture our subcommittee's to-do?

I miss one meeting, and look what happens

We are the "KWA Subcommittee" of the FWIC

My understanding, and why I what to check-in with you, is we are to address 3 questions (our 3 objectives):

(1) What is the updated, long-term, financial cost/benefit analysis for Flint residents of KWA vs staying with DWSD?

(2) What are Flint's formal commitments to KWA?

(3) What are updated projections for Flint resident's water rates? What is driving future rates in the city?

I think the tasks fall into:

(1) Update the prior cost/benefit analysis with revised estimates, including transition costs

(2) Review the long term assumptions of Flint rates if they stay with DWSD

(3) Agree on any non-financial reasons for Flint to choose one option or the other

(4) Review bond covenants and other contractual relations between Flint and KWA

(5) Given reasonable assumptions, project typical Flint water rates for the next 5 and 10 years

We still need to work up a specific work plan and schedule, but the goal is to report back to the full committee by early June

Please let me know you thoughts

Cary,

Per our conversation, please find attached the cash flow which extends projections through June 30, 2017. I have also included additional assumptions for:
1. how customer bill relief will be distributed from the State to the City (amount and # of months)
2. an area for assumptions should the State appropriate additional funding for GLWA water purchase (amount and # of months)
3. Rate increase and collection rate assumptions for the period following 1/1/2017 through 6/30/2017

Please let me know if you have any questions.

CITY OF FLINT
WATER FUND
24 MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH JUNE 30, 2017
Actual Activity Reported through December 31, 2015

Assumptions Defined Below

REVENUE ASSUMPTIONS:

1. User Charges for the period January 2015-December 2016 were based on YTD billing activity and collection rates
2. Rate increase assumptions effective March 1, 2016 and July 1, 2016 may be modified in the gray box below
3. Restoring the FY16 Master Fee Schedule rates per the amended preliminary injunction order would result in a rate increase of approximately 22% and would impact collections beginning in March 2016
4. If the Master Fee Schedule rates are restored in FY16 then any rate increase assumption for FY17 must also include 22%.
5. Issuance of shut off notices and disconnection of services has a tremendous impact on the City's ability to enforce payment for services rendered. In August, prior to the Preliminary Injunction Order the City's average monthly collection rate was 98%. The average collection rate for the period August through December 2015 has fallen to 83%, with a low point in October of 70%.

EXPENDITURE ASSUMPTIONS:

1. Expenditure activity for the period January 2016-June 2016 reflect unspent funds as of December 31, 2015 divided equally over the remaining 6 months of the fiscal year
2. Expenditure activity for the period July 2016-December 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by emergency manager order
3. The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17. An amount for illustrative purposes is shown

	Until 6/30/2016	After 7/1/2016	After 1/1/2017
Average Monthly Collection Rate	85%	45%	75%
Rate Increase	0%	0%	0%

GLWA Water Purchases $ 1,333,333
# of Months of FY17 GLWA Water 6

Amount of State Assisted GLWA Purchases $ -
# of Months Allocated to City -

Amount of State Assisted Bill Relief $ 50,000,000
# of Months Allocated to City 2

- Regarding Rate Increases:
  FY16 has been set such that an increase would impact bills beginning in March 2016.
  Any rate increase assumption for FY17 must also include any rate assumption made for FY16
  For Example: FY16 restoration of Master Fee Schedule equals approximately 22%. Budgeted FY17 projection of 5% must be entered as 27%.

Top Ten Questions

1. How to handle residents who have moved
2. Whether residents in apartments get the 65% or the owner of the building receives 20%.
    a. If the residents are to receive the credit, how will this work?
3. By accepting the credit, do the residents waive their rights to future claims?
    a. If so, how would this work?
4. When will the water fund run out of cash?
5. What is needed when the water fund runs out of cash?
6. Should the $30 million be distributed over several months or should it be credited to a customer's account at one time.
7. When will the water be given a clean bill of health?
8. When will the city be able to resume collecting past due accounts?

Is the assumption that the consumption for the water remains constant throughout the cash flow period?

Please clarify GLWA fees. $10 million and $2 million in escrow? Is the $10 million already spent (in October of 2015)?

Bond payments for KWA –
We see the 2016 payment of $7 million. Is this a yearly payment? Once each year?
The copy from last Friday from the *Jones & Henry Engineers* shows a $690,000 payment for FY 2015. This does not show on the cash flow. Why?
Would you please give me the amortization schedule for the bond payments to KWA?

Upcoming bond sale –
What and when? What does that do to the bond payment?

How many gallons of usage is the cash flow based on?
Is the usage number for 2017 (1.6 million) the expected final number or is there reduced payment or usage – GM water usage – in 2015 numbers (the 2017 numbers look reduced)? Will GM come back?
The cash flow takes into account the GM exit. Jody does not know about when or if they will reenter the system.

What is the contractual obligation for Detroit water? When does that end? What needs to be negotiated? Start/stop date – runs through?
GLWA payments of $1.3 million after June 2016 is speculative. There is no contract.
$12 million for FY 2016 is in escrow. The actual amount of outflows could be more or less depending on what happens with the water.

Is there a cost for testing and treating water for KWA? Does not show on cash flow.
You mentioned that the testing and treating of KWA water is in the line item, Capital Improvements. Which line is that on your cash flow? If it is in the cash flow, do I understand you correctly that you know of no additional costs for this?
Transition, backup, and treatment fees baked in?

Does the "Transfers to Debt Service Fund" line item take into account the restructuring of DWRF loans? We have a yearly amount of $1.8 million. Is that what this line is?

Notes

Two Questions for Larry:

① Cash Flow doesn't appear to include payments to KWA for water. Is it some place else or why isn't it included?

② Sewer Fund may need cash. Can it take from Water (after influx of assistance) or does it have to take from GF?

Suzanne

Is the $8PL really the ongoing amount?

Got it. I won't quote you on the Mike Brown personal issues stuff. I too heard he left for family reasons.

On Wed, Feb 10, 2016 at 12:54 PM, Stanton, Terry A. (Treasury) <StantonT@michigan.gov> wrote:

In July 2013, Mr. Kurtz retired and was replaced by Mike Brown, who could serve as EM pursuant to PA 436. Mr. Earley replaced Mr. Brown when he stepped down in October 2013. **Please do not attribute the following to me:** It's my understanding a member of Mr. Brown's family had fallen ill and he left to spend time with that individual.

Mr. Earley then was named EM for DPS in January 2015 and Mr. Ambrose was appointed...with the expectation he would likely conclude his work by spring. He then left in April 2015, after indicating to the governor that the financial emergency had been adequately addressed.

Terry,

Can you give me a short (one or two sentence) explanation for why various Flint EMs left the position?

I know why Ed Kurtz took over for Michael Brown in August 2012.

But why did Michael Brown return as EM in July 2013 and why did Darnell Early become EM in October 2013? Put another way, why did Ed Kurtz leave and why did Michael Brown stop being EM the second time?

When Darnell Earley left Flint, was that because he'd been named EM of the Detroit Public Schools?

And did Jerry Ambrose's tenure end in April 2015 because that's when the governor determined that Flint's fiscal emergency ended?

Thanks,

Scott

Terry, can you please give me a call when you get a few minutes? I just left you a voice message and said I think it'd be easier to talk by phone rather than over email. I want to better understand interactions between EMs, the treasurer, Treasury Department and the governor.

My number is 443-955-9390. I expect to be free all afternoon. As I said in the message, if you can give me a couple minutes' heads-up that you'll be calling, I can make sure I'm available to take the call.

Thanks,

Scott

On Tue, Feb 9, 2016 at 11:15 AM, Stanton, Terry A. (Treasury) <StantonT@michigan.gov> wrote:

Emergency managers serve at the pleasure of the Governor. There is no set "end date."

There is a provision in PA 436 that after serving 18 months, an individual EM can be removed by a vote of the legislative body (w mayoral support if a strong mayor system). If it were to vote out an EM, the local unit would then have to negotiate a consent agreement with the state.

Under PA 436, the State pays EMs...though salary is determined on a case-by-case basis. Contracts are posted on the following web-page:

Subject: RE: WSJ reporter getting in touch re: Michigan's emergency manager law and program

There is a Fiscal Responsibility Section within the Local Government Financial Services Division of Treasury's Bureau of Local Government Services. Staff does not "oversee" Emergency Managers, per se. EMs are appointed by the Governor and serve at the pleasure of the Governor. Staff does provide technical support to EMs and local units with a Receivership Transition Advisory Board, working under a Consent Agreement or Neutral Condition (mediation).

The Fiscal Responsibility Section (7 employees) can provide any local unit of government (not just those with EMs) with state-wide technical expertise and policy recommendations to ensure proper implementation of state and federal laws, regulations, requirements, accounting standards, and financial controls and to help develop strategies that help locals retain strong fiscal health, and avoid financial stress or crisis.

Thanks, Terry.

The year on this is wrong. Can you pls check? 2011, maybe?

Lou Schimmel appointed EM (PA4) in October 2001, by Gov. Snyder

Also, where do things stand on the resumes for individuals considered/chosen to be EFMs and EMs?

On Tue, Feb 2, 2016 at 4:44 PM, Stanton, Terry A. (Treasury) <StantonT@michigan.gov> wrote:

Scott,

I compiled a list of the managers who have been appointed to MI municipalities and school districts, since the inception of an emergency (financial) manager statute in 1988. As you might have expected, the Wikipedia list has some of the information but does not appear to be an exhaustive list (only municipalities are in the table) and some of the dates were off, when compared to my information.

As you are likely aware, given statutory changes that occurred here between 2001 and 2013, three Acts were intertwined, which makes the compiling of, and understanding of a list, somewhat difficult. That said, the attached has managers listed by local unit, with the Act they were appointed under noted. Under PA72 of 1990, the Local Financial Assistance Loan Board (commonly referred to as the Emergency Loan Board or ELB) appointed emergency financial managers. The ELB is made up of three Gubernatorial appointees; The State Treasurer, the Director of the Department of Technology Management and Budget, and the Director of the Department of Licensing and Regulatory Affairs. Under PA4 (which fell to a statewide voter referendum) and PA436, the Governor appoints managers. Also, under PA436, local units can elect which of four potential remedies they would like to proceed under; an emergency manager, consent agreement, neutral evaluation, or chapter 9 bankruptcy. Please also note the "note" at the bottom of the document.

To date, 15 local units of government have had a manager appointed. Clearly, there have been multiple managers for a number of the local units.

As for EM "applicants"...there is not a formal application process to become a manager.

Under PA436, these are Gubernatorial appointments, so individuals may express an interest in being named an appointee by the Governor, for any given potential post...and those with the financial acumen and or municipal finance expertise could certainly find themselves under consideration.

As you might understand, Treasury staff also interact with, know of, and/or become aware of, individuals who have municipal finance backgrounds and expertise in the area, who may be interested in and have the ability to serve in such a post.

I hope this proves helpful.

Subject: Re: WSJ reporter getting in touch re: Michigan's emergency manager law and program

Hi Terry,

My editor is looking for me to get as much info as possible by tomorrow morning or afternoon. Of the two things I asked about, I'm hoping you can get the list of managers pretty quickly. We don't use Wikipedia as a source, but the chart I found there would seem to be a good guide:

https://en.wikipedia.org/wiki/Financial_emergency_in_Michigan

The basic selection process should be pretty straightforward, too, right? I would imagine someone there could explain to me how managers are chosen.

Then we are still interested in the resumes of applicants/would-be managers. Depending on how those are filed, I could see that taking a bit longer. I'm an optimist, though, so I start off thinking those could be sitting in the same file cabinet or computer file.

Please keep me posted.

Subject: WSJ reporter getting in touch re: Michigan's emergency manager law and program

Hi Terry,

I'm a Wall Street Journal reporter working with Kris Maher on a story about Michigan's emergency manager law(s) and program. I just left a couple voicemail messages for you and am following up with a quick email.

As I mentioned in the messages, we're looking for a list of all emergency managers and emergency financial managers who've been appointed by various governors since the program began, along with their tenures (and which governor made the appointment).

We're also looking for more information on the process by which these managers are selected. Do they apply? Or does the governor work from a list provided by staff? Is there some other process? In addition, we would like to see the resumes of everyone who applied or has been considered for these positions, which obviously would include the ones appointed as emergency managers.

I know the Treasury Department has a lot of information on its website, but I didn't see what I describe above. Please give me a call at 443-955-9390 at your earliest convenience.

Thanks,

Scott Calvert

Subject: List of Emergency Managers

Dear Howard,

Sen. Colbeck is looking for a list of all Emergency Managers by city since the law went into effect.

I found this Wikipedia page that lists all of the EM's in Michigan (including one in Hamtramck in 1988). I was wondering if this list was accurate? And, if not, does Treasury have a complete list?

Thanks,

Nick Plescia, MPP
Legislative Director
Office of Senator Colbeck

Subject: RE: WSJ reporter getting in touch re: emergency manager law/program

Hi Scott,

The emergency managers – there are now none in a Michigan city – work closely with the Treasury Department. They have a regular schedule of reporting information to the Treasury Department and would meet when the need arose. The state Treasurer regularly meets with the Governor and provides updates.

In the cases of the city of Detroit and the Detroit Public Schools, Governor has meet directly with the emergency manager, or the emergency manager would be included as a part of larger meeting with the Governor and members of the administration focused on Detroit's challenges.

The Governor was not part of the discussion about the switch to Flint River water. It's important to note that Virginia Tech professor Marc Edwards and other experts have said that the problems did not arise from the change of the water source, but that the new source was not treated with the corrosion control materials.

That transition is the subject of a study by the Governor's Flint Water Task Force, and it would be inappropriate to get a head of the task force's work. The group's report is expected next month.

Dave

PS: Here's a graphic of the emergency managers in Michigan. There are none in a Michigan city now. Three school districts have emergency managers, though one is expected to change at the end of the month.

Hi Dave,

Terry and I did speak after I got your email, and he was very helpful from the treasury department's perspective. I'd still like to talk to you or someone on the governor's staff, given that emergency managers are appointed by the governor and serve at his pleasure. I'm interested in knowing how Gov. Snyder ensures EMs do the job he appointed them to do, and in the case of Flint, whether he was consulted or informed before the switch to river water in April 2014.

My number is 443-955-9390.

Thanks,
Scott

Hi Dave,

I just left a voicemail message and am following up with a quick email. I'm a Wall Street Journal reporter and would like to speak to you for a story I've been asked to do on Michigan's emergency manager law and program. One thing I'm trying to better understand is how the governor and treasurer and their respective staffs monitor, oversee, etc., the work that the emergency managers do.

Can you please give me a call ASAP at 443-955-9390?

Thanks,

Scott Calvert

I miss one meeting, and look what happens

We are the "KWA Subcommittee" of the FWIC

My understanding, and why I what to check-in with you, is we are to address 3 questions (our 3 objectives):

(1) *What is the updated, long-term, financial cost/benefit analysis for Flint residents of KWA vs staying with DWSD?*

(2) *What are Flint's formal commitments to KWA?*

(3) *What are updated projections for Flint resident's water rates? What is driving future rates in the city?*

I think the tasks fall into:

(1) *Update the prior cost/benefit analysis with revised estimates, including transition costs*

(2) *Review the long term assumptions of Flint rates if they stay with DWSD*

(3) *Agree on any non-financial reasons for Flint to choose one option or the other*

(4) *Review bond covenants and other contractual relations between Flint and KWA*

(5) *Given reasonable assumptions, project typical Flint water rates for the next 5 and 10 years*

We still need to work up a specific work plan and schedule, but the goal is to report back to the full committee by early June

Please let me know you thoughts

I miss one meeting, and look what happens

We are the "KWA Subcommittee" of the FWIC

My understanding, and why I what to check-in with you, is we are to address 3 questions (our 3 objectives):

(1) Can we update some of the basic assumptions underlying the city's transition to KWA? What has changed since the original estimates? Are the updated transition costs reflected in the city's sewer / water cash flows?
(2) What are Flint's dollar commitments to KWA (both amount and timing)?
(3) Can we update projections for Flint resident's future water rates? What is driving future rates in the city?

I think the tasks fall into:

(1) Update the prior analysis with revised estimates, including transition / construction costs and the costs for the upgrade of the Flint Water Treatment Plant
(2) Given reasonable assumptions, project typical Flint water rates for the next 5 and 10 years

We still need to work up a specific work plan and schedule, but the goal is to report back to the full committee by mid-April

Please let me know you thoughts

I'll try and schedule a quick call early next week, or we can use group email if that's easier

FWICC Subcommittee Chairs,

The following subcommittees will present their priorties list at the meeting on Friday:

Health and Education – Chaired by Lyon
Water Quality - Chaired by Creagh
Water Infrastructure Integrity - Chaired by Creagh

The remaining 4 subcommittees will present next week, Feb. 19.

This week we also will have a special presentation by representatives from the Netherlands regarding their experience in replacing lead lines in Amsterdam and how they can assist with the Flint infrastructure and drinking water issues. They are particularly interested in relaying how they built trust within the community as they replaced the lines.

The final agenda will be sent later today. Please let me know if you have any questions.

Best,
Harvey

Subject: FWICC Policy Subcommittee

Good Morning:

I have been asked to chair the FWICC Policy Subcommittee on which you have all been selected to serve.

Our subcommittee has been assigned three general priorities/tasks:

1) Interagency Protocols
2) Statewide Policy
3) Lead and Copper Rule Change Recommendations

Of these, I think the Lead and Copper Rule Change Recommendations is the more straightforward - although certainly not the simplest. Interagency Protocols may prove more multifaceted as it could include protocols between state agencies, between state and local agencies, and between state and federal partners. The last, Statewide Policy, is at this point a holding category that could review implementation of policies requested by other work groups or items of interest to the committee members.

We have been asked to get our finalized list of priorities to Harvey by Thursday morning at 10:00. Given the short time frame and the fact that many of you serve on multiple subcommittees, at this point I am asking that you get back to me by COB tomorrow (Wednesday) indicating whether you agree with my reading of our assignments or would like any changes or modifications. Also, if there are any items on our list that are of particular interest to any of you, please note that.

I will be having my assistant, Diane Burton, reach out to you so that we can set up a telephone conference early next week to discuss scoping out our priorities and assign specific tasks, metrics, and timelines.

I look forward to working with all of you.

Mike

Subject: Flint Water Credit Supplemental

I met with Rep. Poleski during House Session today. He is working on boilerplate to provide some additional guidance/ audit requirements for the money appropriated for credits. Will share the language when I get it, likely this afternoon or tomorrow.

The plan is for the bill to be up in House Appropriations next Wednesday at 9 a.m. How do we want to handle that? Nick, do you want to testify? If Howard and I are to cover it we'll need to spend some time getting a better understanding of the details.

Michelle Lange and Scott Starr were also present for the meeting, I told them we would coordinate with them, and DEQ for purposes of the hearing next week. About how we want to handle next week. But from my conversations with staff and members I think Treasury will be the subject of most of the questions on this.

Finally, Rep. Poleski has been looking at the financial statements for the Flint water system and noted that water and sewer were accounted for separately. I know this came up in our previous meeting with house staff, but he was very interested whether bills were also segregated between water and sewer and whether we could ensure that credits were authorized only for the water portion of the bills.

FLINT WATER INTERAGENCY COORDINATING COMMITTEE

FEBRUARY 12, 2016, 10:00AM – 11:30AM

I. Introductions (All – 5 min)

II. Opening Remarks (Gov. Snyder – 5 min)

III. Subcommittee Priorities Presentations

a. Health & Education (Lyon – 15 mins)

i. Blood Lead Testing/Follow up
ii. Access to Physical and Behavioral Health Services
iii. Nutrition
iv. Case Management
v. Education Birth to 12th

b. Water Quality (Creagh – 15 mins)

i. Establish criteria for lifting the health advisory
ii. Develop a multi-dimensional approach to addressing lead in water going beyond the requirements of the lead and copper rule
iii. Create protocols for addressing concerns regarding disinfection residuals to account for seasonal fluctuations throughout the year
iv. Ensure that disinfection byproduct levels are not adversely affected by disinfection processes
v. Establish a protocol for proactively monitoring for Legionella

c. Water Infrastructure Integrity (Creagh – 15 mins)

i. Assess the condition and functionality of the overall distribution system
ii. Determine the right sizing of the water infrastructure system to support the needs of the City
iii. Create a plan for addressing the needs as defined from the overall distribution assessment
iv. Determine a viable backup / emergency water source
v. Develop a comprehensive lead line replacement program that takes all needs into consideration such as at-risk populations and construction alignment

IV.	**Next Week Subcommittee Presentations** a. Incident Action Plan – Kelenske Chair b. KWA – Khouri Chair c. Policy – Zimmer Chair d. Communication – Hollins Chair	(Hollins – 5 mins)
V.	**Netherlands Waternet Presentation** a. Pipe replacement in Amsterdam b. Community Education and Trust	(Struker– 20 min)
VI.	**Group**	(Hollins/Kelenske 5)
VII.	**Closing Remarks**	(Gov. Snyder – 5 min)

Subject: Karegnondi Water Authority OS

There have been two deals for KWA. The first deal was done in 2013 by Genesee county at $35 million to finance the intake at Lake Huron.

The other deal was done by KWA with Genesee, Lapeer and Sanilac Counties in 2014 at $220.5 million.

The team on both deals were Miller as Bond Counsel with Dickson Wright as Underwriters Counsel. Stauder who is now with PFM was FA.

I believe they are currently working on a $60 million deal as well.

Let me know if you need anything else.

Thanks
John

Subject: Re: WSJ reporter getting in touch re: emergency manager law/program

Thanks for the Pontiac release.

I appreciate that the task force is still working, but I still don't understand why that prevents the state from saying when the EM decided to go with the river option (unless that's not known). Kurtz was clearly moving to do so in the June 28, 2013 report where he mentions the "high consideration" given to using the river and/or a combo of the river and DWSD. What I'm looking for is something that says he definitively went with the river option on June 30 or Aug. 4 or whatever -- if possible.

What I am clear on is that Gov. Snyder wasn't involved in the discussions about using the river, and that then-Treasurer Dillon's OK wasn't required under the law. Dillon told me he vaguely recalls that Kurtz report but said the river issue didn't hit his desk as he best he remembers. The question of whether Flint would part ways with DWSD and go with KWA, on the other hand, was something Dillon said he was very much involved in, as was the governor.

On Thu, Feb 11, 2016 at 5:38 PM, Stanton, Terry A. (Treasury) <StantonT@michigan.gov> wrote:

Ed Kurtz was EM in Flint in June of 2013. I cannot speak to any requests made to DEQ. As Dave noted earlier...the timeline and transition is the subject of a study by the Governor's Flint Water Task Force, which is expected to finalize a report next month.

On your Pontiac question(s), see the attached press release from Sept. 2011.

Mr. Schimmel was appointed given his extensive experience with the emergency manager law and the expectation that he would work collaboratively with local officials to address the financial emergency there.

Mr. Stampfler is certainly entitled to his opinion. One of the primary intents of PA 436 (and PA 4 when it was in effect) was to provide an emergency manager with the tools necessary to address a local government financial emergency as quickly and efficiently as possible so to begin the transition to full local control...as soon as is prudent and possible.

Sorry for another email, but I came across this on page 94 of Gov. Snyder's email release. It's a timeline of events. "Flint" here is Ed Kurtz, correct? And was the request made to DEQ for permits?

June 2013- Groundbreaking for the Karegnondi Water Authority. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

>
> I have another question for you guys: Why did Gov. Snyder replace Michael Stampfler as EM in Pontiac? Stampfler says it's because he wouldn't sell the city's water department to Oakland County, which he didn't think was in Pontiac's long-term interest. He also said he felt there wasn't much supervision/oversight from Treasury/Gov. Snyder and that there was too much emphasis on balancing the books and not enough on making sure the city was positioned to do well after the financial crisis. Any response?

Subject: Re: WSJ reporter getting in touch re: emergency manager law/program

I don't know if Ed Kurtz made the call but it looks like he issued an order in June 2013 calling for the water plant to be readied so the river could serve as the temporary water source while the pipeline was being built. Can you track the order down? Darnell Earley quotes from it in the op-ed he wrote for the Detroit News last fall, but the order isn't on the Flint website that Terry pointed me to (https://www.cityofflint.com/finance/finanical-reports/). I'm copying Terry on this in case he can help. Thanks. Scott

Here's the relevant line from the op-ed:

A subsequent order Kurtz signed on June 26, 2013, speaks specifically to "... upgrading of the Flint Water Plant to ready it to treat water from the Flint River to serve as the primary drinking water source for approximately two years and then converting to KWA delivered lake water."

On Wed, Feb 10, 2016 at 7:11 PM, Calvert, Scott <scott.calvert@wsj.com> wrote:

Thanks, Dave.

When was the decision made to switch to the Flint River, and which emergency manager made that decision? In June 2013 Ed Kurtz reported to the treasurer that "high consideration" was being given to

using the river, and in April 2014 Darnell Earley reported that the city was proceeding with a transition to the river as temporary water source. So the decision would have been made between those two dates, either by Mike Brown or Mr. Earley. I don't see any documents on Flint's website noting when and by whom the decision was made. Can you let me know?

Best,

Scott

On Wed, Feb 10, 2016 at 6:22 PM, Murray, David (GOV) <MurrayD1@michigan.gov> wrote:

Hi Scott,

The emergency managers – there are now none in a Michigan city – work closely with the Treasury Department. They have a regular schedule of reporting information to the Treasury Department and would meet when the need arose. The state Treasurer regularly meets with the Governor and provides updates.

In the cases of the city of Detroit and the Detroit Public Schools, Governor has meet directly with the emergency manager, or the emergency manager would be included as a part of larger meeting with the Governor and members of the administration focused on Detroit's challenges.

The Governor was not part of the discussion about the switch to Flint River water. It's important to note that Virginia Tech professor Marc Edwards and other experts have said that the problems did not arise from the change of the water source, but that the new source was not treated with the corrosion control materials.

That transition is the subject of a study by the Governor's Flint Water Task Force, and it would be inappropriate to get a head of the task force's work. The group's report is expected next month.

Dave

PS: Here's a graphic of the emergency managers in Michigan. There are none in a Michigan city now. Three school districts have emergency managers, though one is expected to change at the end of the month.

Hi Dave,

Terry and I did speak after I got your email, and he was very helpful from the treasury department's perspective. I'd still like to talk to you or someone on the governor's staff, given that emergency managers are appointed by the governor and serve at his pleasure. I'm interested in knowing how Gov. Snyder ensures EMs do the job he appointed them to do, and in the case of Flint, whether he was consulted or informed before the switch to river water in April 2014.

My number is 443-955-9390.

Thanks,

Scott

Hi Dave,

I just left a voicemail message and am following up with a quick email. I'm a Wall Street Journal reporter and would like to speak to you for a story I've been asked to do on Michigan's emergency manager law and program. One thing I'm trying to better understand is how the governor and treasurer and their respective staffs monitor, oversee, etc., the work that the emergency managers do.

Can you please give me a call ASAP at 443-955-9390?

Thanks,

Scott Calvert

In the opinion of Miller, Canfield, Paddock and Stone, P.L.C., Bond Counsel, under existing law, assuming compliance with certain covenants by the Issuer, the interest on the Bonds is excludable from gross income for federal income tax purposes and the Bonds and the interest thereon are exempt from all taxation by the State of Michigan or by any taxing authority within the State of Michigan, except inheritance and estate taxes and taxes on gains realized from the sale, payment or other disposition thereof. See" TAX MATTERS" and "FORM OF APPROVING OPINION" herein for a description of certain provisions of the Internal Revenue Code of 1986, as amended (the "Code"), which may affect the tax treatment of interest on the Bonds for certain Bondholders.

KAREGNONDI WATER AUTHORITY
COUNTIES OF GENESEE, LAPEER AND SANILAC
STATE OF MICHIGAN

$220,500,000
WATER SUPPLY SYSTEM BONDS
(KAREGNONDI WATER PIPELINE), SERIES 2014A

Dated: Date of Delivery **Principal Due: November 1, as shown on Inside Cover Page**

The Water Supply System Bonds (Karegnondi Water Pipeline), Series 2014A (the "Bonds") are issued under the provisions of Act 233, Public Acts of Michigan, 1955, as amended, and a resolution adopted by the Board of Trustees of the Karegnondi Water Authority, Counties of Genesee, Lapeer and Sanilac, State of Michigan (the "Issuer") on November 20, 2013. The Bonds are being issued for the purpose of paying a portion of the cost of acquiring and constructing the Issuer's Water Supply System (the "System") to serve initially the City of Flint and the County of Genesee (individually a "Local Unit" and collectively, the "Local Units"), funding a debt service reserve account, paying capitalized interest and paying the costs of issuing the Bonds. The Bonds are to be issued in anticipation of, and are payable primarily as to principal and interest from, payments (the "Contractual Payments") to be made by the Local Units to the Issuer pursuant to a Contract among the Issuer and the Local Units dated as of August 1, 2013 (the "Contract"). The Contractual Payments will be in installments that will equal the principal and interest payments on the Bonds. Further, each Local Unit has pledged its limited tax full faith and credit for the payment of its Contractual Payments and is obligated, to the extent necessary, as a first budget obligation to levy ad valorem taxes on all taxable property within its boundaries for such purpose, subject to applicable constitutional, statutory and charter tax limitations. Each Local Unit is expected to make its Contractual Payments from revenues collected from charges imposed on the customers of its respective water supply system. The County of Genesee in the Contract has pledged to make all payments that the City of Flint fails to make to the Issuer under the Contract. The Issuer has irrevocably pledged the Contractual Payments for the payment of the principal of and interest on the Bonds.

The Bonds are issuable only as fully registered Bonds without coupons, and when issued, will be registered in the name of Cede & Co., as Bondholder and nominee for The Depository Trust Company ("DTC"), New York, New York. DTC will act as securities depository for the Bonds. Purchases of beneficial interests in the Bonds will be made in book-entry only form, in the denominations of $5,000 or any integral multiple thereof. Purchasers will not receive certificates representing their beneficial interest in Bonds purchased. So long as Cede & Co. is the Bondholder, as nominee of DTC, references herein to the Bondholders or registered owners shall mean Cede & Co., as aforesaid, and shall not mean the Beneficial Owners of the Bonds. See *BOOK-ENTRY ONLY SYSTEM* herein.

Interest on the Bonds will be payable semiannually on May 1 and November 1 of each year commencing on November 1, 2014. The Bonds will be registered Bonds, of the denomination of $5,000 or multiples thereof not exceeding for each maturity the principal amount of such maturity. The principal and interest shall be payable at the corporate trust office of The Huntington National Bank, Grand Rapids, Michigan or such other transfer agent as the Issuer may hereafter designate by notice mailed to the registered owner not less than sixty (60) days prior to any change in interest payment date (the "Transfer Agent"). Interest shall be paid when due by check mailed to the registered owner as shown by the registration books as of the fifteenth day of the month preceding the payment date for each interest payment. Payment of principal and interest to Beneficial Owners shall be made as described in *BOOK-ENTRY ONLY SYSTEM* herein.

The Bonds are subject to redemption at par, as described herein.

The Bonds are offered when, as and if issued by the Issuer and subject to receipt of the approving opinion of Miller, Canfield, Paddock and Stone, P.L.C., Detroit, Michigan, Bond Counsel. Certain legal matters will be passed upon for the Underwriters by their counsel, Dickinson Wright PLLC, Troy and Lansing, Michigan. It is expected that delivery of the Bonds through DTC will be made in New York, New York on or about April 16, 2014.

COUNTY OF GENESEE
STATE OF MICHIGAN
$35,000,000
WATER SUPPLY SYSTEM REVENUE BONDS
(LIMITED TAX GENERAL OBLIGATION)
SERIES 2013

Dated: Date of Delivery **Principal Due: November 1, as shown on Inside Cover Page**

The Water Supply System Revenue Bonds (Limited Tax General Obligation), Series 2013 (the "Bonds") are issued under the provisions of Act 94, Public Acts of Michigan, 1933, as amended, Act 342, Public Acts of Michigan, 1939, as amended, and Ordinance Nos. 03-03, 03-05, 06-06, 12-03 and 13-01 (collectively, the "Ordinances") duly adopted by the County of Genesee, State of Michigan (the "Issuer"). The Bonds are being issued for the purpose of paying a portion of the cost of acquiring and constructing improvements to the Issuer's Water Supply System (the "System"). The Bonds are payable primarily from the Net Revenues (as hereinafter defined) of the System, and are secured by a statutory first lien on the Net Revenues established by said Ordinances on a parity basis with certain Outstanding Bonds (as hereinafter defined). The Issuer has covenanted and agreed to fix and maintain at all times while any of the Bonds are outstanding, such rates for service furnished by the System as shall be sufficient to provide for payment of the necessary expenses of operation, maintenance and administration of the System, of the principal of and interest on all of the Bonds and the Outstanding Bonds when due, and to provide for such other expenditures and funds for the System as are required by the Ordinances.

As additional security for the payment of the principal of and interest on the Bonds, the Issuer has irrevocably pledged its full faith and credit for the prompt payment of the principal of and interest on the Bonds. Should the Net Revenues of the System at any time be insufficient to pay the principal of and interest on the Bonds when due, then the Issuer shall pay the amount of the insufficiency from its general funds as a first budget obligation. The Issuer is obligated, to the extent necessary, to levy ad valorem taxes on all taxable property in the boundaries of the Issuer for such purpose, subject to applicable constitutional and statutory limitations as to rate and amount.

The scheduled payment of principal of and interest on the Bonds when due will be guaranteed under a municipal bond insurance policy to be issued concurrently with the delivery of the Bonds by **BUILD AMERICA MUTUAL ASSURANCE COMPANY.**

The Bonds are issuable only as fully registered Bonds without coupons, and when issued, will be registered in the name of Cede & Co., as Bondholder and nominee for The Depository Trust Company ("DTC"), New York, New York. DTC will act as securities depository for the Bonds. Purchases of beneficial interests in the Bonds will be made in book-entry only form, in the denominations of $5,000 or any integral multiple thereof. Jody N. Lundquist
Chief Financial Officer
City of Flint
1101 S. Saginaw Street, 2nd Floor
Flint, MI 48502
jlundquist@cityofflint.com
(810) 237-2441

CITY OF FLINT
WATER FUND
24 MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH JUNE 30, 2017
Actual Activity Reported through December 31, 2015
Assumptions Defined Below

VENUE ASSUMPTIONS:

User Charges for the period January 2015-December 2016 were based on YTD billing activity and collection rates.
Rate increase assumptions effective March 1, 2016 and July 1, 2016 may be modified in the grey box below
Restoring the FY16 Master Fee Schedule rates per the amended preliminary injunction order would result in a rate increase of approximately 22% and would impact collections beginning in March 2016
If the Master Fee Schedule rates are restored in FY16, then any rate increase assumption for FY17 must also include 22%
Issuance of shut off notices and disconnection of services has a tremendous impact on the City's ability to enforce payment for services rendered In August, prior to the Preliminary Injunction Order, the City's average monthly collection rate was 98% The average collection rate for the period August through December 2015 has fallen to 83%, with a low point in October of 70%.

PENDITURE ASSUMPTIONS:

Expenditure activity for the period January 2016-June 2016 reflect unspent funds as of December 31, 2015 divided equally over the remaining 6 months of the fiscal year.
Expenditure activity for the period July 2016-December 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by emergency manager order
The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17 An amount for illustrative purposes is shown

	Until 6/30/2016	After 7/1/2016	After 1/1/2017
Average Monthly Collection Rate	60%	45%	75%
Rate Increase	0%	0%	0%

GLWA Water Purchase $ 1,333,333
# of Months of FY17 GLWA Water 6

Amount of State Assisted GLWA Purchase $ -
# of Months Allocated to City -

Amount of State Assisted Bill Relief $ 30,000,000
# of Months Allocated to City 3

% Receiving Credit 75%
# of Months Credit Received 4

- Regarding Rate Increases:
  - FY16 has been set such that an increase would impact bills beginning in March 2016
  - Any rate increase assumption for FY17 must also include any rate assumption made for FY16
  - For Example, FY16 restoration of Master Fee Schedule equals approximately 22% Budgeted FY17 projection of 5% must be entered as 27%.

Department of Environmental Quality
Flint Funding
February 11, 2016

2016 Budget

Supplemental 1: PA 143 of 2015			
City of Flint Emergency Water Services *		$	6,000,000
Drinking Water and Environmental Health Staff	2	$	300,000
Laboratory Services		$	1,000,000
	Supplemental 1 Total	$	7,300,000
Supplemental 2: PA 3 of 2016			
Water System Infrastructure Needs		$	2,000,000
Utility Payment Relief		$	3,000,000
Lab and Testing Costs		$	250,000
Corrosion Control Procedures		$	36,500
Infrastructure Integrity Study		$	500,000
	Supplemental 2 Total	$	5,786,500
Supplemental 3: TBD			
City of Flint Water Bill Relief		$	30,000,000
Utility Assistance		$	25,000,000
City of Flint Emergency Water Services (Jul - Sept)		$	3,900,000
Water System Needs (KWA)		$	2,200,000
Response Team		$	2,250,000
	Supplemental 3 Total	$	63,350,000
Total 2016 Supplemental Funding for DEQ		**$**	**76,436,500**

2017 Budget

City of Flint Emergency Water Services (Oct - Dec)		$	3,900,000
Drinking Water Technical Expertise	10	$	1,500,000
Total 2017 General Fund Request for DEQ		**$**	**5,400,000**

* The DEQ paid $6 million to the City of Flint for water connection services through June 2016. The total cost for the connection services was $12 million of which the Mott Foundation paid $4 million and the City of Flint paid $2 million

State of Michigan Totals

Supplemental 1 - PA 143 of 2015	$	9,350,100
Supplemental 2 - PA 3 of 2016	$	28,028,500
Supplemental 3 - As Introduced	$	156,690,000
2017 Budget - As Introduced	$	38,730,900
Total State of Michigan Funding for Flint	**$**	**232,799,500**

Subject: RE: Comment sought on email release - Flint TTHM

Gary—

In reading the full e-mail string you reference, it indicates that the issues raised by Mr. Busch were discussed on a call between DEQ staff and Treasurer Dillon. In the final e-mail of the string, DEQ Director Wyant notes that "all indications are that we (DEQ) are supportive of KWA and its cost benefits..."

I would also clarify that the "approval" signed by Treasurer Dillon in April of 2013 dealt **only** with the eventual transition to KWA, from DWSD (see page 209 of 338 in documents posted today).

Terry

Subject: Comment sought on email release - Flint TTHM

Terry,
As I'm sure you're aware, there was a massive email release today regarding Flint water. One email (attached) contains an email chain between the DEQ and Dept. of Treasury. One of the emails, a March 26, 2013, message from Stephen Busch shows that using the Flint River for an extended period of time could lead to possible microbial and disinfection by-product concerns. The city, under an apparent order from the emergency manager, switched to the river for its drinking water source while awaiting the KWA.

Subsequently, the city's drinking water, following the switch to the river, was found to contain TTHM and suffer from multiple microbial problems (and an alleged connection to Legionella), as warned by Busch.

I wanted to see if treasury would comment on if Mr. Busch's concerns in 2013 were taken seriously (or discussed at all) when the city's switch occurred and if Treasury took these concerns into consideration when signing off on the EM's orders that allowed the city's switch to the river?

I am hoping for a response ASAP for my story.

Thanks.

Andy,

Attached is staff feedback. I will be getting additional feedback in the morning. All indications are that we are supportive of KWA and its cost benefits compared to DWSD options. If that is not the answer you want tomorrow – then we should discuss.

email & 2 attachments

Director Wyant, and Deputy Director Sygo,

Addendums to ODWMA comments provided yesterday regarding the City of Flint water system and comments on the reports from Tucker, Young, Jackson, Tull, Inc. (TYJT) can be found below in red. Additional comments are as follows:

With regards to regulatory authority for DEQ to allow or prevent the breakup of water utilities, and State vs. local decisions about cost effectiveness, it is important to note that when the DEQ permitted the water withdrawal for KWA (permit 2009-001) part of the decision making process (copy attached) included reasonable use and the balance of Economic Development, Social Development, and Environmental Protection. As part of the public participation process general comments were received (pages 6 & 7) regarding impacts on DWSD and rates to remaining customers. The Department's response to those comments stated:

"The DEQ is specifically precluded from using part 327 to "...diminish or create any existing authority of municipalities to require persons to connect to municipal water supply systems as authorized by law" (MCL 324.32726)."

And

"It is appropriately an issue for water service contract negotiations between the regional water system and its customers. To do otherwise invites unwanted intervention of the state into local decision making."

ODWMA cannot on its own assess an actual dollar value to any regional benefit for the City of Flint to remain a full customer of DWSD, but the following should be included in any additional analysis:

- The cost estimates provided in the TYJT report show a cost difference between full KWA and full DWSD participation of $172 million over 30 years.
- The formation of KWA would itself be considered one of the largest regional drinking water authorities in the State in terms of capacity, and as such any regional benefits provided by DWSD may only be marginal in comparison.

Finally, we have additional questions for TYJT regarding the various DWSD supply options and the considerations they made in the operations of the Flint WTP. These considerations will have an impact on the cost estimates for DWSD options.

We look forward to further discussion of these comments during our meetings tomorrow, and please let us know if you have any additional questions for us between now and then.

Subject: Flint Draft Response

Director Wyant,

In preparation for our call today with Treasurer Dillon's office, ODWMA has developed the following for consideration. We can provide any additional info you require during the meeting.

ODWMA has reviewed the materials developed by the consultant Tucker, Young, Jackson, Tull, Inc. (TYJT) for Treasury regarding the City of Flint and potential alternatives for public water supply. Based on our reviews, we have developed the following comments to this point in our analysis:

1. The TYJT report does not contain the full scope of the Karegnondi Water Authority (KWA) raw water supply system. TYJT concerns over raw water supply redundancy and reliability are addressed to the satisfaction of ODWMA under the full KWA proposal. Please note some portions of the overall project are being financed independently by the Genesee County Drain Commission.

2. There are significant differences in contract language between KWA and Detroit Water and Sewerage Department (DWSD) with respect to the contracted maximum day demand capacity.
    a. Under a KWA contract, a "maximum day" capacity of 18 million gallons per day (MGD) would fully satisfy current demands of the City of Flint, without the need to supplement raw water capacity using the Flint River. (18 MGD, average over a 30 day period).
    b. Under a DWSD model contract, a "maximum day" capacity, even at 18 MGD, would not satisfy the current demands for the City of Flint. (18 MGD, over any 24 hour period).

3. Restrictions in contracted capacity that would prevent the City of Flint from meeting peak demand requirements present potential limits to economic development within the City of Flint, including possible connection bans and water system extension bans. This information was previously conveyed to the City of Flint by ODWMA staff.

4. All contract options with DWSD that are considered semi-competitive with the KWA contract do not fully supply the City of Flint, and would require the City of Flint to meet a significant, if not majority, of its water demands by treating water from the Flint River. Continuous use of the Flint River at such demand rates would:
    a. Pose an increased microbial risk to public health (Flint River vs. Lake Huron source water)
    b. Pose an increased risk of disinfection by-product (carcinogen) exposure to public health (Flint River vs. Lake Huron source water)
    c. Trigger additional regulatory requirements under the Michigan Safe Drinking Water Act (LT2ESWTR)
    d. Require significant enhancements to treatment at the Flint WTP, beyond those identified in the TYJT report (see item 5 below).
    e. Water Resource Division is evaluating potential impacts to NPDES wastewater discharge permits in downstream segments of the Flint River, as a result of decreased river baseflow caused by Flint WTP use.

5. The TYJT report does not adequately address increased requirements and costs associated with using the Flint River as a significant source for the Flint WTP, which are not necessary under a Lake Huron source water scenario. This includes:
    a. The need to provide softening treatment
    b. Limitations on disposal options for lime softening sludge
    c. Increased ozone capacity, UV disinfection
    d. Additional backup power, more power required for Flint River operation

6. The Flint WTP must operate at some minimum level and within a range of flow rates to maintain treatment effectiveness. Currently that minimum level is 9 MGD. This level may be reduced with additional capital costs to modify the WTP, not addressed in the TYJT report.

7. Allowing Flint WTP to blend water with DWSD sets a new precedent that could pose future consequences with other DWSD customers.

8. Costs impacts to remaining DWSD customers would be similar under the proposed scenarios, only retaining 8 MGD of 30+ MGD total Flint/Genesee Co. demands, based on the following:

a. Genesee County distribution system demands are pulling out of DWSD regardless of the decisions by Flint WTP
b. Flint's need to utilize the Flint River as a source

9. ODWMA anticipates cost savings under the KWA proposal will be leveraged to provide additional improvements to the City of Flint water distribution system, improving efficiency and providing additional cost benefits. The KWA water withdrawal permit (2009-001) includes the required implementation of conservation measures that would also drive these distribution system improvements.

10. Major cost discrepancies in TYJT analysis
    a. Engineering, Legal, Administration, Contingency – TYJT appears to have effectively double charged for these costs in their KWA estimates without adequate justification
    b. Pumping facilities – TYJT cost estimate methodology does not appear to address localized market costs and does not distinguish fixed and variable costs in its comparison analysis.

11. Remaining DWSD customers in Lapeer County could potentially see water quality impacts as a result of Flint joining KWA, if they remain with DWSD. However, indications to ODWMA are that these communities are currently in final negotiations with KWA for service, which would make this a non-issue.
    a. City Lapeer
    b. City of Imlay City

Additional response to the TYJT report has also been provided by Rowe Engineering to Flint EFM, Mr. Ed Kurtz. (Copy Attached)

ODWMA has continued to meet on a regular basis with KWA, Genesee County, and the City of Flint regarding these water supply proposals.

ODWMA will continue to provide any additional detailed analysis requested by Treasury or the DEQ Executive Office.

>
> "100% of charges, commonly known as late charges, charged to a system customer relating to unpaid billings, as approved by the State Treasurer".
>
> The other comment is on the administrative fee. Based on our conversations with Treasury, I do not have a supreme level of confidence in the ability of the local water folks to administer this credit program. We may want to consider allowing Treasury to bring in some private sector consulting/accounting assistance to ensure that this is done properly. Perhaps we could change Section 302 (1) to read:

"There shall be no administrative charges retained by the Michigan Department of Treasury to expend the funds in this act. However, the Department may expend up to $1,500,000.00 (5%) to contract with a third party entity to ensure the proper distribution of funds under this act."

Please let me know your thoughts on these changes.

Thanks,
Adam

Adam and Josiah,

Our staff was in Flint working on this today. I'm hoping they will have some additional clarity about how best to proceed, but I haven't had a chance to talk with them yet. In general I think the treasurer agrees that we may need some additional flexibility, we are working on the form that would take. And obviously can work to balance that with the need for the oversight the legislature is interested in.

Subject: RE: SB 136 (Re: Flint $30MM appropriation) Poleski proposed edits

Hey Rep. Poleski (& Others),

This is a pretty good draft from our end with just a couple of things to note. I don't want to speak for Treasury, but I'm not sure if we want to specify in this bill about late fees with such detail. That is for two reasons.

1) It has been indicated to me that we may not be able to obtain a significant amount of detail on late fees, or exactly when they were incurred. If it is impossible to separate late fees that occurred in this time frame from ones that were outside the time frame, the way this amendment is written it might make it impossible to do any reimbursements.
2) I think we may be able to, through our Dept. of Treasury, put pressure on the water system to forgive these late fees, since no services were provided that would justify them. If we stipulate in this bill that they must be paid, the water treatment department would not have any incentive to forgive those charges since the state would be reimbursing them for them.

Perhaps for subsection (c) we could change to:

"100% of charges, commonly known as late charges, charged to a system customer relating to unpaid billings, as approved by the State Treasurer".

The other comment is on the administrative fee. Based on our conversations with Treasury, I do not have a supreme level of confidence in the ability of the local water folks to administer this credit program. We may want to consider allowing Treasury to bring in some private sector consulting/accounting assistance to ensure that this is done properly. Perhaps we could change Section 302 (1) to read:

"There shall be no administrative charges retained by the Michigan Department of Treasury to expend the funds in this act. However, the Department may expend up to $1,500,000.00 (5%) to contract with a third party entity to ensure the proper distribution of funds under this act."

Please let me know your thoughts on these changes.

Thanks,
Adam

CITY OF FLINT
WATER FUND
24 MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH JUNE 30, 2017
Actual Activity Reported through December 31, 2015

Assumptions Defined Below

REVENUE ASSUMPTIONS:

1. User Charges for the period January 2015-December 2016 were based on YTD billing activity and collection rates.
2. Rate increase assumptions effective March 1, 2016 and July 1, 2016 may be modified in the grey box below.
3. Restoring the FY16 Master Fee Schedule rates per the amended preliminary injunction order would result in a rate increase of approximately 22% and would impact collections beginning in March 2016.
4. If the Master Fee Schedule rates are restored in FY16, then any rate increase assumption for FY17 must also include 22%.
5. Issuance of shut off notices and disconnection of services has a tremendous impact on the City's ability to enforce payment for services rendered in August, prior to the Preliminary Injunction Order, the City's average monthly collection rate was 98%. The average collection rate for the period August through December 2015 has fallen to 89%, with a low point in October of 70%.

EXPENDITURE ASSUMPTIONS:

1. Expenditure activity for the period January 2016-June 2016 reflect unspent funds as of December 31, 2015 divided equally over the remaining 6 months of the fiscal year.
2. Expenditure activity for the period July 2016-December 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by emergency manager order.
3. The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17 An amount for illustrative purposes is shown.

	Until 6/30/2016	After 7/1/2016	After 1/1/2017
Average Monthly Collection Rate	60%	45%	75%
Rate Increase	0%	0%	0%

Regarding Rate Increases:
FY16 has been set such that an increase would impact bills beginning in March 2016
Any rate increase assumption for FY17 must also include any rate assumption made for FY16.
For Example, FY16 restoration of Master Fee Schedule equals approximately 22%. Budgeted FY17 projection of 5% must be entered as 27%.

GLWA Water Purchase $ 1,333,333
# of Months of FY17 GLWA Water 6

Amount of State Assisted GLWA Purchase $
# of Months Allocated to City

Amount of State Assisted Bill Relief $ 30,000,000
# of Months Allocated to City 3

% Receiving Credit 75%
# of Months Credit Received 6

CITY OF FLINT
SEWER FUND
24 MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH JUNE 30, 2017
Actual Activity Reported through December 31, 2015

Assumptions Defined Below

REVENUE ASSUMPTIONS:

1. User Charges for the period January 2015-December 2016 were based on YTD billing activity and collection rates.
2. Rate increase assumptions effective March 1, 2015 and July 1, 2016 may be modified in the grey box below.
3. Restoring the FY16 Master Fee Schedule rates per the amended preliminary injunction order would result in a rate increase of approximately 17% and would impact collections beginning in March 2016.
4. If the Master Fee Schedule rates are restored in FY16, then any rate increase assumption for FY17 must also include 17%.
5. Issuance of shut off notices and disconnection of services has a tremendous impact on the City's ability to enforce payment for services rendered. In August, prior to the Preliminary Injunction Order, the City's average monthly collection rate was 98%. The average collection rate for the period August through December 2015 has fallen to 83%, with a low point in October of 70%.

EXPENDITURE ASSUMPTIONS:

1. Expenditure activity for the period January 2015-June 2016 reflect unspent funds as of December 31, 2015 divided equally over the remaining 6 months of the fiscal year.
2. Expenditure activity for the period July 2015-December 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by emergency manager order
3. The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17 An amount for illustrative purposes is shown.

	Until 6/30/2016	After 7/1/2016	After 1/1/2017
Average Monthly Collection Rate	60%	45%	75%
Rate Increase	0%	17%	17%

Regarding Rate Increases:
FY16 has been set such that an increase would impact bills beginning in March 2016.
Any rate increase assumption for FY17 must also include any rate assumption made for FY16.
For Example, FY16 restoration of Master Fee Schedule equals approximately 17%. Budgeted FY17 projection of 5% must be entered as 22%.

Sorry so late. I believe this is the fiscally distressed communities grant program. May not be able to confirm right away.

I'm 3,583 pages into some light reading on the Flint water crisis. On that page of this document set the EPA in a June 10 conference call summary notes that in relation to Flint "the state, though the Governor's office, provided disadvantaged system funding, $2M which includes $900K for lead detection and pipe inspection."

Can I get more information on that expenditure?

Emily

Subject: Top Q&A for review
Attachments: Draft City of Flint 24 Month Cash Flows Water & Sewer Funds v02092016.4.xlsx

Larry,

I think it was a productive meeting this morning. My team will continue to keep you informed as conversations progress with BS&A re: design of the "Credit Generator".

The City's next steps are:
1. Work with Treasury to draft Top Q&A for review and approval by State officials and Mayor.
2. Develop technical implementation plan with assistance from BS&A, Yeo & Yeo, State Treasury, and City staff
3. Provide implementation cost estimate to State
4. Review legal implications of implementation strategy with Counsel
5. Develop comprehensive communication plan

Top Q&A:
1. Time line for implementation - application of credits to customer accounts and reimbursement to City dependent upon policy decisions by State/Mayor and development of software program
2. How credits will be disbursed - Determine whether credits will be applied to total bill (more immediate customer relief, benefits sewer fund cash as well) vs. applied only to water billing (keeps water and sewer separate and maintains habit of monthly payment) → city may object - need to discuss w/ Mayor
3. Determination of how water penalties will be relieved - relief of penalties not included in State's initial estimate for relief
4. Application of residential relief to commercial accounts for multi-unit housing customers - Ability to ensure that potential relief is passed from owner to tenants is an issue. Redistribution from 20% relief to 65% relief will put further strain on the ability of $30 million to cover relief amount and time period covered
5. Inactive accounts - how will inactive accounts be addressed if credit amount is greater than any other amount potentially due to the City?

The question of inactive accounts also begs the question of accounts closed while a credit is still active on the account. For instance, if the credit is to be applied to water charges only, someone could close their account with a credit still due. After applying the remaining credit to the total balance owed (water AND sewer), would the customer then be due a refund? If so, what control or policy will be put in place such that someone doesn't come in and close their account to qualify for a refund and then immediately open a new account? Amanda/Al please brainstorm. 60 day delay?

Our next meeting will discuss the 24 month cash flow and to review/finalize the Q&A list for presentation to the State and Mayor's office for their approval before proceeding with finalizing the Credit Generator's parameters.

I have reattached the 24 month cash flow for ease of reference. I have noted that of the total cash balance shown, $5,848,116 is a restricted cash balance in compliance with the Revenue Bond Act (Act 94 of 1933). Reducing the beginning cash balance for the restricted amount immediately impacts the City's ongoing cash position. As distribution of the appropriation from the State to City is coordinated, I cannot reiterate often enough how dire the need is to provide support as quickly as possible. We are dedicated on our end to ensuring all procedures and policies are in place to provide the State with any requisite information and documentation to make it happen.

As always, please feel free to contact me with any questions or for additional information.

Have a great weekend.

Jody N. Lundquist

CITY OF KENT
WATER FUND
24 MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH JUNE 30 2017
Actual Activity Reported Through December 31, 2015

Assumptions Outlined Below

June 2016 were based on FY15 billing activity and collection rates.
16 and July 1, 2016 may be modified in the grey box below.
e the recorded preliminary injunction order would result in a rate increase of approximately 22% and would become enforceable beginning in March 2016.
FY16, there may rate increase assumption for FY17 may also include 22%.
Services had a tremendous impact on the City's ability to enforce payment for services rendered. In August, prior to the Preliminary Injunction Order, the City's
ervice collection rate for the period August through December 2015 was below 80%, with a low point in October of 70%.

June 2016 reflect actuarial funds as of December 31, 2015 divided equally over the remaining 6 months of the fiscal year
mother 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by ordinance thereafter
transf owner from the Great Lakes Water Authority through the first quarter of FY17. An amount for Electricity payments is shown.

16	After 7/1/2016	After 7/1/2017
5%	4.5%	7.5%
3%	2%	3%

Impending Rate Increases:
FY16 may have no such effect, an increase would become effective beginning in March 2016.
Any rate increase assumptions for FY17 may also include rate restructure costs for FY16.
For Example, FY16 restruction of Meter Fee Schedule equals approximately 22%. Budgeted FY17 reduction of 5% must be assumed at 27%

CITY OF FLINT
WATER FUND
18 MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH DECEMBER 31, 2016
Actual Activity Reported through December 31, 2015

Assumptions Defined Below

MPTIONS:
s for the period January 2015-December 2016 were based on YTD billing activity and collection rates.
e assumptions effective March 1, 2016 and July 1, 2015 may be modified in the grey box below.
e FY16 Master Fee Schedule rates per the amended preliminary injunction order would result in a rate increase of approximately 22% and would impact collections beginning in March 2016.
r Fee Schedule rates are restored in FY16, then any rate increase assumption for FY17 must also include 22%.
ded off notices and disconnection of services has a tremendous impact on the City's ability to enforce payment for services rendered. In August, prior to the Preliminary Injunction Order, the City a
ility collection rate was 88%. The average collection rate for the period August through December 2015 has fallen to 83%, with a low point in October of 70%.

SSUMPTIONS:
activity for the period January 2015-June 2016 reflect unpaid funds as of December 31, 2015 divided equally over the remaining 6 months of the fiscal year
activity for the period July 2016-December 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by emergency manager order
they have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17. An increase for illustrative purposes is shown.

	Until 6/30/2016	After 7/1/2016
ity Collection Rate	80%	85%
Rate Increase	0%	0%

GLWA Water Purchase $ 1,821,833

- Regarding Rate Increases:
  FY16 has been set such that an increase would impact bills beginning in March 2016.
  Any rate increase assumption for FY17 must also include any rate assumption made for FY16.
  For Example, FY16 restoration of Master Fee Schedule equals approximately 17%. Budgeted FY17 projection of 5% must be entered as 22%.

NOTES / COMMENTS

- Water billed by the Bill Read Date in the Historical Data table reflects water consumption from the prior month (i.e., billing from a bill with a Bill Read Date of July 2014 reflects water consumption from June 2014).

- Projected water costs are computed by using the average monthly water use for customers for Billed Date July 2014 through [illegible] for both residential and commercial customers legally authorized to bill for water.

Due to the nature of the total water credit for the month of January 2015 (i.e., February 2015 billing for water consumed in December 2014) and January billing for the period of Billed Date [illegible] 2015 to [illegible] 2015 which are applicable exclusively with [illegible] water consumption (December 2014 and January 2015), for those months the total water use credits available are excluded in the projected costs.

Projected cost includes estimated up to June 2016 using the average monthly historical cost from July 2014 August 2015 to account projection (as described here). This incorporates a 3% increase against the historical [illegible] 2014 August 2015. The 3% increase reflects the increase the City used when it [illegible] implemented effective July 1, 2015 until the [illegible] date. The rate increase [illegible] adopted at the Regular [illegible] held in the [illegible] Arizona.

NOTES / COMMENTS
• Water billed by the "Bill Read Dates" in the Historical Data tabs reflects water consumption from the prior month (i.e., billing transactions with a Bill Read Date of July 2014 reflects water consumption from June 2014)
• Projected water costs are computed by using the average amounts for water transactions for Billed Dates July 2014 till August 2015 to reflect rates at which the City of Flint is legally authorized to bill customers
• Due to absence of actual water reads for the month of January 2015 and February 2016 (i.e., water consumed in December 2015 and January 2016 respectively) "Current Date" is set at November 30, 2015. As such an additional two months of water consumption (December 2015 and January 2016) for which actual reads are currently unavailable are included in the projected costs
Projected cost includes estimation up to June 2016, the average monthly historical cost from July 2014-August 2015. Estimated projections beyond June 2016 incorporates a 5% increase against the historical costs from July 2014 to August 2015. The 5% increase reflects the increase the City would otherwise have implemented effective July 1, 2016 until the "safe date". This rate increase was adopted in the Biennial FY16/FY17 budget by the City's Emergency Manager.

Subject: SB 136 (Re: Flint $30MM appropriation) Poleski proposed edits

My apology for not having sent this yesterday afternoon as I had said I would.

Attached is a redlined Word document with my suggestions, and incorporates suggestions I got from House personnel and reflects my discussion yesterday with the Governor's and Treasury's people.

Copying Michelle Lange, Senator Shirkey, Scott Starr and Ken Osborne.

Comments and suggestions from all are welcomed.

<Poleski edit SB 136 Treasury provisions 2.docx>

REP POLESKI PROPOSED EDITS TO BOILERPLATE OF SB 136
THESE EDITS DATED 2/11/2016.

GENERAL SECTIONS

Sec. 201. In accordance with the provisions of section 30 of article IX of the state constitution of 1963, total state spending from state resources in this appropriation act for the fiscal year ending September 30, 2016 is **<<**$30,000,000.00 and state appropriations**>>** paid to local units of government are $0.

Sec. 202. The appropriations authorized under this act are subject to the management and budget act, 1984 PA 431, MCL 18.1101 to 18.1594.

<<DEPARTMENT OF TREASURY

Sec. 301.
(1) From the funds appropriated in part 1 for Flint declaration of emergency, $30,000,000.00 shall be allocated to reimburse the Water Enterprise Fund of the City of Flint in an amount equal to credits posted to its customers' accounts under the provisions of Section 302.~~help cover the cost of water bills for residents of the city of Flint.~~

(2) The department shall report quarterly to the chairs of the senate and house appropriations committees on the distribution of the funds allocated pursuant to part 1.

Sec. 302.
(1) There shall be no administrative charges, from any entity, removed or expended from the appropriations in part 1.

(2) There shall be no expenditures from the funds appropriated in part 1 without specific authorization from the state treasurer.

(3) All unexpended funds, as of September 30, 2016, from the appropriations in part 1 shall be returned to the General Fund.~~department of treasury.~~

~~(4) Any allocation to an entity receiving funds from the appropriations in part 1, other than a specific water and sewer customer, must be specifically approved by the state treasurer in each instance.~~**>>**

(4) The credit to a water customer's account shall be equal to:

a) As to a residential customer, 65% of the amount billed for water from the beginning of the billing period containing April 30, 2014 and ending at the end of the billing period

REP POLESKI PROPOSED EDITS TO BOILERPLATE OF SB 136
THESE EDITS DATED 2/11/2016.

containing the date upon which [some official certification is made that the water is safe to drink]

b) As to all other customers, 20% of the amount billed for water from the beginning of the billing period containing April 30, 2014 and ending at the end of the billing period containing the date upon which [some official certification is made that the water is safe to drink]

c) 100% of charges, commonly known as late charges, charged to a system customer relating solely to any unpaid billings for the time period described in (a) and (b) above.

d) Such late charges relating to amounts due from prior to the billing period containing April 30, 2014 may continue to accrue to Flint's Water Enterprise Fund and shall not be reimbursed under this Section.

e) Credits for sewer services are not to be reimbursed under Section 301 or this Section.

f) The charges described in (a), (b) and (c) above shall reflect rates consistent with historical practice.

(5) The State Treasurer, his/her designee(s), and the Michigan Auditor General may audit transactions called for under Section 301 and this Section at their discretion.

My observations on Adams comments:

I understand and agree with the suggestion with respect to late fees.

As to administrative costs, I fear that those cost may end up being exactly what we allocate to them. Frankly, any accountant who can't administer a straightforward credit to a customer account isn't worthy of the title.

That being said, and in deference to your suggestion, I would suggest language that doesn't specify an amount or percentage; that allows the state treasurer to incur those costs at his discretion; and report the nature of and amount of those costs as part of his quarterly report to the legislature.

Further comments welcomed, with alacrity.

> 1) It has been indicated to me that we may not be able to obtain a significant amount of detail on late fees, or exactly when they were incurred. If it is impossible to separate late fees that

occurred in this time frame from ones that were outside the time frame, the way this amendment is written it might make it impossible to do any reimbursements.

2) I think we may be able to, through our Dept. of Treasury, put pressure on the water system to forgive these late fees, since no services were provided that would justify them. If we stipulate in this bill that they must be paid, the water treatment department would not have any incentive to forgive those charges since the state would be reimbursing them for them.

Perhaps for subsection (c) we could change to:

"100% of charges, commonly known as late charges, charged to a system customer relating to unpaid billings, as approved by the State Treasurer".

The other comment is on the administrative fee. Based on our conversations with Treasury, I do not have a supreme level of confidence in the ability of the local water folks to administer this credit program. We may want to consider allowing Treasury to bring in some private sector consulting/accounting assistance to ensure that this is done properly. Perhaps we could change Section 302 (1) to read:

"There shall be no administrative charges retained by the Michigan Department of Treasury to expend the funds in this act. However, the Department may expend up to $1,500,000.00 (5%) to contract with a third party entity to ensure the proper distribution of funds under this act."

Please let me know your thoughts on these changes.

Thanks,
Adam

As we consider this language, I want to draw the attention of the Administration addressees to the [bracketed] language. That language defines the date that ends this particular payment. You are the ones who would know better how to define that date.

I realize it puts you under some time and definition pressure – to put it bluntly, that is my intent.

Hey Rep. Poleski (& Others),

This is a pretty good draft from our end with just a couple of things to note. I don't want to speak for Treasury, but I'm not sure if we want to specify in this bill about late fees with such detail. That is for two reasons.

1) It has been indicated to me that we may not be able to obtain a significant amount of detail on late fees, or exactly when they were incurred. If it is impossible to separate late fees that occurred in this time frame from ones that were outside the time frame, the way this amendment is written it might make it impossible to do any reimbursements.
2) I think we may be able to, through our Dept. of Treasury, put pressure on the water system to forgive these late fees, since no services were provided that would justify them. If we stipulate in this bill that they must be paid, the water treatment department would not have any incentive to forgive those charges since the state would be reimbursing them for them.

Perhaps for subsection (c) we could change to:

"100% of charges, commonly known as late charges, charged to a system customer relating to unpaid billings, as approved by the State Treasurer".

The other comment is on the administrative fee. Based on our conversations with Treasury, I do not have a supreme level of confidence in the ability of the local water folks to administer this credit program. We may want to consider allowing Treasury to bring in some private sector consulting/accounting assistance to ensure that this is done properly. Perhaps we could change Section 302 (1) to read:

"There shall be no administrative charges retained by the Michigan Department of Treasury to expend the funds in this act. However, the Department may expend up to $1,500,000 00 (5%) to contract with a third party entity to ensure the proper distribution of funds under this act."

Please let me know your thoughts on these changes.

> To all:
>
> I attach a fresh draft of proposed boilerplate for SB 136. My comments upon it:
>
> - **As to Late Fees:** On reflection, it is my view that it would be inappropriate and unnecessary for the State to reimburse the Flint Water System for late fees that may need to be charged off by the System.
>   - My rationale:
>   - If the water system had been operating normally, customers would have paid their bills and no late fees would have accrued. If we reimburse for late fees, the Flint water system would be enriched more than it would have been had there not been a water problem.
>   - If the system is reimbursed for a portion of the water charges, the late fees on that portion should be charged off by the system.
>   - What about late fees as to the unreimbursed water charges (35% for residential and 80% for all others)?
>   - I can argue both sides of this one. **I would value additional thoughts.**
>
> - **As to Administrative costs:** It has been suggested that we should allow some latitude to the Treasurer to expend funds for consultants or others who would help Flint administer the customer credits that SB 136 contemplates. I can see that that may be needed at some point, but I believe it is too early to know for sure.
>
>   - I have purposely drafted the SB 136 language to make billing cutoffs clear, and therefore the credits should be straightforward to calculate.
>   - If we find that the Flint water system accountants can't calculate and post those credits, we can discuss additional assistance then.

- The risk, of course, is that Flint makes a blundering attempt at calculation/posting of credits, and makes an even larger mess of its billing system than would have existed had we helped in the first place.

SENATE BILL No. 136

(As amended February 4, 2016)

February 17, 2015, Introduced by Senator HILDENBRAND and referred to the Committee on Appropriations.

A bill to make, supplement, and adjust appropriations for various state departments and agencies for the fiscal year ending September 30, 2016; and to provide for the expenditure of the appropriations.

THE PEOPLE OF THE STATE OF MICHIGAN ENACT:

PART 1

LINE-ITEM APPROPRIATIONS

Sec. 101. There is appropriated for various state departments and agencies to supplement appropriations for the fiscal year ending September 30, 2016, from the following funds:

<<APPROPRIATION SUMMARY

GROSS APPROPRIATION	$ 30,000,000
Total interdepartmental grants and intradepartmental transfers	0
ADJUSTED GROSS APPROPRIATION	$ 30,000,000
Total federal revenues	0
Total local revenues	0
Total private revenues	0
Total other state restricted revenues	0
State general fund/general purpose	$ 30,000,000

Sec. 102. DEPARTMENT OF TREASURY

(1) APPROPRIATION SUMMARY

SENATE BILL No. 136

Senate Bill No. 136 as amended (2 of 2)

GROSS APPROPRIATION	$	30,000,000
Interdepartmental grant revenues:		
Total interdepartmental grants and intradepartmental transfers		0
ADJUSTED GROSS APPROPRIATION	$	30,000,000
Federal revenues:		
Total federal revenues		0
Special revenue funds:		
Total local revenues		0
Total private revenues		0
Total other state restricted revenues		0
State general fund/general purpose	$	30,000,000
(2) GRANTS		
Flint declaration of emergency	$	30,000,000
GROSS APPROPRIATION	$	30,000,000

Appropriated from:

State general fund/general purpose..... $ 30,000,000>>

PART 2

PROVISIONS CONCERNING APPROPRIATIONS

GENERAL SECTIONS

Sec. 201. In accordance with the provisions of section 30 of article IX of the state constitution of 1963, total state spending from state resources in this appropriation act for the fiscal year ending September 30, 2016 is <<$30,000,000.00 and state appropriations>> paid to local units of government are $0.

Sec. 202. The appropriations authorized under this act are subject to the management and budget act, 1984 PA 431, MCL 18.1101 to 18.1594.

<<**DEPARTMENT OF TREASURY**

Sec. 301. (1) From the funds appropriated in part 1 for Flint declaration of emergency, $30,000,000.00 shall be allocated to help cover the cost of water bills for residents of the city of Flint.

(2) The department shall report quarterly to the chairs of the senate and house appropriations committees on the distribution of the funds allocated pursuant to part 1.

Sec. 302. (1) There shall be no administrative charges, from any entity, removed or expended from the appropriations in part 1.

(2) There shall be no expenditures from the funds appropriated in part 1 without specific authorization from the state treasurer.

(3) All unexpended funds, as of September 30, 2016, from the appropriations in part 1 shall be returned to the department of treasury.

(4) Any allocation to an entity receiving funds from the appropriations in part 1, other than a specific water and sewer customer, must be specifically approved by the state treasurer in each instance.>>

Senator Meekhof offered the following concurrent resolution:

Senate Concurrent Resolution No. 23.

A concurrent resolution to approve an extension of the state of emergency in the county of Genesee and the city of Flint.

Whereas, Since October 1, 2015, the county of Genesee, the city of Flint, the state of Michigan, and the Federal Emergency Management Agency have taken numerous actions to cope with the drinking water situation in the county of Genesee and the city of Flint, including but not limited to, switching back to the Detroit water system on October 16, declaring states of emergency, activating the emergency response and recovery aspects of their emergency operations plans, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

Whereas, It is in the best interest of the state of Michigan to continue to provide resources within the city, and take appropriate measures in response to the public health emergency, to ensure that resources remain sufficient to protect public health, safety, and property, and to lessen or avert the threat of more severe and long-lasting impacts to the community; and

Whereas, Pursuant to the *Constitution of the State of Michigan of 1963* and section 3 of the Emergency Management Act, 1976 PA 390, MCL 30.403, Governor Snyder requested on January 28, 2016, that the legislature approve an extension of the state of emergency proclaimed on January 5, 2016, and expiring on February 2, 2016, to April 14, 2016, in the county of Genesee and the city of Flint. This 73-day extension coincides with the current Presidential Emergency Declaration; now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That we approve Governor Snyder's request for an extension of the state of emergency in the county of Genesee and the city of Flint proclaimed on January 5, 2016, for another 73 days; and be it further

Resolved, That copies of this resolution be transmitted to the Governor.

NOTES / COMMENTS
• Water billed by the "Bill Read Dates" in the Historical Data tabs reflects water consumption from the prior month (i e , billing transactions with a Bill Read Date of July 2014 reflects water consumption from June 2014)
• Projected water costs are computed by using the average amounts for water transactions for Billed Dates July 2014 till August 2015 to reflect rates at which the City of Flint is legally authorized to bill customers
• Due to absence of actual water reads for the month of January 2015 and February 2015 (i e water consumed in December 2015 and January 2016 respectively), "Current Date" is set at November 30, 2015 As such an additional two months of water consumption (December 2015 and January 2016) for which actual reads are currently unavailable are included in the projected costs
Projected cost includes estimation up to June 2016 using the average monthly historical cost from July 2014-August 2015 Estimated projections beyond June 2016 incorporates a 5% increase against the historical costs from July 2014 to August 2015 The 5% increase reflects the increase the City would otherwise have implemented effective July 1 2016 until the "safe date" This rate increase was adopted in the Biennial FY15/FY17 budget by the City's Emergency Manager

Total Historical Cost to be Reimbursed (Residential and Commercial)	$ 24,083,516 42
Total Projected Cost to be Reimbursed (Residential and Commercial)	$ 4,490,495 61
Total Historical and Projected Cost (Residential and Commercial)	$ 28,574,012.03

REP POLESKI PROPOSED EDITS TO BOILERPLATE OF SB 136
THESE EDITS DATED 2/15~~1~~/2016.

GENERAL SECTIONS

Sec. 201. In accordance with the provisions of section 30 of article IX of the state constitution of 1963, total state spending from state resources in this appropriation act for the fiscal year ending September 30, 2016 is **<<**$30,000,000.00 and state appropriations**>>** paid to local units of government are $0.

Subject: updated Flint comments
Attachments: Flint water relief implementation hurdles (2) (1)(Flint comments).docx

Al Mooney seems to be diligently working the system. I have highlighted several updates from the City. We should talk in the morning before you meet with the Governor to review the issues. In addition, Jody may be meeting with the Mayor later this evening to discuss a couple of issues so I may have more updates.

Larry

Flint Water Bill Relief-Top Implementation Issues

Project Scope

The Flint Water Bill Relief Project will distribute an appropriated amount of state funds to the customers of the City of Flint water system. The Project will focus on overcoming implementation hurdles, distributing the funds using equitable principles defined in the appropriation legislation and administrative guidelines, and provide detailed reporting to ensure accountability for all the funds received.

Commented [AM1]: Slight revision with added details for clarification.

Significant Challenges in Implementing Water Bill Relief

- **Communications**
  - Develop a plan which will include media notices, targeted mailings, web-based communications, and/or other communique.
  - Engage a point person to handle the plan to relieve strain on city staff.

Commented [AM2]: Slight revision with added details for clarification.

- **BSA software-building credit generator and modeling relief**
  - Can the BSA software handle the relief as proposed?
  - BSA is at work defining the project scope of the necessary changes.
  - Need to also model relief on all or a portion of the water service and water commodity penalties.
  - Need to tighten timeline for building the credit generator.
  - With the number of accounts and various transaction detail items for each account, there are 7,787,266 records that consist of the data set.
  - A date range delimiter will be used to reduce the data set and define the records to integrate into the relief process.
  - The system changes should include the ability to create comprehensive reporting and provide a complete audit trail of all expenditures for water bill relief.
  - BSA preliminarily has provided for a rate of $150/hour for the software modifications (a special rate reduced from their normal $200/hour rate charged) and guestimates a total cost not to exceed $15,000.

Commented [AM3]: Note several entries have had slight revisions with added details for clarification.

- **Timeline for relief**
  - Given the early stage of the defining the project scope, early April is the best placeholder date for when the software modifications will be available following development, testing, and finalization of the relief program.
  - Highly dependent on the software changes managing the exception items represented by 24,494 Pre-Ruling Balance records and 3,531 water/sewer balances placed on the 2015 real property tax roll as liens.
  - **Can relief be fully provided by the deadline in the statute?**

Commented [AM4]: Slight revision with added details for clarification.

- **How the credits are applied**
  - Need to show the sewer bill on future months to make clear that relief was provided for the water bill.
  - Relief will be provided on active accounts in the form of credits on water bills, not refunds.
  - Can the 65/20 relief be provided on penalties ~~or can penalties be waived altogether~~. Need to have this modeled in the credit generator to make sure it fits within the $30 million?

- **Updating customer information prior to running the credit generator**
  - Delinquent accounts that were on the lien list for 2015 need to be restored in the system (i.e. 3,531 water/sewer balances).
  - Those billings that are now collectible after Shears v. City of Flint amended preliminary injunction order need to be moved back onto customer account history (24,494 Pre-Ruling Balance records and 1,046 payments on these balances). What is the status of the settlement of the lawsuits?

- **Commercial accounts that are residential dwellings**
  - Should commercial accounts that are residential dwellings (4 or more units) receive 65 or 20 relief?
  - How can we be sure the resident received the relief rather than have the relief be kept by the owner? How many are there?
  - Can the credit generator model this relief to ensure it fits within the $30 million?

- **Handling starts**
  - The credit generator needs to calculate relief to ensure those starting service after April 2014 get the proper credits. A determination needs to be made as to the specific start date for credit allocations after the April 24, 2014 Flint River cutover date (i.e. at what point was Detroit's treated water no longer reaching taps). *As noted in our discussion by phone on 2/13, this is not a hurdle. The generator should be more than capable of handling all accounts with activity during the designated period whether active or inactive and regardless of the start/stop date.*

- **Handling stops**
  - Targeting relief if a customer has changed residences but is still a customer.
  - Targeting relief to other bills owed to the city by the customer
  - Development of a hierarchy for which balances get paid in what order from the relief credits if funds are available after 100% of the water relief has been provided for the account (i.e. the sewer charges for the account owed to the city, the water/sewer

Commented [AM5]: The concept of waiving all penalties should be jettisoned as it will become it creates programmatic and policy issues we want to avoid.

Commented [JL6]: Language regarding lien needs to be updated to more accurately communicate delinquency year of origin and tax year.

Commented [AM7]: Updated to reflect the one year in question and added # of records.

Commented [AM8]: Updated to reflect the # of records and # of payments made on the Pre-Ruling Balances to mid-February.

Commented [JL9]: This is active litigation. The City must defer to its Counsel on any disclosures.

Commented [AM10]: Note the added detail on defining the initial date to use – there should be separate dates for different districts. A matrix will need to be developed to adjust for the lag time between when meters are read and when the bill calculation routine is processed for the billing district. If our water service staff believes a billing period included any Flint River source water, the billing district will be granted the entire credit for the period in question.

charges owed on another account by the same customer, the water/sewer charges owed by the same customer at Genesee County).
  - There may need to be an effort to find customers that have left the system to issue a refund.
  - *Policy also needs to be designed in such a way that prevents or limits the number of customers who intentionally close an account to prompt the refund process and reopen immediately in the same or related party's name.*

Commented [AM11]: Further definition is needed on the process by which credit balances on inactive accounts will be managed.

- **Legal agreement with relief to forestall future claims**
  - Local officials need to decide if they need or want to pursue a legal agreement with the customers as part of the relief. This would be an agreement that the customer accepts the relief and foreswears any other claims to relief on their water bills.

Commented [JL12]: Input by the City's legal counsel is requested to describe the potential waiver of claims discussed at previous meetings.

- **Payments to city**
  - As the city provides relief, the state will provide funds to the city.
  - A thorough audit trail is necessary. This might require the city to engage an outside firm to document all expenditures and create an audit trail.

Commented [JL13]: State and City must discuss the impact of timing of disbursement from the State to City.

- **DHHS clients**
  - If DHHS paid the water bill, the customer should only get relief for that portion they paid. Can the credit generator handle this?
    As discussed in the meeting held on 2/12, this point may be immaterial for inclusion in any further discussion. Any customer receiving assistance from DHS is limited to $175 in any given year. This would mean that on an individual basis the most DHHS may have paid on behalf of a water customer is approximately $57 of the total credit ($175 x 50% x 65%) of $114 for the two year period if the customer received assistance in both years.

See below the link to a *Flint Journal* article about the firing of the Police and Fire chiefs. The last paragraph refers to an interim Police chief. If accurate, it may be advisable for us to remind the Mayor that per the terms of the RTAB resolution she cannot name even an interim replacement without first submitting to the RTAB the minimum professional or occupational qualifications and the minimum/maximum salary range for the vacated positions.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

NICK A. KHOURI
STATE TREASURER

Flint Water Timeline (11-09-15)

1. **June 26, 2012** – Letter from Flint EM Mike Brown to DWSD for permission to begin blending Flint River water with treated water from DWSD. The letter indicates that the DEQ is supporting this option and its implementation would save the City between $2M and $3M annually.

2. **September 20, 2012** – Letter from Flint EM Ed Kurtz to DWSD requesting written permission to implement the blending option. Approval is requested by October 1, 2012.

3. **October 31, 2012** – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

4. **November 2012** – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

5. **November 6, 2012** – Letter from Flint Emergency Manager Ed Kurtz to State Treasurer Dillon that a proposal from DWSD is expected but that the initial assessment is that switching to KWA is in the best interest of the City of Flint.

6. **February 6, 2013** – TYJT issues a final report to Treasury on the comparison between Karegnondi Water Authority (KWA) and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

7. **March 2013** – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple options are provided to the Flint Emergency Manager (EM) Ed Kurtz.

8. **March 25, 2013** – The Flint City Council endorses joining KWA.

9. **April 11, 2013** – State Treasurer Andy Dillon authorizes Flint EM Ed Kurtz, pursuant to Section 12(3) of P.A. 436 of 2012, to enter into a contract with KWA if a final offer from DWSD is either not received for rejected in good faith based upon specific objections.

10. **April 15, 2013** – DWSD provides a best and final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

11. **April 16, 2013** –Flint EM Ed Kurtz informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

12. **April 17, 2013** – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

13. **June 26, 2013** – Groundbreaking for the Karegnondi Water Authority begins. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

14. **June 28, 2013** – Financing Contract between the City of Flint and KWA is approved. Effective August 1, 2013. This document was signed by EM Mike Brown.

15. **July 08, 2013** – The City retains Lockwood, Andrews & Newman engineering firm to get the City's water plant up and running while the KWA pipeline is built.

16. **February 19, 2014** – The KWA Board of Directors adopts Resolution 2014-01, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

17. **April 17, 2014** – Water service from DWSD officially ends. The City of Flint also conducts two separate public forums regarding the use of Flint River water, upgrades to the City's water system and the overall cost of the switch to KWA.

18. **April 25, 2014** – City conducts public event marking the transition to the use of Flint River water. DEQ information shows that transition complete by May 2015.

19. **January 2, 2015** – The City issues a press release stating the City water system exceeds the TTHM maximum contaminant level.

20. **March 3, 2015** – Flint EM Jerry Ambrose provides a memorandum to Deputy State Treasurer Wayne Workman stating that a reconnection to DWSD will cost the City $10.1M/year and that water purchases could be as high as $1M/month.

21. **March 12, 2015** – Veolia issues the final operational evaluation of the City's water system.

22. **September 3, 2015** – MDEQ testing of the City's water shows TTHM levels are below the required action level.

23. **September 25, 2015** – Genesee County Health Department and the City of Flint issues a lead advisory for residents to be aware of lead levels in drinking water after hearing concerns from the medical community.

24. **October 16, 2015** – The City of Flint reconnects to Detroit Water.

25. **November 4, 2015** – The EPA issues its final report on high lead levels at three residences in the City.

Subject: SB 136 language
Attachments: 01196'15 (J160216).pdf

Nick,

In looking at SCR 23, which is what Rep. Poleski's language references, it appears to be a hard end date of the declaration of emergency in Flint to April 14, 2016. The House's intent is that April 14 would serve as the hard end date- so bills including that date would be the last billing period the credit would apply to. State Budget Office is reviewing the language as well to make sure they are interpreting it the same way.

I heard from Michelle Lange in the Gov's office this evening though, and they were concerned about a hard date. She was awaiting word from Dick about where they are at. I did share with her your perspective that in a practical sense the $30 million is estimated to cover April 2014 to April 2016, so to cover additional time would potentially require the legislature to revisit the issue anyway.

Will let you know if I hear from her this evening yet.

Subject: RE: PDF For Amendment for SB 136

What is your interpretation of the language related to the end of the time period for bills to qualify that references SCR 23. I didn't work on that SCR so I'm a little in the dark. The last whereas clause talks about the emergency being extended to April 14, 2016. The resolved clause references 73 additional days from the state of emergency declared January 5. which is sometime in early March.

Governor Snyder requested on January 28, 2016, that the legislature approve an extension of the state of emergency proclaimed on January 5, 2016, and expiring on February 2, 2016, to April 14, 2016, in the county of Genesee and the city of Flint. This 73-day extension coincides with the current Presidential Emergency Declaration; now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That we approve Governor Snyder's request for an extension of the state of emergency in the county of Genesee and the city of Flint proclaimed on January 5, 2016, for another 73 days; and be it further

So is the intent that the credit would cover bills including April 14, or something else?

Rep. _____ offered the following amendment to Senate Bill No. 136:

1. Amend page 2, following line 13, following "**DEPARTMENT OF TREASURY**" by striking out all of sections 301 and 302 and inserting:

"Sec. 301. (1) From the funds appropriated in part 1 for the Flint declaration of emergency, up to $30,000,000.00 shall be allocated to reimburse the water enterprise fund of the city of Flint in an amount equal to credits posted to its customers' accounts in accordance with section 302.

(2) The department shall report quarterly to the senate and house appropriations committees, the senate and house fiscal agencies, and the state budget director on the distribution of the funds allocated pursuant to part 1.

Sec. 302. (1) There shall be no administrative charges, from any entity, removed or expended from the appropriations in part 1.

(2) There shall be no expenditures from the funds appropriated in part 1 without specific authorization by the state treasurer.

(3) All unexpended funds from the appropriations in part 1, as of September 30, 2016, shall lapse to the general fund.

(4) The credit to a water customer's account shall be equal to the following:

(a) For a residential customer, an amount determined by the state treasurer not to exceed 65% of the amount billed for water from the beginning of the billing period containing April 30, 2014 to the end of the billing period containing the date upon which the declaration of disaster, as described in Senate Concurrent Resolution No. 23 of the 98th Legislature, expires.

(b) For all other customers, an amount determined by the state treasurer not to exceed 20% of the amount billed for water from the beginning of the billing period containing April 30, 2014 to the end of the billing period containing the date upon which the declaration of disaster, as described in Senate Concurrent Resolution No. 23 of the 98th Legislature, expires.

(5) Credits for sewer services are not to be reimbursed under this section or section 301.

(6) The amount of the credits calculated under subsection (4) shall reflect rates consistent with the rates paid at the time of billing.

(7) The state treasurer, or his or her designee, and the auditor general may audit transactions provided for under this section and section 301 at their discretion.".

Flint Mayor Karen Weaver Targets First Lead Pipe Removal for Next Week

Mayor Calls on Gov. Snyder to Pressure House, Senate GOP Leaders to Immediately Pass $25 Million Supplemental to Pay for Pipe Removal

Mayor's Ambitious "Fast Start" Plan Wins Endorsement of Renowned Virginia Tech Water Expert Dr. Marc Edwards

(FLINT)-- Mayor Karen Weaver announced today that her administration intends to begin replacing lead pipes in Flint next week to restore safe, clean drinking water as quickly as possible to the citizens of her city. She called on Gov. Rick Snyder to pressure the Legislature to move immediately to approve funding for the first phase of her $55 million *Fast Start* lead pipe replacement plan.

Mayor Weaver said she is working with water infrastructure experts from the Lansing Board of Water & Light (BWL) to train local Flint workers on lead pipe removal at a vacant property in Flint owned by the Genesee County Land Bank. The training exercise is set to begin next week at a location to be announced. House-by-house lead service line removal and replacement operations targeting high-risk households across the city will commence shortly thereafter, Weaver said.

Mayor Weaver said she is very pleased that her *Fast Start* plan has been endorsed by renowned Virginia Tech water expert Dr. Marc Edwards, who is widely hailed for his role in uncovering the shocking lead levels in Flint's water supply and frequently testifies before Congress on lead contamination in municipal water systems. Dr. Edwards confirmed to MSNBC's The Rachel Maddow Show last week that he supports Mayor Weaver's project moving forward.

"These guys know what they are doing," Edwards told MSNBC. "Society needs to decide if lead pipe replacements are a good investment. Personally, I think so. I support this plan."

"I will not accept anything less than full removal of all lead pipes from our water system," said Mayor Weaver. "I continue to hear from Lansing that the people of Flint should wait to see if pipes can be 'coated.' I call on Governor Snyder to end that discussion, and to commit fully to getting the lead out of Flint."

Weaver added: "Legislative leaders and Governor Snyder say they want to see our city recover. Job one in that recovery is removal of lead service lines. This Legislature can move bills in a matter of hours when it wants to. Now is the time for the state to accept its duty and its responsibility and cover the cost of this important action."

During the training exercise next week, the BWL will demonstrate its innovative technology for removing and replacing lead pipes with new copper pipes in half the time at half the cost of traditional methods. The Lansing public water and electric utility has perfected its technique by removing more than 13,500 lead pipes in Michigan's capital city over the past 12 years.

"Flint is so fortunate to have great neighbors, friends and partners reaching out to us from every corner of Michigan, across the country and all around the world. Our sister city right next door in Lansing is definitely one of our strongest allies," Weaver said. "I'm especially grateful to Lansing Mayor Virg Bernero and the Board of Water & Light for their help. Together, we're going to get the lead out of Flint, starting next week."

Mayor Weaver said she also appreciates Gov. Snyder's change of heart on moving quickly to replace Flint's lead pipes and his recent budget proposal to partially fund the project, but she is not agreeing to allow the governor's engineering firm and contractors do the work. Weaver welcomed the governor's interest in working with the city to coordinate removal of the first 30 lead service lines, but noted that much more needs to be done by Gov. Snyder and others to secure full funding for her plan.

Toward that end, Mayor Weaver said she is working closely with The White House and Flint's representatives in the Michigan Legislature and U.S. Congress to secure full funding for her lead pipe removal project, as well as long-term funding to fully repair the city's devastated water distribution system. She called on state and federal lawmakers to move quickly to approve emergency funding for her project while long-term repairs to Flint's water distribution system are evaluated.

"Lansing and Washington need to understand that the first and most critical priority is an emergency public health intervention to start getting rid of these pipes immediately," Weaver said. "Then we can figure out exactly what it will cost over the long-term to fix our broken water distribution system. If we have to

replace major components or even the whole system, it will cost an enormous amount of money. Everyone needs to be prepared for that possibility. Let's start a serious conversation about where that money is going to come from while we get to work removing the pipes."

If funding to ramp up her *Fast Start* project is not secured quickly from the state or federal government, Weaver said she may have to take her case directly to the national and international audience that is closely following the daily indignities still being suffered by the people of Flint, especially the city's children, who have been living on bottled water for months after being forced to drink lead-poisoned water for nearly two years.

"If the state and federal governments won't pay to restore safe drinking water and dignity to the people of my city, I may have to go on national TV and crowdsource the funding on the Internet," Weaver said. "Rachel Maddow might just be willing to help me issue a worldwide challenge to the celebrities and other philanthropic donors who are showing so much love for Flint.

"We're going to get this done -- and done quickly -- by any and every means necessary," Weaver concluded. "The people of my city have simply run out of patience and I have a moral obligation to act."

To: Durfee, Sally (TREASURY)
Subject: Re: Flint Billing cycle date

They are going to add an amendment that would allow them to extend the timeframe via resolution. I talked with Nick, while not ideal his inclination was we could live with this. In a practical sense it sounds like we may have to revisit this at some point regardless.

They are not inclined to budge much more than that.

> I've expressed the potential scenario that we need to cover periods beyond April. Rep Poleski feels pretty strongly that he wants to force the administration to revisit the issue with the legislature at that time. His sense is they want the language to serve as pressure on state government to get this resolved.

One correction:

Michael Townsend is the designee of the director of DTMB.

From a Jan 21, 2016 appt release:

"Townsend is the former finance director and budget director of the city of Flint and had served the city since 1997. He has over 25 years of experience in budgetary, finance, accounting and managerial experience. Townsend earned a bachelor's in business administration from Olivet College. He fills the vacancy created by the resignation of Brian Larkin and will serve as the representative of the director of the Department of Technology, Management, and Budget."

Hi Terry – We're planning to issue this appointment release at 3 p.m. I'm not sure if Jordan sent you an FYI yet. If you have changes let me know, otherwise we'll issue at 3.

Thanks much!
Jess

Gov. Rick Snyder appoints Joel Ferguson to Flint Receivership Transition Advisory Board

LANSING, Mich. – Gov. Rick Snyder today announced the appointment of Joel Ferguson, of Lansing, to the Flint Receivership Transition Advisory Board.

The board was first named in April 2015 after the city of Flint transitioned back to local control.

"I thank Joel for his willingness to serve on this important board and am confident his collaboration with local leaders will help ensure ongoing financial stability in the city of Flint," Snyder said.

Ferguson is president of Ferguson Development and F&S Development and is chairman of the Michigan State University Board of Trustees. He served in the U.S. Marine Corps and earned a bachelor's degree in elementary education from Michigan State University. He will represent members with relevant professional experience and replaces David McGhee.

Other members of the City of Flint RTAB include: Frederick Headen, representing the State Treasurer, Mike Finney, representing members with relevant professional experience, and Michael Townsend, representing members with relevant professional experience. Members serve at the pleasure of the governor.

For more information about Public Act 436 of 2012, the Local Financial Stability and Choice Act, visit the Local Government Fiscal Health page on the Department of Treasury's web site at www.michigan.gov/treasury.

Subject: Flint Water infrastructure funding options

We've been asked to put together a couple of pages for the Governor on financing options for pipe replacement in Flint

Let's assume a $100m project

I found the 1/19 document titled "water infrastructure improvements..." It's a good start

What I need is a memo that lays out the options for the Gov

(1) SRO—basically just incorporate John's SRO Federal government proposal
(2) G.O options—CMI, GLWQ (quality of life bonds doesn't seem big enough to mention)
(3) Revenue bonds—bottle deposit, etc

Are there other options we should discuss? Non-state dollars?

For each, a short write up on pros and cons

John—can you take the lead drafting something tomorrow? I know its short notice, but hopefully most of the work has been done already

Thanks

Water Infrastructure Improvements Program and Revenue Generation Options

DRAFT – 2/17/16

CONFIDENTIAL, subject to client privilege

Revenue Generation Options

To date, the following options have been identified as potential sources of proceeds for water infrastructure improvements:

- State GO Bonds
  - Clean Michigan Initiative Program ("CMI")
  - Environmental Protection Program ("EPP"); also known as "Quality of Life Bonds"
  - Great Lakes Water Quality Program ("GLWQ")
- Utilization of the Michigan Finance Authority's ("MFA") Drinking Water Revolving Fund ("DWRF") and/or EPA forgiveness options
- Bottle Deposit Fund usage and/or Bottle Bill changes
- As part of this analysis, tobacco securitization and Lottery revenue bonds have been explored but are not recommended for this purpose

Revenue Generation Options
State GO Bonds - CMI

Purpose

The CMI Program was authorized by voters in 1998 to, "finance environmental and natural resources protection programs that would clean up and redevelop contaminated sites, protect and improve water quality, prevent pollution, ***abate lead contamination***, reclaim and revitalize community waterfronts, enhance recreational opportunities and clean up contaminated sediments in lakes, rivers and streams."

Capacity

- Approximately $80 million is remaining of the originally authorized $675 million
- Last issuance in 2011 - $85 million

Enabling Legislation

PA 451 of 1994, Part 196

Benefits

- Likely easiest to accomplish

Considerations

- Amendments needed to utilize and identify specifically the remaining allocations

Revenue Generation Options

State GO Bonds – EPP "Quality of Life Bonds"

Purpose

The EPP Program was authorized by voters in 1988 to, "finance environmental protection programs that would ***clean up sites of toxic and other environmental contamination,*** contribute to a regional Great Lakes protection fund, address solid waste problems, ***treat sewage and other water quality problems***, and reuse industrial sites and preserve open space."

Capacity

- Approximately $8 million is remaining of the originally authorized $660 million
- Last issuance in 2006 - $25 million

Enabling Legislation

PA 451 of 1994, Parts 193 (proposal and authorization) & 195 (implementation)

Benefits

- Due to spirit of original purpose and small amount of remaining authorization, may not be a strong candidate for other interested parties to mount legal challenges

Considerations

- Appears to be more focused on "dirt-like" projects, i.e., "sites" and "environmental contamination"
- Lead abatement projects not specifically mentioned in ballot language
- Slight possibility of legal challenges; could be offset by new ballot initiatives
- Amendments needed to authorize uses to address water quality problems and other environmental contamination issues and to utilize remaining allocations

Revenue Generation Options

State GO Bonds - GLWQ

Purpose

The GLWQ Program was authorized by voters in 2002 to, "***improve the quality of waters of the state by financing*** sewage treatment works projects, storm water projects and ***water pollution projects***."

Capacity

Out of the $1 billion originally authorized, $527.4 million is not fully expended:

- $200 million is remaining under the Water Pollution Control Revolving Fund
- A $90 million "Rising Bond", issued to satisfy original statutory issuance requirements, is held at the MFA level and could be refunded
- $237.4 million has been committed to local governments for project that have already been approved although funds have not expended under the Strategic Water Quality Initiatives Fund ("SWQIF")

Enabling Legislation

PA 451 of 1994, Parts 53, 54 and 197

Benefits

- Potentially largest source of GO bond proceeds

Considerations

- Appears to be more focused on sewage treatment works projects, storm water projects and nonpoint source projects
- Lead abatement projects not specifically mentioned in ballot language or in authorization paragraph
- SWQIF funds have already been committed and local governments have begun making expenditures based on those commitments
- Possibility of legal challenges; could be offset by new ballot initiatives
- Amendments needed to expand authorization, remove annual borrowing limits and utilize remaining allocations

Revenue Generation Options

Traditional Drinking Water Revolving Fund "DWRF"

Purpose

Designed to make low-interest rate loans to communities and water suppliers in order to improve water quality.

Capacity

- Annual program size approximately $55 million
- $36.3 million has been committed in FY 16

Enabling Legislation

Amendments may be considered to amend application scoring process

Benefits

- Program already well established
- State may be able to supplant or offset debt service to local units of government through revenue sharing modifications

Considerations

- If revenue sharing not used as an offset, normally loans are repaid by local governments who pass along the costs to homeowners through water and sewer rates or special assessments
- FY 16 funding already set; Federal requirements dictate the FY 17 application process begins May 2016 and loans are awarded on a quarterly basis but can be as early as October 1, 2016
- Would need to comply with Federal guidelines related to material sourcing and labor
- Limit of 30% of fundable range

Revenue Generation Options

DWRF Forgiveness

Purpose

The Environmental Protection Agency ("EPA") has allowed for certain percentages of loan forgiveness for disadvantaged communities.

Capacity

- Up to 30% of loans made since 2010 could be eligible for forgiveness
- Potentially up to $60 million in loans could be forgiven, producing upfront proceeds

Enabling Legislation

Federal program – state legislation not needed

Benefits

- No need to backfill program with Proposal 2 bonds or other bonding

Considerations

- Need replacement funds for Clean Water Fund ("CWF")
- 10-15% reduction in annual capacity if CWF funds not replaced

Revenue Generation Options

Bottle Deposit Fund Usage and/or Bottle Bill Changes

Purpose

- Use of cash assets in Bottle Deposit Fund
- Could be combined with an expansion (to other beverages, e.g., tea and juice) or modification of the Bottle Bill to lower the deposit rate to 10 cents in order to increase annual amounts of unclaimed property

Capacity

- Revenues in the Bottle Deposit Fund were $18.8 million in FY 15, $21.7 million in FY 14 and $18.9 million in FY 13
- The Bottle Deposit Fund has $52 million in Common Cash as of FY 15, down from $56 million in FY 14 and $58 million in FY 13

Enabling Legislation

- Changes to the Bottle Bill would need to be drafted and introduced

Benefits

- Utilizes assets generated for environmental purposes

Considerations

- Determination needed to see if funds held in Common Cash can be redirected
- Lowering the deposit rate could appear to be adverse to environmental purposes
- Replacement revenues needed for current expenditures

Program Questions

- Is this to be a statewide program, or specific to a local unit of government?
  - If for a specific unit of government, would the unit be asked to borrow as well?
  - Can special assessments be passed along to the homeowners?
- Are funds to be used for grants or loans? If a revolving loan program, what assumptions should be used to establish the amount of needed seed capital?
  - Amount of individual loans
  - Number of loans targeted per year
  - Repayment terms: duration and rate
  - Default rate
  - Administrative fees
- Does an educational field study need to be funded to determine the most cost effective and fastest way to execute the projects?
- Are there other expenditures other than for pipe replacements that need to be funded? For example:
  - Treatment facility upgrades
  - Water main replacements
  - Education enhancements
  - Health care costs – initial and ongoing

Subject: FW: Flint - Proposed Emergency Relief Package

Here's a simple offer for the Senate

Its two pieces

(1) Allow the State to forgive the current $21m DWRF loan to Flint AND recapitalize the fund by the same amount so other communities in Michigan aren't hurt
(2) Provide an additional $25m capitalization each year for 5 years to the DWRF (above the normal $25m/yr) directed toward communities under an emergency declaration. The capitalization could be converted to a forgivable loan based on a viable implementation plan

#2 could be modified based on legislative appetite

Greetings All,

This week we are schedule to have presentations from the FWICC KWA, Policy and Communications Sub-Committees. As a reminder, please send me your lists of priorities, objectives and tasks using the attached template by end of business on Friday (I need to include them in the Governor's briefing on Thursday).

Also, for those who presented last week and have not sent me your items on this template, please do so by end of business on Wednesday. Please let Harvey or me know if you have any questions.

Thank you,
Stacie

Information for Flint Water Interagency Coordinating Committee Subcommittees

Establishing Initial Incident Priorities

Clear initial priorities are important to establishing unity of effort early in the incident response process. When the members of the team clearly understand the intent behind instructions, they are equipped to act decisively and make better decisions. While many things vie for attention, especially in the immediate aftermath of a disaster or emergency, not everything can be a priority. The axiom that if everything is a priority, then nothing is a priority clearly applies to incident management.

Objectives

Good objectives:

- Are concise and stated in the form of a command
- Begin with an action verb (but not "continue" or "maintain")

Tasks

Tasks define specific actions to be performed to achieve a planned outcome. Tasks specify who, what, where, and when for implementing strategies to achieve incident objectives. Tasks describe the deployment and direction of resources, based on the strategy to accomplish the incident objectives.

In this case, tasks or tactics can be developed by those personnel at lower levels who will be implementing the priorities and objectives.

Subject: Fwd: MEDIA RELEASE: Flint Mayor Targets First Lead Pipe Removal for Next Week

I just received this email. The Mayor appears to be on her own path.

Please get Nick going ASAP on what is available from existing loan and other financing programs. Also, we need to look at the cash flow timing on the water bill payment program.

Thanks
Rick

For Immediate Release

Flint Mayor Karen Weaver Targets First Lead Pipe Removal for Next Week

Mayor Calls on Gov. Snyder to Pressure House, Senate GOP Leaders to Immediately Pass $25 Million Supplemental to Pay for Pipe Removal

Mayor's Ambitious "Fast Start" Plan Wins Endorsement of Renowned Virginia Tech Water Expert Dr. Marc Edwards

(FLINT)-- Mayor Karen Weaver announced today that her administration intends to begin replacing lead pipes in Flint next week to restore safe, clean drinking water as quickly as possible to the citizens of her city. She called on Gov. Rick Snyder to pressure the Legislature to move immediately to approve funding for the first phase of her $55 million *Fast Start* lead pipe replacement plan.

Mayor Weaver said she is working with water infrastructure experts from the Lansing Board of Water & Light (BWL) to train local Flint workers on lead pipe removal at a vacant property in Flint owned by the Genesee County Land Bank. The training exercise is set to begin next week at a location to be announced. House-by-house lead service line removal and replacement operations targeting high-risk households across the city will commence shortly thereafter, Weaver said.

Mayor Weaver said she is very pleased that her *Fast Start* plan has been endorsed by renowned Virginia Tech water expert Dr. Marc Edwards, who is widely hailed for his role in uncovering the shocking lead levels in Flint's water supply and frequently testifies before Congress on lead contamination in municipal water systems. Dr. Edwards confirmed to MSNBC's The Rachel Maddow Show last week that he supports Mayor Weaver's project moving forward.

"These guys know what they are doing," Edwards told MSNBC. "Society needs to decide if lead pipe replacements are a good investment. Personally, I think so. I support this plan."

"I will not accept anything less than full removal of all lead pipes from our water system," said Mayor Weaver. "I continue to hear from Lansing that the people of Flint should wait to see if pipes can be 'coated.' I call on Governor Snyder to end that discussion, and to commit fully to getting the lead out of Flint."

Weaver added: "Legislative leaders and Governor Snyder say they want to see our city recover. Job one in that recovery is removal of lead service lines. This Legislature can move bills in a matter of hours when it wants to. Now is the time for the state to accept its duty and its responsibility and cover the cost of this important action."

During the training exercise next week, the BWL will demonstrate its innovative technology for removing and replacing lead pipes with new copper pipes in half the time at half the cost of traditional methods. The Lansing public water and electric utility has perfected its technique by removing more than 13,500 lead pipes in Michigan's capital city over the past 12 years.

"Flint is so fortunate to have great neighbors, friends and partners reaching out to us from every corner of Michigan, across the country and all around the world. Our sister city right next door in Lansing is definitely one of our strongest allies," Weaver said. "I'm especially grateful to Lansing Mayor Virg Bernero and the Board of Water & Light for their help. Together, we're going to get the lead out of Flint, starting next week."

Mayor Weaver said she also appreciates Gov. Snyder's change of heart on moving quickly to replace Flint's lead pipes and his recent budget proposal to partially fund the project, but she is not agreeing to allow the governor's engineering firm and contractors do the work. Weaver welcomed the governor's interest in working with the city to coordinate removal of the first 30 lead service lines, but noted that much more needs to be done by Gov. Snyder and others to secure full funding for her plan.

Toward that end, Mayor Weaver said she is working closely with The White House and Flint's representatives in the Michigan Legislature and U.S. Congress to secure full funding for her lead pipe removal project, as well as long-term funding to fully repair the city's devastated water distribution system. She called on state and federal lawmakers to move quickly to approve emergency funding for her project while long-term repairs to Flint's water distribution system are evaluated.

"Lansing and Washington need to understand that the first and most critical priority is an emergency public health intervention to start getting rid of these pipes immediately," Weaver said. "Then we can figure out exactly what it will cost over the long-term to fix our broken water distribution system. If we have to replace major components or even the whole system, it will cost an enormous amount of money. Everyone needs to be prepared for that possibility. Let's start a serious conversation about where that money is going to come from while we get to work removing the pipes."

If funding to ramp up her *Fast Start* project is not secured quickly from the state or federal government, Weaver said she may have to take her case directly to the national and international audience that is closely following the daily

indignities still being suffered by the people of Flint, especially the city's children, who have been living on bottled water for months after being forced to drink lead-poisoned water for nearly two years.

"If the state and federal governments won't pay to restore safe drinking water and dignity to the people of my city, I may have to go on national TV and crowdsource the funding on the Internet," Weaver said. "Rachel Maddow might just be willing to help me issue a worldwide challenge to the celebrities and other philanthropic donors who are showing so much love for Flint.

"We're going to get this done -- and done quickly -- by any and every means necessary," Weaver concluded. "The people of my city have simply run out of patience and I have a moral obligation to act."

City of Flint- Deficit Elimination Plan - April 17, 2015

With the currently approved Deficit Elimination/ Reserve Accumulation Plan, adjusted for revised revenue estimates, the current $7 million deficit would not be eliminated until FY22. With the $7 million loan, the deficit is eliminated by the end of FY15, and General Fund reserves accumulate to as much as 10% of projected revenues by FY20, assuming $1 million continues to be budgeted for reserve accumulation as provided for in the current DEP/RAP and City Ordinance.

Impact of Emergency Loan on General Fund Deficit:

1 **Status Quo - No Loan:**

$1 million surplus committed annually by ordinance for deficit elimination/reserve accumulation/OPEB reduction
Assumes revenue-expense gap is not eliminated each year

	Tentative FY16	Tentative FY17	Projected FY18	Projected FY19	Projected FY20
General Fund (101)					
Revenues	$51,239,208	$50,029,123	$50,638,175	$51,180,184	$51,762,300
Expenses	$51,239,208	$50,029,123	$50,638,175	$51,180,184	$51,762,300
Revenues - Expenses Gap	$0	$0	$0	$0	$0
Committed for Deficit Reserve	$1,000,000	$1,000,000	$1,000,000	$1,000,000	$1,000,000
Projected Fund Balance June 30, 2015*	($7,000,000)				
Projected Fund Balance FY17 - FY20		($6,000,000)	($5,000,000)	($4,000,000)	($3,000,000)
Ending Fund Balance	($6,000,000)	($5,000,000)	($4,000,000)	($3,000,000)	($2,000,000)

* Accumulated GF Deficit per audit, June 30, 2014	($8,681,427)
$1,000,000 revenue surplus budgeted in GF for FY15 for deficit elimination	$1,000,000
$800,000 budgeted in Public Improvement Fund for FY15 to reduce GF deficit per previous EM order	$800,000
Additional projected GF surplus for FY15 which will reduce deficit	$181,427
	($7,000,000)

2 **With $7 million Loan:**

$1 million surplus committed annually by ordinance for deficit elimination/reserve accumulation/OPEB reduction
Revenue - expense gap is eliminated each year

	Projected FY16	Projected FY17	Projected FY18	Projected FY19	Projected FY20
General Fund (101)					
Revenues	$51,239,208	$50,029,123	$50,638,175	$51,180,184	$51,762,300

City of Flint 5-Year Financial Plan

Preface

This adopted budget for the City of Flint covers the FY15 and FY16 fiscal years which begin July 1, 2014 and July 1, 2015 respectively. Financial projections for the following 3 fiscal years are included as well.

This budget has been developed within the context of the City's recently adopted Master Plan, the Vision, Mission, and Goals for the City government as adopted by the City Council, and the Budget Priorities as adopted by the City Council. Accompanying this budget is a preliminary statement of objectives initially proposed to be accomplished during the two years.

Taken together, the budget and strategic plan will serve as a template to move the City government forward to become a well-managed, financially stable, and accountable organization focused on creating a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

However, this budget demonstrates the continuing financial challenges facing the City of Flint. Stagnant revenue growth in property tax and income tax revenues, coupled with significant increases in legacy costs, retiree health care in particular, create a significant gap between revenues and expenses which require increases in other revenues and decreases in City staffing and services including the possibility of adjustments in public safety services.

Unfortunately, the financial forecast for the next several years beyond FY16 show a continuing gap between projected revenues and expenses. Within the next few years, without significant means to identify and collect additional revenues, or to further reduce the cost base, the City of Flint will be extremely challenged to provide even the most basic of City services.

Over the last several weeks, this adopted budget has been reviewed by the City Council, which will also held a public hearing to receive citizen input. The Mayor and Council subsequently provided comments and recommendations pertaining to the budget to the Emergency Manager.

Background

The City of Flint has been in state receivership since December, 2011, as a result of consistent deficits in the General Fund, a decline in pooled cash, unrealistic budgeting, and unfunded liabilities for postemployment benefits. Significant progress has been made in addressing these financial issues, as the $19.1 million deficit at the end of FY12 had been reduced to $12.9 million at the end of FY13, cash position had improved, and the FY14 budget was realistically balanced, with further reduction of the deficit anticipated.

The FY14 budget was designed and implemented with the same goals in mind – operating within the constraints of available revenues; restructuring operations and cost factors to enhance future financial stability, and continuing to reduce the remaining $12.9 million deficit. The FY14 budget was constructed with the specific intent of further reducing the deficit by a minimum of $1 million, by budgeting expenses at $1 million less than projected revenues. As of January 31, 2014, seven months into the FY14 year, revenues and expenses are on target.

In order to regain and maintain financial solvency, it is not only necessary to eliminate the remaining accumulated deficit but to have an adequate amount of reserves to protect the City in the event of unexpected financial losses. Planning to accomplish this requires a continual dedication of revenues over the next several years to eliminate the remaining deficit and establish an adequate reserve level. A draft deficit elimination plan to accomplish this is currently under review by the Michigan Department of Treasury.

Making progress to date has required hard decisions and sacrifices for all. The FY13 and FY14 budgets were balanced through a mixture of significant revenue increases, significant expenditure decreases, and steps taken to reduce legacy costs. Revenue increase included a 25 percent increase in water and sewer rates, passage of a 6 mill property tax increase for police and fire, establishment of a special assessment district for street lighting, and implementation of a fee sufficient to cover the cost of waste collection. Expenditure reductions included elimination of 20 percent of the City's workforce, compensation decreases equivalent to a 20 percent wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan.

The actions taken to-date to restructure healthcare benefits for current employees and retirees have also had a significant impact on reducing both current costs and long-term liabilities. The 20% reduction in the workforce required significant reorganizational activities focused on reducing current costs. Long term liabilities were reduced by eliminating traditional defined benefit pension programs for new employees in favor of hybrid plans; by moving the City's retirement system into the a state wide retirement system; by restructuring health insurance benefits for current employees and placing retirees into those same plans; and by eliminating the promise of retiree health care for new employees in favor of providing retiree medical savings accounts. Much of the positive financial result in FY13 came from these actions. The restructuring, which was implemented during the course of FY12, reduced the City's OPEB liabilities alone from nearly $900 million to less than $325 million as noted in the FY13 audit.

The efforts of the City to regain financial solvency have been aided by support from numerous Federal, State and private partners. State police troopers have been placed in the City to support local law enforcement efforts, and funds have been allocated to enhance prosecution activities and to operate the City's lock up. The Governor's proposed budget continues this support.

The steps taken to begin to restore the City to financial solvency have not been without conflict and changing circumstances. A significant legal challenge has been made to the decision to move retirees from their historical health insurance plans into the same plans offered current employees. This action resulted in an initial cost reduction in FY13 of $3.5 million to the City and imposed deductibles and co-pays on retirees. This challenge is currently pending in federal court. If the challenge is ultimately upheld, it will pose a significant challenge to the City in its efforts to regain and maintain financial and service solvency. Due to the stay imposed by the federal court, the City must increase its budget for retiree healthcare costs in the FY15 budget by $5 million and may even need to pay more as retirees seek reimbursement for past medical expenses. These healthcare expenses will continue to increase in subsequent years.

Legacy costs in total will continue to be a cost burden to the City of Flint. In FY 14, the City budgeted $30.2 million for its retiree healthcare and pension costs, an amount equal to 17% of its total revenues. The General Fund alone budgeted $16.4 million, an amount equal to 31% of its total revenues. By FY19, it is projected that the City will need to budget over $43 million, an amount equal to 23% of its total revenues. For the General Fund alone, the amount projected to be needed will exceed $21 million, an amount equal to 34% of General Fund revenues.

The future financial solvency of Flint will also be challenged by a continuing structural deficit. As part of the planning for future financial solvency, five year projections and a strategic plan were developed. This exercise indicated a significant financial challenge forthcoming in FY15, due to the current status of the retiree health care lawsuit and the ending of a major grant supporting firefighting resources. Future year projections also show a continuing gap between revenues and projections.

Finally, the most important challenge to be addressed in the City of Flint will be instituting structural changes in the organization of the City to foster financial solvency as a core value and to assure that future governance and management of the City is conducted in a financially responsible manner. To this end, the current Emergency Manager has created a Blue Ribbon Committee on Governance, charged with developing recommended changes to current ordinances, procedures, and the Charter. The recommendations of the Task Force are anticipated within six months.

Overview

The City of Flint has spent considerable time planning for the community's future through the comprehensive master plan and creating an organizational framework focused on the City's new vision, mission, and goals. The 2-Year budget has been developed in a balanced manner to best meet the needs of a variety of service areas and challenges.

However, challenges to changes in retiree healthcare and the loss of grant funds have required that a new service baseline be established; this also poses significant and immediate challenges to the City's financial viability. Current court rulings in regards to the retiree health care lawsuit have increased retiree health care expenses nearly $5 million in FY15, and the loss of the SAFER grant ($ 3.4 million) eliminates funding for 39 of the City's 65 firefighters.

The harsh winter increased the need to remove hundreds (if not thousands) of damaged and fallen trees throughout the city, and to repair damaged roads and sidewalks. The winter also placed additional stress on the antiquated city facilities as they faced water leaks and damage to walkways and sidewalks. Implementing the master plan, and continuing to eliminate blight will also require dedicated resources going forward.

The recently completed study of the water and sewer system finances also demonstrated a shortfall in revenues needed to operate this critical service and provide for necessary maintenance. As much as the high rates for providing water and sewer services pose significant financial challenges and community implications, the alternative of not addressing basic maintenance and adjustments based on guidance in the master plan is equally challenging.

These factors have a significant effect on the adopted staffing levels. Reductions in city staffing over the past two years have come almost exclusively from City services other than police, fire, and 911. As a result, those remaining city services are thinly staffed, and despite valiant efforts of dedicated employees, service levels have been reduced. In some cases, the reductions have been severe and counter-productive. For example, reductions in customer service at Treasury and staffing at Utilities has reduced capacity to effectively pursue collection of delinquent bills. Reductions in Information Technology have slowed the implementation of technology which can improve effective processing. Reductions in Human Resources have slowed the process of hiring employees. Reductions in Building Safety have slowed the process of conducting inspections and issuing permits, and have eliminated much in the way of code compliance efforts.

Therefore, balancing the budget in a financially sustainable way requires addressing the impact of these issues. It also requires that they are addressed within the context of the Mayor's and Council's stated budget priorities. The Council's stated priorities are:

- Maintaining police and fire staffing levels at the maximum level feasible
- Reducing the General Fund deficit by at least $1 million
- Continuing efforts to reduce blight, including demolition
- Hiring an experienced City Administrator
- Assure that capacity exists to implement the Master Plan
- Add capacity in the areas of Economic Development

- Fund years 1 & 2 of capital improvements identified in the Master Plan
- Improve street maintenance
- Establish parks partnerships
- Improve customer service through training and technology
- Increase removal of dead and diseased trees
- Evaluate ways to reduce water and sewer rates for constituents in the budget process

Balancing the budget responsibly in the context of these immediate and significant financial challenges, while addressing stated priorities, is a significantly difficult task. The unplanned addition of $5 million in expenses for increased retiree health care is a "Game-Changer" and seriously undermines the ability of the City government to move forward in becoming a positive force helping to create a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve quality of life.

As the development of the FY15 budget began, there was a significant gap between projected General Fund revenues and General Fund expenses alone. While some revenue sources indicated a slight increase over the current year, projected expenses were significantly above the current year. The expense increases are due primarily to a nearly $5 million increase in costs for retiree health care and an increase in the per person cost of pension contribution. In addition, there was recognition of the need to assure capacity to implement the Master Plan to continue addressing blight, to address increased costs of health care for current employees, and to address critically needed facility maintenance.

The budget presented here is balanced in a financially responsible manner, in that revenues and expenses meet. However, the consequence is that, where possible, revenues have been increased, and where necessary, expenses have been decreased. Whether the result is an acceptable result, in the context of the needs and the future of the City, is uncertain.

It is clear that proposed changes in service levels reflected in this budget are significant, and that at the same time the financial plan is being finalized within the confines of available revenues, considerable efforts will continue to mitigate the impacts. Continued efforts to achieve a satisfactory resolution of the retiree healthcare lawsuit, as well as to continue searching for additional sustainable funding, or to engage in mutually beneficial partnerships will continue. The changes necessary to achieve necessary balancing of revenues and expenses will be done in a managed way, not in a crisis response.

The financial projection for the years following FY15 and FY16 show the continuing challenge of a structural deficit. Without a means to identify a new significant revenue source or to sustain and even make further reductions in the City's cost base, such as retiree health care, Flint will be extremely challenged to provide even the most basic of City services in future years.

Highlights of the Adopted Budget

Costs to taxpayers are increased....

- Property tax levies remain unchanged
- Street lighting assessment increased to $71 in FY15 and $74 in FY16
- Solid Waste fee increased to $163 in FY15 and $169 in FY16
- Water and Sewer rates increased by a total of 6.5% in FY15 and 6% in FY16

Costs to City employees are increased....

- 20% premium share for health insurance implemented
- Premium contribution for non-Medicare eligible employees retiring after July 1, 2014 established
- 50% premium share for dental and vision insurance implemented
- Vacation and sick leave replaced with PTO, new accumulation caps established
- All new employees enrolled in hybrid pension plan
- All new employees enrolled in RMSA in lieu of promise of retiree health care

Legacy costs are increased significantly...

- General Fund costs for retiree health care are increased 25%, from $8 million to $10 million in FY15, increasing on an annual basis thereafter
- General Fund costs for retiree health care and pension in total are projected to increase from $16.4 million (31% of total revenues) in FY14 to $21.5 million (34% of total revenues) by FY19
- For all funds, total costs for retiree healthcare and pension are projected to increase from $30.4 million (or 17% of total revenues)in FY14 to $43.5 million (23% of total revenues) by FY19

City staffing is budgeted at 522 in FY15 and 523 in FY16.....

- Staffing is maintained in District Court, 911, Finance, Assessing, Transportation, IT, and Fleet
- Police Department – Total department staffing will be 115, with 7 vacant positions and 29 additional positions eliminated through attrition by end of FY15. Additionally, a recently offered COPS Hiring grant for six School Resource Officers will not be accepted. The next several months will be focused on mitigating the impact of this through reorganization with the assistance of consultants specialized in police and fire service; seeking additional funds; and obtaining assistance from law enforcement partners in order to achieve the best possible level of police response.
- Fire Department – Total department will be 75, with 19 positions eliminated as the SAFER grant expires. There are several vacant positions to be eliminated as part of this, with a goal of needed reduction no later than December, 2014. The next several months will be focused on mitigating the impact of this through reorganization and restructuring obtained with the assistance of consultants specialized in fire and police service.

- Planning and Development Department - Staffing is at 25, with adding 1 position. The department is being reorganized to assure capacity to implement the newly adopted Master Plan and continue efforts of blight management. Continued assistance in the form of grants and partnerships will be utilized, and general fund support for those activities is increased.
- Public Works Department - 6 positions are added to the Utilities division as the Water Treatment Plant begins operation as the primary source for Flint water; 1 position is added to Facilities to address critically needed maintenance issues.
- Finance and Administration Department - 3 positions are added to the Treasurer's Office to increase delinquent collections, with the added cost to be offset by additional revenues.
- Governance – As efforts to resolve the financial emergency progress, the position of City Administrator will be filled. Additionally, the salaries of Mayor and Council are partially restored as their role in governance increases.

Council budget priorities are addressed as follows:

- Maintaining police and fire staffing levels at the maximum level feasible – Due to revenue shortfall, increased retiree health care, and lack of other options, staffing is reduced. The Police and Fire millage funds will be used to fund 20 fire fighters and 26 police officers through FY15 and FY16. However, the accumulated millage funds will be fully used by the end of FY16.
- Reducing the General Fund deficit by at least $1 million – General Fund expenses are budgeted at $1 million less than revenues, and $800,000 in Capital Improvement Funds will be appropriated to the Utilities, thus reducing the General Funds debt to the Utility Fund by an additional $800,000. The plan is to continue this commitment for the next several years until the deficit is eliminated, and then the commitment will become one of building a financial reserve equal to 15% of General Fund revenues.
- Continuing efforts to reduce blight, including demolition – CDBG funds continue to be used for demolition and General Fund is assuming partial cost of the Blight Coordinator position
- Hiring an experienced City Administrator – Funds are included in budget.
- Assure that capacity exists to implement the Master Plan – General Fund is assuming partial cost of the Planning and Development Director, and Associate Planner, and a position of GIS technician is created, whose funding is shared among various city funds. Lead partners will be identified in each work area. Also, the Mayor has committed to overseeing the process of assuring that Master Plan implementation is an ongoing important part of city operations.
- Add capacity in the areas of Economic Development-The P&D Director is committed to defining a program for small business development, to be funded in FY16 through CDBG funds. Additionally, 20% of staff time of two DCED staffers and a portion of the Director's time will be devoted to economic development. Also, the Mayor has committed to leading the City's economic development efforts with partners and the assistance of this City staff.
- Fund years 1 & 2 of capital improvements identified in the Master Plan – the CIP portion of the Master Plan will be finalized in FY15, and the results will be considered for inclusion in the FY16 budget.

- Improve street maintenance – Due to minimal increases in state funding for streets, maintenance efforts will continue at the current levels. State financial support has been sought and obtained for some major street projects, in particular those related to economic development projects.

- Establish parks partnerships – The Planning and Development Department now has oversight of Parks, and as one of its strategic objectives, has committed to increase the number of parks partnerships in FY15 and FY16. Funding even the most basic of parks maintenance activities is increasingly challenging within the constraints of the parks millage funds. The goal is to eliminate General Fund support of these activities by the end of FY16.

- Improve customer service through training and technology– Human Resources, as it did in FY14, is committed to continuing ongoing training for supervisors and will be extending these efforts to all employees. IT likewise is committed to providing ongoing training for employees. Finally, most departments are including funds for ongoing training for employees. For example, the Treasury's customer service division is committed to specific customer service training for its front line employees.

- Increase removal of dead and diseased trees – Oversight of removal of trees within street right of ways is now the responsibility of the Transportation Division of Public Works, removal of trees within Parks is now the responsibility of Planning and Development; and removal of trees on other city properties is the responsibility of the Facilities Division of Public Works. Unfortunately, there is only a limited amount of funds available for these purposes, and the general effort will be focused on emergency responses. However, the Transportation Division is committed to attempting to secure assistance from other entities to increase capacity to address this problem.

- Evaluate ways to reduce water and sewer rates for constituents in the budget process-The results of the recent rate study confirm that it unlikely that water and sewer rates can be decreased at any time in the foreseeable future, and in fact, rates need to be increased. However, the actions taken to date to join KWA and to temporarily use the Flint River show that future rate increases will be less than had the City stayed with its prior provider.

Absent new sources of funding or reduced expenses in areas such as retiree healthcare, the commitments to progress and the staffing and service levels here are anticipated to continue for both FY15 and FY16. It is anticipated that the slight additional revenues in the General Fund for FY 16 will not be sufficient to cover increased costs, and it will be necessary to utilize additional funding from the police and fire millage to cover the costs of some police or fire positions in the General Fund in FY15. Depending on the rate of attrition in the Police Department, there should be sufficient remaining funds in the Police and Fire millage to avoid additional reductions in police or fire positions in FY16.

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Darnell Earley, ICMA-CM, MPA
Emergency Manager

June 3, 2014

Mr. Scott Kincaid, President
Members of the Flint City Council
1101 S. Saginaw St.
Flint, MI 48502

Dear Mr. Kincaid and Members of the Flint City Council:

Transmitted herewith are the final numbers for the biennial budget beginning FY14-15 and ending FY 15-16.

This budget is reflective of some of the recommended revisions offered following the Council's departmental budget hearings. All recommendations put forth by City Council were reviewed and thoroughly vetted at Treasury. The attached budget document was revised upwards by $90,000 and includes the details of the incorporated revisions.

The budget was revised to include your recommendations, along with those of the Mayor, which I felt could be implemented without adversely impacting the organizational structure, management, and the anticipated transition of the City of Flint to a Receivership Transition Advisory Board during the course of this spending plan.

Following the public hearing and consideration of the comments received, it is my intent to execute the order adopting the budget at the next Council meeting scheduled for June 23, 2014. At that time, Council will be able to officially receive the two-year budget consistent with PA 436 and the 7 Point Transition Management Plan.

You should also be aware that effective July 1, 2014, the day-to-day operations of the departments of Planning and Development, and Public Works will be shifted to Mayor Dayne Walling. The Mayor is currently putting together a plan for the allocation of resources within those departments. Similarly, Police Chief Tolbert and Fire Chief Cox are also putting together their work plans to utilize the final resource allocations for public safety.

The assistance and cooperation from you and the Council given to me, the Mayor, and the Administration in this process is greatly appreciated. I think we can agree that this is a responsible and realistic snapshot of the City's financial stability over the next two years, given its myriad financial challenges.

Sincerely,

Darnell Earley, ICMA-CM, MPA
Emergency Manager

CC: Dayne Walling, Mayor
Inez Brown, City Clerk
Administration

Proposed Changes to the City of Flint Proposed FY15 & FY16 Budget

On April 30, 2014, Emergency Manager Darnell Earley transmitted a proposed bi-annual budget to the Mayor and City Council, with a request that the Mayor and Council review and comment on the proposed budget. Accordingly, the City Council, acting as Committee of the Whole chaired by Finance Chair Josh Freeman, met five times to review the budget. At the conclusion, a set of recommendations was adopted and given to the Emergency Manager.

This document summarizes the key recommendations of the Council and Mayor and outlines changes made to the proposed budget as a result.

Summary of Council and Mayor Recommended Changes to FY15 & FY16 Proposed Budget

1. The recommendation of the Council identifies $1,824,510 in additional funds to be used by the Police Department:

- Specifically, $1 million of the $2.5 million in state appropriated revenues for the Lock-Up is proposed to be moved to the Police Budget.
- In addition, $1 million is identified by increasing the allocation in the CIP Fund for the purpose of reducing the deficit, thus freeing up the $1 million in the General Fund which has been identified for deficit reduction. Of that $1 million, $763,000) ($628,000 + $135,000) would be moved to the Police budget. Additionally, $61,510 is identified to be moved from the Finance Budget to the Police Budget.

2. The remaining funds from the proposed re-appropriation of the freed-up General Fund revenues ($237,000) would be used for the following:

- $50,000 - District Court
- $72,000 - City Clerk
- $50,000 - City Council Staff
- $45,000 – Additional Pay Raises for Council
- $10,000 – Brennen Center
- $10,000 – Hasselbring

3. Finally, there is a recommendation to eliminate funding for the Human Relations Commission ($22,547) and split those funds equally between Brennen Center and Hasselbring:

- Brennen - $11,274
- Hasselbring - $11,274

4. The Mayor has also made recommendations in other areas, including:

- Adding capacity to Economic Development by replacing the 20% of 2 DCED staff currently subsidized by the GF with CDBG funds and directing that staff to perform 100%

CDGB activities. The freed-up funds ($51,458) would then be used to contract for economic development services.

- Reduce DCED program staff by 1 FTE and utilize CDBG administrative funds for 50% of administrative staff support in Planning and Development
- Add 1 new FTE in Planning and Development dedicated to the new Business Licensing function
- Add to the Strategic Plan a key objective under Governance and Administration: "Respond to a minimum of 500 constituent services per month, including those formerly addressed by the Human Relations Commission staff."

Changes to the Proposed FY15 & FY16 Recommended Budget in response to Council and Mayor recommended changes

The changes proposed by the Mayor and Council have been reviewed, and changes made as considered appropriate within the context of maintaining a viable financial plan for the next two years. The proposed budget, as submitted to the Mayor and Council on April 30, 2014, will be revised as follows in response:

1. The Proposed Budget anticipates a reduction in public safety staffing of 36 officers and 19 firefighters. However, it also does not anticipate these reductions (other than vacancies occurring through attrition) until the comprehensive study of the police and fire departments is concluded. That study is to be completed prior to the end of 2014. At that time, depending on the study recommendations, a decision will be made as to the need for additional resources, and to the extent that funds in the General Fund which are currently targeted for deficit reduction can be used. Although the State will not agree to utilize funds appropriated for the operation of the Lock-Up to fund Flint police officers and firefighters, the Mayor and Emergency Manager will continue their efforts to obtain other state funding to support police and fire operations in Flint during this critical time.
2. The concern of the City Clerk, and supported by both the Council and the Mayor, of her inability to properly conduct the upcoming elections with the proposed staffing reduction, is acknowledged. Accordingly, the proposed budget is revised to continue FY14 budget level of staffing within the Clerk's Office. The business license position, originally moved to the Planning and Zoning Department in the FY15 and FY16 Proposed Budget, has been restored back to City Clerk's department. The new Business Licensing process is scheduled to be implemented by January 1, 2015; at which time, the responsibility for the process will be assumed by the Department of Planning and Development. Since the Clerk's Office staff will remain the same while reducing the responsibilities of the Clerks' Office, there should be adequate staff to conduct the elections and to provide additional support to the Council Office. Until such time as the

Business Licensing process is assumed by the Department of Planning and Development, the Clerk is authorized to increase the hours of the current part-time employee in the Council Office. $15,000 in temporary wages is added to the Council's budget for FY15.

3. The concern of the Council and the Mayor that financial support be continued to assist in the transition of the senior citizen programming at the Brennen Center and Hasselbring is acknowledged. The end goal is for there to be successful senior citizen programming at these locations, supported in their entirety by the County's senior citizen millage, which has been approved by voters within the City of Flint as well as the rest of Genesee County. Instead of adding additional funding to the FY15 and FY16 budgets, however, an amendment to the FY14 budget is being prepared to make a one-time appropriation to each center in the amount of $20,000, for a total expenditure of $40,000. The purpose of this appropriation is to support this transition.
4. The concern of the Council to add additional resources to the District Court is noted. However, during the presentation by the Court at its budget hearing, it became apparent that the proposed strategy of the Court to utilize part time employees may not be consistent with the requirement that temporary employees working in excess of 29 hours per week must be provided access to health care to the extent that full time employees are. Thus, additional funds in the amount of $40,000 is added to the Court's budget to address this potential problem.
5. The recommendation of the Mayor to add additional capacity to economic development as stated in #4 above is acknowledged. Additional resources for economic development was also a stated priority of the Council. The change recommended by the Mayor provides $50,000 in financial capacity, is revenue neutral, and is incorporated into the budget.
6. The recommendation of the Mayor with respect to reducing DCED staff by 1 FTE and redistributing the funds as noted above are also incorporated into the budget.
7. The recommendation of the Mayor to add one new FTE in Planning and Development dedicated to the new Business Licensing function is also acknowledged as being valuable in helping to assure that the new process is implemented aggressively and successfully. Accordingly, $64,000 for wages and fringes is added to the budget of Planning and Development for that purpose.
8. Finally, the recommendation of the Mayor to add an additional objective to the Governance and Administration section of the Strategic Plan is acknowledged and will be incorporated. Accordingly, while the Human Relations Commission may continue as a volunteer board, the proposed allocation is eliminated. As it has become apparent that the Human Resources Director is fully engaged with managing the Human Resources function, the portion of the Director's salary allocated to the HRC budget will be transferred to the Human Resources Budget.

Implementing the changes noted above require identifying $119,000 in FY15 General Fund appropriations and $104,000 in FY16 appropriations. The revenue and expense projections in the budget have been reviewed, and the necessary funds have been identified from the following sources:

FY15:

- $39,000 - reduction in audit costs
- $ 2,600 – net reduction in HRC budget
- $38,400 - additional projected revenue - income tax revenue
- $39,000 – additional projected revenue – delinquent income tax collections

FY16:

- $31,000 - reduction in audit costs
- $ 2,678 – net reduction in HRC budget
- $32,000 - additional projected revenue - income tax revenue
- $38,322 - additional projected revenue - delinquent income tax collections

Appreciation is extended to the Mayor, Council, and staff for the time and effort spent reviewing the proposed budget. The citizens of Flint will be better served by the changes made.

Proposed Budget FY15 and FY16 Technical Adjustments

1. Included the pension expense in the Office of the Clerk - $29,519

2. Removed wages and fringes for GIS Technician from Assessing Department because it was already budgeted in the Planning and Zoning Department - $60,518

3. Corrected the inclusion of all salaries, wages, and fringes in the Planning and Zoning department for all the approved positions - $123,596

4. Corrected Fund 202 FY15 and FY16 fund balance use. The indirect cost allocation was double reported in FY15. This was a $536,000 reduction in cost in FY15. In FY16, wages in administration was entered in error causing salaries to be overstated by $812,000. This correction was made.

FLINT STRATEGIC PLAN

2015 -2019

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors and improve our quality of life.

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to realize our Mission, residents, businesses, students and visitors can expect that:

The City will provide a highly trained and professional staff of elected leaders, appointed officials and employees

The City will provide for a safe, secure, and healthy environment in which to live, work, learn and play

The City will provide access to dependable and affordable water, sewer, and waste collection

The City will provide access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

The City will foster cooperation between business, non-profit, and foundation partners and residents to create a climate that supports community and economic development

The City government will also:

Seek partnerships with Local, State and Federal governmental partners and other private entities in order to maximize efficiencies and resources in meeting its Mission

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

Mayor and Council Priorities for Developing the Two-year (FY15 & FY16) Budget

The Mayor and Council request that the two-year budget to be developed will include a set of objective which, when achieved, will result in significant progress being made towards achieving their stated Vision, Mission, and Goals.

Additionally, the Mayor and Council request that the two-year budget to be developed address the following specific priorities:

1. Maintain police and fire staffing levels at the maximum level feasible
2. Reduce the General Fund deficit by at least $1 million
3. Continue efforts to reduce blight, including demolition
4. Hire an experienced and professional City Administrator
5. Assure that capacity exists to implement the Master Plan
6. Add capacity in the area of Economic Development
7. Fund years 1 & 2 of capital improvements identified in the Master Plan
8. Improve street maintenance
9. Establish parks partnerships
10. Improve customer service through training and technology
11. Increase removal of dead and diseased trees
12. Evaluate ways to reduce water and sewer rates for constituents in the budget process

2. EM ORDER AUTHORIZING LOAN APPLICATION

EM SUBMISSION NO.: EMA 16 7 2015

PRESENTED: 4-08-15

ADOPTED: 4-08-15

BY THE EMERGENCY MANAGER:

RESOLUTION APPROVING SUBMISSION OF AN APPLICATION TO THE LOCAL EMERGENCY FINANCIAL ASSISTANCE LOAN BOARD CREATED PURSUANT TO THE EMERGENCY MUNICIPAL LOAN ACT, REQUESTING AN EMERGENCY LOAN FOR THE PURPOSE OF ENABLING THE CITY TO MEET ITS FINANCIAL OBLIGATIONS, PRESCRIBING THE FORM OF THE NOTE, AND DETERMINING OTHER MATTERS RELATING TO THE APPLICATION, THE LOAN AND RELATED DOCUMENTATION TO ASSURE THAT THE LOAN MAY BE MADE UNDER THE MOST FAVORABLE CONDITIONS FOR THE CITY

The City of Flint, County of Genesee, State of Michigan (the "City"), a municipal corporation of the State of Michigan (the "State), has been duly created under the provisions of the Home Rule Cities Act of the State, Act 279, Michigan Public Acts of 1909, as amended ("Act 279"), pursuant to which the City has the comprehensive home rule power conferred upon it by Act 279 and the Constitution of the State of 1963 (the "Constitution"), subject only to the limitations on the exercise of that power contained in the Constitution, by statute of the State or by Flint City Charter (the "City Charter") provisions; and

Pursuant to the City Charter, the City may borrow money for any purpose within the scope of its powers, may issue bonds or other evidences of indebtedness therefor, and may when permitted by the Constitution and the law, pledge the full faith, credit and resources of the City for the payment of those obligations; and

The State has enacted the Revised Municipal Finance Act, Act 34, Michigan Public Acts of 2001, as amended ("Act 34"), relative, inter alia, to the borrowing of money and the issuance of certain debt and securities, providing for tax levies, authorizing the issuance of certain debt and securities and to generally govern municipal finance practices in the State; and

The City is defined to be a "municipality" under Act 34 that has the power to issue a security such as bonds, notes, contracts, obligations or other similar instruments; and

Pursuant to the provisions of the Local Financial Stability and Choice Act, Act 436, Michigan Public Acts of 2012 ("Act 436"), a financial emergency has been determined to exist within the City and Gerald W. Ambrose has been appointed, pursuant to Act 436, as Emergency Manager (the "Manager") for the City and is authorized to take certain actions in accordance with Act 436; and

The Manager has determined that there exists a deficit in the City's general fund for the current fiscal year that could not be adequately provided for in the current fiscal year budget; and

The Manager has determined that it is necessary and in the best interest of the City to make application to the Michigan Local Emergency Financial Assistance Loan Board (the "Board") established pursuant to the Emergency Municipal Loan Act, Act 243, Michigan Public Acts of 1980, as amended ("Act 243") to borrow the sum of not to exceed Seven Million Dollars ($7,000,000); and

The City is defined to be a "municipality" under Act 243 which may apply for and receive a loan under Act 243; and

Pursuant to Act 34, Act 279, Act 436 and Act 243, the Manager may approve the issuance of municipal securities to finance the deficit and pay necessary operating expenditures of the City; and

Pursuant to Act 436 and Act 34, the Manager may order or resolve the issuance of a municipal security which order or resolution shall contain an irrevocable provision for the levying of a tax in order to repay the municipal security from the receipt of such taxes; and

The Manager has determined that a deficit for the City's general fund is projected for the City's current fiscal year; and

The Manager anticipates that within the last eighteen (18) months immediately preceding the request for a loan with the Board, the Department of Treasury will act upon a request by the City to issue tax anticipation notes under Act 34; and

The state equalized valuation of real and personal property within the City at the time the loan application will be made will be less than the state equalized valuation of real and personal property within the City in the immediately preceding year; and

The City has or will submit a five-year plan that has been approved by the Manager on behalf of the City, outlining actions to be taken to balance future expenditures with anticipated revenues; and

The Manager hereby certifies the foregoing and further desires to make certain determinations for, on behalf of and in the best interests of the City, which determinations by the Manager shall be in writing and included along with all other documentation of the Loan, as hereinafter defined.

IT IS RESOLVED that:

Section 1. The Manager is authorized to submit an application to the Board requesting a loan in the amount of not to exceed Seven Million Dollars ($7,000,000) or such part thereof as the Michigan Department of Treasury may authorize (the "Loan") for which a note (the "Note") of the City shall be issued as evidence thereof.

Section 2. The Note shall bear interest at the current rate of interest of 2.09% per annum or such other rate established by the Board not to exceed 3.00% per annum, as in compliance with and pursuant to Act 243 in its Order, as hereinafter defined, approving the Loan, and interest payments shall be due and payable on June 1 and December 1 of each year commencing on December 1, 2015 or such other dates established by the Board in its Order.

Section 3. Principal payments under the Note shall be payable in not to exceed fifteen (15) annual installments on June 1 of each year commencing on June 1, 2016 or such other dates and in the amounts specified by the Board in the Order.

Section 4. The Loan shall be a general obligation of the City, and the full faith and credit of the City shall be pledged to the payment of the principal of and interest on the Note as and when due. The Note shall be payable out of the general fund of the City, including collections of ad valorem taxes the City may levy on all taxable property within the City within applicable Constitutional, statutory and City Charter limitations. As additional security for the payments due and owing under the Note, the City shall acknowledge, assign, and pledge, to the repayment of principal of or interest on the Note, the State's statutory right to withhold the amount of all delinquent payments due on the Note from State payments owed to the City under the Glenn Steil State Revenue Sharing Act of 1971, Act 140, Michigan Public Acts of 1971, as amended ("Act 140").

Section 5. The Manager shall execute the Note on behalf of the City and the City's seal or facsimile thereof shall be imprinted or affixed thereon, and upon receipt of the principal amount of the Loan, the fully executed Note shall be delivered to the Board as agent for the State.

Section 6. The Note shall be in substantially the form attached hereto as Exhibit A.

Section 7. The City hereby acknowledges that the Loan will be made pursuant to an order of the Board (the "Order") which Order may contain terms and conditions of the Loan. The Manager is hereby authorized to accept such terms and conditions if he determines that accepting such terms and conditions is in the best interests of the City, and once accepted such terms and conditions of any such Order shall be binding on the City.

Section 8. Notwithstanding anything herein to the contrary, the Manager, City Clerk, Finance Director, Deputy Finance Director, City Attorney and any other official or employee of the City are each hereby authorized and ordered to take such action or execute such documents and certificates as may be necessary or desirable and in the best interests of the City in connection with the delivery of the Note and the City's receipt of the proceeds of the Loan.

Section 9. The appointment of the law firm of Miller, Canfield, Paddock and Stone, P.L.C. of Detroit, Michigan as Note Counsel for the Note securing the Loan is hereby ratified and confirmed notwithstanding the periodic representation by Miller, Canfield, Paddock and Stone, P.L.C. in unrelated matters of the State and other parties and potential parties, if any, to the issuance of the Note.

Section 10. All resolutions and parts of resolutions insomuch and insofar as they conflict with the provisions of this Resolution be and the same are hereby rescinded.

Section 11. This Resolution shall be effective immediately upon execution.

NOTE FORM

UNITED STATES OF AMERICA
STATE OF MICHIGAN
COUNTY OF GENESEE

CITY OF FLINT

EMERGENCY LOAN NOTE
(General Obligation Limited Tax)
2014-15 Series _

Registered Owner: State of Michigan

Principal Amount: _____

Date of Original Issue: _____, 2015

The CITY OF FLINT, County of Genesee, State of Michigan (the "Issuer"), acknowledges itself to owe and for value received hereby promises to pay to the State of Michigan, the Principal Amount specified above, in lawful money of the United States of America, in ____ installments on the dates and in the amounts set forth on Schedule A attached hereto ("Schedule A"), unless prepaid prior thereto as hereinafter provided, with interest on the unpaid principal balance hereof from the Date of Original Issue specified above or such later date to which interest has been paid, until paid, at the rate of ___ percent (___%) per annum payable semiannually on the dates and in the amounts set forth on Schedule A. Interest on this note shall be computed on the basis of a 365-day year and the actual number of days elapsed. Both the principal of and interest on this note are payable at the Office of the State Treasurer in Lansing, Michigan, or such other place as may be designated in writing to the Issuer by the State Treasurer.

This note is issued pursuant to a resolution of the Emergency Manager of the Issuer, and under and in full compliance with the Constitution and statutes of the State of Michigan, including specifically the Emergency Municipal Loan Act, Act 243, Michigan Public Acts of 1980, as amended, to evidence the obligation of the Issuer to make repayment of an emergency loan made by the State of Michigan for the purpose of enabling the Issuer to meet its financial obligations.

The Issuer shall have the right to pay at any time or times prior to maturity, without penalty or premium, all or any portion of this note. Prepayments shall be credited to principal payments in direct order of maturity.

This note, including the interest hereon, is payable as a first budget obligation from the general fund of the Issuer, and the Issuer is required, if necessary, to levy ad valorem taxes on all

taxable property in the Issuer for the payment thereof, subject to applicable constitutional, statutory and charter tax rate limitations.

As additional security for payment of this note and in the event of the delinquency of the Issuer on the payment of required principal or interest hereon, the State Treasurer is authorized to withhold all delinquent amounts of principal or interest due on this note from state payments to the Issuer otherwise required to be made to the Issuer pursuant to the provisions of the Glenn Steil State Revenue Sharing Act of 1971, Act 140, Michigan Public Acts of 1971, as amended ("Act 140"), and said withholding shall be applied by the State Treasurer against said delinquent payments.

The Issuer covenants that it shall perform and meet all requirements imposed upon the Issuer as a result of receiving this loan pursuant to Act 243 until this note is paid in full.

It is hereby certified and recited that all acts, conditions and things required by law to be done, precedent to and in the issuance of this note, exist and have been done and performed in regular and due form and time as required by law, and that the total indebtedness of the Issuer, including this note, does not exceed any constitutional, statutory or charter debt limitation.

[Signature page to follow]

IN WITNESS WHEREOF, the Issuer, by resolution of the Emergency Manager, has caused this note to be signed in the name of the Issuer by the manual signature of its Emergency Manager and its corporate seal to be hereunto affixed, all as of the Date of Original Issue.

RESOLUTION NO.: **150302.1**

PRESENTED: April 13, 2015

ADOPTED: April 13, 2015

RESOLUTION APPROVING EMERGENCY MANAGER RESOLUTION NO. EMA1672015, APPROVAL OF EMERGENCY LOAN

BY THE FLINT CITY COUNCIL:

On April 8, 2015, pursuant to Section 12(1)(u) of the Local Financial Stability and Choice Act, Act No. 436, Public Acts of Michigan, 2012, ("Act 436"), Gerald W. Ambrose, the Emergency Manager of the City of Flint (the "Emergency Manager"), filed with this City Council his EM Resolution No. EMA1672015 (the "Resolution") approving submission of an Application to the Local Emergency Financial Assistance Loan Board (the "Emergency Loan Board") for a loan in the amount of not to exceed Seven Million Dollars ($7,000,000), or such part thereof as approved by the Emergency Loan Board (the "Loan"); and

The Resolution provides that (i) the City will issue a Note (the "Note") under Act 243, Public Acts of Michigan, 1980, as amended ("Act 243") in the principal amount of the final amount of the Loan approved by the Emergency Loan Board; (ii) the Note will bear interest at the current rate of 2.09% per annum or such other rate not to exceed 3.0%, as finally approved by the Emergency Loan Board, and payable on the dates provided in the Resolution, or such other dates as approved by the Emergency Loan Board; and (iii) principal payments under the Note shall be payable in not to exceed 15 annual installments on June 1 of each year commencing on June 1, 2016, or on the dates and in the amounts as approved by the Emergency Loan Board; and

Under Act 243, approval of the issuance of the Note and the terms and conditions of the Loan must be provided by the Emergency Loan Board; and

The City Council has reviewed the Resolution and terms and conditions for the issuance of the Note and the Loan; and

The City Council desires to adopt this resolution to indicate its approval of the issuance of the Note and the Loan pursuant to Section 19(1) of Act 436, as a precondition for the Emergency Manager to seek approval of the terms and conditions for the issuance of the Note and the Loan by the Emergency Loan Board.

IT IS RESOLVED by the Flint City Council, pursuant to Act 243 and Act 436, as follows:

Section 1. Pursuant to Section 19(1) of Act 436, the City Council hereby approves the terms and conditions of the issuance of the Note and the Loan as set forth in the Resolution, attached hereto as Exhibit A.

Section 2. All resolutions or parts of resolutions or other proceedings of the City of Flint in conflict herewith shall be and the same hereby are repealed insofar as such conflict exists.

Section 3. This resolution shall take effect immediately upon its adoption by the City Council.

LOCAL EMERGENCY FINANCIAL ASSISTANCE LOAN BOARD

ORDER 2015-2

ORDER OF APPROVAL OF EMERGENCY LOAN

THE LOCAL EMERGENCY FINANCIAL ASSISTANCE LOAN BOARD, ACTING UPON THE APPLICATION OF

THE CITY OF FLINT
COUNTY OF GENESEE
STATE OF MICHIGAN

A local fiscal emergency exists within the city of Flint (the "City").

A deficit is projected for the City's General Fund in the City's fiscal year ending June 30, 2015.

The Michigan Department of Treasury ("**Treasury**") has acted upon a request by the City to issue tax anticipation notes or revenue sharing notes under the Revised Municipal Finance Act, 2001 PA 34, as amended, MCL 141.2101 to 141.2821.

As of April, 17, 2015, the state equalized value of real and personal property within the City is less than the state equalized valuation of real and personal property within the City in the immediately preceding year.

The City seeks an emergency loan in the amount of $7,000,000.00 to enable the City to meet its financial obligations.

The City has submitted with an application for an emergency loan a five-year plan approved by the emergency manager for the City acting for the City's governing body under the Local Financial Stability and Choice Act, 2012 PA 436, MCL 141.151 to 141.1575 ("**Act 436**"), and acceptable to Treasury that will balance future expenditures with anticipated revenues.

The City has complied with the applicable requirements of the Emergency Municipal Loan Act, 1980 PA 243, as amended, MCL 141.931 to 141.142 ("**Act 243**").

The Local Emergency Financial Assistance Loan Board ("Board") therefore orders the following:

1. **Approval of Emergency Loan.** The Board approves an emergency loan from the State of Michigan to the City in the amount of $7,000,000.00 (the "Emergency Loan").

2. **Loan Terms.** The Emergency Loan will be evidenced by a note with a term not to exceed 15 years. The principal amount outstanding under the emergency loan will bear interest initially at the rate of 2.09% per year, except as otherwise provided in the emergency loan agreement described in section 3. Interest will be computed on the basis of actual number of days elapsed in a calendar year. The City shall make an initial payment of interest only then owing on December 1, 2015. After the initial payment and until the Emergency Loan is repaid, the City shall make a payment of principal and interest then owing on each June 1, and a payment of interest only then owing on each December 1, with a date of final maturity of June 1, 2030. Principal payments shall be made in 15 consecutive annual installments as set forth in schedule 1, unless prepaid in advance of schedule payments.

3. **Emergency Loan Agreement.** The State Treasurer (the "**Treasurer**") shall, on behalf of the Board, enter into an emergency loan agreement with the City, dated April 29, 2015, previously approved by the City (the "**Emergency Loan Agreement**"). The City shall comply with the Emergency Loan Agreement.

4. **Security.** As additional security for the repayment, the City hereby pledges and assigns to the repayment of principal of or interest on the Emergency Loan, the State Treasurer's right to withhold delinquent payments due on the Emergency Loan from both of the following:

(1) state payments owed to the City under the Glenn Steil State Revenue Sharing Act of 1971, 1971 PA 140, as amended, MCL 141.901 to 141.921 ("Act 140"); and

(2) the City's portion of the revenue generated by the local community stabilization share tax levied under the Use Tax Act, 1937 PA 94, as amended, MCL 205.91 to 205.111, and payable by the Michigan Department of Treasury ("Treasury") to the Local Community Stabilization Authority created under the Local Community Stabilization Authority Act, 2014 PA 86, MCL 123.1341 to 123.1362, for distribution to the City and other governmental entities.

5. **Supervision.** The Treasurer shall supervise the City's compliance with this order.

6. **Waiver.** The Board may waive a provision of this order if the City demonstrates good cause for the waiver to the satisfaction of the Board, if permitted under Act 243. No waiver will be effective unless approved by the Board and in writing.

The Board has approved this order at a properly noticed open meeting and the members of the Board are signing the order on the date indicated.

[signatures on following page]

IN WITNESS WHEREOF, the members of the Board, or their designees, have signed and executed this Order of Approval.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

CONTRACT FOR EMERGENCY MANAGER SERVICES

Rick Snyder, Governor of the State of Michigan (Governor) and the Michigan Department of Treasury retain and appoint Gerald W. Ambrose as the Emergency Manager (Emergency Manager) for the City of Flint (City) under Public Act 436 of 2012, the Local Financial Stability and Choice Act, MCL 141.1541 *et seq*, (the Act).

The Emergency Manager will provide services to the City pursuant to the terms and conditions set forth in this Contract and the Act.

The Emergency Manager's role is to remedy the financial distress of the City by requiring, within available resources, prudent fiscal management and an efficient provision of municipal services by exercising the necessary authority conferred herein to take appropriate action on behalf of the City and its residents. In accepting this appointment, the Emergency Manager agrees to leverage all the Emergency Manager's skills and abilities to accomplish these objectives on behalf of City residents.

1. PARTIES, PURPOSE, DUTIES, AND REPORTS

1.1 Parties. The parties to this Contract are the State of Michigan by the Department of Treasury and Gerald W. Ambrose.

1.2 Purpose. The parties to this Contract agree that Gerald W. Ambrose will act as the Emergency Manager for the City. The Emergency Manager's duties and responsibilities are delineated in the Act and include conducting all aspects of the operations of the City and establishing and implementing a written financial plan as required by Section 11 of the Act.

1.3 Duties. The Emergency Manager shall possess all the powers and duties authorized under the Act, including those specifically related to local governments. In addition, the Emergency Manager shall work cooperatively with the Office of the Governor and the State Treasurer. The Emergency Manager agrees to continue to keep these officials informed of major initiatives to be undertaken in furtherance of this Contract before their public announcement. The Emergency Manager shall seek the approval of the State Treasurer before entering into a new collective bargaining agreement.

1.4 Reports. The Emergency Manager shall file quarterly reports with the Department of Treasury beginning on April 15, 2015, for the immediately preceding quarter and shall file the first report required by Section 17 of the Act within six months of the Emergency Manager's appointment and every three months thereafter.

1.5 Communications. The Emergency Manager shall establish and maintain an appropriate protocol for ongoing communications with officials of the City, City residents, and the media. The communications protocol should include a variety of means, including personal interactions.

2. TERM OF CONTRACT

2.1 The Emergency Manager serves at the pleasure of the Governor except as provided in Section 9(3)(d) and Section 9(6)(c) of the Act.

2.2 Effective Date. This contract is effective on Tuesday January 13, 2015.

3. COMPENSATION FOR SERVICES PROVIDED

3.1 Source of Payment. The State shall pay the compensation of the Emergency Manager for all services rendered under this Contract.

3.2 Salary. The Emergency Manager's salary for services rendered under this Contract shall be $180,000.00 per year. If this Contract is terminated after the Emergency Manager has provided services for a portion of the month, the Emergency Manager shall be entitled, for that portion of that month, to $15,000.00 multiplied by the proportion that the number of days of the month for which services were provided bears to the number of days of the whole month.

3.3 Payment for Services. The Emergency Manager shall be paid in installments consistent with the established written policies and procedures of the Michigan Department of Treasury. If requested by the State Treasurer, the Emergency Manager shall provide to the Michigan Department of Treasury additional information regarding services performed pursuant to this Contract.

3.4 Reimbursement for Actual and Necessary Expenses. The actual and necessary expenses of the Emergency Manager, including customary expenses related to travel, meals, and lodging which are incurred in connection with service to the City will be reimbursed by the City. The Emergency Manager shall provide original copies of all receipts for meals, lodging, and travel reimbursement with any request for reimbursement. Any reimbursement for expenses under this contract shall be reviewed and approved in writing by the City's Chief Financial Officer.

4. ADDITIONAL STAFF AND CONSULTANT FEES

4.1 Staff. The Emergency Manager may, as provided in the Act, appoint additional staff as necessary to fulfill the obligations of the Emergency Manager's appointment and duties under this Contract. Payment of compensation for additional staff will be the obligation of the City. While authority to hire additional staff rests with the Emergency Manager, the Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before extending offers of employment for positions paying $50,000.00, or more, annually. The Emergency Manager shall issue a written employment contract to each individual hired pursuant to this Section, regardless of the compensation paid to that individual. The employment contract

issued pursuant to this Section shall, as of the date the individual is hired by the Emergency Manager, prohibit the individual from engaging in any other employment for remuneration without the express written approval of the Emergency Manager. The Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before approving outside employment for any individual. A breach of this Section shall be a material breach of this Contract.

4.2 Professional Assistance. The Emergency Manager may, as provided in the Act, secure professional assistance as necessary to fulfill the obligations of the Emergency Manager's appointment and duties under this Contract. Payment of compensation for additional professional assistance will be the obligation of the City. The Emergency Manager agrees to consult with the State Treasurer, or the designee of the State Treasurer, at least 24 hours before authorizing professional services contracts of $50,000.00, or more, per engagement or project. If a contract under this Section, or under Section 4.1, has a value of $50,000 or more, the Emergency Manager shall not execute the contract unless the contract is subject to competitive bidding by the Emergency Manager or the Emergency Manager receives prior written approval from the State Treasurer.

4.3 Security. The Emergency Manager will be entitled to receive security protection in connection with the Emergency Manager's duties under this Contract. Security personnel will be retained only upon the approval of the State Treasurer, or the designee of the State Treasurer, and only after consultation with the Director of the Michigan Department of State Police, or the designee of the Director of the Michigan Department of State Police. Payment of compensation for security personnel will be the obligation of the City.

5. REPRESENTATIONS

5.1 Qualifications. By signing this Contract, the Emergency Manager, represents that the Emergency Manager meets the minimum qualifications for appointment set forth in the Act. The Emergency Manager shall perform the duties of that office on a full-time basis, except as otherwise approved by the State Treasurer, and shall not accept any other employment or engage in any other activity for remuneration without the express written approval of the State Treasurer.

5.2 Conflict of Interest. The Emergency Manager represents and warrants that the Emergency Manager has no personal or financial interest, and will not acquire any such interest, that would conflict in any manner or degree with the performance of this Contract.

5.3 Non-competition. The Emergency Manager represents and warrants that the Emergency Manager is not subject to any non-disclosure, non-competition, or similar clause with current or prior clients or employers that will interfere with the performance of this Contract. The State will not be subject to any liability for any such claim.

5.4 Facilities and Personnel. The City will provide the Emergency Manager with proper facilities and personnel to perform the services and work required to be performed pursuant to this Contract.

5.5 Records. The Emergency Manager shall maintain complete records in accordance with

generally accepted accounting practices and sound business practices. This requirement applies to all information maintained or stored in the computer system of the Emergency Manager or computer system of the City. The State Treasurer and his designees shall have the right to inspect all records related to this Contract.

5.6 Non-Discrimination.

a) The Emergency Manager shall comply with Public Act 220 of 1976, the Persons with Disabilities Civil Rights Act, MCL 37.1101 *et seq.*, and all applicable federal, State, and local fair employment practices and equal opportunity laws. The Emergency Manager covenants that the Emergency Manager will not discriminate against any employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of a disability that is unrelated to the individual's ability to perform the duties of a particular job or position. The Emergency Manager shall impose this covenant upon every subcontractor that enters into an agreement for the performance of any obligation imposed by this Contract. A breach of this covenant shall be a material breach of this Contract.

b) The Emergency Manager shall comply with Public Act 453 of 1976, the Elliott-Larsen Civil Rights Act, MCL 37.2101 *et seq.*, and all applicable federal, State, and local fair employment practices and equal opportunity laws. The Emergency Manager covenants that the Emergency Manager will not discriminate against an employee or applicant for employment with respect to hire, tenure, terms, conditions, or privileges of employment, or a matter directly or indirectly related to employment, because of race, color, religion, national origin, age, sex, height, weight, or marital status. The Emergency Manager shall impose this covenant upon every subcontractor that enters into an agreement for the performance of any obligation imposed by this Contract. A breach of this covenant shall be a material breach of this Contract.

5.7 Unfair Labor Practices. The Emergency Manager shall not enter into a contract for the performance of any obligation imposed by this Contract with a subcontractor, manufacturer, or supplier whose name appears in the register prepared pursuant to Public Act 278 of 1980, MCL 423.322, of employers found in contempt of court for failure to correct unfair labor practices. The State may void this Contract if the Emergency Manager, or any subcontractor, manufacturer, or supplier of the Emergency Manager that is a party to a contract for the performance of any obligation imposed by this Contract, appears in the above mentioned register.

5.8 Independent Contractor. The relationship of the Emergency Manager to the State and to the City under this Contract is that of an independent contractor. Except as specifically provided in the Act, no liability, benefits, workers compensation rights or liabilities, insurance rights or liabilities, or any other rights or liabilities arising out of, or related to, a contract for hire, nor employer-employee relationship, shall arise, accrue, or be implied to either party under this Contract or to an agent, subcontractor, or employee of either party under this Contract, as a result of the performance of this Contract.

6. NOTICES

6.1 The State Treasurer is the designee for this Contract unless notice of another designa-

tion is provided by the Governor. All notices, correspondence, requests, inquiries, billing statements, and other documents mentioned in this Contract shall be directed to the attention of the State Treasurer, R. Kevin Clinton, and to the following:

For the State:

Michigan Department of Treasury
Office of Legal Affairs
Richard H. Austin Building, 430 West Allegan Street
Lansing, Michigan 48922
Phone: (517) 373-3223

For the Emergency Manager:

Gerald W. Ambrose
Flint City Hall
1101 South Saginaw Street
Flint, Michigan 48502

7. LIMITATION UPON LIABILITY

7.1 The State. The State, the Governor, the State Treasurer, and all other State officials are not liable for any obligation of or claim against the City resulting from actions taken in accordance with the Act or this Contract.

7.2 The Emergency Manager. Pursuant to the Act, in performing this Contract the Emergency Manager is engaging in a governmental function and is immune from liability for any action taken which the Emergency Manager reasonably believes to be within the scope of the Emergency Manager's authority granted by the Act or by this Contract.

8. INSURANCE

8.1 General. The Emergency Manager may procure and maintain, at the expense of the City, health, worker's compensation, general liability, professional liability, and motor vehicle insurance for the Emergency Manager and any employee, agent, appointee, or contractor of the Emergency Manager as may be provided to elected officials, appointed officials, or employees of the City. The insurance procured and maintained by the Emergency Manager may extend to any claim, demand, or lawsuit asserted or costs recovered against the Emergency Manager and any employee, agent, appointee, or contractor of the Emergency Manager to the extent permitted by the Act.

8.2 Post-Contract. If, after the date that the service of the Emergency Manager is concluded, the Emergency Manager or any employee, agent, appointee, or contractor of the Emergency Manager is subject to a claim, demand, or lawsuit arising from an action taken during the service of the Emergency Manager, and not covered by a procured insurance policy, litigation expenses, including but not limited to attorney fees, payments in satisfaction of judgments, and

payments made in settlement as specified pursuant to the Act, shall be paid by the City. If such expenses are not paid by the City, they shall be treated as a debt owed to this State pursuant to section 17a(5) of Public Act 140 of 1971, the Glenn Steil State Revenue Sharing Act of 1971, MCL 141.917a.

8.3 Additional Insurance. If the City has purchased, or otherwise obtained, an errors and omissions policy, then the Emergency Manager may choose to be covered under such policy at the expense of the City.

8.4 Payment by City. All insurance required under this Contract shall be acquired at the expense of the City under valid and enforceable policies, issued by insurers of recognized responsibility. The State Treasurer reserves the right to reject as unacceptable any insurer.

9. TERMINATION OF CONTRACT AND APPOINTMENT

9.1 Termination by the State.

a) The State. The Emergency Manager serves at the pleasure of the Governor except as provided in Section 9(3)(d) and Section 9(6)(c) of the Act. The Governor has the power to rescind the appointment and terminate this Contract at any time, and without cause, by issuing a Notice of Termination to the Emergency Manager.

9.2 Termination Process. Upon receipt of a Notice of Termination, and except as otherwise directed, the Emergency Manager shall:

a) Cease work under this Contract upon the date and to the extent specified in the Notice of Termination;

b) Incur no costs beyond the date specified by the Notice of Termination;

c) Submit to the State Treasurer on the date the termination is effective all records, reports and documents as this State shall specify and carry out such directives as the State Treasurer may issue concerning the safeguarding and disposition of files and property; and

d) Submit within 30 calendar days a closing memorandum and final billing, which shall be paid within 30 days.

9.3 Termination by Emergency Manager. The Emergency Manager may terminate this Contract at any time, with or without cause, with 30 days written notice to the State Treasurer. Within 30 days of the Emergency Manager's final day of service, the Emergency Manager shall submit a closing memorandum and final billing, which shall be paid within 30 calendar days.

10. GENERAL PROVISIONS

10.1 Governing Law and Jurisdiction. This Contract shall be subject to, and construed according to, the laws of the State of Michigan, and no action shall be commenced against this State,

its agents, or employees for any matter whatsoever arising out of this Contract, in any court other than a Michigan State court.

10.2 No Waiver. A party's failure to insist on the strict performance of this Contract shall not constitute waiver of any breach of the Contract.

10.3 Other Debts. The Emergency Manager represents and warrants that the Emergency Manager is not, and will not become, in arrears on any contract, debt, or other obligation to the State of Michigan, including taxes.

10.4 Invalidity. If any provision of this Contract or its application to any persons or circumstances shall, to any extent, be determined by a court of competent jurisdiction to be invalid or unenforceable, the remainder of this Contract shall not be affected, and each remaining provision of this Contract shall be valid and enforceable to the fullest extent permitted by law.

10.5 Headings. Section headings contained in this Contract are for convenience only and shall not be used to interpret the scope or intent of this Contract.

10.6 Entire Agreement. This Contract represents the entire and exclusive agreement between the parties and supersedes all proposals or other prior agreements, oral or written, and all other communications between the parties.

10.7 Amendment. No Contract amendment will be effective and binding upon the parties to this Contract unless the amendment expressly makes reference to this Contract, is in writing, and is signed by duly authorized representatives of all parties and all the requisite State approvals are obtained.

10.8 Order of Priority. This Contract and the Act shall be read to be consistent one with the other. However, if a conflict is deemed to exist between the terms of this Contract and the Act, the Act shall supersede the terms of this Contract.

10.9 Counterparts. This Contract may be executed in separate counterparts, each of which when executed shall be deemed an original, but all of which when taken together shall constitute one and the same Contract.

IN WITNESS WHEREOF, the Governor and the Emergency Manager have signed and executed this Contract.

5. EM ORDER RATIFYING TERMS OF LOAN

Execution Copy

RESOLUTION RATIFYING TERMS OF LOAN

BY THE EMERGENCY MANAGER:

RESOLUTION OF THE EMERGENCY MANAGER OF THE CITY OF FLINT, COUNTY OF GENESEE, STATE OF MICHIGAN, APPROVING ISSUANCE OF THE CITY'S EMERGENCY LOAN NOTE (GENERAL OBLIGATION LIMITED TAX) 2014-15 SERIES I, TO THE LOCAL EMERGENCY FINANCIAL ASSISTANCE LOAN BOARD CREATED PURSUANT TO THE EMERGENCY MUNICIPAL LOAN ACT, FOR THE PURPOSE OF ENABLING THE CITY TO MEET ITS FINANCIAL OBLIGATIONS, PRESCRIBING THE FORM OF THE NOTE, PROVIDING FOR THE RIGHTS OF THE HOLDER OF THE NOTE AND ENFORCEMENT THEREOF, RATIFYING THE TERMS OF THE LOAN, DETERMINING OTHER MATTERS RELATING TO THE ISSUANCE OF THE NOTE AND RELATED DOCUMENTATION TO ASSURE THAT THE NOTE IS ISSUED UNDER THE MOST FAVORABLE CONDITIONS FOR THE CITY.

WHEREAS, the City of Flint, County of Genesee, State of Michigan (the "City"), a municipal corporation of the State of Michigan (the "State), has been duly created under the provisions of the Home Rule City Act of the State, Act 279, Michigan Public Acts of 1909, as amended ("Act 279"); and

WHEREAS, pursuant to the City Charter, the City may borrow money for any purpose within the scope of its powers, and may issue notes or other evidences of indebtedness therefor; and

WHEREAS, the State has enacted the Revised Municipal Finance Act, Act 34, Michigan Public Acts of 2001, as amended ("Act 34"), relative, inter alia, to the borrowing of money and the issuance of certain debt and securities, providing for tax levies, authorizing the issuance of certain debt and securities and to generally govern municipal finance practices in the State; and

WHEREAS, the City is defined to be a "municipality" under Act 34 that has the power to issue a security such as bonds, notes, contracts, obligations or other similar instruments; and

WHEREAS, pursuant to the provisions of the Local Finance Stability and Choice Act, Act 436, Michigan Public Acts of 2012, as amended ("Act 436"), a financial emergency has been determined to exist in the City and Gerald W. Ambrose has been appointed, pursuant to Act 436, as emergency manager of the City (the "Manager") and is authorized to take certain actions in accordance with Act 436; and

Whereas, pursuant to the provisions of the Emergency Municipal Loan Act, Act 243, Michigan Public Acts of 1980 as amended ("Act 243"), a local fiscal emergency exists in the City; and

WHEREAS, the Manager has determined that there exists a deficit in the City's general fund for the current fiscal year which condition could not reasonably have been adequately provided for in the current fiscal year budget; and

RESOLUTION RATIFYING TERMS OF LOAN

WHEREAS, in a Resolution ordered by the Manager on April 8, 2015, the Manager resolved that it was necessary and in the best interest of the City to request a loan from the Michigan Local Emergency Financial Assistance Loan Board (the "Board") established pursuant to Act 243, in the principal amount of not to exceed Seven Million Dollars ($7,000,000); and

WHEREAS, the Board, at a meeting held on April 29, 2015 approved a loan to the City in the principal amount of Seven Million Dollars ($7,000,000), together with other matters related thereto; and

WHEREAS, it is now necessary for the City to ratify, confirm, and approve the conditions of the said initial loan and other matters related thereto; and

WHEREAS, the City is defined to be a "municipality" under Act 243 which may receive a loan under Act 243; and

WHEREAS, pursuant to Act 34, Act 279, Act 436 and Act 243, the Manager may approve the issuance of municipal securities to finance the deficit and pay necessary operating expenditures of the City; and

WHEREAS, pursuant to Act 436, Act 34 and Act 243, the Manager may order or resolve the issuance of a municipal security which order or resolution shall contain an irrevocable provision for the levying of a tax in order to repay the municipal security from the receipt of such taxes; and

WHEREAS, the Manager desires to make certain determinations for, on behalf of and in the best interest of the City, which determinations by the Manager shall be in writing and included along with all other documentation of the Loan, as hereinafter defined.

NOW, THEREFORE, BE IT RESOLVED by the Emergency Manager of the City of Flint, that:

Section 1. A note of the City designated "Emergency Loan Note (General Obligation Limited Tax) 2014-15 Series I" (the "Note") shall be issued in the principal amount of Seven Million Dollars ($7,000,000) (the "Loan"). The Note shall evidence the obligation of the City to repay the Loan to the State pursuant to the provisions of the Act 243. The Note shall be dated as of the date of delivery thereof to the State of Michigan (April 29, 2015). Principal on the note shall be payable in fifteen (15) consecutive annual installments beginning on June 1, 2016 and ending on the maturity date of June 1, 2030. The Note shall bear interest at the rate of 2.09% per annum, payable semiannually beginning on December 1, 2015 and ending on the maturity date of June 1, 2030. Interest on the Note shall be computed on the basis of a 365-day year and the actual number of days elapsed. A schedule of the amounts of interest and principal payments on the Note is set forth on Schedule A attached hereto. Principal and interest on the Note shall be payable to the office of the State Treasurer of the State.

Section 2. The Note shall be a limited general obligation of the City and the full faith and credit of the City shall be pledged to the payment of the principal of and interest on the Note as and when due. The Note shall be payable out of the general funds of the City, including collection of ad valorem taxes the City may levy on all taxable property within the City within constitutional,

statutory and City Charter limitations. As additional security for the payments due and owing under the Note, the City acknowledges the State's statutory right to withhold the amount of all delinquent payments due on the Note from State payments owed to the City under the Glenn Steil State Revenue Sharing Act of 1971, Act 140, Michigan Public Acts of 1971, as amended ("Act 140") and authorizes the State to withhold such funds and apply such funds to the repayment of principal of or interest on the Note which are delinquent according to the Note. The City also authorizes the State to withhold and apply to the repayment of principal of or interest on the Note that are delinquent, the City's portion of the revenue generated by the local community stabilization share tax levied under the Use Tax Act, Act 94, Michigan Public Acts of 1937, as amended ("Act 94"), and payable by the Michigan Department of Treasury ("Treasury") to the Local Community Stabilization Authority created under the Local Community Stabilization Authority Act, Act 86, Michigan Public Act of 2014, as amended ("Act 86"), for distribution to the City and other governmental entities.

Section 3. The Manager and the City Clerk of the City shall execute the Note on behalf of the City, and the City's seal or facsimile thereof shall be imprinted or affixed thereon, and upon receipt of the principal amount of the Loan, the fully executed Note shall be delivered to the Board as agent for the State.

Section 4. The Note shall be in substantially the form attached hereto as Exhibit A.

Section 5. The City also hereby acknowledges the conditions of the Loan and agrees to comply with the requirements of the Board's Order of Approval of Loan (the "Order"). A copy of the Order is attached to this Resolution as Exhibit B.

Section 6. The Manager hereby resolves that the proceeds of the Loan shall be disbursed in accordance with Use of Proceeds of Emergency Loan Table.

Section 7. The Manager is authorized and directed to execute the Emergency Loan Agreement between the City and the Board. The Manager, the City Clerk, the Finance Director, the City Attorney and any other official or employee of the City are hereby authorized and ordered to take such action or execute such other documents and certificates as may be necessary or desirable and in the best interest of the City in connection with the delivery of the Note and the City's receipt of the proceeds of the Loan.

Section 8. This Resolution shall be effective immediately upon execution.

Section 9. All resolutions and parts of resolutions insomuch and insofar as they conflict with the provisions of this Resolution be and the same are hereby rescinded.

EXHIBIT A
FORM OF NOTE

UNITED STATES OF AMERICA
STATE OF MICHIGAN

CITY OF FLINT

EMERGENCY LOAN NOTE
(General Obligation Limited Tax)
FY 2014-2015 Series 1

Registered Owner:	State of Michigan
Principal Amount:	$7,000,000.00 (the "**Principal Amount**")
Date of Original Issue:	April 29, 2015 (the "**Issue Date**")

The City of Flint, a Michigan public body corporate (the "**Issuer**"), acknowledges that it owes and hereby promises to pay the State of Michigan the Principal Amount owed in 15 consecutive annual installments as detailed on schedule 1, unless prepaid as provided in this note, with interest on the unpaid principal balance of this note from the Issue Date or the later date to which interest has been paid, until paid, at the annual rates provided in this note, first payable on December 1, 2015 and biannually on each following June 1 and December 1. Both the principal of and interest on this note are payable at the office of the State Treasurer in Lansing, Michigan, or another place as designated in writing to the Issuer by the State Treasurer.

From the Date of Original Issue specified above until June 1, 2030, this note will bear interest at an annual rate of 2.09%. Interest on this note will be computed on the basis of the actual number of days elapsed in a calendar year.

This note is issued by the Emergency Manager of the Issuer under and in full compliance with Michigan law to evidence the obligation of the Issuer to repay an emergency loan made by the State of Michigan under the Emergency Municipal Loan Act, 1980 PA 243, as amended, MCL 141.931 to 141.942 ("**Act 243**") to enable the Issuer to meet its financial obligations.

The Issuer may pay at any time or times before maturity, without penalty or premium, all or any portion of this note. Prepayments will be credited to principal payments in direct order of maturity.

This note, including the interest on this note, is payable as a first budget obligation from the general funds of the Issuer, and the Issuer is required, if necessary, to levy ad valorem taxes on all taxable property in the Issuer for the payment of the obligations, subject to applicable limitations under Michigan law.

RESOLUTION RATIFYING TERMS OF LOAN
SCHEDULE A

As additional security for payment of the note and if the Issuer is delinquent in paying required principal or interest under this note, the State Treasurer is authorized to withhold all delinquent amounts of principal or interest due on this note from either or both of the following:

(1) payments from the State of Michigan owed to the Issuer under the Glenn Steil State Revenue Sharing Act of 1971, 1971 PA 140, as amended, MCL 141.901 to 141.921; and

(2) the Issuer's portion of the revenue generated by the local community stabilization share tax levied under the Use Tax Act, 1937 PA 94, as amended, MCL 205.91 to 205.111, and payable by the Michigan Department of Treasury to the Local Community Stabilization Authority created under the Local Community Stabilization Authority Act, 2014 PA 86, MCL 123.1341 to 123.1362, for distribution to the Issuer and other governmental entities.

The City hereby consents to an entry of judgment against the City for unpaid amounts owed under this note and enforcement of that judgment under section 6093 of the Revised Judicature Act of 1961, 1961 PA 236, as amended, MCL 600.6093, if the City defaults on the Emergency Loan.

Until this note is paid in full, the Issuer will perform and meet all applicable requirements resulting from the receipt of an emergency loan under Act 243.

The Issuer states that all acts, conditions, and things required by law for the issuance of this note have been completed in a timely manner and that the total indebtedness of the Issuer, including this note, does not any applicable debt limitation.

The Emergency Manager and the City Clerk are signing and the City Clerk is affixing the seal of the Issuer on the date indicated opposite the Emergency Manager's and the City Clerk's signature.

STATE TREASURER

CERTIFICATION OF FINAL TRANSCRIPT

I, Harlan Goodrich, Secretary to the Local Emergency Financial Assistance Loan Board, Bureau of Local Government Services, Michigan Department of Treasury, do hereby certify as follows:

1. That the foregoing is a complete and correct transcript of all relevant proceedings and records on file in the Bureau of Local Government Services relating to the issuance by the City of Flint, County of Genesee, State of Michigan, of its "Emergency Loan Note (General Obligation Limited Tax) 2014-15 Series I," in the principal amount of seven million dollars ($7,000,000), dated April 29, 2015, the same having been compared by me with the originals on file in the Bureau of Local Government Services.

2. That the Local Emergency Financial Assistance Loan Board proceedings of April 29, 2015, have not been vetoed, rescinded, or amended in any manner whatsoever, but are in full force and effect.

3. That, at the time of the taking of the proceedings of the Local Emergency Financial Assistance Loan Board April 29, 2015, the persons named in the proceedings were the duly qualified and acting members of the Board, and that the persons who acted for, or as designees of, any members at the meeting at which the proceedings were taken were duly qualified and authorized to act.

4. That public notice of the meeting of the Local Emergency Financial Assistance Loan Board of April 29, 2015, was given pursuant to and in compliance with Public Act 267 of 1976, the Open Meetings Act, as amended, including in the case of a special meeting or a meeting recessed for more than 36 hours, notice by posting at least 18 hours prior to the time set for the meeting.

IN WITNESS WHEREOF, I have hereunto affixed my signature on the date indicated below.

By Harlan Goodrich

John C. Bollman, Director

March 23, 2015

Mr. Harlan Goodrich
Local Emergency Financial Assistance Loan Board
430 W. Allegan Street
Lansing, MI 48922

Dear Mr Goodrich:

Attached please find one copy of the following act:

Act 243 of 1980, as amended, being § 141.931 et seq. of the *Michigan Compiled Laws*.

The attached copy of this act was generated from *MichLaw*, the computerized database of the *Michigan Compiled Laws*, which database is maintained by the Legislative Service Bureau, a nonpartisan agency of the Michigan Legislature, pursuant to its duty to maintain the official text of the statutes of Michigan. See Act 268 of 1986, being § 4.1101 et seq. of the *Michigan Compiled Laws*, and Const 1963, art 4, sec 36.

The text of the above described act, as set forth in the attached copy, has been verified against the official copy of the act and all amendments thereto as filed with the Secretary of State.

Materials in boldface type on the attached copy, particularly the act heading, M. C. L. numbers, catchlines, history notes, compiler's notes, and related annotations are not part of the statutes as enacted by the Michigan Legislature.

Sincerely,

Marge Martin

Enclosure

EMERGENCY MUNICIPAL LOAN ACT
Act 243 of 1980

AN ACT to provide emergency financial assistance for certain political subdivisions of this state; to create a local emergency financial assistance loan board and to prescribe the powers and duties of this board; to prescribe conditions for granting and receiving loans, to prescribe terms and conditions for the repayment of loans, and to allow the limiting of repayment by a county from specified revenue sources; to impose certain requirements and duties on certain state departments, political subdivisions of this state, and officials of this state and political subdivisions of this state; and to prescribe remedies and penalties.

History: 1980, Act 243, Imd Eff July 24, 1980;—Am 1980, Act 324, Imd Eff Dec 15, 1980;—Am 1988, Act 198, Imd Eff June 27, 1988;—Am 2012, Act 284, Imd. Eff. Aug 1, 2012.

The People of the State of Michigan enact:

141.931 Definitions.

Sec. 1. As used in this act:

(a) "Board" means the local emergency financial assistance loan board created under section 2.

(b) "Fiscal year" means, unless otherwise provided in this act, the fiscal year of the municipality applying for a loan under this act.

(c) "Income tax collections" means the total collection of a municipality under the city income tax act, 1964 PA 284, MCL 141.501 to 141.787, in any calendar year.

(d) "Income tax revenue growth rate" means the quotient of the following:

(*i*) The numerator is the income tax collections of the municipality for the calendar year immediately preceding the municipality's application for a loan under this act.

(*ii*) The denominator is the income tax collections for the municipality for the calendar year preceding the calendar year used in determining the numerator.

(e) "Municipality" means a county, city, village, or township in this state. For the period beginning on October 1, 2011 and ending on September 30, 2018, municipality also includes a school district in this state.

(f) "Local tax base growth rate" for a municipality means the state equalized valuation of the real and personal property of the municipality for the most recent year for which data is available divided by the state equalized valuation of real and personal property of the municipality for the fifth year preceding the most recent year for which data is available.

(g) "Statewide tax base growth rate" means the total state equalized valuation for real and personal property for the most recent year for which data is available divided by the total state equalized valuation for the fifth year preceding the most recent year for which data is available.

(h) "State equalized valuation of real and personal property of the municipality" means the valuation determined under 1911 PA 44, MCL 209.1 to 209.8, of real and personal property within the municipality plus an amount equal to the state equalized valuation equivalent of certain revenues of the municipality as determined under this subdivision. The state equalized valuation equivalent shall be calculated by dividing the sum of the following amounts by the municipality's millage rate for the fiscal year:

(*i*) The amount levied by the municipality for its own use during the municipality's fiscal year from the specific tax levied under 1974 PA 198, MCL 207.551 to 207.572.

(*ii*) The amount levied by the municipality for its own use during the municipality's fiscal year from the specific tax levied under the commercial redevelopment act, 1978 PA 255, MCL 207.651 to 207.668.

History: 1980, Act 243, Imd Eff July 24, 1980;—Am. 1987, Act 282, Eff Apr 11, 1988;—Am 2007, Act 178, Imd Eff. Dec. 21, 2007;—Am. 2012, Act 284, Imd. Eff Aug 1, 2012.

141.932 Local emergency financial assistance loan board; creation; membership; powers and duties; approval of actions; conducting business at public meeting; staff services.

Sec. 2. (1) There is created a local emergency financial assistance loan board within the department of treasury. This board shall consist of the state treasurer, the director of the department of licensing and regulatory affairs, and the director of the department of technology, management, and budget. Except for budgeting, procurement, and related functions of the board that shall be performed under the direction and supervision of the state treasurer, the board shall exercise its prescribed statutory powers, duties, and functions independently of the department of treasury.

(2) The board has the powers necessary to carry out and effectuate the purposes and provisions of this act, and powers vested in the board under other laws of this state, including, but not limited to, all of the following powers:

(a) To act by an order issued in the name of the board and signed by the members of the board. The signature of the designee of a member, when the designee is acting for his or her principal, has the same force and effect as the signature of the member.

(b) To authorize and make loans; to renegotiate the terms of outstanding loans; and to make, execute, and deliver contracts and other instruments necessary or convenient to the exercise of its powers.

(c) To aid, advise, and consult with a municipality with respect to fiscal questions arising from and relating to its proposed or outstanding loans.

(d) To promulgate rules under the administrative procedures act of 1969, 1969 PA 306, MCL 24.201 to 24.328, that it considers necessary.

(e) To examine the books and records of a municipality applying for or receiving a loan under this act for the purpose of ascertaining if the municipality is complying, in relation to a loan under this act, with the requirements of the board, the laws of this state, and the charter, ordinances, and resolutions of the municipality. Additionally, for effectuating this purpose, the board may require sworn statements from any officer or employee of the municipality and may require the municipality to furnish a statement of its financial condition. The board has full power, in furtherance of its investigations, to examine witnesses on oath, to compel the attendance of witnesses, to compel the giving of testimony, and to compel the production of books, papers, and records. Witnesses may be summoned by the board by its process upon the payment of the same fees as are allowed to witnesses attending in the circuit court for the county in which a hearing is held. A person duly subpoenaed under this section who fails to attend or testify at the place named in the subpoena served for that purpose is guilty of a misdemeanor.

(f) To serve notice upon a municipality of an order relating to the municipality issued by the board. A municipality has prima facie notice of and is bound by an order of the board if notice has been served upon it by registered mail addressed to any officer of the municipality upon whom legal process may be served.

(g) To enforce compliance with its orders; with the terms of outstanding loans; with any provision of this act; or, in relation to a loan under this act, with any law of this state or with the charter, ordinances, or resolutions of a municipality that received a loan under this act. As 1 method to enforce compliance, the board may institute appropriate proceedings in the courts of this state, including proceedings for writs of mandamus and injunctions.

(h) To subject a loan to the terms and conditions the board considers necessary to ensure compliance with the uniform budgeting and accounting act, 1968 PA 2, MCL 141.421 to 141.440a, and to ensure timely repayment of the loan, including, but not limited to, requiring the direct assignment for repayment of a loan of any state money appropriated to the municipality or, for a municipality that is a school district, other revenue or money that may be pledged by a school district under section 1211 of the revised school code, 1976 PA 451, MCL 380.1211, or other law.

(i) To provide loan terms specifying conditions and events of default and remedies available upon default by a municipality.

(j) To impose loan terms upon the disbursement of a loan authorized to be made under section 3(2)(b) or (3).

(3) The board shall review each application for a loan from a municipality to determine if the municipality satisfies the requirements of this act. Except for loans authorized under section 3(2) or (3), upon determining those applications that satisfy the application eligibility requirements of section 4 and, for subsequent annual loans, section 8, the board may authorize an annual loan to 1 or more of those eligible applicants upon declaring that a local fiscal emergency exists in the municipality. For loans authorized under section 3(2) or (3), the board may authorize a loan upon determining that the municipality has satisfied the requirements of this act applicable to loans under section 3(2) or (3).

(4) All actions of the board shall be approved by all members of the board. All meetings of the board shall be conducted at a public meeting held in compliance with the open meetings act, 1976 PA 267, MCL 15.261 to 15.275.

(5) Subject to the requirements of this act, the board has the sole authority to determine all of the following:

(a) The amount of a loan.

(b) The rate or rates of interest on a loan.

(c) Any other condition related to a loan including, but not limited to, requiring that the proceeds of a loan be used for specified purposes.

(6) The department of treasury shall provide staff services to the board to carry out this act.

(7) A municipality may do 1 or more of the following:

(a) Borrow money under this act, and issue evidences of indebtedness for repayment of obligations, including, but not limited to, money advanced or previously advanced to a school district or approved or

previously approved for advancement to a school district under section 15(2) of the state school aid act of 1979, 1979 PA 94, MCL 388.1615, or money borrowed by the school district under section 1225 of the revised school code, 1976 PA 451, MCL 380.1225.

(b) Enter into a loan agreement with the board.

(c) Issue its notes evidencing the loan.

(d) Assign and convey any revenues allocated to it for repayment of the loan.

(e) Take any other action necessary to receive, secure, or repay a loan under this act.

History: 1980, Act 243, Imd. Eff. July 24, 1980;—Am. 1980, Act 324, Imd. Eff. Dec. 15, 1980;—Am. 1986, Act 6, Imd. Eff. Feb. 21, 1986;—Am. 1987, Act 282, Eff. Apr. 11, 1988;—Am. 1998, Act 528, Imd. Eff. Jan. 12, 1999;—Am. 2012, Act 284, Imd. Eff. Aug. 1, 2012

141.933 Maximum amount of loans in fiscal year; limitations; conditions; revenue for loans; restructuring payments; "county juvenile agency" defined.

Sec. 3. (1) For state fiscal years ending before October 1, 2011, the board may authorize loans under this act to municipalities that total up to $5,000,000.00 in a state fiscal year. For state fiscal years beginning after September 30, 2018, the board may authorize loans under this act to municipalities that total up to $10,000,000.00 in a state fiscal year, but a loan to a single municipality shall not exceed $4,000,000.00 in a state fiscal year. For the period beginning on October 1, 2011 and ending on September 30, 2018, the board may do all of the following:

(a) Authorize loans to municipalities other than school districts that total up to $35,000,000.00 during the period. Loans to a single municipality under this subdivision shall not total more than $20,000,000.00. The board shall not authorize a loan to a municipality under this subdivision until 30 days after the effective date of the amendatory act that added this subdivision.

(b) Authorize loans to municipalities that are school districts that total up to $50,000,000.00 during the period. Loans to a single school district under this subdivision shall not total more than $20,000,000.00.

(2) The board may authorize loans under this act to a county within the following limitations:

(a) In the 1998-99 state fiscal year, the board may authorize loans under this act to a county with a population greater than 1,500,000.

(b) For a state fiscal year in which the block grant appropriated to a county with a population of more than 1,500,000 that is organized under 1966 PA 293, MCL 45.501 to 45.521, and that is a county juvenile agency is less than the amount required to be distributed to that county in that year under the social welfare act, 1939 PA 280, MCL 400.1 to 400.119b, the board may authorize a loan to that county in an amount not greater than the difference between the amount of the block grant and the amount required to be distributed to that county for that fiscal year under the social welfare act, 1939 PA 280, MCL 400.1 to 400.119b. The board is not required to authorize loans under this subdivision to a county for more than 1 state fiscal year.

(3) If in a state fiscal year the block grant appropriated to a county other than a county described in subsection (2) that is a county juvenile agency is less than the amount required to be distributed to that county in that year under the social welfare act, 1939 PA 280, MCL 400.1 to 400.119b, the board may authorize a loan to that county in an amount not greater than the difference between the amount of the block grant and the amount required to be distributed to that county under the social welfare act, 1939 PA 280, MCL 400.1 to 400.119b, in that state fiscal year.

(4) Sections 6(2), 7, and 8 and the conditions listed in section 4(1) do not apply to a loan authorized under subsection (2) or (3).

(5) The proceeds of a loan made under subsection (2) or (3) shall be maintained in a separate account and shall not be commingled with the county's general fund or any other special fund or account.

(6) The state treasurer or his or her designee shall monitor the expenditure of the proceeds of any loan made under subsection (2) or (3).

(7) The proceeds of a loan made under subsection (2) or (3) are subject to the requirements of the county juvenile agency act, 1998 PA 518, MCL 45.621 to 45.631.

(8) Except as otherwise provided in this subsection, revenue for loans made under this act shall be provided from the surplus funds of this state under authorization granted under section 1 of 1855 PA 105, MCL 21.141. Alternatively, for a school district, revenue for a loan made under this act may be provided from money advanced to the school district by this state from money appropriated from the state school aid fund established under section 11 of article IX of the state constitution of 1963 and payable to the school district under the state school aid act of 1979, 1979 PA 94, MCL 388.1601 to 388.1896.

(9) After September 30, 2012, the board may restructure payments, but not the outstanding principal balance or interest, on a loan to a municipality under subsection (1) if all of the following apply:

(a) For a municipality that is a school district, in a state fiscal year after the state fiscal year in which the

loan to the school district was authorized by the board, the foundation allowance for the school district under the state school aid act of 1979, 1979 PA 94, MCL 388.1601 to 388.1896, is less than the foundation allowance for the school district in the state fiscal year in which the loan was authorized.

(b) For a municipality other than a school district, in a state fiscal year after the state fiscal year in which the loan to the municipality was authorized by the board, statutory revenue sharing for the municipality under the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.901 to 141.921, combined with any economic vitality incentive program money payable to the municipality is less than the statutory revenue sharing for the municipality combined with any economic vitality incentive program money payable to the municipality in the state fiscal year in which the loan was authorized.

(c) The municipality is in compliance with the terms of the loan and any other requirements applicable to the municipality under this act.

(d) The municipality is in compliance with any requirements relating to a deficit elimination plan under state law.

(e) The municipality is in compliance with any applicable consent agreement or order of an emergency manager under the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1501 to 141.1531.

(f) For a municipality that is a school district, the school district is in compliance with all requirements for receipt of the foundation allowance and any other requirements applicable to the school district under the state school aid act of 1979, 1979 PA 94, MCL 388.1601 to 388.1896.

(g) For a municipality other than a school district, the municipality is in compliance with all conditions for economic vitality incentive program money or statutory revenue sharing or other requirements applicable to the municipality under the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.901 to 141.921.

(h) The restructuring of payments complies with applicable law.

(i) The loan has not been sold or transferred under section 6a.

(10) As used in this section, "county juvenile agency" means that term as defined in section 2 of the county juvenile agency act, 1998 PA 518, MCL 45.622.

History: 1980, Act 243, Imd. Eff. July 24, 1980.—Am. 1980, Act 324, Imd. Eff. Dec. 15, 1980.—Am. 1987, Act 282, Eff. Apr. 11, 1988.—Am. 1998, Act 528, Imd. Eff. Jan. 12, 1999.—Am. 2012, Act 284, Imd. Eff. Aug. 1, 2012

141.933a Proceeds of a loan; special assessment.

Sec. 3a. The proceeds of a loan issued under this act to a municipality shall not be used by the municipality to finance any costs associated with a special assessment or special assessment district established after the effective date of the amendatory act that added this section.

History: Add. 2012, Act 284, Imd. Eff. Aug. 1, 2012

141.934 Application for loan; resolution; certification of information and conditions; inspection, copying, or auditing of books and records; applicability of subsection (1).

Sec. 4. (1) If the governing body of a municipality desires to request a loan, it shall provide by resolution for the submission of an application to the board for a loan made under this act. The municipality shall certify and substantiate all of the following information and conditions to be eligible for consideration for a loan authorization by the board:

(a) A deficit for the municipality's general fund is projected for the current fiscal year.

(b) That 1 or both of the following have occurred within the 18 months immediately preceding the loan request:

(*i*) The municipality has issued tax anticipation notes or revenue sharing notes under the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821, or for a school district, issued notes under section 1225 of the revised school code, 1976 PA 451, MCL 380.1225.

(*ii*) The department of treasury has acted upon a request by the municipality to issue tax anticipation notes or revenue sharing notes under the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821.

(c) The municipality meets 1 or more of the following conditions:

(*i*) Its income tax revenue growth rate is .90 or less, or the municipality has 2 or more emergency loans outstanding at the time its application is submitted and its income tax revenue growth rate is 1.3 or less.

(*ii*) Its local tax base growth rate is 75% or less of the statewide tax base growth rate.

(*iii*) The state equalized valuation of real and personal property within the municipality at the time the loan application is made is less than the state equalized valuation of real and personal property within the municipality in the immediately preceding year.

(*iv*) The municipality is levying the maximum number of mills it is authorized to levy as approved by the

voters and has either of the following:

(A) One or more delinquent special assessments.

(B) Outstanding bonds, notes, or other evidences of indebtedness that were issued in anticipation of a contract obligation with, or an assessment obligation against, another municipality that has 1 or more delinquent special assessments that were levied to satisfy, in whole or in part, the contract or assessment obligation.

(*v*) For a school district, the school district's membership under section 6 of the state school aid act of 1979, 1979 PA 94, MCL 388.1606, at the time the loan application is made has declined over a preceding 3-state-fiscal-year period by a total of 15% or more, as determined by the department of treasury.

(*vi*) The municipality is in receivership or is subject to a consent agreement under the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1501 to 141.1531, or a successor statute, and loan authorization by the board is necessary to implement a financial and operating plan, a consent agreement, or a continuing operations plan or recovery plan for the municipality under the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1501 to 141.1531, or a successor statute.

(*vii*) The municipality is a municipality for which a financial emergency has been confirmed to exist and responsibilities for the municipality are vested in an emergency financial manager under former 1990 PA 72 or is a municipality for which a consent agreement, including a plan to address a serious financial problem, is in place for the municipality under former 1990 PA 72. This subparagraph applies only if the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1501 to 141.1531, is repealed or otherwise not effective and former 1990 PA 72 is again in effect or applicable.

(d) The municipality submits a 5-year plan, that has been approved by the governing body of the municipality, and that will balance future expenditures with anticipated revenues.

(2) If the board determines it necessary, the board may inspect, copy, or audit the books and records of a municipality.

(3) Subsection (1) does not apply to a loan authorized under section 3(2) or (3).

History: 1980, Act 243, Imd. Eff. July 24, 1980;—Am. 1980, Act 324, Imd. Eff. Dec. 15, 1980,—Am. 1983, Act 67, Imd. Eff. May 31, 1983,—Am. 1986, Act 6, Imd. Eff. Feb. 21, 1986,—Am. 1998, Act 528, Imd. Eff. Jan. 12, 1999;—Am. 2002, Act 405, Imd. Eff. June 3, 2002,—Am. 2007, Act 198, Imd. Eff. Dec. 21, 2007,—Am. 2012, Act 284, Imd. Eff. Aug. 1, 2012

141.935 Maximum amount of loans; eligibility.

Sec. 5. Except for a county subject to section 3(2), until September 30, 2011, the board may authorize loans to any 1 municipality in an amount not to exceed $3,000,000.00 in any 1 fiscal year of the municipality. Except for a county subject to section 3(2), a municipality is not eligible to receive loans in more than 5 fiscal years in any 10-year period.

History: 1980, Act 243, Imd. Eff. July 24, 1980;—Am. 1980, Act 324, Imd. Eff. Dec. 15, 1980,—Am. 1987, Act 282, Eff. Apr. 11, 1988,—Am. 2007, Act 198, Imd. Eff. Dec. 21, 2007,—Am. 2012, Act 284, Imd. Eff. Aug. 1, 2012

141.936 Annual rate or rates of interest; fixed rate; rate calculated upon formula; limitation; payment of interest and principal; delinquency; repayment at earlier date or in fewer installments; prohibited conditions; effect of failure to make repayments; loan as general obligation of municipality; exception.

Sec. 6. (1) A loan made under this act shall bear an annual rate or rates of interest, if any, as established by the board under section 2(5). The board may establish interest for a loan under this act either at a rate or rates that are fixed for the term of the loan or, if the formula is approved by the board at the time the loan is made or renegotiated as authorized in section 2, at a rate calculated upon a formula that varies the rate annually. The board may provide that the interest rate or rates for a loan under this act may adjust to an interest rate or rates determined at the time of the sale or transfer by the state treasurer to be sufficient to facilitate the sale of the loans under section 6a. Except for loans sold or transferred under section 6a, if the interest rate for a loan under this act is a single fixed rate, the annual rate of interest for the term of a loan shall not be less than the municipal 10-year rate as determined by the state treasurer. The board may consider a higher interest rate based on both the market interest rates and the risk of the municipality requesting the loan.

(2) Interest payments are due and payable as determined by the board or the state treasurer under section 6a. Repayment of all of the principal shall be made not more than 30 years from the date of issuance determined by the board or state treasurer under section 6a, except as provided in subsection (5). This subsection, sections 7 and 8, and the conditions listed in section 4(1) do not apply to a loan authorized under section 3(2) or (3).

(3) The loan agreement between the board and a county for a loan authorized under section 3(2) or (3) shall establish the schedule for payment of the principal of and interest on the loan, the nature of the

obligation of the county to repay a loan made under this act, and any security for that loan. Payments of principal and interest for a loan authorized by section 3(2) shall be limited to revenues allocated to the county under the health and safety fund act, 1987 PA 264, MCL 141.471 to 141.479, minus those revenues authorized by the board in the loan agreement for use in the payment of other county obligations.

(4) Unless other state appropriations to a municipality are pledged or assigned in an amount sufficient for the municipality to make a required principal or interest payment, if the municipality's payment of required principal or interest is delinquent, the state treasurer may withhold the amount of all delinquent payments that are due on a loan issued under this act from state payments to the municipality under the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.901 to 141.921.

(5) Except for loans sold or transferred under section 6a or as otherwise determined by the board, notwithstanding the payment schedules and methods established by this section or by the terms of a loan agreement, a municipality may initiate repayment of all or part of a loan made under this act at an earlier date or may make repayment in fewer installment payments, or both. The board shall not condition either eligibility for consideration for a loan or the grant of a loan under this act on repayment schedules and terms other than those required by subsections (1), (2), (3), and (4). In addition, failure of a municipality to make repayments under terms or a schedule it has instituted under this subsection does not disqualify the municipality from eligibility for consideration for loans in subsequent fiscal years.

(6) A loan issued under this act shall be a general obligation of the municipality except that a loan issued under section 3(2) shall not be a general obligation of the municipality and shall be repaid solely from specific revenues pledged for repayment of the loan.

History: 1980, Act 243, Imd. Eff. July 24, 1980;—Am. 1980, Act 324, Imd. Eff. Dec. 15, 1980;—Am. 1986, Act 6, Imd. Eff. Feb. 21, 1986;—Am. 1987, Act 282, Eff. Apr. 11, 1988;—Am. 1988, Act 198, Imd. Eff. June 27, 1988;—Am. 1998, Act 528, Imd. Eff. Jan. 12, 1999;—Am. 2012, Act 284, Imd. Eff. Aug. 1, 2012

141.936a State treasurer selling or transferring loan; security; interest rate; terms; notice.

Sec. 6a. (1) The state treasurer may sell or transfer a loan under this act and enter into an agreement related to the sale or transfer of the loan. The state treasurer also may assign to the purchaser or transferee of a loan under this act all security pledged for the loan by a municipality. A loan sold or transferred under this section shall be secured in the same manner as a loan under this act not sold or transferred, including, but not limited to, benefiting from the security provided by section 6(4).

(2) The state treasurer may enter into an agreement with the purchaser or transferee of a loan under this act to repurchase the loan at a price and time or upon the occurrence of an event provided in the agreement.

(3) Except as otherwise provided in this subsection, at the time a loan is sold or transferred under this section, the state treasurer may set the interest rate, or method of determining the interest rate, on the loan being sold or transferred, including, but not limited to, a loan made before the effective date of the amendatory act that added this section, at a rate the state treasurer determines necessary and advisable to accomplish the sale or transfer. A rate determined by the state treasurer shall not exceed the maximum rate otherwise authorized by law.

(4) When a loan is sold or transferred under this section, the state treasurer may make changes to the terms of the loan, including a loan made before the effective date of the amendatory act that added this section, as the state treasurer determines necessary and advisable to permit a purchaser or transferee to sell obligations secured by the loans as tax-exempt under federal law, including, but not limited to, modifying redemption provisions, principal amortization, and interest and principal payment dates of the loan. The state treasurer also may require a municipality to make certain covenants the state treasurer determines necessary or advisable relating to the tax-exempt status of the obligations of a purchaser or transferee.

(5) At any time, the state treasurer may require a municipality to enter into an agreement with a purchaser or transferee of a loan regarding continuing disclosure obligations under federal law or any other matters the state treasurer determines are necessary and advisable. The state treasurer may require entry into an agreement with a recipient of a loan issued before the effective date of the amendatory act that added this section.

(6) If a loan is sold or transferred under this section, the state treasurer shall notify all of the following that the loan was sold or transferred:

(a) Governor.

(b) Senate majority leader.

(c) Senate minority leader.

(d) Speaker of the house of representatives.

(e) House minority leader.

(f) Senate fiscal agency.

(g) House fiscal agency.

History: Add. 2012, Act 284, Imd. Eff. Aug. 1, 2012

141.937 Duties of municipality receiving loan; definitions; exception.

Sec. 7. (1) A municipality that receives a loan under this act shall perform all of the following:

(a) Except as otherwise provided in this subdivision, employ a full-time professional administrator or contract with a person with expertise in municipal finance and administration to direct or participate directly in the management of the municipality's operations until otherwise ordered by the board. If the municipality is in receivership under the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1501 to 141.1531, or a successor statute, compensate the emergency manager for the municipality and reimburse the emergency manager's actual and necessary expenses as provided under section 15(5)(e) of the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1515, or a successor statute. If the municipality is under a consent agreement as provided under the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1501 to 141.1531, or a successor statute, compensate those officials who are required to be compensated under the consent agreement with the municipality and reimburse those officials' actual and necessary expenses as provided under the consent agreement.

(b) If the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1501 to 141.1531, is repealed or otherwise not effective and former 1990 PA 72 is again in effect or applicable and an emergency financial manager is in place for the municipality under former 1990 PA 72, compensate the emergency financial manager and reimburse the emergency financial manager's actual and necessary expenses. If the local government and school district fiscal accountability act, 2011 PA 4, MCL 141.1501 to 141.1531, is repealed or otherwise not effective and former 1990 PA 72 is again in effect or applicable and a consent agreement is in place for the municipality under former 1990 PA 72, compensate those officials who are required to be compensated under the consent agreement with the municipality and reimburse those officials' actual and necessary expenses as provided under the consent agreement.

(c) Not more than 6 months after receiving a loan and semiannually after that date for the period the loan is outstanding, submit to the board an evaluation of the performance of the municipality against the 5-year plan submitted under section 4(1).

(d) Submit all of the following to the board on a quarterly basis:

(*i*) A statement of actual revenues received in the last quarter and in the current fiscal year to date.

(*ii*) A statement of total revenues estimated to be received by the municipality in the current fiscal year.

(*iii*) A statement of expenditures made and encumbrances entered into by the municipality in the last quarter and in the current fiscal year to date.

(*iv*) A statement of revenues that were estimated to be received and expenditures that were estimated to be made during the current fiscal year and through the end of the last quarter.

(*v*) A balance sheet indicating whether total estimated expenditures for the current fiscal year and for the last quarter exceed the total estimated revenues for the current fiscal year and for the last quarter, respectively.

(e) Submit the general appropriations act of the municipality, and any amendments to that act, adopted under the uniform budgeting and accounting act, 1968 PA 2, MCL 141.421 to 141.440a, or any equivalent report as may be required by the board if the municipality is not required to adopt a general appropriations act.

(f) Submit any budget change in the current fiscal year or any amendment to the general appropriations act of the municipality for the current fiscal year to the board before adoption.

(g) Submit any budget for the ensuing fiscal year or the general appropriations act of the municipality for the ensuing fiscal year to the board before adoption.

(h) Certify that the municipality has fully complied with all statutory requirements concerning use of the uniform chart of accounts and audits.

(2) If the state treasurer determines that a municipality is not in compliance with all of the requirements under subsection (1) and with the 5-year plan submitted under section 4(1), the state treasurer may modify the terms of the loan to require a higher interest rate or to accelerate the repayment of the loan.

(3) As used in this section, "expenditure" and "revenue" mean those terms as defined in sections 2c and 2d of the uniform budgeting and accounting act, 1968 PA 2, MCL 141.422c and 141.422d.

(4) Subsection (1) does not apply to a loan authorized under section 3(2) or (3).

History: 1980, Act 243, Imd. Eff. July 24, 1980;—Am. 1980, Act 324, Imd. Eff. Dec. 15, 1980;—Am. 1986, Act 6, Imd. Eff. Feb. 21, 1986;—Am. 1998, Act 528, Imd. Eff. Jan. 12, 1999;—Am. 2012, Act 284, Imd. Eff. Aug. 1, 2012

141.938 Additional eligibility requirements; exception.

Sec. 8. (1) In addition to the requirements of section 4, to be eligible for consideration for a fiscal year loan

under this act after having qualified for and received the first or any subsequent fiscal year loan under this act, a municipality shall satisfy all of the following requirements:

(a) Fulfilled the requirements of section 7.

(b) Submitted a progress report to the board detailing the steps that have been taken to achieve the long-range plan submitted pursuant to section 4(1) and the management measures that have been taken to improve fiscal management of the municipality.

(c) Satisfy the board that reasonable progress has been made to resolve any federal discrimination suit pending against the municipality.

(2) Subsection (1) does not apply to a loan authorized under section 3(2) or (3).

History: 1980, Act 243, Imd Eff July 24, 1980,—Am 1980, Act 324, Imd Eff Dec 15, 1980,—Am. 1986, Act 6, Imd Eff. Feb 21, 1986,—Am. 1998, Act 528, Imd Eff Jan 12, 1999

141.939 Annual report; evaluation of loan program; recommendations.

Sec. 9. The board shall report annually to the governor and the legislature on which municipalities have applied for loans under the program, which municipalities have received loans, the amount of each loan, and the conditions under which each loan was made. Five years after the effective date of this act, the board shall submit to the governor and the legislature an evaluation of the loan program with recommendations for its continuance or discontinuance.

9. Emergency Loan Agreement

EMERGENCY LOAN AGREEMENT

This emergency loan agreement is dated April 29, 2015, and is between the LOCAL EMERGENCY FINANCIAL ASSISTANCE LOAN BOARD, a Michigan state board (the "**Board**"), and the CITY OF FLINT, a Michigan public body corporate (the "**City**").

A financial emergency currently exists within the City under the Local Financial Stability and Choice Act, 2012 PA 436, MCL 141.151 to 141.1575 ("**Act 436**").

To assist in the resolution of its financial emergency, on behalf of the City and with the approval of the City's governing body (the "**City Council**"), the emergency manager of the City appointed under section 9 of Act 436 (the "**Emergency Manager**") asked for an emergency loan from the State of Michigan in the amount of $7,000,000.00 (the "**Emergency Loan**") under the Emergency Municipal Loan Act, 1980 PA 243, as amended MCL 141.931 to 141.942 ("**Act 243**").

The parties acknowledge that the Emergency Loan is necessary and in the best interests of the City.

The parties therefore agree as follows:

1. **Emergency Loan Terms.** (a) The Board shall authorize a loan from the State of Michigan to the City, and the City shall borrow from the State of Michigan, $7,000,000.00, with the proceeds payable to the City on April 29, 2015. The Emergency Loan is a general obligation of the City.

(b) The principal amount outstanding under the Emergency Loan will bear interest at the rate of 2.09% per year, except as provided in section 15(a). Interest will be computed on the basis of actual number of days elapsed in a calendar year.

(c) The City shall issue notes evidencing the Emergency Loan, with the notes substantially in the form as attachment A (the "**Note**"). The Note will be for a term of up to 15 years.

2. **Repayment.** (a) The City shall make an initial payment of interest only then owing on December 1, 2015. After the initial payment and until the Emergency Loan is repaid, the City shall make a payment of principal and interest then owing on each June 1, and a payment of interest only then owing on each December 1, with a date of final maturity of June 1, 2030.

(b) As additional security for the repayment, the City hereby pledges and assigns to the repayment of principal of or interest on the Emergency Loan, the State Treasurer's right to withhold delinquent payments due on the Emergency Loan from both of the following:

(1) state payments owed to the City under the Glenn Steil State Revenue Sharing Act of 1971, 1971 PA 140, as amended, MCL 141.901 to 141.921 ("**Act 140**"); and

(2) the City's portion of the revenue generated by the local community stabilization share tax levied under the Use Tax Act, 1937 PA 94, as amended, MCL 205.91 to 205.111, and payable by the Michigan Department of Treasury ("**Treasury**") to the Local Community Stabilization Authority created under the Local Community Stabilization Authority Act, 2014 PA 86, MCL 123.1341 to 123.1362, for distribution to the City and other governmental entities.

3. **Loan Proceeds.** (a) The City shall use the proceeds of the Emergency loan to reduce the City's general fund deficit by first using the proceeds to repay a cash advance from the City's sewer fund, and then using any remaining proceeds in a manner consistent with the two-year budget for the City imposed by the Emergency Manager.

(b) As required by section 3a of Act 243, the City shall not use the proceeds of the Emergency Loan to finance any costs associated with a special assessment or a special assessment district established after August 1, 2012.

4. **City Certifications.** The City states all of the following:

(1) that a deficit is projected for the City's general fund in the City's fiscal year ending June 30, 2015;

(2) that Treasury has acted upon a request by the City to issue tax anticipation notes or revenue sharing notes under the Revised Municipal Finance Act, 2001 PA 34, as amended, MCL 141.2101 to 141.282 ("**Act 34**");

(3) that as of April 17, 2015, the state equalized value of real and personal property within the City is less than the state equalized valuation of real and personal property within the City in the immediately preceding year; and

(4) that the City has fully complied with all statutory requirements concerning use of the uniform chart of accounts and audits.

5. **Five-Year Plan.** (a) The Board acknowledges that the City has submitted a five-year plan that has been approved by the Emergency Manager exercising the powers of the City Council under Act 436 and that will balance future City expenditures with anticipated City revenues (the "**Five-Year Plan**").

(b) Each year after 2015, before the adoption of a new budget for a fiscal year for the City, the City shall update the Five-Year Plan for a new five-year period. Each Five-Year Plan must balance future City expenditures with anticipated City revenues.

(c) By September 30, 2015, and by each following March 31 and September 30, the City shall submit to the Board an evaluation of the City's performance against the original Five-Year Plan and the Five-Year Plan then effective.

6. **Professional Assistance.** (a) As required by section 7(1)(a) of Act 243, the City shall employ a full-time professional administrator or contract with a person with expertise in municipal finance and administration to direct or participate directly in the management of the City's operations until otherwise ordered by the Board.

(b) The parties acknowledge that the position of city administrator created by Order No. 3 issued by the Emergency Manager on April 10, 2015 (the "**City Administrator**") satisfies the requirements of section 6(a).

(c) If a vacancy in the position of City Administrator occurs, the City shall fill the vacancy within 120 days, with the approval of a receivership transition advisory board for the City if a receivership transition advisory board is in place for the City under section 23 of Act 436, or the approval of the State Treasurer if no receivership transition advisory board is in place. A vacancy must be filled

with an individual that meets qualifications included in a job description adopted by a receivership transition advisory for the City, if a receivership transition advisory board is in place for the City under section 23 of Act 436, or the by the State Treasurer if no receivership transition advisory board is in place. To identify qualified candidates to potentially fill a vacancy in the position of City Administrator, the City shall use a professionally recognized search firm approved by a receivership transition advisory board for the City if a receivership transition advisory board is in place for the City under section 23 of Act 436, or by the State Treasurer if no receivership transition advisory board is in place. The City may not terminate the City Administrator without the prior approval of a receivership transition advisory board for the City, if a receivership transition advisory board is in place for the City under section 23 of Act 436, or the State Treasurer if no receivership transition advisory board is in place.

7. **Reports.** (a) Beginning on September 30, 2015, and on each following December 31, March 31, June 30, and September 30, the City shall submit to the Board, in a form prescribed by the State Treasurer, all of the following:

(1) a statement of actual Revenues received by the City in the previous quarter and in the current fiscal year to date;

(2) a statement of total Revenues estimated to be received by the City in the current fiscal year;

(3) a statement of Expenditures made and encumbrances entered into by the City in the previous quarter and in the current fiscal year to date;

(4) a statement of Revenues that were estimated to be received and Expenditures that were estimated to be made by the City during the current fiscal year and through the end of the last quarter; and

(5) a balance sheet indicating whether total estimated City Expenditures for the current fiscal year and for the last quarter exceed the total estimated City Revenues for the current fiscal year and for the last quarter, respectively.

(b) For purposes of this section 7 and section 8, "**Expenditure**" and "**Revenue**" mean those terms as defined in sections 2c and 2d of the Uniform Budgeting and Accounting Act, 1968 PA 2, as amended, MCL 141.421 to 141.440a ("**Budget Act**").

8. **Budget.** (a) The City shall adopt and adhere to a budget for each City fiscal year consistent with applicable law and the ordinances described in section 13 (collectively the "**Fiscal Stability Ordinances**") and in fiscal years 2015-2016 and 2016-2017 the two-year budget for the City imposed by the Emergency Manager. If a receivership transition advisory board is in place for the City, each City budget and any City budget amendment must be approved by the receivership transition advisory board. Each budget must comply with all of the following:

(1) be prepared, presented, and adopted in compliance with the Budget Act and 1963 (Ex Sess) PA 43, as amended, MCL 141.411 to 141.415; and

(2) be based upon a forecast of monthly cash demands necessary to satisfy the Expenditures authorized in the budget, with an appropriation not being a mandate to spend.

(b) If a shortfall in anticipated Revenue occurs in any City fund, the City shall reduce budgeted Expenditures in the adopted annual budget on a timely basis as provided under the Budget

Act and, the Fiscal Stability Ordinances, and any applicable orders of the Emergency Manager, so that the City may close the fiscal year with a balanced budget. For purposes of this section 8(b), "**a timely basis**" means the time period necessary to adjust budgeted Expenditures or budgeted Revenues, or both, so as to preclude an Expenditure being made for which adequate Revenues are unavailable or are projected to be unavailable.

(c) The City shall not close a fiscal year with an operating deficit in any fund according to the uniform minimum standards of and guidelines for financial accounting and reporting standards for state and local governments issued by the Government Accounting Standards Board ("**GASB**"), including GASB's hierarchy of generally accepted accounting principles for state and local governments ("**Generally Accepted Accounting Principles**"), unless both of the following occur:

(1) the fund in which the operating deficit occurred had a sufficient beginning balance to offset the deficit consistent with the Budget Act; and

(2) the financial statements of the City indicate that the sufficient beginning balance fairly represents the financial position of the City according to an independent auditor in a qualified or unqualified opinion using Generally Accepted Accounting Principles and the professional standards and guidance included in government accounting standards issued by the Comptroller General of the United States ("**Generally Accepted Government Auditing Standards**").

(d) The City shall do all of the following:

(1) submit to the Board the general appropriations act of the City and any amendments adopted under the Budget Act;

(2) submit to the Board before adoption any budget change in its 2015-2016 fiscal year or any amendment to the general appropriations act of the City for the 2015-2016 fiscal year; and

(3) submit to the Board before adoption any budget for a City fiscal year after the 2015-2016 fiscal year or the general appropriations act of the City for a fiscal year after the 2015-2016 fiscal year.

9. **Audits.** (a) For each City fiscal year ending after the effective date of this agreement, the City shall retain, with the approval of the State Treasurer, a recognized independent certified public accounting firm to perform an annual audit of the City (an "**Independent Auditor**"). The parties acknowledge that the City has retained an Independent Auditor as of the effective date of this agreement and the Independent Auditor retained by the City is hereby approved by the State Treasurer. If the City fails to retain an Independent Auditor in compliance with this section 9(a) or the annual audit required under this section 9 is not completed, the State Treasurer shall conduct the audit or appoint a firm to perform the audit, with the cost paid by City. The City may continue to retain the auditor under contract with the City to perform an annual audit of the City on the effective date of this agreement for the remainder of the City's agreement with that auditor, but that agreement may not be renewed or extended without the approval of the State Treasurer.

(b) The annual audit required under this section 9 shall:

(1) comply with Generally Accepted Government Auditing Standards;

(2) include an opinion as to whether the City's financial statements for the fiscal year were prepared in accordance with Generally Accepted Accounting Principles;

(3) state whether the audit of the City's financial statements was made in accordance with Generally Accepted Government Accounting Standards and accordingly included tests of the City's accounting records and other auditing procedures as considered necessary under the circumstances;

(4) disclose any fiscal irregularities, including defalcations, misfeasance, nonfeasance, or malfeasance identified by the Independent Auditor;

(5) note the nature and extent of any variations from Generally Accepted Accounting Principles reflected in the City's financial statements; and

(6) comply with the requirements of the Budget Act and other applicable law.

(c) The Independent Auditor shall prepare a report of the auditing procedures applied in each annual audit using Treasury Form 496 or any successor form.

(d) The City shall require the Independent Auditor to transmit upon completion a copy of the annual audit and the audit procedures report required under section 9(c) to the City Council and the State Treasurer.

(e) The City shall make available for inspection and duplication all records required by the Independent Auditor to perform the annual audit required under this section. The City shall make its officers and employees available to, and shall cooperate with, the Independent Auditor to facilitate timely completion of the annual audit by the Independent Auditor.

10. **Retirement System Obligations.** The City shall do all of the following:

(1) comply with the Municipal Employees Retirement Act of 1984, 1984 PA 427, as amended, MCL 38.1501 to 38.1555, (the "**Retirement Act**");

(2) make timely payments to the Michigan Employees Retirement System ("**MERS**") created by former 1945 PA 135 and continued and restated under the Retirement Act; and

(3) fully satisfy all City obligations to MERS under the Retirement Act and any agreement between the City and MERS.

11. **Water and Sewers.** (a) The City shall not decrease rates the City charges for water or sewer services without the prior written approval of the State Treasurer or a prior written determination by the State Treasurer that the City's water and sewer system are financially stable.

(b) The City shall not terminate its participation in the Karegnondi Water Authority (the "KWA") before the KWA water supply system, including the pipeline being constructed by the KWA from Lake Huron to the City, is operational with all required regulatory approvals effective. The City also shall comply with the KWA financing contract between the City, Genesee County, and the State of Michigan dated August 1, 2013.

(c) The City shall not enter into an agreement with the Detroit Water and Sewerage Department, or any successor entity, including the Great Lakes Water Authority, without the prior written approval of the State Treasurer.

12. **District Court Consolidation.** The City shall implement the memorandum of understanding with Genesee County dated April 13, 2015 providing for the consolidation of the 67th District Court and the 68th District Court beginning on January 2, 2016, consistent with section 8134(4) of the Revised Judicature Act of 1961, 1961 PA 236, as amended, MCL 600.8134(4). The City shall take all action necessary to approve and implement the consolidation described in this section 12.

13. **Fiscal Stability Ordinances.** The City shall comply with City Ordinances 3851 to 3856 each adopted March 1, 2015, and City Ordinance 3866, adopted on April 24, 2015.

14. **Emergency Manager Orders.** The City shall comply with each provision of an order issued by the Emergency Manager that remains effective, including an order issued on or after April 29, 2015.

15. **Noncompliance; Remedies.** (a) Consistent with section 7(2) of Act 243, if the State Treasurer determines that the City is not in compliance with sections 5(c), 6, 7, or 8(c), the State Treasurer may modify the terms of the Emergency Loan to require a higher interest rate or to accelerate the repayment of the loan. If the State Treasurer determines that the City is otherwise not in compliance with this agreement, the City hereby consents to withholding by the State Treasurer of some or all of the state payments otherwise owed to the City under Act 140 until the State Treasurer determines that the City is in compliance with this agreement.

(b) If the City does not pay principal or interest, or both, when due under the Note, the State Treasurer may declare all amounts under the Note to be due and payable immediately, without notice or demand. The City hereby waives presentment, demand, notice of dishonor, protest, and notice of non-payment with respect to the Note.

16. **Due Dates.** If a due date under this agreement falls on a Saturday, Sunday, or legal holiday, then the due date will be the next day that is not a Saturday, Sunday, or legal holiday.

17. **Governing Law.** The laws of the State of Michigan, without giving effect to its principles of conflicts of law, govern all adversarial proceedings arising out of this agreement.

18. **Entire Agreement.** This agreement constitutes the entire understanding between the parties as to the Emergency Loan and supersedes all other agreements, whether written or oral, between the parties.

19. **Non-assignment.** No party may assign any of that party's rights or delegate any of that party's obligations under this agreement without the prior written consent of the other party. Any purported assignment or delegation in breach of this section 19 will be void.

20. **End Date.** This agreement ends upon the repayment in full by the City of all amounts due under this agreement.

21. **Modification; Waiver.** No amendment to this agreement will be effective unless it is in writing and signed by the parties. Unless prohibited by Act 243, the State Treasurer may waive a provision of this agreement not relating to the payment of principal and interest on the Emergency Loan if the State Treasurer determines that the City demonstrates good cause for the waiver. No waiver of satisfaction of a condition or failure to comply with an obligation under this agreement will be effective

unless it is in writing and signed by the State Treasurer, and no such waiver will constitute a waiver of satisfaction of any other condition or failure to comply with any other obligation.

22. **Severability.** If any provision of this agreement is held to be unenforceable, then that provision is to be construed either by modifying it to the minimum extent necessary to make it enforceable (if permitted by law) or disregarding it (if not). If an unenforceable provision is modified or disregarded under this section 22, the rest of the agreement is to remain in effect as written, and the unenforceable provision is to remain as written in any circumstances other than those in which the provision is held to be unenforceable.

23. **Counterparts.** If the parties sign this agreement in several counterparts, each will be deemed an original but all counterparts together with will constitute one instrument.

The parties are signing this agreement on the date stated in the introductory clause.

CITY OF FLINT

EMERGENCY LOAN NOTE
(General Obligation Limited Tax)
FY 2014-2015 Series 1

Registered Owner:	State of Michigan
Principal Amount:	$7,000,000.00 (the "**Principal Amount**")
Date of Original Issue:	April 29, 2015 (the "**Issue Date**")

The City of Flint, a Michigan public body corporate (the "**Issuer**"), acknowledges that it owes and hereby promises to pay the State of Michigan the Principal Amount owed in 15 consecutive annual installments as detailed on schedule 1, unless prepaid as provided in this note, with interest on the unpaid principal balance of this note from the Issue Date or the later date to which interest has been paid, until paid, at the annual rates provided in this note, first payable on December 1, 2015 and biannually on each following June 1 and December 1. Both the principal of and interest on this note are payable at the office of the State Treasurer in Lansing, Michigan, or another place as designated in writing to the Issuer by the State Treasurer.

From the Date of Original Issue specified above until June 1, 2030, this note will bear interest at an annual rate of 2.09%. Interest on this note will be computed on the basis of the actual number of days elapsed in a calendar year.

This note is issued by the Emergency Manager of the Issuer under and in full compliance with Michigan law to evidence the obligation of the Issuer to repay an emergency loan made by the State of Michigan under the Emergency Municipal Loan Act, 1980 PA 243, as amended, MCL 141.931 to 141.942 ("**Act 243**") to enable the Issuer to meet its financial obligations.

The Issuer may pay at any time or times before maturity, without penalty or premium, all or any portion of this note. Prepayments will be credited to principal payments in direct order of maturity.

This note, including the interest on this note, is payable as a first budget obligation from the general funds of the Issuer, and the Issuer is required, if necessary, to levy ad valorem taxes on all taxable property in the Issuer for the payment of the obligations, subject to applicable limitations under Michigan law.

As additional security for payment of the note and if the Issuer is delinquent in paying required principal or interest under this note, the State Treasurer is authorized to withhold all delinquent amounts of principal or interest due on this note from either or both of the following:

(1) payments from the State of Michigan owed to the Issuer under the Glenn Steil State Revenue Sharing Act of 1971, 1971 PA 140, as amended, MCL 141.901 to 141.921; and

(2) the Issuer's portion of the revenue generated by the local community stabilization share tax levied under the Use Tax Act, 1937 PA 94, as amended, MCL 205.91 to 205.111, and payable by the Michigan Department of Treasury to the Local Community Stabilization Authority created under the Local Community Stabilization Authority Act, 2014 PA 86, MCL 123.1341 to 123.1362, for distribution to the Issuer and other governmental entities.

The City hereby consents to an entry of judgment against the City for unpaid amounts owed under this note and enforcement of that judgment under section 6093 of the Revised Judicature Act of 1961, 1961 PA 236, as amended, MCL 600.6093, if the City defaults on the Emergency Loan.

Until this note is paid in full, the Issuer will perform and meet all applicable requirements resulting from the receipt of an emergency loan under Act 243.

The Issuer states that all acts, conditions, and things required by law for the issuance of this note have been completed in a timely manner and that the total indebtedness of the Issuer, including this note, does not have any applicable debt limitation.

The Emergency Manager and the City Clerk are signing and the City Clerk is affixing the seal of the Issuer on the date indicated opposite the Emergency Manager's and the City Clerk's signature.

EMERGENCY LOAN NOTE
(General Obligation Limited Tax)
FY 2014-2015 Series I

Registered Owner:	State of Michigan
Principal Amount:	$7,000,000.00 (the **"Principal Amount"**)
Date of Original Issue:	April 29, 2015 (the **"Issue Date"**)

The City of Flint, a Michigan public body corporate (the **"Issuer"**), acknowledges that it owes and hereby promises to pay the State of Michigan the Principal Amount owed in 15 consecutive annual installments as detailed on schedule 1, unless prepaid as provided in this note, with interest on the unpaid principal balance of this note from the Issue Date or the later date to which interest has been paid, until paid, at the annual rates provided in this note, first payable on December 1, 2015 and biannually on each following June 1 and December 1. Both the principal of and interest on this note are payable at the office of the State Treasurer in Lansing, Michigan, or another place as designated in writing to the Issuer by the State Treasurer.

From the Date of Original Issue specified above until June 1, 2030, this note will bear interest at an annual rate of 2.09%. Interest on this note will be computed on the basis of the actual number of days elapsed in a calendar year.

This note is issued by the Emergency Manager of the Issuer under and in full compliance with Michigan law to evidence the obligation of the Issuer to repay an emergency loan made by the State of Michigan under the Emergency Municipal Loan Act, 1980 PA 243, as amended, MCL 141.931 to 141.942 (**"Act 243"**) to enable the Issuer to meet its financial obligations.

The Issuer may pay at any time or times before maturity, without penalty or premium, all or any portion of this note. Prepayments will be credited to principal payments in direct order of maturity.

April 29, 2015

City of Flint
County of Genesee
State of Michigan

We have examined the transcript of proceedings relating to the issuance by the City of Flint, County of Genesee, State of Michigan (the "City"), of a note in the principal amount of $7,000,000, designated Emergency Loan Note (General Obligation Limited Tax) 2014-15 Series I (the "Note"), for the purpose described in the Note. The Note is dated as of April 29, 2015, is payable as to principal and interest, and is subject to payment prior to maturity in the manner, at the prices and at the times specified in the Note and the Loan Agreement, as hereinafter defined. The Note was authorized by the Emergency Manager of the City (the "Emergency Manager"), on behalf of the City pursuant to resolutions executed by the Emergency Manager on April 8, 2015 and April 29, 2015 under the authority granted to the Emergency Manager pursuant to Act 436, Public Acts of Michigan, 2012, and an Order of the Local Emergency Financial Assistance Loan Board dated April 29, 2015. In connection with the issuance of the Note, the City and the Local Emergency Financial Assistance Loan Board have entered into an Emergency Loan Agreement, dated April 29, 2015 (the "Loan Agreement").

We have also examined the Note as executed.

As to questions of fact material to our opinion, we have relied on the certified proceedings and other certifications of public officials and others furnished to us.

Based upon the foregoing, we are of the opinion that, under existing law:

1. The Loan Agreement has been duly authorized and executed by the City and is a legal, valid and binding obligation of the City.

2. The Note has been duly authorized and executed by the City and is a legal, valid and binding general obligation of the City.

3. All taxable property within the boundaries of the City is subject to taxation for payment of the Note, subject to applicable constitutional, statutory and charter tax rate limitations.

The rights or remedies of noteholders and the enforceability of the Note and the Loan Agreement may be affected by bankruptcy, insolvency, fraudulent conveyance or other laws

affecting creditors' rights generally, now existing or hereafter enacted, and by the application of general principles of equity, including those relating to equitable subordination.

This opinion is given as of the date hereof and we assume no obligation to revise or supplement this opinion to reflect any facts or circumstances that may hereafter come to our attention, or any changes in law that may hereafter occur.

Very truly yours,

MILLER, CANFIELD, PADDOCK AND STONE, P.L.C.

17. LETTER FROM OFFICE OF ATTORNEY GENERAL

STATE OF MICHIGAN
DEPARTMENT OF ATTORNEY GENERAL

P.O. Box 30754
LANSING, MICHIGAN 48909

BILL SCHUETTE
ATTORNEY GENERAL

April 29, 2015

Nick A. Khouri, State Treasurer
Austin Building
430 West Allegan St.
Lansing, MI 48922

Dear Mr. Khouri:

Re: City of Flint, Genesee County, Michigan, Emergency Loan Note (General Obligation Limited Tax) 2014-15 Series I

We have caused to be examined certified copies of the proceedings (the "Closing Transcript") and other documents relating to the issuance by the City of Flint, Genesee County, Michigan, of its note designated "Emergency Loan Note (General Obligation Limited Tax) 2014-15 Series I." Said note is in the denomination of Seven Million Dollars ($7,000,000), dated April 29, 2015, bearing interest at the rate of 2.09% per annum. The accrued interest on the note shall be paid first on December 1, 2015 and semi-annually on each June 1st and December 1st thereafter. The principal balance on the note shall be paid first on June 1, 2016 and thereafter shall be paid in 15 consecutive annual installments on June 1st of the years 2016 through 2030. In the event that an installment for the principal amount or interest due on May 1st or November 1st in any year falls on a Saturday, Sunday or any day in which banks in Michigan are generally not open, such payment shall be due on the next succeeding business day. The City has the right to pay all or part of the principal and accrued interest on the note at any time prior to maturity without penalty or premium. Prepayments shall be credited to principal payments in direct order of maturity.

The documentation for this loan is consistent with and demonstrates compliance with the statutory authority for the making of this loan by the Local Emergency Financial Assistance Loan Board pursuant to the Emergency Municipal Loan Act, 1980 PA 243, as amended, MCL 141.931 *et seq*. When you are satisfied with the documents in the Closing Transcript, the loan

proceeds can be transmitted by the Department of Treasury to the City of Flint to complete the closing of this loan.

Sincerely,

Bill Schuette
Attorney General

Shenique A. Moss
Assistant Attorney General
Finance Division

18. CERTIFICATION OF FINAL TRANSCRIPT BY CITY

FINAL TRANSCRIPT CERTIFICATE OF CITY

The undersigned, being the duly qualified and elected City Clerk of the City of Flint, County of Genesee, State of Michigan, hereby certifies that:

1. The documents described and contained in the foregoing transcript relating to the issuance by the City of its Emergency Loan Note (General Obligation Limited Tax) 2014-15 Series I, dated as of the date of delivery thereof, in the principal amount of $7,000,000, insofar as the same constitute proceedings, records and other documents of the City, are true copies of the originals or certified copies thereof and have not been amended, modified or supplemented except as therein permitted and as set forth in the foregoing transcript, and remain in full force and effect without change as of the date hereof.

2. At the times of the taking of the various proceedings and execution of the various records and documents by the City, which are contained in the foregoing transcript, the persons named therein (including the undersigned) as being officers of the City were such duly designated, qualified and acting officers.

City of Flint
County of Genesee
State of Michigan

Inez M. Brown
City Clerk

Agenda for Call on BS&A Utility Billing (UB) Software Modifications

February 18, 2016

Discussion with Matt Harris, BS&A Utility Billing program manager and Ryan Klein on design, testing, and implementation issues for the customization work.

Topics to be covered by MI Treasury - Update on the legislative framework in the bill.

Topics to be covered by BS&A - Update on the development of the 3 primary program changes:

1) Creating the utility to move Pre-Ruling Balances from the Certification subscreen back to the History subscreen. (Proposal dated 02-15-16)
mostly ready – – in testing –
Issues: Managing the 1,046 payment records

2) Creating the utility to transfer back from the 2015 Summer Tax Roll the delinquent unpaid UB amounts back to the History subscreen.

   Issues: Managing the 50+ payment records
   Follow Up: Run the Export Delq. Utility Bills To Tax using Delq. Item Codes for sewer charges.

3) Create the credit generator for Utility Bills to provide the water relief, revise the billing program to assign credits, and provide for reporting and GL requirements.

   Issues: Managing the credit buckets, including the penalty buckets; design of program to be water specific in terms of applying credit bucket amounts for active accounts; risks of designing work flows where the legislation does not pair up with the BS&A code used for our anticipated program; definition on relief for Commercial accounts with residential usage (apartments, mobile home parks) and need for flexibility in routine to categorize relief buckets as "apply to accounts" versus "apply to common bucket with a defined batch number"; capacity to design for DHS stipends of $114 per customer for two years of grants; capacity to design for other assistance providers; establishing hierarchy of applying relief in credit buckets to other non-water balances.

2.18.2016

Bond payments for KWA –
We see the 2016 payment of $7 million. Is this a yearly payment? Once each year?
The copy from last Friday from the *Jones & Henry Engineers* shows a $690,000 payment for FY 2015. This does not show on the cash flow. Why?

Upcoming bond sale –
What and when? What does that do to the bond payment?

How many gallons of usage is the cash flow based on?
Is the usage number for 2017 (1.6 million) the expected final number or is there reduced payment or usage – GM water usage – in 2015 numbers (the 2017 numbers look reduced)? Will GM come back.
The cash flow takes into account the GM exit. Jody does not know about when or if they will reenter the system.

What is the contractual obligation for Detroit water? When does that end? What needs to be negotiated? Start/stop date – runs through?
GLWA payments of $1.3 million after June 2016 is speculative. There is no contract.
$12 million for FY 2016 is in escrow. The actual amount of outflows could be more or less depending on what happens with the water.
true up

Is there a cost for testing and treating water for KWA? Does not show on cash flow.

Jody,

I have a few follow up questions to our conversation that I would appreciate your assistance on when you are able.

1. Would you please give me the amortization schedule for the bond payments to KWA?

2. The report from *Jones & Henry* showed a "KWA Capital Cost" of $6.9 million in FY 2017 and 2018 which is shown on the cash flow. However, there is $690,000 for the FY 2016 that does not show or is this on a different line?

3. There is an upcoming bond sale. What does that do to your bond payment line?

4. Does the "Transfers to Debt Service Fund" line item take into account the restructuring of DWRF loans? We have a yearly amount of $1.8 million. Is that what this line is?

5. You mentioned that the testing and treating of KWA water is in the line item, *Capital Improvements*. Which line is that on your cash flow? If it is in the cash flow, do I understand you correctly that you know of no additional costs for this?

Feel free to reply or give me a call. As you know, we are looking to get these items taken care of prior to your meeting with the Treasurer tomorrow at 3:00.

Thanks for your help!

Larry,

Attached is the most recent version of the bill. The House passed it today. The Senate has already adjourned, but I would suspect they will approve it next week.

No major changes from prior versions of the language Rep. Poleski had been working on. It allows for a credit at a rate determined by the Treasurer not to exceed 65% for residential customers and 20% for commercial customers.

Time period is from April 2014 until the billing period containing the date of the expiration of the disaster declaration as described in SCR 23, which is April 14, unless a subsequent resolution is approved extending it.

HOUSE SUBSTITUTE FOR

SENATE BILL NO. 136

A bill to make, supplement, and adjust appropriations for various state departments and agencies for the fiscal year ending September 30, 2016; and to provide for the expenditure of the appropriations.

THE PEOPLE OF THE STATE OF MICHIGAN ENACT:

PART 1

LINE-ITEM APPROPRIATIONS

Sec. 101. There is appropriated for various state departments and agencies to supplement appropriations for the fiscal year ending September 30, 2016, from the following funds:

APPROPRIATION SUMMARY

GROSS APPROPRIATION	$ 30,000,000
Total interdepartmental grants and intradepartmental transfers	0

ADJUSTED GROSS APPROPRIATION	$	30,000,000
Total federal revenues		0
Total local revenues		0
Total private revenues		0
Total other state restricted revenues		0
State general fund/general purpose	$	30,000,000

Sec. 102. DEPARTMENT OF TREASURY

(1) APPROPRIATION SUMMARY

GROSS APPROPRIATION	$	30,000,000
Interdepartmental grant revenues:		
Total interdepartmental grants and intradepartmental transfers		0
ADJUSTED GROSS APPROPRIATION	$	30,000,000
Federal revenues:		
Total federal revenues		0
Special revenue funds:		
Total local revenues		0
Total private revenues		0
Total other state restricted revenues		0
State general fund/general purpose	$	30,000,000

(2) GRANTS

Flint declaration of emergency	$	30,000,000
GROSS APPROPRIATION	$	30,000,000
Appropriated from:		
State general fund/general purpose	$	30,000,000

PART 2

PROVISIONS CONCERNING APPROPRIATIONS

GENERAL SECTIONS

Sec. 201. In accordance with the provisions of section 30 of article IX of the state constitution of 1963, total state spending from state resources in this appropriation act for the fiscal year ending September 30, 2016 is $30,000,000.00 and state appropriations paid to local units of government are $0.

Sec. 202. The appropriations authorized under this act are subject to the management and budget act, 1984 PA 431, MCL 18.1101 to 18.1594.

DEPARTMENT OF TREASURY

Sec. 301. (1) From the funds appropriated in part 1 for the Flint declaration of emergency, up to $30,000,000.00 shall be allocated to reimburse the water enterprise fund of the city of Flint in an amount equal to credits posted to its customers' accounts in accordance with section 302.

(2) The department shall report quarterly to the senate and house appropriations committees, the senate and house fiscal agencies, and the state budget director on the distribution of the funds allocated pursuant to part 1.

Sec. 302. (1) There shall be no administrative charges, from any entity, removed or expended from the appropriations in part 1.

(2) There shall be no expenditures from the funds appropriated in part 1 without specific authorization by the state treasurer.

(3) All unexpended funds from the appropriations in part 1, as of September 30, 2016, shall lapse to the general fund.

(4) The credit to a water customer's account shall be equal to the following:

(a) For a residential customer, an amount determined by the state treasurer not to exceed 65% of the amount billed for water from the beginning of the billing period containing April 30, 2014 to the end of the billing period containing the date upon which the declaration of disaster, as described in Senate Concurrent Resolution No. 23 [or a successor concurrent resolution] of the 98TH Legislature, expires.

(b) For all other customers, an amount determined by the state treasurer not to exceed 20% of the amount billed for water from the beginning of the billing period containing April 30, 2014 to the end of the billing period containing the date upon which the declaration of disaster, as described in Senate Concurrent Resolution No. 23 [or a successor concurrent resolution] of the 98th Legislature, expires.

(5) Credits for sewer services are not to be reimbursed under this section or section 301.

(6) The amount of the credits calculated under subsection (4) shall reflect rates consistent with the rates paid at the time of billing.

(7) The state treasurer, or his or her designee, and the auditor general may audit transactions provided for under this section and section 301 at their discretion.

Dave Murray, Governor
(517) 335-6397

Gov. Snyder announces grants for distressed municipalities

$5.4 million awarded for service and quality of life projects

Gov. Rick Snyder will award $5.4 million to eleven municipalities to help fund various improvement projects, including water system and public safety enhancements as well as technology upgrades through the Financially Distressed Cities, Villages, and Townships (FDCVT) grant program. Snyder previously announced a $2 million award for the City of Flint.

Municipalities are eligible to apply for a FDCVT grant if they are experiencing one or more conditions indicative of "probable financial stress," as defined by Public Act 436 of 2012, the Local Financial Stability and Choice Act.

"The municipalities that applied for and have now been approved for this special funding are among those that have faced significant financial challenges in recent years," Snyder said. "These grants will go a long way to ensure these cities can improve the public services their residents expect and deserve."

Under the grant program, funding may be used to pay for specific projects, services, or strategies that move a city, village, or township toward financial stability. There was $5 million appropriated for the program with a $400,000 carryover from the previous fiscal year. The FDCVT program has a $2 million cap, per local unit.

The following communities will receive funding this year, with projects and amounts noted (alphabetical order):

Local Unit	Project Description	Amount
City of Allen Park	Provide an emergency generator for public safety.	$270,187
City of Benton Harbor	Public safety enhancement through replacement and upgrade of police camera system.	$25,000
City of Benton Harbor	Water system enhancement through water main replacements.	$400,000
City of Ecorse	Public safety enhancement through police body cameras.	$30,000
City of Flint	Water system enhancement through reconnection to Detroit Water and Sewer Department.	$2,000,000

City of Hamtramck	Public safety enhancement through replacement and upgrade of police camera system.	$90,000
City of Highland Park	Water system enhancement through maintenance to water system.	$1,505,000
City of Inkster	Public safety enhancement through deployment of a community relations police officer.	$244,968
City of Inkster	Public safety enhancement through replacement and upgrade of police and fire radios.	$318,993
City of Inkster	Public safety enhancement through fleet replacement of police vehicles.	$218,367
City of Lincoln Park	Public safety enhancement through replacement and upgrade of fire technology.	$21,000
City of Melvindale	Public safety enhancement through fleet replacement of police vehicles and replacement and upgrade of technology.	$94,800
City of River Rouge	Public safety enhancement of dispatch and jail services.	$171,833
City of Wayne	Public safety enhancement through fleet replacement of police vehicle.	$25,389

All appropriated funding has been spent. No future rounds will occur in FY 2016.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON D C 20460

THE ADMINISTRATOR

The Honorable Rick Snyder
Governor of Michigan
P.O Box 30013
Lansing, Michigan 48909

Dear Governor Snyder:

Thank you for your time today to talk about our shared concerns for the people of Flint. As we discussed, today I am issuing an Order, pursuant to Section 1431 of the Safe Drinking Water Act, directing the Michigan Department of Environmental Quality and the City of Flint to take immediate action to address serious and ongoing concerns with the safety of Flint's drinking water system. The U.S. Environmental Protection Agency is deeply concerned by continuing delays and lack of transparency and has determined that the actions required by the Order – the key elements of which are summarized below – are essential to ensuring the safe operation of Flint's drinking water system and the protection of public health. The Order, which has been transmitted separately, directs that the state notify the EPA in writing within one day of its intent to comply. Recognizing that you have made changes to the leadership at MDEQ, it is imperative that our respective teams set up a meeting no later than next week to begin the work that is before the state, the city and the EPA.

The EPA and other federal agencies are working closely with the state and city to address the public health emergency that is now unfolding as a result of the failure to properly operate Flint's system, leading to multiple health-based drinking water violations and unsafe lead levels in the city's drinking water. As part of these efforts, this past October the EPA established the Flint Safe Drinking Water Task Force (the "EPA Task Force"), composed of EPA scientists who are recognized experts in the field of corrosion control in drinking water systems. The EPA Task Force has provided written recommendations to the city and MDEQ, clearly addressing specific steps needed to re-optimize corrosion control, as well those needed to ensure that the system maintains optimal corrosion control throughout the transition of Flint's water supply from the Great Lakes Water Authority (Detroit) to the Karegnondi Water Authority (KWA) that the city is planning for the summer of 2016. These recommendations have been publicly posted at http://www.epa.gov/mi/flint-drinking-water-documents.

As you and I discussed, some progress has been made in addressing these recommendations; but there continues to be inadequate transparency and accountability with regard to provision of test results and actions taken and those are critical for the people of Flint. In addition, there is an increasing concern about capacity to carry out the recommended actions and to safely manage Flint's drinking water system – especially in the context of the intended transition to KWA water in summer 2016. The EPA Task Force, the city, and the state have had to devote substantial effort to issues related to the planned

Recycled/Recyclable

transition from treated water purchased from Detroit to untreated water from KWA. That transition presents complex technical and managerial challenges, above and beyond those related to the immediate need to reduce lead levels in Flint's drinking water, that have serious implications for drinking water safety and public health. Finally, it must be recognized that the EPA Task Force's expertise and technical advisory role are narrowly focused on corrosion control, and that there is a much broader set of issues that must be addressed to ensure the safety of drinking water provided by the Flint system.

For these reasons, the EPA's Order requires the state and the city to take a number of actions, summarized below, to ensure that Flint's drinking water system is re-optimized for corrosion control, that the city establishes the capacity to safely and effectively operate its drinking water system, and that there is public transparency and accountability with regard to these actions:

1. Promptly provide the EPA and the public with official, public and timely responses to the recommendations of the EPA Task Force, including status and plans with regard to implementation of recommended actions

2. Fully implement the EPA Task Force's recommendations with regard to lead sampling; promptly and continuously share the results of all lead sampling and other relevant Flint drinking water data with the EPA and the public, with proper protections for personally identifiable information; and cooperate with the independent EPA sampling effort described below.

3. Ensure, including through the provision of state resources as necessary, that the city has the full complement of qualified professionals needed to safely operate Flint's drinking water system.

4. Obtain, through a publicly transparent process and with the support of state resources as necessary, advice from independent, nationally-recognized experts on drinking water treatment, sampling, and distribution system operation – in order to ensure safe and effective management of that system and to restore public confidence.

5. Prior to implementing any transition to KWA water, make an affirmative determination, with appropriate expert advice and an opportunity for public input, that the city has the technical, managerial, and financial capacity to safely and effectively operate its drinking water system, and that all necessary infrastructure upgrades, analysis, and testing have been completed, in order to ensure a safe transition to KWA.

To help ensure transparency and accountability, the EPA will work with the city in the near term to oversee and participate in the collection of Lead and Copper Rule drinking water samples by Flint residents, will have these samples analyzed in a certified laboratory, and will provide this data to the public, with appropriate protections for personally identifiable information. Further, the EPA will conduct additional, sequential sampling at locations throughout the distribution system, which will be used to further inform the treatment optimization process. The EPA underscores that the state and city ultimately will need to work with independent recognized experts to undertake a broader effort to fully assess and verify the safety of Flint's drinking water system-wide.

Flint Drinking Water Task Force (FTF 15-5)

Task Force Recommendations Regarding Flint Drinking Water Treatment Performance Evaluation

For protection of public health, Flint must avoid significant distribution system issues similar to those experienced following the source water switch to the Flint River and subsequent operation of Flint's water treatment plant.

The EPA Flint Safe Drinking Water Task Force recommends that Flint develop and implement a Performance Assessment Plan prior to distribution of water from the Karegnondi Water Authority (KWA) source. The plan must address how the treatment plant will be brought on-line, and how finished drinking water will be introduced to the distribution system. This plan is particularly important given the City has no experience treating the KWA-supplied water, and is operating a distribution system that is still recovering from the past upset.

Flint should work with its consultant and MDEQ to establish objective water quality and plant performance criteria. The plan must include operation of Flint's drinking water treatment plant for a reasonable period of time to treat KWA-supplied water until:

(1) the treated water meets finished water quality goals;
(2) the finished water quality is consistently maintained;
(3) potential plant operational and mechanical start-up issues are identified and addressed; and
(4) water plant operations staff are proficient in treating the new source.

KWA water should not be distributed to the public until these conditions are satisfied.

During this performance evaluation period, Flint must distribute to the public water from an alternate source. As water is already received from Detroit (Great Lakes Water Authority), that is an obvious and appropriate choice for that interim period. The length of the performance evaluation period will be dependent on the amount of time it takes for the treatment plant to consistently and reliably meet the performance criteria.

Because of similarities in source water and in treatment processes with Detroit's Huron plant, the Flint water plant will likely be configured to produce treated water with similar quality to that of the water currently being received from Detroit. Continued use of Detroit water during the performance evaluation period will minimize the risk of distribution system upsets.

We encourage Flint and the City's consultant to perform a number of assessments prior to the completion of the KWA pipeline and availability of the Lake Huron source water to expedite the plant transition period. For example, the planned bench-scale jar tests will be helpful in establishing full-scale treatment plant operating parameters. Assessment of corrosion control treatment using Detroit source water with lead pipe loop rigs in advance of switching to the KWA source may also be transferrable to the KWA source water. Pipe loops rigs operated during the performance assessment period will help predict whether lead release will be an issue when the new plant goes on line. EPA will work with the City to set up pipe loops at the Flint treatment plant.

The steps outlined above are essential to fulfill our shared interest in the protection of public health against further harm from drinking water contamination, and to restoring public confidence that the ongoing drinking water crisis will be promptly and fully remedied. I expect to receive prompt written notice of the state's intention to promptly and fully comply with the requirements of the Order.

Sincerely,

Gina McCarthy

cc: The Honorable Karen Weaver
Mayor of Flint

Notes on Executive Order 2016-01
Creating the Flint Water Interagency Coordinating Committee

1 Purpose of the FWICC

The first section of Executive Order 2016-01 explains that the goal of the FWICC is to facilitate collaboration and communication between state departments, local governments, and subject matter experts to (1) ensure safe drinking water and (2) address the consequences of elevated lead levels in drinking water. Three key "whereas" clauses are highlighted below:

> WHEREAS, multiple state departments and local authorities share the responsibility for ensuring safe drinking water and the coordination of efforts to address the consequences resulting from the presence of elevated lead levels in drinking water; and
>
> WHEREAS, ensuring safe drinking water and addressing the consequences of elevated lead levels in drinking water will require collaboration and communication between state departments, local governments, and subject matter experts; and
>
> WHEREAS, the establishment of a Flint Water Interagency Coordinating Committee within the Michigan Department of State Police will facilitate the collaboration and communication between state departments, local governments, and subject matter experts necessary to effectively coordinate a response and recovery effort;

2. Administrative Location of the FWICC

Under the Michigan law, executive functions generally must occur within one of the principal departments of the executive branch. Accordingly, the FWICC was created within the Department of State Police (MSP). All administrative matters like budget and staffing fall under the MSP umbrella. Colonel Kriste Etue is the department director of MSP.

> I. A. The Flint Water Interagency Coordinating Committee ("Coordinating Committee") is created as an advisory body within the Michigan Department of State Police (the "Department").
>
> ****
>
> III. A. The Coordinating Committee shall be staffed and assisted by personnel from the Department as directed by the Department Director. Any budgeting, procurement, and related management functions of the Coordinating Committee shall be performed under the direction and supervision of the Department Director.

An advisory committee does not make policy; rather, it provides advice to policy makers. As such, the committee is not subject to the specific statutory requirements Open Meetings Act. This gives the committee maximum flexibility to hold meetings in private or in public as the committee decides. This also gives FWICC flexibility to allow all or some participants to join meetings by telephone or send votes by email, as you decide to be appropriate.

3. Composition of the FWICC & Length of Terms

Section I of the Executive Order addresses the composition of the committee. The FWICC consists of seven state government officials (Office of Urban Initiatives, EMHS, DEQ, DHHS, LARA, Treasury and MDE), seven local officials (selected by the Mayor and the county commission), and three subject matter experts. The initial terms of service end on 12/31/18, the last full day of the Governor's term.

Directors may send a designee to attend and vote at meetings. It generally works best if the designee is the same person each time, but that is not a strict requirement.

Executive orders carry over from one administration to the next unless they are rescinded or amended. The next Governor will have the option of keeping the FWICC in place and making new appointments. Your appointment will last as long as you remain eligible or until a new person is appointed after the expiration of your term. You may be appointed to successive terms. The FWICC will exist until a Governor decides that the FWICC should be terminated.

I. C. A vacancy on the Coordinating Committee occurring other than by expiration of a term shall be filled in the same manner as the original appointment for the balance of the unexpired term. A member may continue serving until his or her successor is appointed. A member may serve successive terms if reappointed

4. Charge to FWICC

Section II of the Executive Order lays out the responsibilities of the FWICC:

1. Create an incident action plan designed to assist state and local authorities in ensuring safe drinking water for the residents of the City of Flint and addressing the consequences of elevated lead levels in drinking water.
2. Review recommendations made by the Flint Water Advisory Task Force and propose statutory, regulatory, or contractual actions necessary for implementation of such recommendations.
3. Identify staff with competencies in emergency planning, operations, logistics, and finance as outlined under the National Incident Management System (NIMS) to work with the Coordinating Committee to track resource requests and document progress on the incident action plan.
4. Establish a standard process for sharing pertinent information between all members including use of the NIMS and Unified/Incident Command as appropriate.
5. Establish routine communications protocols at the local, executive, and legislative levels as appropriate.
6. Establish a public information protocol to effectively inform the community.
7. Make recommendations for acceptable standards for potable water.

8. Make recommendations regarding the health impacts for the affected population.

9. Assess the status of infrastructure and determine feasible actions to upgrade the water system.

10. Establish subcommittees among its members to specifically address, at a minimum, each of the three following topic areas: Water Quality, Community Health, and Education.

11 Assist the Governor and the Department in implementing appropriate operations permitted under the Michigan Emergency Management Act or the federal Stafford Disaster Relief and Emergency Assistance Act, including local emergency operations plans and guides

12. Explore any avenues of funding for response and recovery efforts including federal grants, legislative appropriations, and private partners.

Highlights include: Creating an incident action plan, reviewing recommendations of the Flint Water Advisory Task Force, working with EMHS on the emergency response, facilitating communication within and outside of government, forming at least three subcommittees (Water Quality, Community Health, and Education), making various recommendations to the Governor based on the knowledge and expertise of the FWICC, and exploring funding options.

Not all of these tasks are not the *sole* responsibility of the FWICC. A number of the state and local offices that are part of the FWICC also share responsibility. The FWICC will help to ensure that the various responsible bodies at the state and local level are collaborating and communicating with each other.

5. Operations of the FWICC

Section III of the Executive Order addresses how the FWICC will operate. It is designed to give the FWICC maximum flexibility.

As Statewide Coordinators, Harvey Hollins and Captain Kelenske will be responsible for running the meetings and ensuring that the FWICC completes its required functions:

III. B. The Director of Office of Urban Initiatives within the Executive Office of the Governor and the Deputy State Director of Emergency Management and Homeland Security shall together serve as the Statewide Coordinators responsible for the administrative functions of the Coordinating Committee.

****

III. E. The Coordinating Committee shall meet at the call of either of the Statewide Coordinators and as may be provided in procedures adopted by the Coordinating Committee.

The FWICC has a great deal of freedom to consult with or work with outside experts, members of the public, and government officials:

> **III. C.** The Coordinating Committee may utilize subcommittees and advisory panels composed of its members to assist in completing the functions of the Coordinating Committee. The Coordinating Committee may request public participation on advisory panels as the Coordinating Committee deems necessary.
>
> ****
>
> **III. F.** The Coordinating Committee may, as appropriate to perform its duties, make inquiries, conduct studies, consult with outside experts and federal agencies, and receive comments from the public.
>
> ****
>
> **III. H.** The Coordinating Committee may accept donations of labor, services, or other items of value from any public or private agency or person. Any donations shall be expended in accordance with applicable laws, rules, and procedures.
>
> ****
>
> **IV. A.** All departments, committees, commissioners, or officers of this state or of any political subdivision of this state may give to the Coordinating Committee, or to any member or representative of the Coordinating Committee, any necessary assistance required by the Coordinating Committee, or any member or representative of the Coordinating Committee, in the performance of the duties of the Coordinating Committee so far as is compatible with its, his or her duties.

Any recommendations to the Governor must be supported by a majority of currently serving FWICC members:

> **III. D.** When making recommendations to the Governor, a majority of the serving members of the Coordinating Committee must concur.

Committee members are not compensated but may be reimbursed for travel expenses (e.g., mileage and parking) according to the normal state expense rules. These reimbursements would occur through MSP, which houses the FWICC.

> **III. G.** Members of the Coordinating Committee shall serve without compensation but may receive reimbursement for necessary travel and expenses according to relevant statutes and the rules and procedures of the Civil Service Commission, and the Department of Technology, Management and Budget, subject to available funding.

Any media inquiries, legislative inquiries, and legal inquiries should be handled through MSP. If the FWICC needs legal representation or assistance, it would be provided by an assistant attorney general through MSP:

> III. I. Members of the Coordinating Committee shall refer all legal, legislative, and media contacts to the Department.

6. The Freedom of Information Act

The FWICC is a "public body" within the department of state police in the executive branch. Accordingly it is subject to FOIA. For purposes of clarity, this is spelled out in the Executive Order:

> III. J. A writing prepared, owned, used, in the possession of, or retained by the Coordinating Committee in the performance of an official function is subject to the Freedom of Information Act, 1976 PA 442, as amended, MCL 15.231 to 15.246

Any FOIA requests to FWICC should be referred to the FOIA coordinator for MSP, who will work with you to handle the response.

Michigan's FOIA law covers the public records of public bodies (such as MSP and the FWICC).

A "public record" means "a writing prepared, owned, used, in the possession of, or retained by a public body in the performance of an official function, from the time it is created. Public record does not include computer software." The definition of "writing" is very broad, including any "means of recording or retaining meaningful content."

In short, this means that your notes taken at FWICC meetings, e-mails between FWICC members about FWICC business, and any documents created or used by FWICC are subject to FOIA and could be released to the media. There are a number of exemptions to FOIA. These are listed at MCL 15.243, and include—among other things—personal information and information that is subject to a legal privilege like that attorney-client privilege.

Gov. Rick Snyder: Swift Senate approval of $30 million for water bills shows strong commitment to Flint residents

If approved by House, supplemental funding for Flint totals $67.3 this fiscal year

Thursday, Feb 4, 2016

LANSING, Mich. – The proposal announced yesterday by Gov. Rick Snyder to aid the city of Flint with credits to be applied to the portion of residents' water and sewer bills for water used for drinking, bathing and cooking is one step closer to enactment after the state Senate voted unanimously today for passage of the $30 million dollar funding request.

"We want to provide relief to Flint residents who were paying for water they could not drink," Snyder said. "The entire state continues to demonstrate unity in coming together for the residents of Flint, and I greatly appreciate the acts of cooperation, bipartisanship and good will that are advancing Flint's recovery."

If approved by both chambers and signed into law, the Consumption and Consumer Use Credit would aid the city of Flint in applying these credits to residents' water portion of their water and sewer bills until state and federal officials certify the water is safe to consume. Under the plan, the city would credit residential bills going back to April 2014 for water used for drinking, bathing and cooking - about 65 percent of the water portion of residential water and sewer bills. Residents would still be responsible for covering sewer costs as well as water not used for consumption - such as flushing toilets, hot water boilers and outside water use.

Last Friday, Snyder signed a supplemental budget bill for Flint for $28 million to supply free bottled water, faucet filters, and testing kits for Flint residents, put nurses in local schools to monitor student health and well-being, provide better nutrition for students and infants through WIC and in-school nutrition programs and fund other health care and follow-up services for children with high lead levels.

The $28 million is in addition to $9.3 million appropriated in Oct. 2015 to move back to Detroit's water system, test drinking water and provide wraparound services for children. If this $30 million is approved by the House, state funding for Flint's water crisis for this Fiscal Year will total $67.3 million.

The supplemental spending now heads to the House for consideration, where it will be held for 5 days according to the Constitution before it can be voted on.

Book-Entry-Only

In the opinion of Miller, Canfield, Paddock and Stone, P.L.C., Bond Counsel, under existing law, assuming compliance with certain covenants by the Issuer, the interest on the Bonds is excludable from gross income for federal income tax purposes and the Bonds and the interest thereon are exempt from all taxation by the State of Michigan or by any taxing authority within the State of Michigan, except inheritance and estate taxes and taxes on gains realized from the sale, payment or other disposition thereof. See "TAX MATTERS" and "FORM OF APPROVING OPINION" herein for a description of certain provisions of the Internal Revenue Code of 1986, as amended (the "Code"), which may affect the tax treatment of interest on the Bonds for certain Bondholders

COUNTY OF GENESEE
STATE OF MICHIGAN
$35,000,000
WATER SUPPLY SYSTEM REVENUE BONDS
(LIMITED TAX GENERAL OBLIGATION)
SERIES 2013

Dated: Date of Delivery **Principal Due: November 1, as shown on Inside Cover Page**

The Water Supply System Revenue Bonds (Limited Tax General Obligation), Series 2013 (the "Bonds") are issued under the provisions of Act 94, Public Acts of Michigan, 1933, as amended, Act 342, Public Acts of Michigan, 1939, as amended, and Ordinance Nos. 03-03, 03-05, 06-06, 12-03 and 13-01 (collectively, the "Ordinances") duly adopted by the County of Genesee, State of Michigan (the "Issuer") The Bonds are being issued for the purpose of paying a portion of the cost of acquiring and constructing improvements to the Issuer's Water Supply System (the "System") The Bonds are payable primarily from the Net Revenues (as hereinafter defined) of the System, and are secured by a statutory first lien on the Net Revenues established by said Ordinances on a parity basis with certain Outstanding Bonds (as hereinafter defined) The Issuer has covenanted and agreed to fix and maintain at all times while any of the Bonds are outstanding, such rates for service furnished by the System as shall be sufficient to provide for payment of the necessary expenses of operation, maintenance and administration of the System, of the principal of and interest on all of the Bonds and the Outstanding Bonds when due, and to provide for such other expenditures and funds for the System as are required by the Ordinances.

As additional security for the payment of the principal of and interest on the Bonds, the Issuer has irrevocably pledged its full faith and credit for the prompt payment of the principal of and interest on the Bonds. Should the Net Revenues of the System at any time be insufficient to pay the principal of and interest on the Bonds when due, then the Issuer shall pay the amount of the insufficiency from its general funds as a first budget obligation The Issuer is obligated, to the extent necessary, to levy ad valorem taxes on all taxable property in the boundaries of the Issuer for such purpose, subject to applicable constitutional and statutory limitations as to rate and amount.

The scheduled payment of principal of and interest on the Bonds when due will be guaranteed under a municipal bond insurance policy to be issued concurrently with the delivery of the Bonds by **BUILD AMERICA MUTUAL ASSURANCE COMPANY.**

The Bonds are issuable only as fully registered Bonds without coupons, and when issued, will be registered in the name of Cede & Co., as Bondholder and nominee for The Depository Trust Company ("DTC"), New York, New York. DTC will act as securities depository for the Bonds Purchases of beneficial interests in the Bonds will be made in book-entry only form, in the denominations of $5,000 or any integral multiple thereof Purchasers will not receive certificates representing their beneficial interest in Bonds purchased. So long as Cede & Co. is the Bondholder, as nominee of DTC, references herein to the Bondholders or registered owners shall mean Cede & Co., as aforesaid, and shall not mean the Beneficial Owners of the Bonds. See *BOOK-ENTRY ONLY SYSTEM* herein.

Interest on the Bonds will be payable semiannually on May 1 and November 1 of each year commencing on May 1, 2014 The Bonds will be registered Bonds, of the denomination of $5,000 or multiples thereof not exceeding for each maturity the principal amount of such maturity The principal and interest shall be payable at the corporate trust office of The Huntington National Bank, Grand Rapids, Michigan or such other transfer agent as the Issuer may hereafter designate by notice mailed to the registered owner not less than sixty (60) days prior to any change in interest payment date (the "Transfer Agent"). Interest shall be paid when due by check mailed to the registered owner as shown by the registration books as of the fifteenth day of the month preceding the payment date for each interest payment. Payment of principal and interest to Beneficial Owners shall be made as described in *BOOK-ENTRY ONLY SYSTEM* herein.

The Bonds are subject to redemption at par, as described herein.

The Bonds are offered when, as and if issued by the Issuer and subject to receipt of the approving opinion of Miller, Canfield, Paddock and Stone, P.L.C., Detroit, Michigan, Bond Counsel. Certain legal matters will be passed upon for the Underwriters by their counsel, Dickinson Wright PLLC, Troy and Lansing, Michigan. It is expected that delivery of the Bonds will be made in New York, New York on or about October 3, 2013.

THIS COVER PAGE CONTAINS CERTAIN INFORMATION FOR QUICK REFERENCE ONLY. IT IS NOT A SUMMARY OF THIS ISSUE. INVESTORS MUST READ THE ENTIRE OFFICIAL STATEMENT TO OBTAIN INFORMATION ESSENTIAL TO THE MAKING OF AN INFORMED INVESTMENT.

TRANSFER AGENT ..... *The Huntington National Bank*

BOND COUNSEL ..... *Miller, Canfield, Paddock and Stone, P.L.C.*

FINANCIAL ADVISOR ..... *Stauder, BARCH & ASSOCIATES, Inc.*

No dealer, broker, salesman or other person has been authorized by the Issuer to give any information or to make any representations, other than those contained in this Official Statement, and, if given or made, such other information or representations must not be relied upon as having been authorized by any of the foregoing. This Official Statement does not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the Bonds by any person in any jurisdiction in which it is unlawful for such person to make such offer, solicitation or sale. The information set forth in this Official Statement has been obtained from the Issuer and other sources which are believed to be reliable, including The Depository Trust Company with respect to the information contained under the heading BOOK-ENTRY ONLY SYSTEM, but is not guaranteed as to accuracy or completeness by, and is not to be construed as a representation by, the Issuer. The information and expressions of opinion in this Official Statement are subject to change without notice, and neither the delivery of this Official Statement nor any sale made under this Official Statement shall, under any circumstances, create any implication that there has been no change in the affairs of the parties referred to above or that the other information or opinions are correct as of any time subsequent to the date of this Official Statement. The Transfer Agent has not participated in the preparation of this Official Statement and assumes no responsibility for it.

The Underwriters have provided the following sentence for inclusion in this Official Statement. The Underwriters have reviewed the information in this Official Statement in accordance with, and as part of, their respective responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriters do not guarantee the accuracy or completeness of such information.

Build America Mutual Assurance Company ("BAM") makes no representation regarding the Bonds or the advisability of investing in the Bonds. In addition, BAM has not independently verified, makes no representation regarding, and does not accept any responsibility for the accuracy or completeness of this Official Statement or any information or disclosure contained herein, or omitted herefrom, other than with respect to the accuracy of the information regarding BAM, supplied by BAM and presented under the heading "BOND INSURANCE" and in Appendix H, "SPECIMEN MUNICIPAL BOND INSURANCE POLICY."

IN MAKING AN INVESTMENT DECISION INVESTORS MUST RELY ON THEIR OWN EXAMINATION OF THE ISSUER AND THE TERMS OF THE OFFERING, INCLUDING THE MERITS AND RISKS INVOLVED. THESE SECURITIES HAVE NOT BEEN RECOMMENDED BY ANY FEDERAL OR STATE SECURITIES COMMISSION OR REGULATORY ISSUER. FURTHERMORE, THE FOREGOING AUTHORITIES HAVE NOT CONFIRMED THE ACCURACY OR DETERMINED THE ADEQUACY OF THIS DOCUMENT. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

IN CONNECTION WITH THIS OFFERING, THE UNDERWRITERS MAY OVER-ALLOT OR EFFECT TRANSACTIONS WHICH STABILIZE OR MAINTAIN THE MARKET PRICE OF THE BONDS AT A LEVEL ABOVE THOSE WHICH MIGHT OTHERWISE PREVAIL IN THE OPEN MARKET. SUCH STABILIZING, IF COMMENCED, MAY BE DISCONTINUED AT ANY TIME.

This Official Statement contains forward-looking statements, which can be identified by the use of the future tense or other forward-looking terms such as "may," "intend," "will," "expect," "anticipate," "plan," "management believes," "estimate," "continue," "should," "strategy," or "position" or the negatives of those terms or other variations of them or by comparable terminology. In particular, any statements express or implied, concerning future receipts of federal grants or the ability to generate cash flow to service indebtedness are forward-looking statements. Investors are cautioned that reliance on any of those forward-looking statements involves risks and uncertainties and that, although the Issuer's management believes that the assumptions on which those forward-looking statements are based are reasonable, any of those assumptions could prove to be inaccurate. As a result, the forward-looking statements based on those assumptions also could be incorrect, and actual results may differ materially from any results indicated or suggested by those assumptions. In light of these and other uncertainties, the inclusion of a forward-looking statement in this Official Statement should not be regarded as a representation by the Issuer or that its plans and objectives will be achieved. All forward-looking statements are expressly qualified by the cautionary statements contained in this paragraph. The Issuer undertakes no duty to update any forward-looking statements.

OFFICIAL STATEMENT

COUNTY OF GENESEE
STATE OF MICHIGAN
$35,000,000
WATER SUPPLY SYSTEM REVENUE BONDS
(LIMITED TAX GENERAL OBLIGATION)
SERIES 2013

The purpose of this Official Statement, which includes the cover page and Appendices, is to furnish information in connection with the issuance and sale by the County of Genesee, State of Michigan (the "Issuer") of its Water Supply System Revenue Bonds (Limited Tax General Obligation), Series 2013 (the "Bonds") in the aggregate principal amount of $35,000,000.

PURPOSE AND SECURITY

Pledge of Revenues

The Bonds are issued under the provisions of Act 94, Public Acts of Michigan, 1933, as amended, Act 342, Public Acts of Michigan, 1939, as amended ("Act 342"), and Ordinance Nos. 03-03, 03-05, 06-06, 12-03 and 13-01 (collectively, the "Ordinances") duly adopted by the Issuer. The Bonds are being issued for the purpose of paying a portion of the cost of acquiring and constructing improvements to the Issuer's Water Supply System (the "System") consisting of acquiring land adjacent to Lake Huron in Sanilac County, Michigan and constructing thereon an intake facility in the County of Sanilac (collectively, the "Project"). The Issuer intends for the Project to be made available to and used by the Karegnondi Water Authority ("KWA") as part of the water supply system to be established by KWA (the "KWA System") for the benefit of its member communities. KWA was incorporated in October, 2010 pursuant to Act 233, Public Acts of Michigan, 1955, as amended, by the Issuer, the County of Lapeer, the County of Sanilac, the City of Flint and the City of Lapeer. For a description of the proposed KWA System, see the heading KAREGNONDI WATER AUTHORITY herein.

The principal of and interest on the Bonds are payable primarily from the revenues of the System, after provision has been made for the reasonable and necessary expenses of administration, operation and maintenance of the System (the "Net Revenues"), and a statutory first lien on the Net Revenues is established by the Ordinances. The Bonds are equally secured and on a parity basis in all respects as to the Net Revenues of the System with the Issuer's outstanding Water Supply System Revenue Bonds (Limited Tax General Obligation), Series 2003, Water Supply System Revenue Bonds (Limited Tax General Obligation), Series 2003B, Water Supply System Revenue Bonds (Limited Tax General Obligation), Series 2004 and Water Supply System Revenue Bonds (Limited Tax General Obligation), Series 2007 (collectively, the "Outstanding Bonds").

Rate Covenant

The Issuer has covenanted and agreed to fix and maintain at all times while any of the Bonds are outstanding, such rates for service furnished by the System as shall be sufficient to provide for payment of the expenses of administration and operation of the System and such expenses for

maintenance of the System as are necessary to preserve the System in good repair and working order. In addition, the Issuer has covenanted and agreed to fix and maintain rates so that there shall be produced in each fiscal year Net Revenues in an amount not less than the aggregate principal and interest coming due on the Bonds and the Outstanding Bonds in each fiscal year.

No Bond Reserve Account

The Issuer has not established and will not maintain a bond reserve account to secure payment of the Bonds and the Outstanding Bonds.

Additional Bonds

The Issuer has reserved the right to issue additional bonds of equal standing and priority of lien as to the Net Revenues with the Bonds and the Outstanding Bonds, but only for the purposes and subject to the terms and conditions set forth in Section 20 of Ordinance No. 03-03, a copy of which is included in APPENDIX G.

System Information; Funds and Accounts

For a description of the System and certain statistical and summary financial information related to the operation of the System, see the heading GENESEE COUNTY MUNICIPAL WATER SYSTEM herein and APPENDIX C hereto. For a complete description of the funds and accounts of the System and the flow of funds, reference is made to the Ordinances attached hereto as APPENDIX G.

Pledge of Issuer Full Faith and Credit

As additional security for the payment of the principal of and interest on the Bonds, the Issuer has irrevocably pledged its full faith and credit for the prompt payment of the principal of and interest on the Bonds. Should the Net Revenues of the System at any time be insufficient to pay the principal of and interest on the Bonds when due, then the Issuer shall pay the amount of the insufficiency from its general funds as a first budget obligation. The Issuer is obligated, to the extent necessary, to levy ad valorem taxes on all taxable property in the boundaries of the Issuer for such purpose, subject to applicable constitutional and statutory limitations as to rate and amount.

The rights or remedies of bondholders may be affected by bankruptcy, insolvency, fraudulent conveyance or other laws affecting creditors' rights generally, now existing or hereafter enacted, and by the application of general principles of equity, including those relating to equitable subordination.

For additional information on the Issuer, see APPENDIX A and APPENDIX C hereto.

THE PROJECT

The Project consists of water supply system improvements involving the acquisition of a parcel of land adjacent to Lake Huron in Sanilac County and the acquisition and construction thereon of a raw water intake facility. The Issuer intends for the Project to be made available to and used by KWA as part of the KWA System for the benefit of its member communities.

ESTIMATED SOURCES AND USES OF FUNDS

Sources of Funds

Par amount of Bonds	$35,000,000
Net Original Issue Premium/Discount	657,341
Total Sources	$35,657,341

Use of Funds

Deposit to Construction Fund	$35,118,672
Costs of Issuance (including Insurance Premium)	355,687
Underwriters' Discount	182,982
Total Uses	$35,657,341

THE BONDS

The Bonds will be dated the date of delivery thereof, will bear interest at the rates and will mature in the amounts and on the dates set forth on the inside cover page of this Official Statement and will be subject to redemption prior to maturity as described below.

The Bonds will be issued as fully registered Bonds as described in APPENDIX F, BOOK-ENTRY-ONLY SYSTEM. Subject to the provisions for the book-entry system, the principal of and any redemption premium on the Bonds will be payable upon surrender thereof at the designated office of the Transfer Agent, and interest will be payable by check or draft mailed by the Transfer Agent to the registered owners of the Bonds as shown on the registration books of the Issuer maintained by the Transfer Agent as of the close of business on the fifteenth day of the calendar month preceding the month in which the interest payment is due. The Transfer Agent also may pay interest on Bonds by wire transfer or such other method as is acceptable to the Transfer Agent and the Bondholder to whom payment is being made.

PRIOR REDEMPTION OF BONDS

Optional Redemption

Bonds maturing in the years 2014 to 2022, inclusive, shall not be subject to redemption prior to maturity. Bonds or portions of Bonds in multiples of $5,000 maturing in the year 2023 and thereafter shall be subject to redemption prior to maturity, at the option of the Issuer, in any order of maturity and by lot within any maturity, on any date on or after May 1, 2023, at par and accrued interest to the date fixed for redemption.

Mandatory Redemption of Term Bonds

The Bonds maturing in the year 2038 (the "Term Bonds") shall be subject to annual mandatory redemption on November 1 of the following years and in the following amounts, at par, plus accrued interest to the date of mandatory redemption.

Redemption Dates	Principal Amounts
November 1, 2034	$1,945,000
November 1, 2035	$2,050,000
November 1, 2036	$2,160,000
November 1, 2037	$2.275.000
November 1, 2038 (Maturity)	$2,400,000
TOTAL	$10,830,000

When Term Bonds are purchased by the Issuer and delivered to the Transfer Agent for cancellation or are redeemed in a manner other than by mandatory redemption, the principal amount of Term Bonds affected shall be reduced by the principal amount of the Term Bonds so purchased or redeemed in the order determined by the Issuer.

In case less than the full amount of an outstanding Bond is called for redemption, the Transfer Agent, upon presentation of the Bond called for redemption, shall register, authenticate and deliver to the registered owner of record a new Bond in the principal amount of the portion of the original Bond not called for redemption.

Notice of redemption shall be given to the registered owner of any Bond or portion thereof called for redemption by mailing of such notice not less than thirty (30) days prior to the date fixed for redemption to the registered address of the registered owner of record. A Bond or portion thereof so called for redemption shall not bear interest after the date fixed for redemption, whether presented for redemption or not, provided funds are on hand with the Transfer Agent to redeem said Bond or portion thereof.

BOND INSURANCE

Bond Insurance Policy

Concurrently with the issuance of the Bonds, Build America Mutual Assurance Company ("BAM") will issue its Municipal Bond Insurance Policy for the Bonds (the "Policy"). The Policy guarantees the scheduled payment of principal of and interest on the Bonds when due as set forth in the form of the Policy included as Appendix H to this Official Statement.

The Policy is not covered by any insurance security or guaranty fund established under New York, California, Connecticut or Florida insurance law.

Build America Mutual Assurance Company

BAM is a New York domiciled mutual insurance corporation. BAM provides credit enhancement products solely to issuers in the U.S. public finance markets. BAM will only insure obligations of states, political subdivisions, integral parts of states or political subdivisions or entities

otherwise eligible for the exclusion of income under section 115 of the U.S. Internal Revenue Code of 1986, as amended. No member of BAM is liable for the obligations of BAM.

The address of the principal executive offices of BAM is: 1 World Financial Center, 27th Floor, 200 Liberty Street, New York, New York 10281, its telephone number is: 212-235-2500, and its website is located at: www.buildamerica.com.

BAM is licensed and subject to regulation as a financial guaranty insurance corporation under the laws of the State of New York and in particular Articles 41 and 69 of the New York Insurance Law.

BAM's financial strength is rated "AA/Stable" by Standard and Poor's Ratings Services, a Standard & Poor's Financial Services LLC business ("S&P"). An explanation of the significance of the rating and current reports may be obtained from S&P at www.standardandpoors.com. The rating of BAM should be evaluated independently. The rating reflects the S&P's current assessment of the creditworthiness of BAM and its ability to pay claims on its policies of insurance. The above rating is not a recommendation to buy, sell or hold the Bonds, and such rating is subject to revision or withdrawal at any time by S&P, including withdrawal initiated at the request of BAM in its sole discretion. Any downward revision or withdrawal of the above rating may have an adverse effect on the market price of the Bonds. BAM only guarantees scheduled principal and scheduled interest payments payable by the issuer of the Bonds on the date(s) when such amounts were initially scheduled to become due and payable (subject to and in accordance with the terms of the Policy), and BAM does not guarantee the market price or liquidity of the Bonds, nor does it guarantee that the rating on the Bonds will not be revised or withdrawn.

Capitalization of BAM

BAM's total admitted assets, total liabilities, and total capital and surplus, as of June 30, 2013 and as prepared in accordance with statutory accounting practices prescribed or permitted by the New York State Department of Financial Services were $485.8 million, $9.2 million and $476.6 million, respectively.

BAM is party to a first loss reinsurance treaty that provides first loss protection up to a maximum of 15% of the par amount outstanding for each policy issued by BAM, subject to certain limitations and restrictions.

BAM's most recent Statutory Annual Statement, which has been filed with the New York State Insurance Department and posted on BAM's website at www.buildamerica.com, is incorporated herein by reference and may be obtained, without charge, upon request to BAM at its address provided above (Attention: Finance Department). Future financial statements will similarly be made available when published.

BAM makes no representation regarding the Bonds or the advisability of investing in the Bonds. In addition, BAM has not independently verified, makes no representation regarding, and does not accept any responsibility for the accuracy or completeness of this Official Statement or any information or disclosure contained herein, or omitted herefrom, other than with respect to the

accuracy of the information regarding BAM, supplied by BAM and presented under the heading "BOND INSURANCE."

GENESEE COUNTY
MUNICIPAL WATER SUPPLY SYSTEM

Water Supply System

The Issuer currently purchases water from the City of Flint, which in turn purchases water from the City of Detroit, through its Detroit Water and Sewerage Department ("DWSD"). The Issuer's payment to Flint is a flat rate of $446,290 per month plus a commodity charge equal to the charge from Detroit to Flint for the water. For 2012 the commodity charge was $1.246 per metered hundred cubic feet. The commodity charge went down starting July 1, 2012 by 6.7%, but is anticipated to increase at 6 to 8% per year in the future. The flat rate went up starting July 1, 2012 by $124,035 and is also anticipated to increase at 6 to 8% per year in the future.

Wholesale or master meter customers are those customers that purchase the water in bulk at designated metered locations. The Issuer is not involved in the local operation and maintenance of the water distribution system.

Purchased Water from the City of Flint

Year	Total (cu.ft.)	% Increase	Year	Total (cu. ft.)	%Increase
2006	709,663,900		2010	616,632,200	0.05
2007	719,759,400	1.42	2011	621,182,300	0.74
2008	656,343,300	-8.81	2012	630,152,800	1.44
2009	616,325,400	-6.10			

Average - 1.88% per year

Billable Metered Water Volume

The Issuer's water charges are based on either community master meter readings or the summation of individual water meter readings within each community. Billable metered water volumes by community for 2011 and 2012 for the water supply district are given in Table 1.

Table 1
Water Supply District

Community	2011 (cu. ft.)	2012 (cu. ft.)	Average % Increase Per Year (11-12)

[1] Master Meter

Water Purchased and Sold

The historical water loss is shown below with an average system loss of 5.56%. Water loss can be due to fire protection, water line breaks, illegal hook ups, and errors in billing. Water purchases are based on billable water plus 8% water loss.

Historical Water Purchased v. Sold

Year	Water Purchased	Billable Water	% System Loss
2007	719,759,400	668,814,441	7.08%
2008	656,343,300	643,936,714	1.89%
2009	616,325,400	594,736,958	3.50%
2010	616,632,200	585,092,058	5.11%
2011	621,182,300	572,717,934	7.80%
2012	630,152,800	579,781,667	7.99%

Operating Revenues and Expenses

The following table sets forth operating revenue and expense summaries for the System for the years ended 2010, 2011 and 2012, which information has been taken from the audited financial statements of the System for such years. See APPENDIX C hereto.

Operating Revenues	2010 Audited	2011 Audited	2012 Audited
Revenue from Rates	$21,202,820	$21,697,903	$23,104,124
Water Meter Sales	65,757	64,662	46,694
Other Operating Revenue	21,705	497,659	709,227
Total Operating Revenues	$21,560,282	$22,260,224	$23,860,045

Operating Expenses	2010 Audited	2011 Audited	2012 Audited
Cost of Water	$10,835,456	$12,947,738	$11,779,406

Repairs and Maintenance	410,699	623,712	459,761
Other Supplies and Expenses	254,988	183,585	255,244
Insurance Claims and Expenses	71,501	78,992	118,481
Depreciation	1,782,129	1,782,145	1,849,811
Total Operating Expenses	$18,613,505	$20,561,423	$20,474,403

Water Rate Structure

Water for the System is measured by a meter or equivalent meters, installed and controlled by the Issuer. Charges for water service are made for water furnished based upon monthly and quarterly billings as set forth in the tables below. The Issuer charges a County Capital Improvement Fee (CCIF) for new connections to the water loop in the amount of $1,000 per residential equivalent unit. The Issuer also charges for specific services.

The basis for customer charges is the monthly distribution of water per customer. Water bills are based on a Readiness to Server (RTS) charge along with a commodity component due on actual usage. This cost recovery method provides a relatively consistent revenue base. In addition, each of the customer communities imposes rates and charges to recover the cost of local water utility services that they provide. As a result, each community on the System has diverse rates and charges in place which impact individual customers differently.

Where individual water meter readings are available, the readings are used as the basis for charges. The rates charged are based on the size of the individual water meters, plus the actual water consumption measured by the accumulation of these individual water meter readings. RTS charges start at $14.59 per month for a 5/8" meter. Commodity charges are currently $3.53 per 100 cubic feet, or $4.72 per 1,000 gallons of water consumed.

Where community bulk water readings are available, the readings are used as the basis for charges. The rates charged are based on the number of equivalent meters for a community plus the actual water consumption measured at the community master meters. RTS charges are currently $89.67 per equivalent meter. Commodity charges are currently $3.53 per 100 cubic feet, or $4.72 per 1,000 gallons of water consumed.

Individual Meters **Water Supply Minimum Charge Rates**

Meter Size (in)	09/02/2012 - 09/01/2013 Charge	09/02/2013 Charge	01/02/2014 Charge

KAREGNONDI WATER AUTHORITY

KWA was established in October 2010 for the purpose of providing its member communities (the Issuer, the County of Lapeer, the County of Sanilac, the City of Flint ("Flint") and the City of Lapeer) with a new source of water. KWA will supply raw water for the three county area consisting of over 2,232 square miles and a population of over one half million residents. Each member will be responsible for providing finished or raw water to its local customers. The Issuer participated in the establishment of KWA in order to have a more reliable supply of water at rates that will ultimately be less than what would otherwise be payable to DWSD.

KWA will supply metered, untreated water to each contracting member. The actual cost for appurtenances and maintenance of KWA will be allocated based on water sold and each contracting member will be responsible for its proportional share of the cost. Each contracting member will be responsible for treating and distributing drinking water to its individual customers.

To supply water to its contracting members, KWA will be required to construct a lake intake on Lake Huron, approximately 65 miles of pipe from the intake plant to the City of Flint and 2 pump stations, one of which will be located near the intake facility. Such facilities collectively constitute the KWA System. The intake facility and the site therefor also constitute the Project that is being financed with the proceeds of the Bonds, and the Issuer intends for the Project to be made available to and used by KWA as part of the KWA System.

KWA has retained the services of the Genesee County Drain Commissioner, as County Agency of the Issuer under Act 342 (the "County Agency"), to administer the design and construction of the KWA System. On behalf of KWA, the County Agency has acquired 40 acres on Lake Huron for the intake plant and pump station and 40 acres in Lynn Township on the borders of Sanilac, St. Clair and Lapeer Counties for the second pump station. In anticipation of the construction of the KWA System, the County Agency has obtained a water withdrawal permit of up to 85 million gallons per day ("mgd") from Lake Huron. The lake intake is currently under construction, the County Agency having supervised the design of the facility and the receipt and award of construction bids for the facility. In addition, the County Agency has hired project managers which have to date secured the route of the pipe line, identified all environmental issues and prepared preliminary permits for the entire 65-mile route, and also has retained consulting firms to complete the design of the remaining KWA System facilities.

KWA currently has entered into two water purchase contracts (the "Water Purchase Contracts"), effective October 1, 2013: one with Flint to supply up to 18 mgd and one with the County Agency, on behalf of the Issuer, to supply 42 mgd. The charges to be paid by Flint and the Issuer in the Water Purchase Contracts are broken down into two distinct portions: an annual fixed or capital fee and an annual commodity or operations and maintenance fee. The Issuer expects to pay such charges from Revenues of the System as an operation and maintenance expense in the same manner that it presently pays Flint for water furnished by DWSD.

The size of the KWA System is based on the volume identified in the Water Purchase Contracts and any additional water purchase contracts entered into with additional parties, up to a maximum of 85 mgd, KWA's permit limit. Each contracting party will be responsible for the annual

fixed fee regardless of the amount of water taken. The other members of KWA have until October 16, 2013 to enter into a water purchase contract with KWA at the same rates set forth in the Water Purchase Contracts. It is not anticipated that other members of KWA will enter into water purchase contracts during this period. Members entering into water purchase contracts with KWA subsequent to such date will pay any incremental costs associated with accommodating their water purchase contracts.

The estimated construction costs for the KWA System, including the Project, are $272,000,000 based on water contracts of 60 mgd. It is expected that KWA will enter into a contract with Flint and the Issuer under Act 233 (the "KWA Financing Contract") whereby KWA will agree to issue bonds (the "KWA Bonds") to finance the remaining facilities for the KWA System, presently estimated to be in an amount not to exceed $237,000,000, in anticipation of payments to be made by Flint and the Issuer as provided therein. The KWA Financing Contract is contemplated in the Water Purchase Contracts and will set forth the manner in which the capital costs of the KWA System facilities will be allocated. Under the KWA Financing Contract, Flint and the Issuer are expected to be responsible for paying 34.2% and 65.8%, respectively, of the debt service on the KWA Bonds. This allocation takes into account and credits the Issuer for financing and being responsible for the payment of 100% of the costs of the Project. In addition, in the event and to the extent that Flint fails to pay its share of the debt service on the KWA Bonds, the Issuer will be responsible for making up the shortfall. Flint and the Issuer each expect to make such payments from the revenues to be derived from the users of their respective water supply systems, but each will pledge its limited tax full faith and credit to the making of such payments.

In order to provide finished water to its customers, Flint expects to utilize an existing water treatment plant, which is currently operating in a back-up role with a capacity of 36 mgd. Flint will be required to make an estimated $8,000,000 in improvements to convert the plant from stand-by to fully operational. The County Agency will be required to build a new water treatment plant at an estimated cost of $60,000,000 to provide finished water to the Issuer's customers. The County Agency has acquired 76 acres approximately 14 miles east of the City of Flint in Marathon Township in Lapeer County, which is expected to serve as the site of the Issuer's new water treatment plant. The new water treatment plant is expected to be constructed and fully operational on or before January 1, 2016, the date on which the KWA System is expected to be fully operational.

Currently, Flint and the Issuer through the County Agency receive finished water from the City of Detroit, through its Detroit Water and Sewerage Department ("DWSD"). In 2012, Flint and the Issuer combined for a total payment to DWSD of approximately $25,000,000 in both fixed fee and commodity charges for an average water cost of $22.72 per 1,000 cubic feet of water. Based upon the purchase of 16 mgd and an annual average flow of 12 mgd, Flint's estimated cost to produce finished water is $14.02 per 1,000 cubic feet. The County Agency will purchase 42 mgd of capacity. With a current annual average day flow of 14 mgd, the Issuer's estimated cost per 1,000 cubic feet will be $32.96. Based on current estimates, assuming an annual 5% increase in DWSD rates, the Issuer expects that its cost to produce finished water from the KWA System will be less than its cost to produce finished water from DWSD beginning 7 years after the commencement of operation of the KWA System.

It is expected that the design of the remaining facilities of the KWA System will be completed in late 2013 with bid dates in February, 2014 and construction to begin in May, 2014. The completion date for the KWA System has been set for January 1, 2016, at which time Flint and the County Agency expect to discontinue purchasing water from DWSD and begin purchasing water from KWA and producing their own water. It is expected that KWA will also contract with the County Agency for operation and maintenance of the KWA System.

BONDHOLDERS' RISKS

The following discussion of some of the risk factors associated with the Bonds is not, and is not intended to be, exhaustive, and such risks are not necessarily presented in the order of their magnitude.

This Official Statement does not describe all of the risks of an investment in the Bonds and the Underwriters disclaim any responsibility to advise prospective investors of such risks as they exist at the date of this Official Statement or as they change from time to time. Prospective investors should consult their own legal and tax advisors as to the risks associated with an investment in the Bonds and the suitability of investing in the Bonds in light of their particular circumstances. Prospective investors should be able to bear the risks relating to an investment in the Bonds and should carefully consider, among other factors, the matters described below.

Assumptions With Regard to Net Revenues

To estimate the Net Revenues available to pay debt service on the Bonds, the Issuer has made certain assumptions with regard to the Net Revenues of the System. The Issuer believes these assumptions to be reasonable, but to the extent that the Net Revenues of the System are less than the assumptions, Net Revenues available to pay debt service on the Bonds may be less than those projected herein and may under certain circumstances, be less than those necessary to pay the principal of and interest on the Bonds when due. The assumptions are based on factors beyond the Issuer's control and there is no assurance that these projections will be achieved. Many factors may prevent the projections from being achieved. These include yearly changes in water consumption.

In addition, the Issuer's pledge of Net Revenues is shared on a parity basis with the Outstanding Bonds and any Additional Bonds authorized to be issued under the Ordinances. There can be no assurance that the Net Revenues will be sufficient to pay debt service on the Bonds.

Sufficiency of Net Revenues

Although it is expected that the Net Revenues will be available in sufficient amounts to pay debt service on the Bonds, there can be no assurance that the Net Revenues will be sufficient to pay debt service on the Bonds. Future economic and other factors may adversely affect the Issuer's revenues and expenses, and, consequently, its ability to meet its operating expenses. Among the factors that could have such adverse effects are population, population growth, household income, competitive facilities, accessibility, absorption, occupancy, vacancy and market penetration.

NO GUARANTEE CAN BE MADE THAT THE PROJECTIONS CONTAINED HEREIN WILL CORRESPOND WITH THE RESULTS ACTUALLY ACHIEVED IN THE FUTURE BECAUSE THERE IS NO ASSURANCE THAT ACTUAL EVENTS WILL CORRESPOND WITH THE ASSUMPTIONS MADE BY THE ISSUER IN FORMULATING THE PROJECTIONS. ACTUAL OPERATING RESULTS MAY BE AFFECTED BY MANY FACTORS, INCLUDING, BUT NOT LIMITED TO, INCREASED COSTS, LOWER THAN ANTICIPATED NET REVENUES, CHANGES IN EMPLOYEE RELATIONS, APPLICABLE GOVERNMENTAL REGULATION, ECONOMIC AND DEMOGRAPHIC TRENDS, AND COMPETITION.

Inability to Finance the Project; Project Completion Risk

As described under the heading KAREGNONDI WATER AUTHORITY, the Issuer intends for the Project to be made available and used by the KWA System, which in turn will supply raw water for the Issuer's System. If for any reason KWA is unable to acquire, construct, complete or place the KWA System in service, the Project will not be useful to the Issuer's System unless the Issuer constructs its own pipeline. At this time, it is unclear whether the Issuer would undertake constructing its own pipeline.

The rates and charges currently established by the Issuer are projected to be sufficient to pay the principal of and interest on the Bonds. However, if the KWA System is not placed in service, the additional costs associated with paying for the debt service on the Bonds without a tangible benefit to be derived from the Project could ultimately have an adverse effect on the Issuer's Net Revenues and its ability to pay debt service on the Bonds.

In order to provide customers for the KWA System, the County Agency and Flint have entered into the Water Purchase Contracts. The Issuer and Flint also expect to enter into the Financing Contract, under which they will be responsible for paying their respective share of the KWA Bonds to be issued to finance the costs of the remaining KWA System facilities (approximately $237,000,000). The Issuer's share of the approximately $237,000,000 will be the entire amount if Flint fails to fulfill its payment obligation under the Financing Contract for any reason. The Financing Contract is subject to a right of referendum by the respective electors of Flint and the Issuer. If a referendum prevents Financing Contract from becoming effective, it is unlikely that KWA could finance the remaining facilities intended to be part of the KWA System.

The Issuer faces potential exposure to its general fund and to the rates and charges to be paid by its water customers served by its System for the debt service associated with the Bonds and up to an estimated $237,000,000 for the KWA Bonds if for any reason the remaining KWA System facilities are not completed. The remaining KWA System facilities could fail to be completed because of a referendum on the Financing Contract, an inability to gain market access for the financing for all or part of such facilities, cost overruns in construction, or acts of God.

The Issuer intends for its obligations with respect to the Bonds and the KWA Bonds to be paid for by rates and charges from the users of its System. If Flint fails to pay its share of the KWA Bonds, either from rates and charges to users of its water system or from its general fund, the Issuer

would be responsible for making up the shortfall. If the Issuer's general fund is needed to pay a significant portion of the KWA Bonds, it could cause significant financial strain on the Issuer.

As noted under the heading KAREGNONDI WATER AUTHORITY, in order for Flint to provide finished water to its customers, it needs to undertake approximately $8,000,000 in improvements to its existing water treatment plant. If Flint is unable to timely complete such improvements for any reason (including without limitation, a referendum on the financing, an inability to gain market access for the financing for the improvements, cost overruns in construction, or acts of God), Flint may be unable to generate sufficient rates and charges from its customers to cover its share of the debt service on the KWA Bonds as provided in the Financing Contract. Without sufficient rates and charges, it is unclear whether Flint's general fund will have sufficient funds to fulfill its obligations under the Financing Contract, which in turn could strain the Issuer's general fund or the amount of rates and charges to be charged to the Issuer's customers.

Finally, similar to Flint, the Issuer needs to construct a water treatment plant at an estimated cost of $60,000,000 as described under the heading KAREGNONDI WATER AUTHORITY in order to provide finished water to its customers. If the Issuer is unable to timely complete the new treatment plant for any reason (including without limitation, a referendum on the financing, an inability to gain market access for the financing, cost overruns in construction, or acts of God), the Issuer may be unable to generate sufficient rates and charges from its customers to cover its share of the debt service on the KWA Bonds as provided in the Financing Contract, which could strain the Issuer's general fund.

Financial Condition of the City of Flint for future KWA Obligations

Flint is currently operating under a State-appointed Emergency Manager under the Local Financial Stability and Choice Act, Act No. 436, Michigan Public Acts of 2012 ("Act 436"). If Flint's financial status were to deteriorate further, Flint's options to improve its fiscal health may be limited. The United States Bankruptcy Code, 11 U.S.C. Section 101, *et. seq.* (the "Bankruptcy Code") does not authorize municipalities to be subject to involuntary bankruptcy. Flint must be specifically authorized to be a debtor under chapter 9 of the Bankruptcy Code by State law or by a governmental officer or organization empowered by State law to authorize Flint to be a debtor under chapter 9 of the Bankruptcy Code. Act 436 provides such authorization after Flint first complies with certain requirements set forth therein. The effect of a Flint bankruptcy on its obligations to KWA is unknown at this time, including without limitation its obligations to continue to make payments to KWA under its Water Purchase Contract with KWA and under the KWA Financing Contract. If such obligations are modified for any reason, including a bankruptcy of Flint, the Issuer will be required to pay Flint's share of the debt service on the proposed KWA Bonds. Such payments could cause significant financial strain on the general fund of the Issuer and the Net Revenues of the System.

LITIGATION

Pending Litigation

The Issuer has no litigation pending or, to its knowledge, threatened, wherein an unfavorable decision, ruling or finding would adversely affect the issuance of the Bonds or materially affect the Issuer's ability to pay the principal of and interest on the Bonds.

Other Litigation

On December 28, 1998, in *Bolt v City of Lansing*, the Michigan Supreme Court decided that the City of Lansing's stormwater user fee, imposed to defray the capital costs of the City of Lansing's stormwater system, was an unconstitutional tax levied without the approval of the electors of the City of Lansing in violation of the Headlee Amendment to the Michigan Constitution. The Court articulated certain principles in reaching its decision which, if extended to all enterprise systems, could, in certain instances, result in a finding that fees charged to the users of such enterprise systems are taxes which may not be imposed without the approval of the electors of the municipality.

Although the *Bolt* opinion did not address user charges relating to enterprise systems generally, subsequent lower court decisions have applied the principles articulated in *Bolt* to other enterprise systems, including water supply systems. Because of the confusion caused by the language of the *Bolt* decision and subsequent lower court decisions, it is not possible to predict with certainty what impact, if any, *Bolt* and subsequent decisions would have on any legal challenge to the rates and charges imposed by the Issuer for use of the System.

TAX MATTERS

In the opinion of Miller, Canfield, Paddock and Stone, P.L.C., Bond Counsel, under existing law, the interest on the Bonds is excludable from gross income for federal income tax purposes and is not an item of tax preference for purposes of the federal alternative minimum tax imposed on individuals and corporations. It should be noted, however, that with respect to corporations (as defined for federal income tax purposes) such interest is taken into account in determining adjusted current earnings for the purpose of computing the alternative minimum tax imposed on such corporations. Bond Counsel is also of the opinion that, under existing law, the Bonds and the interest thereon are exempt from all taxation by the State of Michigan or by any taxing authority within the State of Michigan, except inheritance and estate taxes and taxes on gains realized from the sale, payment or other disposition thereof. Bond Counsel will express no opinion regarding any other federal or state tax consequences arising with respect to the Bonds and the interest thereon.

The opinion on federal tax matters is based on the accuracy of certain representations and certifications, and continuing compliance with certain covenants, of the Issuer contained in the transcript of proceedings and which are intended to evidence and assure the foregoing, including that the Bonds are and will remain obligations the interest on which is excludable from gross income for federal income tax purposes. The Issuer has covenanted to take the actions required of it for the interest on the Bonds to be and to remain excludable from gross income for federal income tax purposes, and not to take any actions that would adversely affect that exclusion. Bond Counsel's

opinion assumes the accuracy of the Issuer's certifications and representations and the continuing compliance with the Issuer's covenants. Noncompliance with these covenants by the Issuer may cause the interest on the Bonds to be included in gross income for federal income tax purposes retroactively to the date of issuance of the Bonds. After the date of issuance of the Bonds, Bond Counsel will not undertake to determine (or to so inform any person) whether any actions taken or not taken, or any events occurring or not occurring, or any other matters coming to Bond Counsel's attention, may adversely affect the exclusion from gross income for federal income tax purposes of interest on the Bonds or the market prices of the Bonds.

The opinion of Bond Counsel is based on current legal authority and covers certain matters not directly addressed by such authority. It represents Bond Counsel's legal judgment as to the excludability of interest on the Bonds from gross income for federal income tax purposes but is not a guarantee of that conclusion. The opinion is not binding on the Internal Revenue Service ("IRS") or any court. Bond Counsel cannot give and has not given any opinion or assurance about the effect of future changes in the Internal Revenue Code of 1986, as amended (the "Code"), the applicable regulations, the interpretations thereof or the enforcement thereof by the IRS.

Ownership of the Bonds may result in collateral federal income tax consequences to certain taxpayers, including, without limitation, corporations subject to the branch profits tax, financial institutions, certain insurance companies, certain S corporations, individual recipients of Social Security or Railroad Retirement benefits and taxpayers who may be deemed to have incurred (or continued) indebtedness to purchase or carry the Bonds. Bond Counsel will express no opinion regarding any such consequences.

Tax Treatment of Accruals on Original Issue Discount Bonds

Under existing law, if the initial public offering price to the public (excluding bond houses and brokers) of a Bond is less than the stated redemption price of such Bonds at maturity, then such Bond is considered to have "original issue discount" equal to the difference between such initial offering price and the amount payable at maturity (such Bonds are referred to as "OID Bonds"). Such discount is treated as interest excludable from federal gross income to the extent properly allocable to each registered owner thereof. The original issue discount accrues over the term to maturity of each such OID Bond on the basis of a constant interest rate compounded at the end of each six-month period (or shorter period) from the date of original issue with straight-line interpolations between compounding dates. The amount of original issue discount accruing during each period is added to the adjusted basis of such OID Bonds to determine taxable gain upon disposition (including sale, redemption or payment on maturity) of such OID Bonds.

The Code contains certain provisions relating to the accrual of original issue discount in the case of purchasers of OID Bonds who purchase such OID Bonds after the initial offering of a substantial amount thereof. Owners who do not purchase such OID Bonds in the initial offering at the initial offering prices should consult their own tax advisors with respect to the tax consequences of ownership of such OID Bonds.

All holders of the OID Bonds should consult their own tax advisors with respect to the allowance of a deduction for any loss on a sale or other disposition of an OID Bond to the extent such loss is attributable to accrued original issue discount.

Amortizable Bond Premium

For federal income tax purposes, the excess of the initial offering price to the public (excluding bond houses and brokers) at which a Bond is sold over the amount payable at maturity thereof constitutes for the original purchasers of such Bonds (collectively, the "Original Premium Bonds") an amortizable bond premium. Bonds other than Original Premium Bonds may also be subject to an amortizable bond premium determined generally with regard to the taxpayer's basis (for purposes of determining loss on a sale or exchange) and the amount payable on maturity or, in certain cases, on an earlier call date (such bonds being referred to herein collectively with the Original Premium Bonds as the "Premium Bonds"). Such amortizable bond premium is not deductible from gross income. The amount of amortizable bond premium allocable to each taxable year is generally determined on the basis of the taxpayer's yield to maturity determined by using the taxpayer's basis (for purposes of determining loss on sale or exchange) of such Premium Bonds and compounding at the close of each six-month accrual period. The amount of amortizable bond premium allocable to each taxable year is deducted from the taxpayer's adjusted basis of such Premium Bonds to determine taxable gain upon disposition (including sale, redemption or payment at maturity) of such Premium Bonds.

All holders of the Premium Bonds should consult with their own tax advisors as to the amount and effect of the amortizable bond premium.

Market Discount

The "market discount rules" of the Code apply to the Bonds. Accordingly, holders acquiring their Bonds subsequent to the initial issuance of the Bonds will generally be required to treat market discount recognized under the provisions of the Code as ordinary taxable income (as opposed to capital gain income). Holders should consult their own tax advisors regarding the application of the market discount provisions of the Code and the advisability of making any of the elections relating to market discount allowed by the Code.

Information Reporting and Backup Withholding

Information reporting requirements apply to interest paid after March 31, 2007 on tax-exempt obligations, including the Bonds. In general, such requirements are satisfied if the interest recipient completes, and provides the payor with, a Form W-9, "Request for Taxpayer Identification Number and Certification," or unless the recipient is one of a limited class of exempt recipients, including corporations. A recipient not otherwise exempt from information reporting who fails to satisfy the information reporting requirements will be subject to "backup withholding," which means that the payor is required to deduct and withhold a tax from the interest payment, calculated in the manner set forth in the Code. For the foregoing purpose, a "payor" generally refers to the person or entity from whom a recipient receives its payments of interest or who collects such payments on behalf of the recipient.

If an owner purchasing the Bonds through a brokerage account has executed a Form W-9 in connection with the establishment of such account no backup withholding should occur. In any event, backup withholding does not affect the excludability of the interest on the Bonds from gross income for federal income tax purposes. Any amounts withheld pursuant to backup withholding

would be allowed as a refund or a credit against the owner's federal income tax once the required information is furnished to the IRS.

Future Developments

Bond Counsel's engagement with respect to the Bonds ends with the issuance of the Bonds and, unless separately engaged, bond counsel is not obligated to defend the Issuer in the event of an audit examination by the IRS. The IRS has a program to audit tax-exempt obligations to determine whether the interest thereon is includible in gross income for federal income tax purposes. If the IRS does audit the Bonds, under current IRS procedures, the IRS will treat the Issuer as the taxpayer and the beneficial owners of the Bonds will have only limited rights, if any, to obtain and participate in judicial review of such audit.

NO ASSURANCE CAN BE GIVEN THAT ANY FUTURE LEGISLATION OR CLARIFICATIONS OR AMENDMENTS TO THE CODE, IF ENACTED INTO LAW, WILL NOT CONTAIN PROPOSALS WHICH COULD CAUSE THE INTEREST ON THE BONDS TO BE SUBJECT DIRECTLY OR INDIRECTLY TO FEDERAL OR STATE OF MICHIGAN INCOME TAXATION, ADVERSELY AFFECT THE MARKET PRICE OR MARKETABILITY OF THE BONDS, OR OTHERWISE PREVENT THE HOLDERS FROM REALIZING THE FULL CURRENT BENEFIT OF THE STATUS OF THE INTEREST THEREON. BOND COUNSEL EXPRESSES NO OPINION REGARDING ANY PENDING OR PROPOSED FEDERAL OR STATE OF MICHIGAN TAX LEGISLATION.

FURTHER, NO ASSURANCE CAN BE GIVEN THAT ANY ACTIONS OF THE INTERNAL REVENUE SERVICE, INCLUDING, BUT NOT LIMITED TO, SELECTION OF THE BONDS FOR AUDIT EXAMINATION, OR THE COURSE OR RESULT OF ANY EXAMINATION OF THE BONDS, OR OTHER BONDS WHICH PRESENT SIMILAR TAX ISSUES, WILL NOT AFFECT THE MARKET PRICE OF THE BONDS.

INVESTORS SHOULD CONSULT WITH THEIR TAX ADVISORS AS TO THE TAX CONSEQUENCES OF THEIR ACQUISITION, HOLDING OR DISPOSITION OF THE BONDS, INCLUDING THE IMPACT OF ANY PENDING OR PROPOSED FEDERAL OR STATE OF MICHIGAN TAX LEGISLATION.

QUALIFICATION BY THE MICHIGAN DEPARTMENT OF TREASURY

The Issuer has received a letter from the Department of Treasury of the State of Michigan stating that the Issuer is in material compliance with the criteria of the Revised Municipal Finance Act, Act No. 34, Public Acts of Michigan, 2001, as amended, for a municipality to be granted qualified status. The Issuer may therefore proceed to issue the Bonds without further approval from the Department of Treasury of the State of Michigan.

BOND COUNSEL'S RESPONSIBILITY

The fees of Miller, Canfield, Paddock and Stone, P.L.C. ("Bond Counsel") for services rendered in connection with its approving opinion are expected to be paid from Bond proceeds. Except to the extent necessary to issue its approving opinion as to the validity of the Bonds and tax matters relating to the Bonds and the interest thereon, and except as stated below, Bond Counsel has not been retained to examine or review, and has not examined or reviewed, any financial documents, statements or materials that have been or may be furnished in connection with the authorization, issuance or marketing of the Bonds and accordingly will not express any opinion with respect to the accuracy or completeness of any such financial documents, statements or materials.

Bond Counsel has reviewed the statements in this Official Statement under the headings entitled "PURPOSE AND SECURITY," "THE BONDS," "PRIOR REDEMPTION OF BONDS," "TRANSFER OUTSIDE BOOK-ENTRY-ONLY SYSTEM," "TAX MATTERS," "QUALIFICATION BY THE MICHIGAN DEPARTMENT OF TREASURY," "BOND COUNSEL'S RESPONSIBILITY," and "CONTINUING DISCLOSURE" (first two paragraphs only). Bond Counsel has not been retained to review and has not reviewed any other portions of the Official Statement for accuracy or completeness, and has not made inquiry of any official or employee of the Issuer or any other person and has made no independent verification of such other portions hereof, and further has not expressed and will not express an opinion or belief as to any such other portions hereof.

CONTINUING DISCLOSURE

Prior to the delivery of the Bonds, the Issuer will execute a Continuing Disclosure Undertaking (the "Undertaking") for the benefit of the holders of the Bonds or Beneficial Owners to send certain information annually and to provide notice of certain events to certain information repositories pursuant to the requirements of Rule 15c2-12(b)(5) (the "Rule") adopted by the Securities and Exchange Commission under the Securities Exchange Act of 1934. The information to be provided on an annual basis, the events which will be noticed on an occurrence basis, and the other terms of the Undertaking are set forth in *APPENDIX D-FORM OF CONTINUING DISCLOSURE UNDERTAKING* to this Official Statement.

A failure by the Issuer to comply with the Undertaking will not constitute an event or default under the Ordinances authorizing the issuance of the Bonds and holders of the Bonds or Beneficial Owners are limited to the remedies described in the Undertaking.

The Issuer has recently discovered it had failed to comply with certain of its continuing disclosure obligations under previous undertakings entered into pursuant to the Rule with respect to annual information filings required for fiscal years 2008-2010. The Issuer was required to file this information within a period of time specified in each previous undertaking after the end of the fiscal year which ends on September 30. The filings were subsequently made for fiscal year 2008 in December 2010, for fiscal year 2009 in June 2010 and for fiscal year 2010 in December 2011 for the Issuer's sewer, water supply, capital improvement and general obligation bonds. The filings for

fiscal years 2008-2010 were subsequently made for the Issuer's building authority bonds on July 23, 2013. The Issuer has filed its annual audited financial statements for fiscal years 2011 and 2012 on a timely basis.

In addition, the Issuer failed to provide notice of certain underlying rating changes that occurred in 2010 affecting its sewer, water supply, building authority, capital improvement and general obligation bonds. The Issuer has subsequently filed notice of these rating changes and the current ratings on those bonds with a filing dated July 16, 2013. Furthermore, the Issuer failed to provide notice of certain insured rating downgrades affecting its sewer, water supply and building authority bonds, of which the Issuer was not separately notified by the relevant rating agencies, and which resulted from a series of widely reported downgrades of the applicable municipal bond insurer for those bonds. The Issuer has subsequently filed notice of these rating changes and the current ratings on those bonds with a filing dated July 16, 2013. The Issuer has taken steps to assure that it will comply with the Undertaking, including the annual filing requirements, in the future. The Issuer entered into an agreement in October, 2011 with Stauder, Barch & Associates, Inc. to serve as disclosure agent and assist the Issuer in completing all required filings on a timely basis.

A failure by the Issuer to comply with the Undertaking must be reported by the Issuer in accordance with the Rule and must be considered by any broker, dealer or municipal securities dealer before recommending the purchase or sale of the Bonds in the secondary market. Consequently, such failure may adversely affect the transferability and liquidity of the Bonds and their market price.

LEGAL OPINION

Legal matters incident to the authorization, issuance and sale of the Bonds are subject to the approval of Miller, Canfield, Paddock and Stone, P.L.C., attorneys of Detroit, Michigan, Bond Counsel. A copy of the opinion of Bond Counsel will be furnished with the Bonds, which opinion will be substantially in the form set forth in APPENDIX E.

FINANCIAL ADVISOR

Stauder, Barch & Associates, Inc., Ann Arbor, Michigan, (the "Financial Advisor") has been retained by the Issuer to provide certain financial advisory services including, among other things, preparation of portions of the deemed "final" Preliminary Official Statement and the final Official Statement (the "Official Statements"). The information contained in the Official Statements was prepared in part by the Financial Advisor and is based on information supplied by various officials from records, statements and reports required by various local county or state agencies of the State of Michigan in accordance with constitutional or statutory requirements.

To the best of the Financial Advisor's knowledge, all of the information contained in the Official Statements, which it assisted in preparing, while it may be summarized is (i) complete and accurate; (ii) does not contain any untrue statement of material fact; and (iii) does not omit any material fact, or make any statement which would be misleading in light of the circumstances under which these statements are being made. However, the Financial Advisor has not and will not

independently verify the completeness and accuracy of the information contained in the Official Statements.

The Financial Advisor's duties, responsibilities and fees arise solely from that as financial advisor to the Issuer and they have no secondary obligations or other responsibility. The Financial Advisor's fees are expected to be paid from Bond proceeds.

UNDERWRITING

The Bonds are being purchased by the Underwriters listed on the cover page of this Official Statement. The Underwriters have agreed, subject to certain conditions, to purchase all of the Bonds from the Issuer at an underwriters' discount of $182,981.96 from the initial offering prices set forth in this Official Statement. The Underwriters are obligated to purchase all of the Bonds, if any are purchased, the obligation to make such purchase being subject to certain terms and conditions set forth in the Bond Purchase Agreement with respect to the Bonds, the approval of certain legal matters by counsel and certain other conditions. The initial public offering prices of the Bonds may be changed from time to time by the Underwriters. The Bonds may be offered and sold by the Underwriters to certain dealers (including dealers depositing the Bonds in unit investment trusts, some of which may be managed by the Underwriters) and certain dealer banks and banks acting as agents at prices lower than the public offering prices set forth in this Official Statement.

J.P. Morgan Securities LLC ("JPMS"), one of the Underwriters of the Bonds, has entered into negotiated dealer agreements (each, a "Dealer Agreement") with each of UBS Financial Services Inc. ("UBSFS") and Charles Schwab & Co., Inc. ("CS&Co.") for the retail distribution of certain securities offerings, at the original issue prices. Pursuant to each Dealer Agreement (if applicable to this transaction), each of UBSFS and CS& Co. will purchase Bonds from JPMS at the original issue price less a negotiated portion of the selling concession applicable to any Bonds that such firm sells.

Wells Fargo Securities is the trade name for certain securities-related capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including Wells Fargo Bank, National Association ("WFBNA"). WFBNA, one of the underwriters of the Bonds, has entered into an agreement (the "Distribution Agreement") with its affiliate, Wells Fargo Advisors, LLC ("WFA"), for the distribution of certain municipal securities offerings, including the Bonds. Pursuant to the Distribution Agreement, WFBNA will share a portion of its underwriting or remarketing agent compensation, as applicable, with respect to the Bonds with WFA. WFBNA also utilizes the distribution capabilities of its affiliates, Wells Fargo Securities, LLC ("WFSLLC") and Wells Fargo Institutional Securities, LLC ("WFIS"), for the distribution of municipal securities offerings, including the Bonds. In connection with utilizing the distribution capabilities of WFSLLC, WFBNA pays a portion of WFSLLC's expenses based on its municipal securities transactions. WFBNA, WFSLLC, WFIS, and WFA are each wholly-owned subsidiaries of Wells Fargo & Company.

The Underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage

activities. The Underwriters have, from time to time, and may in the future perform, various investment banking services for the Issuer for which it received or will receive customary fees and expenses.

In the ordinary course of its various business activities, the Underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (which may include bank loans and/or credit default swaps) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities may involve securities and instruments of the Issuer.

RATING

The Underwriters' obligations to purchase the Bonds is conditioned on the Bonds receiving a rating of "AA" from Standard & Poor's Ratings Service, a division of The McGraw-Hill Companies, Inc. ("S&P"). The assignment of such rating is conditioned upon the delivery by BAM of the Policy at the time of the delivery of the Bonds. In addition, Moody's Investors Service has assigned the Bonds an underlying rating of "A2," and S&P has assigned the Bonds an underlying rating of "A+." No application was made to any other rating agency for the purpose of obtaining an additional rating on the Bonds. Any explanation of the significance of each such rating may only be obtained from the rating agency. Generally, a rating agency bases its rating on such information and materials and on investigations, studies and assumptions by the rating agency. There is no assurance that such rating will continue for any given period of time or that it will not be revised downward or withdrawn entirely by such rating agency, if in the judgment of the rating agency circumstances so warrant. Any such downward revision or withdrawal of such rating may have an adverse effect on the market price of the Bonds.

OTHER MATTERS

All information contained in this Official Statement is subject, in all respects, to the complete body of information contained in the original sources thereof. In particular, no opinion or representation is rendered as to whether any projection will approximate actual results, and all opinions, estimates and assumptions, whether or not expressly identified as such, should not be considered statements of fact.

FOR IMMEDIATE RELEASE

GENESEE COUNTY COMMISSIONERS DECLARE EMERGENCY

Flint, MI -- January 4, 2016 – During their first board meeting of the year, Monday morning, Genesee County Commissioners declared a state of emergency in Genesee County. The move a sign that county leaders support Flint Mayor Dr. Karen Weaver and her efforts to get resources and relief to the residents suffering from the ongoing water situation in the city.

Mayor Weaver declared a state of emergency in Flint last month to raise awareness about the severity of the problems surrounding the water situation that continues to effect residents. The problems a result of the man-made disaster caused by the city switching to the Flint River as a water source in 2014.

Following the board's vote today, Genesee County Commission Chairperson, Jaime Curtis said, "This is a state, man-made disaster and we're going to ask the state to fix their disaster. Curtis also said, "Genesee County is the fifth largest county in Michigan and we will not be ignored."

Mayor Weaver hopes the county's show of support will convince the Governor to provide the City of Flint with financial support to help leaders address immediate infrastructure needs. Those needs include more than $45 million to replace every identified lead pipe in the city, reimbursement of the $2 million spent to switch back to the Detroit Water Sewerage Department, $6 million to help with the transfer to the Karegnondi pipeline and additional resources to support the city's Heath Initiative to assist affected adults and children in Flint who have consumed water contaminated with lead.

In an interview with media after the board's emergency declaration Mayor Weaver said, "It's a victory and a step in the right direction." The mayor plans to meet with Governor Snyder in Lansing Thursday of this week to discuss the state's response and next steps.

Natasha L. Henderson, Administrator
City of Flint
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Mayor Weaver and Ms. Henderson:

Thank you for your recent letter. Your letter requested financial assistance from the Department of Treasury to defray litigation-related expenses incurred by the City in defending *Shears* v *City of Flint*.

This Department will reimburse the City for 75 percent of *Shears* litigation-related expenses incurred by the City, including any such expenses incurred prior to the date of this letter, up to a maximum amount of $300,000.00. Any *Shears* litigation-related expenses incurred by the City in excess of $300,000.00 shall remain the sole obligation of the City.

The City Administrator must provide this Department within 45 days of receipt by the City original copies of *Shears* litigation-related invoices with any request for reimbursement. Requests for reimbursement must first be reviewed and approved in writing by the City's Chief Financial Officer. Any requests for reimbursement submitted to this Department should be directed to the attention of Randall Byrne, Manager of the Fiscal Responsibility Section, Bureau of Local Government Services.

I trust that this information will be of assistance. If I may be of further assistance, let me know.

Sincerely,

N. A. Khouri

STATE OF MICHIGAN
EXECUTIVE OFFICE
LANSING

RICK SNYDER
GOVERNOR

BRIAN CALLEY
LT. GOVERNOR

PROCLAMATION

DECLARATION OF EMERGENCY

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, under the Emergency Management Act, Act No. 390 of the Public Acts of 1976, as amended, MCL 30.401 to 30.421, the Governor is responsible for coping with dangers to this state or the people of this state presented by a disaster or emergency or threat thereof, and may issue executive orders and proclamations, having the force and effect of law to implement the Act; and

WHEREAS, under Section 3 of the Emergency Management Act, 1976 Public Act 390, MCL 30.403, the Governor shall, by executive order or proclamation, declare a state of emergency if the Governor finds that an emergency has occurred or that the threat of an emergency exists; and

WHEREAS, on April 25, 2014 the City of Flint, Michigan switched from the Detroit water system to the Flint River as a water source, the harmful effects of untreated water struck the city's water infrastructure, causing leaching of lead into the water which caused damage to the water system and potential negative health impacts to the citizens; and

WHEREAS, the area affected includes parts of the City of Flint, within the County of Genesee; and

WHEREAS, the damaged water infrastructure and leaching of lead into the city's water caused damage to public and private water infrastructure, and has either caused or threatened to cause elevated blood lead levels, especially in the population of children and pregnant women, and causing a potential immediate threat to public health and safety and disrupting vital community services; and

WHEREAS, from October 1, 2015 to this date, the County of Genesee and the City of Flint have taken a number of actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16th, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling

and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, local resources have been insufficient to address the situation, and additional assistance from voluntary organizations and the state is required to protect public health, safety, and property, and to lessen or avert the threat of more severe and long lasting impacts to the community;

NOW, THEREFORE, I, RICHARD D. SNYDER, Governor of the state of Michigan, pursuant to the Constitution of the state of Michigan and provisions of Act No. 390 of the Public Acts of 1976, as amended, do hereby proclaim that a state of emergency exists in the aforementioned county and municipality; and

FURTHER, the Emergency Management and Homeland Security Division of the Department of State Police shall coordinate and maximize all state efforts, and may call upon all state departments to utilize resources at their avail to assist in the emergency area pursuant to the Michigan Emergency Management Plan; and

FURTHER, termination of this emergency will occur at such time as the threats to public health, safety, and property caused by the emergency no longer exist and appropriate programs have been implemented to recover from the effects of this emergency, but in no case longer than February 1, 2016, unless extended as provided by Act No. 390.

Given under my hand and the
Great Seal of the State of Michigan this
5th day of January in the Year of Our
Lord, Two Thousand and Sixteen.

Flint Water Quality Chronology – January 2016

Pre-Emergency Manager Status: Prior to November 28, 2011

1. **March 16, 2011** – Public Act 4 of 2011 becomes effective repealing Public Act 72 of 1990.
2. **August 26, 2011** – Notification of preliminary review sent to Flint Mayor.
3. **August 29, 2011** – Treasury staff begins preliminary review of Flint's finances.
4. **September 12, 2011** – Treasurer sends preliminary review report sent to Governor indicating probable financial stress and recommends appointment of a review team.
5. **September 30, 2011** – Governor appoints a financial review team asking review team to produce a report within 30 days versus 60 days allowed by statute.
6. **October 5, 2011** – Review team begins its review of the City's finances.
7. **November 7, 2011** – The review team issues its report to the Governor finding a financial emergency in the City of Flint.
8. **November 8, 2011** – The Governor declares a financial emergency in the City of Flint.
9. **November 28, 2011** – The Governor appoints Michael Brown as the Emergency Financial Manager.

Emergency Manager Michael Brown: November 28, 2011 – August 8, 2012

1. **June 26, 2012** – Letter from Flint EM Mike Brown to DWSD for permission to begin blending Flint River water with treated water from DWSD. The letter indicates that the DEQ is supporting this option and its implementation would save the City between $2M and $3M annually.
2. **August 8, 2012** – Public Act 4 of 2011 is suspended while awaiting referendum vote on November 6, 2012. Public Act 72 of 1990 reinstated, which does not allow a former employee of the city to be an emergency financial manager. Michael Brown is required to step down.

Emergency Financial Manager/Emergency Manager Ed Kurtz: August 8, 2012 – July 4, 2013

3. **August 8, 2012** – ELB Order #2012-4, Appointment of Emergency Financial Manager, Edward J. Kurtz.

4. **September 20, 2012** – Letter from Flint EM Ed Kurtz to DWSD requesting written permission to implement the blending option. Approval is requested by October 1, 2012.

5. **October 31, 2012** – Analysis by the Flint Finance Director suggests that the annual cost to purchase water from DWSD will steadily increase to $23M per year by fiscal year 2020.

6. **November 2012** – Treasury retains Tucker, Young, Jackson and Tull (TYJT) to evaluate the KWA proposal to the City of Flint.

7. **November 6, 2012** – Letter from Flint Emergency Manager Ed Kurtz to State Treasurer Dillon that a proposal from DWSD is expected but that the initial assessment is that switching to KWA is in the best interest of the City of Flint.

8. **January 11, 2013** – ELB Order #2013-2, Amending Contract of Emergency Financial Manager, Edward J. Kurtz.

9. **February 6, 2013** – TYJT issues a final report to Treasury on the comparison between Karegnondi Water Authority (KWA) and DWSD. Analysis suggests that the KWA option is the cheaper option for the City of Flint.

10. **March 2013** – DWSD contacts the City of Flint to begin direct negotiations on a contract extension. Multiple options are provided to the Flint Emergency Manager (EM) Ed Kurtz.

11. **March 25, 2013** – The Flint City Council endorses joining KWA.

12. **March 28, 2013** – Public Act 436 of 2012 becomes effective.

13. **April 11, 2013** – State Treasurer Andy Dillon authorizes Flint EM Ed Kurtz, pursuant to Section 12(3) of P.A. 436 of 2012, to enter into a contract with KWA if a final offer from DWSD is either not received for rejected in good faith based upon specific objections.

14. **April 15, 2013** – DWSD provides a best and final offer to the City of Flint. Analyses by Flint EM Ed Kurtz, the Department of Environmental Quality and Treasury's Office of Fiscal Responsibility independently conclude that the KWA option is cheaper for the City of Flint.

15. **April 16, 2013** –Flint EM Ed Kurtz informs the State Treasurer that the City will join KWA. This decision was officially announced May 1, 2013.

16. **April 17, 2013** – DWSD transmits a letter to Flint EM Ed Kurtz terminating service to the City of Flint, effective April 17, 2014.

17. **June 26, 2013** – Groundbreaking for the Karegnondi Water Authority begins. Flint also requests full time use of the Flint Water Treatment Plant with Flint River water as a source.

18. **June 28, 2013** – Financing Contract between the City of Flint and KWA is approved. Effective August 1, 2013. This document was signed by EM Mike Brown.

Emergency Manager Michael Brown: July 4, 2013 – October 8, 2013

19. **July 4, 2013** – Michael Brown appointed Emergency Manager under PA 436 of 2012.

20. **July 08, 2013** – The City retains Lockwood, Andrews & Newman engineering firm to get the City's water plant up and running while the KWA pipeline is built.

Emergency Manager Darnell Earley: October 8, 2013 – January 13, 2015

21. **October 8, 2013** – Darnell Earley appointed as Emergency Manager under PA 436 of 2012.

22. **February 19, 2014** – The KWA Board of Directors adopts Resolution 2014-01 and 2014-02, authorizing KWA to bond for water line construction on-behalf of the City of Flint.

23. **April 17, 2014** – Water service from DWSD officially ends. The City of Flint also conducts two separate public forums regarding the use of Flint River water, upgrades to the City's water system and the overall cost of the switch to KWA.

24. **April 25, 2014** – City conducts public event marking the transition to the use of Flint River water. DEQ information shows that transition complete by May 2015.

25. **January 2, 2015** – The City issues a press release stating the City water system exceeds the TTHM maximum contaminant level.

26. **January 9, 2015** – ELB Order #2015-1, Determination that Modification of Collective Bargaining Agreement Proposed by Emergency Manager Best Serves Interest of the Public (International Association of Firefighters Local 352)

Emergency Manager Gerald Ambrose: January 13, 2015 – April 29, 2015

27. **January 13, 2015** – Gerald Ambrose appointed Emergency Manager under PA 436 of 2012.

28. **March 3, 2015** – Flint EM Jerry Ambrose provides a memorandum to Deputy State Treasurer Wayne Workman stating that a reconnection to DWSD will cost the City $10.1M/year and that water purchases could be as high as $1M/month.

29. **March 12, 2015** – Veolia issues the final operational evaluation of the City's water system.

30. **April 29, 2015** – ELB Order #2015-2, Order of Approval of Emergency Loan, ($7,000,000)

31. **April 29, 2015** – Financial emergency resolved. Gerald Ambrose vacates Emergency Manager position and Governor appoints a Receivership Transition Advisory Board.

Post Emergency Manager Status (Flint RTAB): April 29, 2015 - Present

32. **September 3, 2015** – MDEQ testing of the City's water shows TTHM levels are below the required action level.

33. **September 25, 2015** – Genesee County Health Department and the City of Flint issues a lead advisory for residents to be aware of lead levels in drinking water after hearing concerns from the medical community.

34. **October 16, 2015** – The City of Flint reconnects to Detroit Water.

35. **November 4, 2015** – The EPA issues its final report on high lead levels at three residences in the City.

> >
> > We are still working towards procuring coverage on a go forward basis for professional liability. In the meantime we do need to take advantage of the extended reporting period (ERP) on the expiring policy. If you want to elect the ERP, which gives you an additional 12 months to report any incident that occurred during the policy period that expired on 12-18-2015 we need to act quickly. Attached is an invoice for that coverage.

Please let us know if you wish to take advantage

Thanks
Steve

Subject: RE: Professional Liability claim

Darnell;

Attached is the policy that was requested. With respects to the renewal here is where we stand.

The current carrier ACE has non-renewed the first layer of coverage (initial $1M) and the market is turning with respects to covering any prior acts before the renewal. The excess carrier Ironshore is also unwilling to renew the second layer ($2M). Both have stated the Flint water situation is making them uncomfortable to continue offering coverage at any price. (You will have the option to purchase extended reporting which I will describe later in a paragraph below)

With the City of Flint making National headlines the marketplace is tightening up and unwilling to offer coverage with any prior acts. This means we cannot purchase a policy at this point that will cover any potential claim (act) that will provide coverage prior to 12/18/2015. We are searching the marketplace for a carrier that will consider writing a new policy going forward only. That will be the most cost effective way to go, albeit you will have potential exposure for a prior act. But remember it is our understanding that PA 436 (attached) affords protection for you if you are unable to procure a policy.

Our marketing was also delayed in this endeavor as during these efforts it came to our attention the current DPS broker, who we believe is AON, was searching for coverage thus blocking certain markets for us to approach. That further delays the process when two brokers are going to the same carriers. We do not know what the outcomes from that research yielded but it is preventing us from accessing those declinations or proposals. On top of this we do not know the parameters discussed with the carriers by the AON? Were they looking for prior acts or a policy just going forward? This could make a significant difference in what carriers will think or be willing to offer.

We would respectfully ask you to consider one broker to obtain the coverage for you as the insurance industry becomes muddled and slow with more than one broker going to the same carrier(s). Only one broker is going to get a proposal or declination and the other will have to ask for a release from you to obtain access to the carrier(s). We are comfortable with any decision you make as the ultimate goal is to get coverage for you.

With respects to the expiring policies they do provide for an extended reporting period of 12 months from the expiration date of 12/18/2015. The cost for the extended period is $1,118 for the first layer ($1 M) and $4,100 for the second layer ($2M). We would advise taking advantage of this option as it will give you another 12 months to present claims incurred prior to 12/18/2015, which would include time spent in Flint and

DPS. We have 30 days to decide whether to accept the offer for the extension. Just let us know.

We know this is last minute, but the delay in getting the renewal information, the complexity of the Flint issue and the current DPS broker blocking the markets hindered our ability to have quotes presented on a timely basis. Please let us know how you would like us to proceed as we are blocked at our other markets.

Regards,

Steve

> We have reviewed the policy for Professional Liability and the denial on the claim for Melisa Mays et al. The suit involved a number of families who are alleging that due to the toxic nature of the City of Flint water system they have suffered bodily injuries (i.e. high levels of copper and lead causing among other things, neurological and autoimmune disorders). Professional Liability policies are written to protect the insured from decisions that cause financial harm and not bodily injury or pollution arising from the decision. Bodily injury and pollution coverage are generally afforded under separate General Liability policies and/or a Pollution Liability policy.
>
> The coverage under your professional policy has specific exclusions for decisions that cause alleged bodily injury or pollution. There is no alleged monetary loss due to the decision of converting the water system (increased monetary costs to the plaintiff's by switching the systems) from Detroit to Flint only that families have suffered alleged bodily injury or property damage due to pollutants in the system. We have calls into the City of Flint notifying them that they need to have their General Liability or Pollution policies respond to the allegations.

Your professional policy has responded to other claims that have been submitted with respects to decisions that have caused alleged financial harm.

We are available for further conversations on this matter

Regards,
Steve

Tom

A Flint city attorney confirmed that it is Ordinance Section 46-52.1 date of April 15 by which the Finance Director shall calculate and transmit to the Mayor and City Council the new water rate schedules. Let me know if you need any further information.

Did you guys go back to the court ruling to confirm whether the operative date re fee increases is April or Dec 31. It would be helpful if we could know that by the end of today.

Hello Fred,

I am reviewing the latest COA opinion for Kincaid v. Flint. I am troubled by the court's holding that no EM actions taken under PA 4 "survive[d] the electors' referendum of that Act" (p8). What about the 19(1)(k) actions taken under PA 4?

Both Flint and Pontiac have enormous OPEB liabilities to honor if the 19(1)(k) actions are no longer effective.

--Drew

STATE OF MICHIGAN

COURT OF APPEALS

WILLIAM SCOTT KINCAID, ERAINA POOLE, GEORGE POOLE, and MARY BELL,

Plaintiffs-Appellants,

v

CITY OF FLINT,
a municipal corporation.

Defendant-Appellee.

FOR PUBLICATION
June 11, 2015
9:10 a.m.

No. 318906
Genesee Circuit Court
LC No. 12-098490-CZ

Before: DONOFRIO, P.J., and BORRELLO and STEPHENS, JJ.

STEPHENS, J.

Plaintiffs, all residents of the defendant, appeal as of right the order of the circuit court granting defendant's motion for summary disposition and denying plaintiffs' motion to amend their complaint. We reverse and remand.

I. BACKGROUND

On August 15, 2011, the defendant's finance director, Michael Townsend sent a notice of a proposed 3.5% water and sewerage rate increase to be effective September 16, 2011, to the city council and mayor. The increase was proposed to meet a projected fiscal year deficit in the water fund of $14,789,666 as well as a sewer fund deficit of $8,078,917. Council adopted the proposal and the mayor signed it.

Shortly thereafter defendant was declared to be in a state of financial emergency.[1] On November 28, 2011, Governor Rick Snyder appointed Michael Brown as the Emergency Manager (EM) of defendant under the Emergency Manager Law, Public Act 4 of 2011.[2] On

[1] MCL 141.1545, former MCL 141.1214 lists the four instances in which a financial emergency exists.

[2] Former MCL 141.1501 *et seq.*; At the time, former MCL 141.1515(4) provided the Governor with the authority to appoint an emergency manager:

May 5, 2012, after being informed by newly appointed finance director Gerald Ambrose of the financial disarray of the water and sewer funds for defendant, EM Brown created Emergency Order No. 31. Order No. 31 ratified and confirmed the water and sewer rates implemented under Townsend on September 16, 2011, and additionally raised water and sewer rates, 12.5% and 45%, respectively.

After the Emergency Order by Brown, plaintiffs in this suit filed a complaint seeking this Court's original jurisdiction pursuant to Const 1963, art 9, §§ 31-32. The claim of error in that case was that defendant violated the Headlee Amendment[3]. This Court dismissed plaintiffs' claims without a hearing, finding that the rate increases from September of 2011 and those set to take place in July of 2012 were "revisions of existing user fees that do not implicate the Headlee Amendment." Plaintiffs' claims not relating to the Headlee Amendment were dismissed for lack of original jurisdiction. *Kincaid v Flint*, unpublished order of the Court of Appeals, entered June 29, 2012 (Docket No. 310221), lv den 493 Mich 871 (2012).

After the case before this Court was dismissed, plaintiff filed the instant action. The essence of the case was a claim that the rate increases in September of 2011 were made contrary to city ordinances: § 46-52.1.and § 46-57 and that the defendant had illegally pooled the funds collected for the water and sewer fund and used them to pay general obligations not related to sewer or water expenses. Plaintiffs requested that the trial court certify a class action suit against defendant for all sewer and water customers of defendant, declare that the rate increases were an illegal tax under the Headlee Amendment, and cease the co-mingling funds. Additionally, plaintiffs requested monetary relief in the form of a refund of the illegally collected rates and for damages caused to defendant's residents that were left without water and sewer service.

In lieu of filing an answer, defendant moved the trial court to grant it summary disposition pursuant to MCR 2.116(C) (6), (7), and (8). However, before defendant's motion for summary disposition was heard, plaintiffs moved the trial court for leave to amend their complaint asking for leave to allege a violation of MCL 123.131(2), (3).[4]

> Upon the confirmation of a finding of a financial emergency, the governor shall declare the local government in receivership and shall appoint an emergency manager to act for and in the place and stead of the governing body and the office of chief administrative officer of the local government.

[3] Specifically, the Headlee Amendment to the state constitution provides standing to "[a]ny taxpayer of the state" to bring suit in this Court to enforce the tax provisions of §§ 25 to 31.

[4] MCL 123.141(2), (3), states:

> (2) The price charged by the city to its customers shall be at a rate which is based on the actual cost of service as determined under the utility basis of rate-making. This subsection shall not remove any minimum or maximum limits imposed contractually between the city and its wholesale customers during the remaining life of the contract. This subsection shall not apply to a water system

Defendant responded to plaintiffs' motion to amend their complaint by arguing that it should be denied as futile. On February 15, 2013, the trial court heard the two outstanding motions. On June 21, 2013, the trial court entered an opinion and order granting summary disposition in favor of defendant. On July 12, 2013, plaintiffs moved the trial court to reconsider its decision to which the court entered an order permitting defendant to respond to plaintiffs' motion for reconsideration. The court denied the motion on October 14, 2013. Plaintiffs now appeal the order granting defendant summary disposition.

During the pendency of this case in the trial court, Public Act 4 of 2011 was rejected by a majority of the electorate causing its repeal.[5] One month later on December 26, 2012, the Legislature approved the Local Financial Stability and Choice Act, Public Act 436 of 2012,[6] effective March 28, 2013.[7] Many of the provisions of Public Act 436 of 2012 mirror those of Public Act 4 of 2011.

II. STANDARD OF REVIEW

The trial court ordered summary disposition under (C)(8) and the parties base their arguments on that subsection before this Court, but our review of the record shows that the trial court went beyond the pleadings in making its decision as did both parties in making their arguments. Plaintiffs' response to defendant's motion for summary disposition relied on 16 exhibits. Plaintiffs also moved for summary disposition themselves and cited exhibits outside the pleadings. The analysis of this case therefore will be done under MCR 2.116(C)(10). See *Cuddington v United Health Servs, Inc*, 298 Mich App 264, 270; 826 NW2d 519 (2012)

> that is not a contractual customer of another water department and that serves less than 1% of the population of the state. This subsection shall take effect with the first change in wholesale or retail rate by the city or its contractual customers following the effective date of this subsection. Any city that has not adjusted rates in conformity with this subsection by April 1, 1982 shall include in the next ensuing rate period an adjustment to increase or decrease rates to wholesale or retail customers, so that each class of customer pays rates which will yield the same estimated amount of revenue as if the rate adjustment had been retroactive to April 1, 1982. A city that is subject to section 5e of Act No. 279 of the Public Acts of 1909, being section 117.5e of the Michigan Compiled Laws, shall begin proceedings to determine rate changes pursuant to section 5e(b) of Act No. 279 of the Public Acts of 1909, being section 117.5e of the Michigan Compiled Laws.
>
> (3) The retail rate charged to the inhabitants of a city, village, township, or authority which is a contractual customer as provided by subsection (2) shall not exceed the actual cost of providing the service.

[5] The state board of canvassers certified the vote on November 26, 2012. Public Act 72 of 1990 came back into effect while the referendum on Public Act 4 of 2011 was pending.

[6] MCL 141.1541 *et seq.*

[7] Public Act 436 of 2012 repealed Public Act 72 of 1990, effective March 28, 2013.

("[B]ecause the trial court considered documentary evidence beyond the pleadings, we construe the motion as having been granted pursuant to MCR 2.116(C)(10).").

"This Court reviews decisions on motions for summary disposition de novo to determine if the moving party was entitled to judgment as a matter of law." *Alcona Co v Wolverine Environmental Prod, Inc*, 233 Mich App 238, 245; 590 NW2d 586 (1998), lv den 461 Mich 854 (1999). A motion for summary disposition pursuant to MCR 2.116(C)(10) "tests the factual sufficiency of the complaint." *Joseph v Auto Club Ins Assoc*, 491 Mich 200, 206; 815 NW2d 412 (2012), reh den 815 NW2d 491 (2012). "In evaluating a motion for summary disposition brought under this subsection, a trial court considers affidavits, pleadings, depositions, admissions, and other evidence submitted by the parties, MCR 2.116(G)(5), in the light most favorable to the party opposing the motion." *Maiden v Rozwood*, 461 Mich 109, 120; 597 NW2d 817 (1999). Summary disposition is proper where there is no "genuine issue regarding any material fact." *Id.* A party opposing a motion made pursuant to MCR 2.116(C)(10) has "the burden of showing that a genuine issue of disputed fact exists." *Major v Auto Club Ins Assoc*, 185 Mich App 437, 440; 462 NW2d 771 (1990), lv den 437 Mich 923 (1991) (citations omitted). The opposing party may not rest upon mere allegations or denial in the pleadings, but must, by affidavit or other documentary evidence, set forth specific facts showing that there is a genuine issue for trial. *Id.* (citations omitted).

This Court also reviews issues of statutory interpretation de novo. *Allen v Bloomfield Hills Sch Dist,* 281 Mich App 49, 52; 760 NW2d 811 (2008).

> When interpreting a statute, we follow the established rules of statutory construction, the foremost of which is to discern and give effect to the intent of the Legislature. The first step when interpreting a statute is to examine its plain language, which provides the most reliable evidence of [legislative] intent. If the language of a statute is clear and unambiguous, the statute must be enforced as written and no further judicial construction is permitted. When an ambiguity does indeed exist, we may go beyond the statutory text to ascertain legislative intent. Effect should be given to every phrase, clause, and word in the statute and, whenever possible, no word should be treated as surplusage or rendered nugatory. [*People v. Carrier*, ___ Mich App ___; ___ NW2d ___ (2015); slip op at 6-7 (citations and quotation marks omitted).].

III. CLAIMS OF ERROR

Plaintiffs' claims of error are two: that water and sewer rate increases that occurred under Townsend in September 2011were not authorized by Flint Ordinances and that EM Brown did not have the authority to ratify Townsend's unauthorized increases and then further increase water and sewer rates in violation of the same ordinances.

A. ORDINANCE VIOLATIONS

The City of Flint Ordinances that plaintiffs claim were violated are:

Ordinance 46-52.1

(a) Every year the Director of Finance shall calculate and transmit on or before April 15, to the Mayor and City Council the new water rate schedules with a complete itemization of water system costs for all classes of customers as given in § 46-52, for the purpose of calculating all bills for the forthcoming 12 months beginning July 1 of that year. The new water rate schedules shall be published at least 30 days prior to the date of implementation.

(b) Water rates shall be reviewed annually and the water percentage index (WRI) as applied to the water rate schedules shall be limited to an adjustment of 8% in any year unless:

(1) Such an adjustment is necessary to provide for all costs of operation, maintenance, replacement and debt service of the water supply system; or

(2) Such an adjustment is necessary to comply with applicable provisions of the city's water supply revenue bond resolutions or ordinances.

and,

Ordinance 46-57.1

Every year the Director of Finance shall calculate and transmit on or before April 15, to the Mayor and City Council the new sewage rate schedules with a complete itemization of sewage system costs for all classes of customers as given in § 46-57, for the purpose of calculating all bills for the forthcoming 12 months beginning July 1 of that year. The new water rate schedules shall be published at least 30 days prior to the date of implementation.

Plaintiffs argue that the rate increases of September 2011 and those imposed by the EM failed to meet the notice and effective date requirements of the ordinances and exceeded the percentage of increase allowed under the ordinances. We agree in part.

The September 2011 35% water rate increase was in violation of Flint Ordinance 46-52.1 because it was not published and noticed at least 30 days prior to its implementation and went into effect almost immediately in September 2011 instead of being implemented over twelve months beginning on July 1 of the next fiscal year. The sewer rate increases were invalid for the same reasons under Ordinance 46-57.1. The sewer rates were not published and noticed 30 days prior to their implementation and were implemented soon after the finance director's recommendation instead of on July 1 of the next fiscal year.

Plaintiffs' argument that the increases also violated Ordinance 46-52.1 by increasing the water rates above 8% is not supported by the ordinance language. Ordinance 46-52.1 envisions that water rate increases be limited to an adjustment of 8%, but allows for uncapped increases in the event "the adjustment is necessary to provide for all costs of operation, maintenance,

replacement and debt service of the water supply system' or . . . to comply with applicable provisions of the city's water supply revenue bond resolutions and ordinances." The defendant's then finance director, Townsend, sent an August 2011 letter to Mayor Walling and City Council, providing justification for the amount of the increase. In that letter, Townsend stated that the water fund was operating at a $3.21 million loss and that the city was not meeting its state bond requirements to operate with revenues greater than 125% of the amount of debt service of the bonds. Townsend explained that the rate increases would help cover the rate increases the city paid to Detroit and the Drinking Water Revolving Fund Bonds. This Court has no basis to find those statements invalid. While the notice, publication and implementation of the water and sewer rate increases were not authorized, the percentage of increase for the rates was not a violation of the ordinances.

Plaintiffs challenge the EM's rate increases under Order No. 31 on the same basis as they challenged the September 2011 increases. However, EM Brown's water and sewer rate increases of 12.5% and 45% respectively, did not violate Flint Ordinances 46-52.1 and 46-57.1. On May 5, 2012, EM Brown published notice of the increases and that they were to be effective July 1, 2012. The Order complied with the notice, publication and implementation provisions of 46-52.1 and 46-57.1. Plaintiffs again argue that any increase in water rates over 8% is not authorized under 46-52.1, but as discussed above, the language of the ordinance does not support that argument. The language of Order No. 31 established both of the excepted instances in 46-52.1 that allow for an increase in water rates greater than 8%. The Order explained that defendant was required under MCL 141.121[8] to set sewer rates that were sufficient to cover the costs of operating the water and sewer systems and that Townsend's increase was insufficient to

---

[8] MCL 141.121, the Revenue Bond Act of 1933, provides in pertinent part:

(1) Rates for services furnished by a public improvement shall be fixed before the issuance of the bonds. The rates shall be sufficient to provide for all the following:

(a) The payment of the expenses of administration and operation and the expenses for the maintenance of the public improvement as may be necessary to preserve the public improvement in good repair and working order.

(b) The payment of the interest on and the principal of bonds payable from the public improvements when the bonds become due and payable.

(c) The creation of any reserve for the bonds as required in the ordinance.

(d) Other expenditures and funds for the public improvement as the ordinance may require.

(2) The rates shall be fixed and revised by the governing body of the borrower so as to produce the amount described in subsection (1). The borrower shall covenant and agree in the ordinance authorizing the issuance of the bonds and on the face of each bond to maintain at all times the rates for services furnished by the public improvement sufficient to provide for the amount described in subsection (1). Rates pledged for the payment of bonds that are fixed and established pursuant to a contract or lease shall not be subject to revision or change, except in the manner provided in the lease or contract.

meet defendant's obligation under state law. The Order stated that additional increases were necessary "to cover the costs of operating the water and sewer systems and pay outstanding bonded indebtedness on the water system."

B. RATIFICATION AUTHORITY OF THE EMERGENCY MANAGER

EM Brown not only increased water and sewer rates with the enactment of Order No. 31, but also purported to expressly ratify and confirm the September 16, 2011 rate increases. The issue of first impression for this Court is whether EM Brown was granted the authority to ratify the unauthorized acts of another public official. We conclude that the Legislature did not delegate the power to ratify to an emergency manager.

The EM is a creature of the Legislature with only the power and authority to do what is granted by statute. EM Brown derived his authority from the former Emergency Manager Law, PA 4 of 2011.[9] That authority was not as broad as defendant argues. We do not agree with defendant that Public Act 436 of 2012, the successor statute to PA 4 of 2011, ratified all the actions of the EM taken under PA 4. MCL 141.1570(1)(a)-(e), states that "[a]ll of the following actions that occurred under the former 2011 PA 4" became effective under 2012 PA 436:

> (a) A determination by the state treasurer or superintendent of public instruction pursuant to a preliminary review of the existence of probable financial stress or a serious financial problem in a local government.
>
> (b) The appointment of a review team.
>
> (c) The findings and conclusion contained in a review team report submitted to the governor.
>
> (d) A determination by the governor of a financial emergency in a local government.
>
> (e) A confirmation by the governor of a financial emergency in a local government.

The actions taken by the state treasurer, the appointed review team and the governor remain effective and were not required to be re-approved with 2012 PA 436. Notably, actions taken by the EM are not included.

We also reject defendant's argument that an act of the EM is an act of the governor and that the EM derives power to ratify from the governor. Former MCL 141.1519(1)(dd) and (ee) state that an EM's authority is limited to the local level. An EM "[e]xercise[s] solely, for and on behalf of the local government," and "exercise[s] any power or authority of any officer, employee, department, board, commission, or other similar entity of the local government.

[9] Former MCL 141.1501 *et seq.*

whether elected or appointed, relating to the operation of the local government." MCL 141.1519(1)(dd), (ee). Thus, the EM acts in place of numerous persons, but they are all local government officials. Former 2011 PA 4[10] and 2012 PA 436[11] each provides that the governor may delegate his duties to the treasurer. Notably, there is no similar provision regarding the delegation of any authority to the EM. Rather, the EM serves at the pleasure of the governor.[12]

The EM's responsibilities and authority under former 2011 PA 4 are listed in former sections MCL 141.1515 through MCL 141.1530. Those provisions are similarly stated in sections MCL 141.1549 through MCL 141.1564 under 2012 PA 436. Of all the powers granted to the EM, ratification is not one of them. Ratification, in both the former 2011 PA 4 and 2012 PA 436, is explicitly granted to the actions of certain persons and entities. Under the former 2011 PA 4, "[a]ll proceedings and actions taken by the governor, the state treasurer, or a review team . . . are ratified and are enforceable as if the proceedings and actions were taken under this act, and a consent agreement entered into . . . is ratified and is binding and enforceable." Former MCL 141.1512(6). 2012 PA 436 contains nearly identical language:

> All proceedings and actions taken by the governor, the state treasurer, the superintendent of public instruction, the local emergency financial assistance loan board, or a review team under former 2011 PA 4, . . . are ratified and are enforceable as if the proceedings and actions were taken under this act, and a consent agreement entered into under former 2011 PA 4, . . . that was in effect immediately prior to the effective date of this act is ratified and is binding and enforceable under this act. [MCL 141.1544(6).]

The clear difference between 2011 PA 4 and 2012 PA 436 is that PA 436 adds "the superintendent of public instruction" and "the local emergency financial assistance loan board." Neither PA 4 nor PA 436 ratifies actions taken by the EM. Further, the EM's power to supersede local government authority does not extend to the state officers and entities listed above.[13] Consequently, the Legislature did not grant the EM the power of ratification, nor did the actions of the EM taken under 2011 PA 4 survive the electors' referendum of that Act.

Absent the power of ratification, defendant urges this Court to look elsewhere for the EM's authority to approve the unauthorized 2011 water and sewer rate increases. Defendant

---

[10] Former MCL 141.1515(10).

[11] MCL 141.1549(8).

[12] Former MCL 141.1515(5)(d); MCL 141.1549(3)(d).

[13] The EM's power is superior to and supersedes that of local government officials and entities. Former MCL 141.1519(1)(ee); MCL 141.1552(1)(ee). The EM does not usurp the authority of the superintendent of public instruction. See e.g. MCL 141.1554(c). The EM is not an appointed member of the financial assistance loan board or review team. Former MCL 141.1212; MCL 141.1544.

argues that the additional powers granted to an emergency manager in former MCL 141.1519[14] authorized the EM to raise water and sewer rates notwithstanding the ordinances. Under that section,

> An emergency manager may take 1 or more of the following additional actions with respect to a local government which is in receivership, notwithstanding any charter provision to the contrary:
>
> (a) Analyze factors and circumstances contributing to the financial emergency of the local government and initiate steps to correct the condition.

We are not persuaded by this argument. MCL 141.1519 applies in the instance where the EM, after having analyzed the factors and circumstances contributing to the financial emergency, *initiates* some action to alleviate the emergency. In other words, some affirmative act is required of the EM. "The word 'initiate' is a synonym of the word 'commence.' " *Fast Air, Inc. v. Knight*, 235 Mich App 541, 544; 599 NW2d 489 (1999) citing *Black's Law Dictionary* (5th ed). In turn, the plain and ordinary meaning of the word commence is "to begin; start," *The American Heritage Dictionary* (4th Ed 2006) and "begin" is defined as "to take the first step in performing an action." *Id.*[15] MCL 141.1519, then in effect, supported the 12.5% water and 45% sewer rates initiated by the EM after his appointment. Those increases were initiated after the EM was provided with information from his appointed finance director Gerald Ambrose of the operating losses of both the water and sewer systems and were implemented to correct those conditions. Although the EM had the authority to institute the change in rates notwithstanding any charter provision to the contrary under the former MCL 141.1519(1)(a), as discussed above, the increases complied with the notice, publication and implementation guidelines of city ordinances 46-52.1 and 46-57.1. MCL 141.1519(1)(a) however, does not support the action taken by the EM to expressly ratify and confirm the increases recommended by Townsend. In that instance, the EM did not "initiate" the steps to correct the condition by an affirmative act, but rather approved the steps already taken by someone else. Because the EM did not initiate those increases, MCL 141.1519(1)(a) does not apply.

In light of our analysis, we conclude that defendant violated its own ordinances, 46-52.1 and 46-57.1, by increasing water and sewer rates without first providing notice and publication to its residents thirty days prior and by not waiting to implement those rates until July 1 of the next fiscal year. We also conclude that Order No. 31 did not rectify the violations.

The trial court's grant of summary disposition to defendant was premised on its understanding of the EM's authority as broad, substantial and complete. Our decision today only highlights that authority for a closer look at the statutory boundaries of the EM's power.

---

[14] Now, MCL 141.1552.

[15] See *SBC v J.T. Crawford, Inc*, unpublished opinion per curiam of the Court of Appeals, issued November 27, 2007 (Docket No. 275334), p. 5.

Because we disagree with the trial court's conclusion that the EM had the authority to ratify, we reverse its order granting defendant summary disposition.

C. COMINGLING OF FUNDS

Next, this Court must consider whether the trial court properly summarily disposed of plaintiffs' claims regarding comingling of funds. Plaintiffs assert that defendant placed water and sewer rate fees from customers into a pooled cash account with other funds, used the water and sewer funds to pay general obligations of defendant in violation of the Revenue Bond Act of 1933, and that this practice led to a deficit in the water and sewer funds which precipitated the increases by Townsend and EM Brown. Plaintiffs' arguments rely entirely on the motion being granted pursuant to MCR 2.116(C)(8). Indeed, plaintiffs maintain that the trial court should not have considered the affidavit of Pamela Hill, a certified public accountant and auditor of defendant's financial statements, nor held it against plaintiffs for not providing any evidence to the contrary, because subrule (C)(8) requires the trial court to disregard evidence outside the pleadings. However, as has been discussed, this motion was granted pursuant to MCR 2.116(C)(10).

Plaintiffs argue that defendant illegally comingled funds. We find no merit to this claim. A party opposing a motion made pursuant to MCR 2.116(C)(10) has "the burden of showing that a genuine issue of disputed fact exists." *Major*, 185 Mich App at 440. The opposing party may not rest upon mere allegations or denials in the pleadings, but must, by affidavit or other documentary evidence, set forth specific facts showing that there is a genuine issue for trial. *Id.* (citations omitted). The record reveals that defendant provided evidence, in the form of an affidavit from Hill who was hired to audit municipalities, that defendant's accounting system was entirely legal and was used by several other municipalities. Plaintiffs assert that Hill's affidavit only evidences the practice of comingling without establishing the legality of the practice. While the trial court only mentioned the Hill affidavit in its order granting summary dismissal, it also had before it plaintiffs' exhibits in support of their response to defendant's motion for summary disposition which included an affidavit from city treasurer Douglas Bingaman. Bingaman's affidavit stated that the water and sewer funds were in a single pooled cash account, but that funds which state law required to be maintained separately were excluded. Further, that the "account is intended to have each City fund, including the water and sewer funds, end up paying only its own operating and other expenses." Bingaman's affidavit is evidence that defendant was following state law in regards to pooled cash accounts. It was also evidence that the water and sewer funds were not being used to pay the general obligations of defendant. Hill's affidavit averred knowledge of legal accounting practices that only certain accounts were excluded from being maintained in single pooled cash accounts and that water and sewer funds were not excluded. Hill further averred that, "each participating fund's share of the pooled cash account is accounted for," meaning that the water and sewer funds were also accounted for. In response, plaintiffs provided no evidence of defendant's accounting system being illegal. This Court's decision in *Major*, 185 Mich App 437, quite plainly requires plaintiffs to provide *some* evidence that there is a disputed issue of fact. This, plaintiffs did not do. As such, the trial court was required to determine that there was no genuine issue of material fact for trial, and properly granted summary disposition on this issue. *Id.*

III. MOTION TO AMEND

Plaintiffs last argue that it was error for the trial court to deny their request to amend their complaint. We agree.

"This Court reviews grants and denials of motions for leave to amend pleadings for an abuse of discretion." *Hakari v Ski Brule Inc*, 230 Mich App 352, 355; 584 NW2d 345 (1998). "There are circumstances where a trial court must decide a matter and there will be no single correct outcome; rather, there may be more than one reasonable and principled outcome. The trial court abuses its discretion when its decision falls outside this range of principled outcomes." *Pontiac Fire Fighters Union Local 376 v Pontiac*, 482 Mich 1, 8; 753 NW2d 595 (2008).

"A party may amend a pleading once as a matter of course within 14 days after being served with a responsive pleading by an adverse party." MCR 2.118(A)(1). "Except as provided in subrule (A)(1), a party may amend a pleading only by leave of the court or by written consent of the adverse party. Leave shall be freely given when justice so requires." MCR 2.118(A)(2). "Because a court should freely grant leave to amend a complaint when justice so requires, a motion to amend should ordinarily be denied only for particularized reasons." *Wormsbacher v Phillip R Seaver Title Co*, 284 Mich App 1, 8; 772 NW2d 827 (2009), lv den 485 Mich 927 (2009). Those reasons include undue delay, bad faith or dilatory motive, repeated failure to cure deficiencies by amendment previously allowed, undue prejudice, or where amendment would be futile. *Miller v Chapman Contracting*, 477 Mich 102, 105; 730 NW2d 462 (2007). Further, MCR 2.116(I)(5) states that when the trial court summarily disposes of a case under subrules (C)(8), (C)(9), or (C)(10), the trial court "shall give the parties an opportunity to amend their pleadings as provided by MCR 2.118, unless the evidence then before the court shows that amendment would not be justified."

The trial court's reason for denying plaintiffs' motion to amend their complaint was that the "proposed amended complaint is in conflict with this decision." The fact that an amended complaint would present issues at odds with the trial court's decision does not appear to be an accepted particularized reason. A court must specify its reasons for denying the motion; a failure to do so requires reversal, unless amendment would be futile. *Noyd v Claxton, Morgan, Flockhart & Vanliere*, 186 Mich.App 333, 340; 463 NW2d 268 (1990). Because we cannot discern on what basis the trial court denied plaintiffs' motion to amend their complaint, we remand this issue to the trial court. On remand, the trial court is to consider the additional claims in plaintiffs' proposed amended complaint and articulate its reasons for granting or denying the motion.

Reversed and remanded for proceedings consistent with this opinion. We do not retain jurisdiction.

PRELIMINARY INJUNCTION

At a Session of Said Court
Held in the Courthouse
On the 7th Day of August, 2015

PRESENT HONORABLE ARCHIE L. HAYMAN, CIRCUIT COURT JUDGE

THIS MATTER, having come on to be heard by Plaintiffs' Motion for Issuance of a Preliminary Injunction, the City of Flint having responded thereto, the Court having read the same and taken testimony and received exhibits into evidence, in Open Court, and being otherwise duly advised in the premises;

IT IS THEREFORE ORDERED AND ADJUDGED that Plaintiffs' Motion for Issuance of a Preliminary Injunction be and the same is hereby **GRANTED** for the reasons stated on the Record in Open Court, which include the following reasons:

1. The September 16, 2011 35% water and sewer rate increases, that have been collected by the City of Flint between September 16, 2011 and the date hereof, were not implemented in conformity with Flint City Ordinances 46 – 52.1 and 46 – 57.1.
2. The water readiness to serve charges that have been collected by the City of Flint from September 16, 2011 to the date hereof are not calculated nor authorized in accordance with Flint City Ordinance 46 – 52.
3. The July 1, 2012 12.5 % water rate increase and 45% sewer rate increase implemented by Emergency Manager Michael Brown under Public Act 4 of 2011 became void with the electors' referendum/rejection of Public Act 4 of 2011.
4. Following the rejection of Public Act 4 of 2011 there was no Order signed by any later Flint Emergency Manager that adopted or implemented the September 16, 2011 water and sewer rate increases and the July 1, 2012 water and sewer rate increases.
5. The liens placed against the real property of the City of Flint's delinquent water and sewer customers were due to delinquencies caused by the September 16, 2011 and July 1, 2012 water and sewer rate increases and the charging of the water readiness to serve charge from September 16, 2011 to the date hereof.

6. The City of Flint has disconnected the water service for its delinquent water and sewer customers due to their failure to pay delinquencies caused by charges related to the September 16, 2011, July 1, 2012, water and sewer rate increases, and water readiness to serve charges.

IT IS FURTHER ORDERED AND ADJUDGED that the City of Flint, its agents, employees, servants, attorneys, and those other persons in active concert or participation with it, be and the same are hereby **ENJOINED** from the following actions, until further Order of This Court:

1. Charging and collecting a water readiness to serve charge, also known as the water service charge from its water and sewer customers until it comes into compliance with Flint City Ordinance 46 – 52.
2. Charging and collecting water and sewer rates that include the September 16, 2011 35% rate increases.
3. Disconnecting the water service for its delinquent water and sewer customers wherein the delinquency arose between September 16, 2011 and the date hereof.
4. Placing any further liens against the real property of its delinquent water and sewer customers for delinquencies that occurred between September 16, 2011 and the date hereof.
5. Taking any monies from the Water Supply Fund, which include the water and sewer funds, and using those monies to pay general obligations.

IT IS FURTHER ORDERED AND ADJUDGED that no Security is required of Plaintiffs herein as this matter is in the public interest as the actions of the City of Flint that are being enjoined are actions that Defendant City of Flint has been engaged in since September 16, 2011, which violate its own Ordinances.

IT IS FURTHER ORDERED AND ADJUDGED that the parties are to meet and negotiate the repayment of 15.7 million dollars to the Sewer fund by the General Fund and are to return to this Court on November 13, 2015 if they are unable to reach agreement on the return of the 15.7 million dollars to the Sewer Fund.

The parties are to provide this Court with their proposals for repayment of the 15.7 million dollars to the Sewer fund, if they are unable to reach an agreement on the process of repayment of the 15.7 million dollars to the Sewer fund by the General Fund by October 31, 2015.

The City of Flint shall immediately establish funds for its water and sewer funds, also known as the Water Supply fund, that are in compliance with the Revenue Bond Act of 1933 as recited by the Court in open Court.

The Finance Department of Defendant City of Flint shall prepare a document/report that creates for this Court a history of the expenditures for the Sewer fund between 2007 and 2013 that reflects how those expenditures would have occurred if the 15.7 million dollars had not been transferred to the General Fund/Lawsuit Settlement Fund.

The issue of Emergency Manager Brown's July 1, 2012 12.5% water rate increase and 45% sewer rate increase is hereby preserved until the Court has reviewed the document/report prepared by the City of Flint's Finance Department.

IT IS FURTHER ORDERED AND ADJUDGED that the parties shall attend a Pre-Trial Conference for this case to be held on November 13, 2015 at 12:00 PM.

IT IS SO ORDERED

ARCHIE L. HAYMAN, P37516
CIRCUIT COURT JUDGE

The S E O C will be activated at 8 a.m. on Wednesday January 6, 2016 in response to the Flint water crisis and the Emergency Declaration made by Governor Snyder. An e mail was sent to all primary S E M C's this afternoon requesting your agency's participation in a mandatory briefing which will be conducted at the S E O C at 9 a.m. on Wednesday January 6, 2016. Please coordinate within your agency to assure that a representative will be at this briefing.

This message is from the Michigan State Police Alert Notification System and is For Official Use Only.

Flint

Weekly Phone Call

01/06/16

Present on call:

Mayor Weaver, (Flint)
N. Henderson (Flint)
Council President Nelson (Flint)
F. Headen (Treasury)
W. Lamphier (Treasury)
P. Dostine (Treasury)
E. Cline (Treasury)
A. Heimann (Treasury)

Not present:

R. Byrne (Treasury)

1. Water Update:

Governor has declared a state of emergency regarding Flint's water

- GIS Mapping/Scope of issue
  - Will be documenting all lines that are made of lead (likely) so that they can have an accurate scope of the issue, and better prioritize replacements when funding becomes available
  - Will also look at the age of the infrastructure
- Health Department will be adding a nutrition component to the State of Emergency declaration

Water rate

- According to the city, their water rates adjustment schedule is that the rates need to be determined by "April at some point" was not sure of the exact day in April
- Will be considering this after their audit is completed, but do intend to examine it.

KWA Connection

- *Temporary line may not be necessary, have been discussing a plan where* "city and county would back up each other"
  - This plan would solve the problem of not having to have the Flint River as a backup water supply
  - Will also be significantly more expensive than the original plan to create a temporary pipeline to the city that will go to waste afterwards

DPW Recruitment

- Have met with two recruiters, and will be going with "Joyce" from the MML
- Will be changing the proposal slightly for recruitment, the original proposal was too minimal, and the new proposal will be more expensive
- Could take 120 days to find a candidate, but the city is optimistic that it will happen sooner

Legal fees

- Treasury sent a letter notifying the city that they (the Treasury) will be paying 75% of legal fees associated with the Spears Kincaid lawsuit.
- City will start to send us invoices shortly

Corrosion control

- No issues with the corrosion control so far, have seen significant decreases in the quantity of lead in the water

2. Other issues

City Council Meetings - Had a City Council special meeting on the 30th and regular meeting on the 21st

- Special meeting on the 30th of December
    - Judge wanted to City Council to approve a fund transfer from 2008
    - If the RTAB approves this action, the city believes that the judge will not force the city to transfer this money back

Question about PA 436 and Councilor Eric Mays

- City Council President Nelson wanted to know if the RTAB has the capacity to act on removing Councilor Mays considering he is going to be serving a prison sentence
- F. Headen suggested that this was a matter for the City Council to address, and suggested that most cities have a provision to remove a Councilor.
- The City then noted that they would explore that matter internally.

Follow-up questions from the RTAB

- RTAB member (not named) sent follow-up questions to N. Henderson that weren't returned
- N. Henderson had difficulty finding the questions in her email, but after getting them forwarded to her from E. Cline she suggested that all of these questions had been thoroughly addressed in materials that were already sent.
- She will be following up with the individual, and will send responses to her direct questions to all RTAB members so that everyone will have them.

All:

I attended the briefing at the SEOC regarding the Flint Water Crisis, Randy Byrne also attended. The briefing included a lot of details regarding actions already taken by the City, County, and State and to establish the resources necessary to move forward to get the issue fixed. MSP-EMHSD has taken the lead along with several other state agency EMC and PIO's, at this time Treasury is not part of the incident command plans but they will call on us if needed. After the meeting, Randy Byrnes informed me of the RTAB that is in place with the City of Flint and I shared with MSP, Chris Kelenske and Tony Katarsky, they appreciated having knowledge of the RTAB and feel that will work its daily course and not play at this time in the EM plan. If you have any questions let me know.

Subject: URGENT - SEOC Activation

On January 4, 2016, Genesee County requested that a "State of Emergency/Disaster" be issued by Governor Snyder. Today, the Governor issued a State of Emergency declaration.

EMHSD will activate the SEOC tomorrow at 0800 and will conduct a briefing at 0900 on the event. All state agencies are to send a representative to the 0900 briefing. MDHHS and MDEQ have been directed to brief on the situation. Following initial SEOC briefings, each state agency, in consultation with the State Director, must determine if they need to play a role in ongoing SEOC operations to contribute to addressing the problem. At minimum, MDEQ, MDHHS, Education, DTED, DTMB, and MDARD should maintain a presence in the SEOC. The initial focus of the SEOC will be to:

- Identify and implement any needed protective actions to protect public health and safety;
- Develop situational awareness;

- Develop understanding of technical aspects;
- Coordinate damage assessment;
- Coordinate public information; and
- Identify programs to assist in remediating damage.

If you require anything in the interim, please contact me by email or cell (517-242-5371).

Importance: High

All,

Attached please find a **DRAFT** Executive Order that would establish the Flint Water Interagency Coordinating Committee. The goal of the executive order is to establish a coordinating committee that will allow state and local officials the opportunity to communicate and collaborate on both short-term and long-term response and recovery efforts to address the Flint water issues. The coordinating committee would be housed within MSP and chaired by Harvey Hollins and Captain Chris Kelenske of MSP (who leads state emergency response efforts). The impacted departments are MSP, DEQ, DHHS, LARA, Treasury, and MDE.

Please review and advise of any suggested edits, corrections or questions by C.O.B. today. You may share this with relevant staff, as necessary, but please maintain confidentiality as this document is only a draft.

Thank you,

Paul C. Smith

EXECUTIVE ORDER
No. 2016 – xxx

CREATION OF
FLINT WATER INTERAGENCY COORDINATING COMMITTEE

MICHIGAN DEPARTMENT OF STATE POLICE

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, Section 2 of Article V of the Michigan Constitution of 1963 empowers the Governor to make changes in the organization of the Executive Branch or in the assignment of functions among its units that he considers necessary for efficient administration; and

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint switched its water source to the Flint River causing the Governor to issue a proclamation declaring a state of emergency on January 5, 2016; and

WHEREAS, the Flint Water Advisory Task Force was formed as an independent advisory task force charged with reviewing actions regarding water use and testing in Flint; and

WHEREAS, the Flint Water Advisory Task Force has made an interim recommendation that the state government should coordinate a sustained, public-health focused response to remedy, to the fullest extent possible, the impacts on the Flint community; and

WHEREAS, multiple state departments and local authorities share the responsibility for ensuring the restoration of safe drinking water and the coordination of efforts to address the consequences resulting from the presence of elevated lead levels in drinking water; and

WHEREAS, restoring safe drinking water and addressing the consequences of elevated lead levels in drinking water will require collaboration and communication between state departments, local governments, and subject matter experts; and

WHEREAS, the establishment of a Flint Water Interagency Coordinating Committee within the Department of State Police will facilitate the collaboration and communication between state departments, local governments, and subject matter experts necessary to effectively coordinate a response and recovery effort;

NOW, THEREFORE, I, Richard D. Snyder, Governor of the state of Michigan, by virtue of the power and authority vested in the Governor by the Michigan Constitution of 1963 and Michigan law, order the following:

I. CREATION OF THE FLINT WATER INTERAGENCY COORDINATING COMMITTEE

A. The Flint Water Interagency Coordinating Committee ("Coordinating Committee") is created as an advisory body within the Department of State Police (the "Department").

B. The Coordinating Committee shall be composed of the following sixteen members who shall serve an initial term expiring on December 31, 2018.

- The Director of Office of Urban Initiatives within the Executive Office of the Governor;
- The Deputy State Director of Emergency Management and Homeland Security within the Michigan Department of State Police;
- The Director of the Department of Environmental Quality, or his or her designee;
- The Director of the Department of Health and Human Services, or his or her designee;
- The Director of the Department of Licensing and Regulatory Affairs, or his or her designee;
- The State Treasurer, or his or her designee;
- The Superintendent of Public Instruction, or his or her designee;
- The elected Mayor of the City of Flint who shall be appointed to the Coordinating Committee by the Governor;
- Two additional representatives of the City of Flint who shall be submitted by the Mayor of the City of Flint and appointed to the Coordinating Committee by the Governor;
- Three representatives of Genesee County who shall be submitted by the Genesee County Board of Commissioners and appointed to the Coordinating Committee by the Governor;
- Three subject matter experts who shall be appointed to the Coordinating Committee by the Governor.

After the initial appointments, members of the Coordinating Committee appointed under this subsection shall serve terms of three years.

C. A vacancy on the Coordinating Committee occurring other than by expiration of a term shall be filled in the same manner as the original appointment for the balance of the unexpired term. A member may continue serving until his or her successor is appointed. A member may serve successive terms if reappointed.

II. CHARGE TO THE COORDINATING COMMITTEE

A. The Coordinating Committee shall act in an advisory capacity to the Governor and subject to the Governor's review and approval, shall do all of the following:

1. Create an incident action plan designed to assist state and local authorities in restoring safe drinking water to the residents of the City of Flint and addressing the consequences of elevated lead levels in drinking water.

2. Review recommendations made by the Flint Water Advisory Task Force and propose statutory, regulatory or contractual actions necessary for implementation of such recommendations.

3. Identify staff with competencies in emergency planning, operations, and finance as outlined under the National Incident Management System (NIMS) to work with the Coordinating Committee to track resource requests and document progress on the incident action plan.

4. Establish a standard process for sharing pertinent information between all members including use of the NIMS and Unified/Incident Command as appropriate.

5. Establish routine communications protocols at the local, executive and legislative levels as appropriate.

6. Establish a public information protocol to effectively inform the community.

7. Make recommendations for acceptable standards for potable water.

8. Make recommendations regarding the health impacts for the affected population.

9. Assess the status of infrastructure and determine feasible actions to upgrade the water system.

10. Establish subcommittees among its members to specifically address, at a minimum, each of the three following topic areas: Water Quality, Community Health, and Education.

11. Assist the Governor and the Department in implementing appropriate operations permitted under the Michigan Emergency Management Act or the federal Stafford Disaster Relief and Emergency Assistance Act, including local emergency operations plans and guides.

12. Explore any avenues of funding for response and recovery efforts including federal grants, legislative appropriations, and private partners.

B. The Coordinating Committee shall provide other information or advice as requested by the Governor or the Department.

III. OPERATIONS OF THE COORDINATING COMMITTEE

A. The Coordinating Committee shall be staffed and assisted by personnel from the Department as directed by the Department Director. Any budgeting, procurement, and related management functions of the Coordinating Committee shall be performed under the direction and supervision of the Department Director.

B. The Director of Office of Urban Initiatives within the Executive Office of the Governor and the Deputy State Director of Emergency Management and Homeland Security shall

together serve as the Statewide Coordinators responsible for the administrative functions of the Coordinating Committee.

C. The Coordinating Committee may utilize subcommittees and advisory panels composed of its members to assist in completing the functions of the Coordinating Committee. The Coordinating Committee may request public participation on advisory panels as the Coordinating Committee deems necessary.

D. When making recommendations to the Governor, a majority of the serving members of the Coordinating Committee must concur.

E. The Coordinating Committee shall meet at the call of either of the Statewide Coordinators and as may be provided in procedures adopted by the Coordinating Committee.

F. The Coordinating Committee may, as appropriate to perform its duties, make inquiries, conduct studies, consult with outside experts, and receive comments from the public.

G. Members of the Coordinating Committee shall serve without compensation but may receive reimbursement for necessary travel and expenses according to relevant statutes and the rules and procedures of the Civil Service Commission, and the Department of Technology, Management and Budget, subject to available funding.

H. The Coordinating Committee may accept donations of labor, services, or other items of value from any public or private agency or person. Any donations shall be expended in accordance with applicable laws, rules and procedures.

I. Members of the Coordinating Committee shall refer all legal, legislative, and media contacts to the Department.

J. A writing prepared, owned, used, in the possession of, or retained by the Coordinating Committee in the performance of an official function is subject to the Freedom of Information Act, 1976 PA 442, as amended, MCL 15.231 to 15.246.

IV. MISCELLANEOUS

A. All departments, committees, commissioners, or officers of this state or of any political subdivision of this state may give to the Coordinating Committee, or to any member or representative of the Coordinating Committee, any necessary assistance required by the Coordinating Committee, or any member or representative of the Coordinating Committee, in the performance of the duties of the Coordinating Committee so far as is compatible with its, his or her duties.

B. Any suit, action, or other proceeding lawfully commenced by, against, or before any entity affected under this Order shall not abate by reason of the taking effect of this Order.

C. The invalidity of any portion of this Order shall not affect the validity of the remainder of the Order.

The Executive Order shall become effective upon filing.

Given under my hand and the Great Seal of the state of Michigan this _____ day of January, in the year of our Lord, Two Thousand Sixteen

RICHARD D. SNYDER
GOVERNOR

BY THE GOVERNOR:

SECRETARY OF STATE

Robert, Carla M. (Treasury)

Subject: RE: Flint Water Interagency Coordinating Committee - DRAFT EO - Review and response requested by COB today.
Attachments: Flint Water Interagency Coordinating Committee - Revised Draft.docx

Attached is a revised version incorporating Harvey's suggestion.

The relevant paragraphs now read:

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint switched its water source to the Flint River

WHEREAS, the County of Genesee and the City of Flint have taken actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16th, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, the Flint Water Advisory Task Force was formed as an independent advisory task force charged with reviewing actions regarding water use and testing in Flint; and

WHEREAS, the Flint Water Advisory Task Force has made an interim recommendation that the state government should coordinate a sustained, public-health focused response to remedy, to the fullest extent possible, the impacts on the Flint community; and

WHEREAS, on January 5, 2016, the Governor issued a proclamation declaring a state of emergency in the County of Genesee and the City of Flint; and

Subject: Re: Flint Water Interagency Coordinating Committee - DRAFT EO - Review and response requested by COB today.

The following whereas statement implies the Governor declared and emergency absent any actions from the locals.

"WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint switched its water source to the Flint River causing the Governor to issue a proclamation declaring a state of emergency on January 5, 2016; and"

I suggest inserting some of the following language from the Governor's emergency declaration either in the whereas above or as a stand alone statement before this whereas:
"WHEREAS, from October 1, 2015 to this date, the County of Genesee and the City of Flint have taken a number of actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16th, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and"

Best,
Harvey

> Attached please find a **DRAFT** Executive Order that would establish the Flint Water Interagency Coordinating Committee. The goal of the executive order is to establish a coordinating committee that will allow state and local officials the opportunity to communicate and collaborate on both short-term and long-term response and recovery efforts to address the Flint water issues. The coordinating committee would be housed within MSP and chaired by Harvey Hollins and Captain Chris Kelenske of MSP (who leads state emergency response efforts). The impacted departments are MSP, DEQ, DHHS, LARA, Treasury, and MDE.

EMERGENCY MANAGER

Lincoln Park
Emergency Manager: Brad Coulter
Appointed: July 7, 2014
Exit: December 22, 2015

Recent Developments

- In FY15 the anticipated unassigned general fund balance was $186,901. In FY14 the unassigned general fund balance was a negative $1.0M.
- The police and fire pension millage failed 53% to 47%. The millage would have raised an additional $3M annually.
- MERS recently notified the city that its pension ARC is increasing from last year's amount of $2.2M to a current amount due of $3.9M. EM Coulter believes the city can only pay $3.16M. Treasury and the city are working with MERS to reach a resolution regarding annual contributions to the pension plan.

- The City Council hired a law firm to prepare a complaint against the pension funds' actuary. The city believes that the actuary did not properly advise the city regarding long-term financial sustainability of the pension system. The May 2015 actuarial analysis showed pension funding at 23% for Police and Fire and 20% for MERS. The city paid the required ARC each year, yet the funding levels were reduced to critical levels.

- A collective bargaining agreement with the Technical and Professional Office Workers Association of Michigan was approved by the Treasurer and became effective on November 1, 2015. The city eliminated retiree healthcare and reduced employee paid time off.

Significant Actions/Issues

- On August 10, 2015, the Lincoln Park Retiree Association filed suit against the state, Treasury, and the City of Lincoln Park regarding the reduction of city retiree healthcare.

FINANCIAL REVIEW COMMISSION (FRC)

Detroit

FRC Created: November 12, 2014

FRC Members: Nick Khouri, Bill Martin, Brenda Jones, Darrell Burks, John Roberts, Lorron James, Mike Duggan, Stacy Fox, Tony Saunders

Recent Developments

- The city expects to record a larger than expected surplus for FY15. For FY16, the city currently projects a $35M budget surplus.
- The FRC filed its second statutorily required biannual report on Detroit on November 24, 2015. The report detailed the FRC's activities to date and significant developments in the city's finances.
- The city's three police officers' unions have ratified amendments to their existing labor contracts to implement additional pay increases and other work rule changes. The additional cost is projected to be $41M over 4 years (FY16 - FY19) and will be paid for with savings from lower Exit Financing debt service, reallocating budgeted police capital expenses to old bond proceeds, and the elimination of vacant police assistant positions no longer deemed needed.
- The city's EM Orders are subject to revision or rescission by the City Council beginning on December 10, 2015. The city has informed the FRC that the City Council has decided not to modify these EM Orders at this time.
- On December 3, 2015, the DWSD and the GLWA achieved bondholder consent to transfer DWSD debt to GLWA.
- Moody's issued a report on December 7, 2015 indicating Detroit's economic and fiscal health are stronger a year after bankruptcy. Moody's noted the city's ongoing recovery is necessary to meet the challenge in funding its pension obligations from the General Fund starting in FY24. Moody's current rating on Detroit is "B2".

Significant Action/Issues

- The city has started developing its FY17 - FY20 financial plan. This will be the first budget since the EM's departure that Mayor and City Council will develop.

RECEIVERSHIP TRANSITION ADVISORY BOARD (RTAB)

Allen Park
RTAB Appointed: September 26, 2014
RTAB Members: Suzanne Schafer, Fredrick Frank, Karen Barann, Mark Wollenweber, Scott Lites

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $5.8M. In FY14 the unassigned general fund balance was $2.6M.
- Incumbent Mayor William Matakas defeated challenger Councilman Dennis Hays 62% to 38%.
- The road repair millage passed 52% to 48%. The millage will raise $1.4M in the first year.
- The city closed the bond tender refinancing related to the prior movie studio transaction on November 19, 2015. S&P rated the bonds "BBB."

Significant Actions/Issues
- On September 22, 2015, the Michigan Court of Claims granted the state's motion to dismiss the lawsuit brought by retirees of the City of Allen Park who challenged changes made to their healthcare by the former EM. The retirees may appeal this decision.

Benton Harbor
RTAB Appointed: March 10, 2014
RTAB Members: Larry Steckelberg, Bret Witkowski, Marvin Raglon, Sharon Hunt

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $3.1M. In FY14 the unassigned general fund balance was $2.2M.
- Mayoral challenger Marcus Muhammad defeated incumbent Mayor James Hightower 60% to 40%.
- Treasury has begun planning to reduce the RTAB's role.

Significant Actions/Issues
- The former Public Safety Director brought a lawsuit against the city and the former EM for wrongful termination.
- On August 3, 2015, the City Commission requested financial assistance from the Department of Treasury for legal fees and settlement costs associated with decisions made during the tenure of the EM.

Ecorse
RTAB Appointed: May 1, 2013
RTAB Members: Edward Koryzno, Robert Bovitz, Joan Brophy

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $2.7M. In FY14 the unassigned general fund balance was $2.1M.
- Incumbent Mayor Lamar Tidwell defeated challenger John Miller Jr. 59% to 41%.
- On November 25, 2015, the City Administrator submitted a revised 5-year financial plan. Treasury is in the process of reviewing.

Significant Actions/Issues

- MERS pension contributions are anticipated to increase from $1.8M in FY15 to $2.4M in FY16 due to accelerated funding for closed plans.

Flint

RTAB Appointed: April 29, 2015

RTAB Members: Frederick Headen, David McGhee, Beverly Walker-Griffea, Robert McMahan

Recent Developments

- Mayoral challenger Karen Weaver defeated incumbent Mayor Dayne Walling 56% to 44%.
- The Regional Flint Mass Transportation Authority millage passed 72% to 28%.
- The City Attorney has resigned effective December 31, 2015. A new City Attorney, when appointed, will need to be confirmed by the RTAB.
- On November 13, 2015, a complaint was filed in the U.S. District Court against State officials, City of Flint officials, and the former EM for the decision to utilize the Flint River as a water source for residents.
- On November 16, 2015, a Notice of Intent to Sue was filed in the U.S. District Court against state and City of Flint officials for violating the federal Safe Drinking Water Act requirements.
- Mayor Weaver declared State of Emergency on December 14, 2015.
- On August 7, 2015, a Genesee County Circuit Court lawsuit, Shears vs. Flint, invalidated a previous 35% increase in water and sewer rates, reverting back to 2011 rates. This injunction also requires the city to repay $15.7M from the General Fund to the Water Fund, prevents the city from collecting certain past due water bills, and from disconnecting water service for nonpayment. The city's appellate efforts to date have not been successful. The city has requested financial assistance related to the litigation regarding water issues.
- Kincaid vs. City of Flint litigation was held that the EM had no statutory authority to later ratify water and sewer rate increases from May of 2012. The city filed an appeal to the Michigan Supreme Court, but the Court did not address the appeal because the city missed the filing deadline by one day. The case has been remanded back to Genesee County Circuit Court to resolve outstanding matters.
- As a result of current review, the State Tax Commission notified the city it must maintain adequate assessment records. The city will be issuing an RFP for the reassessment of properties.

Significant Actions/Issues

- On September 11, 2015, Genesee County Circuit Court dismissed the Coalition for Clean Water vs. the City of Flint case to force the city to purchase water from the City of Detroit.
- The KWA pipeline is expected to be completed in June 2016. The pipeline is 80% complete, the two pump houses are 90% complete and the intake is completed.
- If the city loses a lawsuit over retiree healthcare, the EM's two-year budget does not assume an additional $5M to $6M projected annual expense.

Hamtramck
RTAB Appointed: December 18, 2014
RTAB Members: Deborah Roberts, Mark Stema, Karen Young, Albert Bogdan, Peter McInerney

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $3.3M. In FY14 the unassigned general fund balance was $2.6M.
- The city has developed a long-term capital improvements plan.

Significant Actions/Issues
- A suit was filed in federal court by Hamtramck retirees over changes to healthcare benefits made in October 2014. The potential exposure to the city is currently unknown.
- The annual pension liability is anticipated to increase from $3.5M in FY15 to $4.3M by FY19. This increase is a result of closing certain pension plans and the MERS policy of accelerating the required contribution for closed plans. The increases were included in the EM's two-year budget.

Pontiac
RTAB Appointed: August 19, 2013
RTAB Members: Edward Koryzno, Keith Sawdon, Robert Burgess, (one appointment pending)

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $9.9M. In FY15 the unassigned general fund balance was $4.3M.
- The city's former pension advisor Roy Dixon was sentenced to federal prison for bribery involving Pontiac pension board members.
- The Oakland County Circuit Court dismissed the lawsuit filed by the city against Ottawa Towers LLC/ Phoenix Center. Treasury is working with the city to move forward to resolve the litigation and assist with the sale to a private operator, which could free up $2M in demolition funds.
- Treasury is working with the city on a plan to significantly reduce the role of the RTAB by spring of 2016.

Significant Actions/Issues
- A proposed mediation settlement between the city and the Pontiac Retired Employees Association, if approved, could fund pension and OPEB benefits for the GERS and the Police and Fire VEBA members, and resolve the lawsuit filed by the Association.

CONSENT AGREEMENT

Inkster
Date Executed: February 20, 2012
Consent Agreement Consultant: Mark Stuhldreher

Recent Developments
- In FY15 the audited unassigned general fund balance was $1.38M. In FY14 the general fund balance was a negative $837,194.
- Byron Nolen was elected Mayor by defeating Walter Stargill Jr. 87% to 13%.
- The Parks and Recreation millage passed 72% to 28%. It will raise $400K annually.

- The Senior Services millage passed 73% to 27%. It will raise $200K annually.
- The Inkster Public Schools non-homestead millage passed 64% to 34%. It will raise $750K the first year.
- On October 5, 2015, City Council approved an agreement with Wayne County regarding repayment of the $4.9M sewer charges owed to the county through a millage levy and other resources.

River Rouge
Date Executed: December 15, 2009
Consent Agreement Consultant: N/A (PA 72)
Date Released: December 7, 2015

Recent Developments
- The city ended FY 15 with an operating surplus of $1.77M.
- Standard and Poor's ratings services assigned an investment grade "A" rating for a recent $5M refunding bond issue that the city undertook.

Royal Oak Township
Effective Date: April 21, 2014
Consent Agreement Consultant: Robert Burgess

Recent Developments
- In FY15 the anticipated unassigned general fund balance was $267,405. In FY14 the unassigned general fund balance was $154,092. The fiscal year ends December 31, 2015.
- The Township Board voted to extend the Consent Agreement Consultant's contract through March 31, 2016. A replacement will need to be identified.
- The township is exploring options for police services with neighboring jurisdictions, however the proposed costs are greater than what the township's police millage generates. The Michigan State Police have and continue to provide police services to the township.

Wayne County
Effective Date: August 21, 2015
Consent Agreement Consultant: Warren Evans

Recent Developments
- On November 15, 2015, the county submitted a revised cash flow forecast. The cash flow, excluding the Trust and Agency cash, projects a September 2016 balance of $179M, which is $36M less than the October 2015 projection.
- The quarterly financial report submitted by the county on October 15, 2015 projects an operating surplus of $107M.
- The county indicated it has reached/imposed agreements with all collective bargaining units with the exception of the Circuit Court. The Circuit Court contracts do not expire until September 2016 and includes 77 members.
- Two lawsuits are currently pending a motion to dismiss: 1) AFSCME 3317 (sergeants and lieutenants) is a state case; and 2) AFSCME 25 (hearing and vision techs) is a federal case. Neither case prevents the county from carrying out its requirements under the Consent Agreement.

- On May 29, 2015, the Wayne County Circuit Court rendered a decision in favor of the Retirement System resulting in a $49M judgement levy. The county paid $10M of the judgment from available funds and placed $39M on the tax roll. As of November 9, 2015, the county has collected $29M of the amount levied.

Significant Actions/Issues

- The annual structural General Fund deficit is approximately $53.4M prior to any of the proposed remedial actions. Those remedial actions include $36.2M in changes to retiree healthcare, $5.2M in changes to active employee healthcare, and $12M in a combination of revenue increases and potential expenditure reductions.
- The county submitted documentation regarding the long-term solution for its jail. Reviews and discussion are ongoing with the county.

NEUTRAL EVALUATION

Highland Park
Financial Review Team Appointed: December 2, 2013
Financial Emergency Declared: January 30, 2014
PA 436 Option Selected: Neutral Evaluation

Recent Developments

- Mayoral challenger (and former Mayor) Hubert Yopp defeated incumbent Mayor DeAndre Windom 63% to 37%.
- The Highland Park Schools non-homestead millage passed 54% to 46%. It will raise $1.5M the first year.
- A class action lawsuit dated November 6, 2015 has been filed against the city claiming Headlee Amendment violations for alleged overcharging for water and sewer services.
- The City Administrator reported that annual retiree OPEB costs were reduced from $1.5M to $250K, effective October 1, 2015.
- Hearings are being held in U.S. Federal Court regarding the judgement in favor of DWSD over the city's unpaid water bill.
- The city's water system is experiencing low water pressure. City officials are working with Wade Trim, Treasury, DEQ, and GLWA/DWSD to develop a plan to implement immediate repairs which are anticipated to increase water pressure. Treasury expects funding the project through continued grants and loans.

Subject: Re: FW: RTAB Questions from RTAB Meeting

Categories: Blue Category

Please see my responses to each item below. Should you need any further clarification or have any additional questions, please let me know.

1. The City Administrator in her email proposes using $7,287,125 of Fund Balance in the water fund to offset the balance projected decrease in the revenue. The latest "budget to actual" report provided shows the Fund Balance in the water fund to be $4,937,210. Will there be an amendment showing where the remaining $2,349,915 will be taken from?

When the first quarter budget amendments were originally presented to Council the FYE 6/30/2015 fund balances for the water and sewer funds were $4.9M and $17.2M, respectively. These were unaudited year end projections as the City worked to close it's books and prepare for the auditors arrival. The City has historically looked at the combined total of the fund balances of both funds to determine the financial position of the system as a whole. I would note that, in light of the recent attention being paid to the City's compliance with the Revenue Bond act, the practice of reviewing the combined fund balances for financial position of the total system will not be followed in the future. This is especially important as new GASB statements governing the preparation of the City's financial statements continue to be issued requiring the City to report total pension liabilities for unfunded expenses.

With the changes in GASB reporting that require net pension liability to be reported for the first time, the water and sewer funds now carry unrestricted deficits for both funds. The funds maintain a positive total net position. Net pension liability is a long term liability that has always existed, however with the implementation of GASB 68 and 71 is shown on the face of the financial statements. I have been maintaining ongoing conversations with the City's auditors regarding the presentation of the net pension liability on the water and sewer fund unrestricted fund balances (also referred to as unrestricted net assets) and how to communicate that to the City's management, elected officials and public. These statements impact all units of government across the nation and have resulted in many of them, including Flint, reporting negative unrestricted balances for their enterprise funds. I have asked that the auditors be prepared to discuss this matter in more detail with the Council and RTAB.

I have summarized unrestricted net asset data below. The unrestricted net position has been adjusted to remove net pension liability in order to present a clearer indication of the City's current financial position and, therefore, its ability to respond to any change in financial circumstances ($11.3M for water and $22.8M for sewer). It would be from these assets that the City would be offsetting the shortfall in revenues to cover operating expenditures (shown as budgeted use of fund balance of $7.3M for water and $4M for sewer). The unrestricted net asset and net pension liability balances were taken directly from page 3-11 of the City's audited financial statements, which are now available online.

CITY OF FLINT
WATER AND SEWER FUND UNRESTRICTED NET POSITION ANALYSIS

	Budgeted Use of Fund Balance	Projected FYE 6/30/2015 Unrestricted Net Assets	Actual FYE 6/30/2015 Audited Unrestricted Net Assets	Add Back: Net Pension Liability	**Unrestricted Net Position w/o Net Pension Liability**
Water	**(7,287,125)**	4,937,210	(20,358,465)	31,703,314	**11,344,849**
Sewer	**(3,975,246)**	17,229,833	(14,158,340)	36,982,444	**22,824,104**
Total	**(11,262,371)**	22,167,043	(34,516,805)	68,685,758	**34,168,953**

2. The last budget to actual report provided to RTAB (Month Ended October 31, 2015) the 590 Sewer Fund shows a "YTD Balance" at 10/31/15 of $2,480,146 in the "Charges for Services" line item. If I annualize this, the total would be $7,440,438. The budget amendment of a $5,941,475 reduction in that budget line item adjusts the total budgeted amount to be $24,493,240. In what months from November 2015 through June 2015 will there be an acceleration of service for fee revenue that will allow us to achieve the amended budget?

Unfortunately, as a result of the Preliminary Injunction Order the process of moving delinquent balances off of customers accounts removed all of the billed revenue from the current year actual totals. This was necessary in order to identify accounts with delinquent balances outstanding on bills issued after the rates were reduced. The City's Utility Billing and Finance staff are working together to repost the actual billed revenue to the appropriate periods and move the revenue that was reduced to the appropriate allowance for doubtful accounts.

Stated another way, nearly $11.6 million in delinquent balances were "set aside" in order to process shut off notices. In doing so, the utility billing department inadvertantly reduced the current year billed revenue reported under "Charges for Services" on the RTAB report by the same amount. Adding this back and annualizing activity through 10/31/2015 to fiscal year end returns projections closely to those reflected by the amounts reflected in the first quarter budget amendment. It should be further noted that with the amendment to the preliminary injunction order, the City looks forward to recommending a third quarter budget amendment that will restore a portion of the projected revenue.

3. The same concern for the Water Fund as well.

See above.

Subject: RTAB Questions from RTAB Meeting

On August 7, 2015 Genesee County District Court Judge Archie Hayman issued a Preliminary Injunction Order (the "Order") against the City. As a result of the Order, the City anticipated an immediate and devastating impact on the financial stability of the Water and Sewer Funds if a stay was not quickly granted by the Michigan Supreme Court Appellate Court. Indeed, the City's request was denied and the financial impact of the Court order has been reviewed through the fiscal year ending June 30, 2016.

Upon issuance of the Order, the City was immediately enjoined from charging and collecting water and sewer rates that include the September 16, 2011 35% rate increases and disconnecting water service for its delinquent water and sewer customers wherein the delinquency arose between September 16, 2011 and the date of the Order. This immediately resulted in a decrease in cash collections on outstanding and current water bills and a decrease in total billed revenue.

The following budget amendments reflect a decrease in revenue projections as a result of monthly billing activity for the period September 2015-June 2016. September billing reflected the reduced rates as ordered by the Preliminary Injunction and confirmed preliminary estimates with $670,000 less in billed usage from the same period in 2014. The City has assumed and average decrease of $616,148 in monthly billed revenue, or $6,777,624 by fiscal year end (for 11 months of billing).

The City had total accounts receivable due of $13,738,190 for all active and inactive accounts at August 7, 2015. It is highly probable that a large percentage of that balance will have to be written off as uncollectible without the ability to enforce payment. The proposed amendments reflect an estimated uncollectible balance at this time of $8,340,823.

The City is working diligently to review the FY2016 operating budgets for additional sources of savings. Upon issuance of the Order, a spending and hiring freeze for all non-critical items was immediately implemented. The City has worked diligently to redevelop its capital improvement plan and has now canceled or postponed many planned projects and purchases until financial stability can be regained.

Changes to appropriations reflect the carry forward of projects in progress but not completed at June 30, 2015 for the Sewer and Water Funds of $41,796 and $1,456,922, respectively. This carry forward is largely offset by decreases to the City's capital improvement plan.

The City's emphasis at this time continues to be on providing safe, clean water to the City's residents and moving forward with preparations for the KWA pipeline to come online. As a result of this re-prioritization, the budget amendments reflect a reduction to budget capital improvements of $5,564,804.

Sewer Fund

The Sewer Fund budget (590) reflects a decrease in projected revenue of $6,741,475 and increase in Use of Fund balance of $2,883,373. The Sewer Fund was paid in full by the 101 fund at the end of FY2015, therefore the budgeted payment of $800,000 from the Public Improvement Fund must be removed. As noted previously, the decrease in Charges for Services of $5,941,475 is a result of the combined impact of inability to enforce collections on balance prior to August 7 and decrease in billed revenue per Court ordered rate reductions.

The roll forward of incomplete FY2015 projects of $41,796 is reflected by a corresponding decrease in cancelled and postponed capital improvement projects of $3,899,898.

Water Fund

The Water Fund budget (591) reflects a decrease in projected revenue of $8,560,824 and increase in Use of Fund balance of $7,287,125. Again, as noted previously, the decrease in Charges for Services are a result of the combined impact of inability to enforce collections on balance prior to August 7 and decrease in billed revenue per Court ordered rate reductions.

The roll forward of incomplete FY2015 projects of $1,456,922 is reflected by a corresponding decrease in cancelled and postponed capital improvement projects of $1,664,906. The City had just begun its much need meter replacement program at the end of FY2015. A significant portion of the roll forward reflects outstanding purchase orders and invoices related to this project prior to the spending freeze. The reduction in FY2016 budgeted improvements reflects the reprioritization of the KWA project and postponement of other significant projects such as the Dupont Street Pipeline Project and Hamilton Dam Sheet Piling.

Thanks,

Subject: Fwd: RTAB Questions from Earlier today
Below are my questions for the City Manager. Thank you. Beverly

1. The City Administrator in her email proposes using $7,287,125 of Fund Balance in the water fund to offset the balance projected decrease in the revenue. The latest "budget to actual" report provided shows the Fund Balance in the water fund to be $4,937,210. Will there be an amendment showing where the remaining $2,349,915 will be taken from?

2. The last budget to actual report provided to RTAB (Month Ended October 31, 2015) the 590 Sewer Fund shows a "YTD Balance" at 10/31/15 of $2,480,146 in the "Charges for Services" line item. If I annualize this, the total would be $7,440,438. The budget amendment of a $5,941,475 reduction in that budget line item adjusts the total budgeted amount to be $24,493,240. In what months from November 2015 through June 2015 will there be an acceleration of service for fee revenue that will allow us to achieve the amended budget?

3. The same concern for the Water Fund as well.

Subject: Flint Water Litigation

Governor Snyder, Since our meeting yesterday afternoon, we have learned from Miller Canfield that the City of Flint has succeeded in Genesee County Circuit Court in substantially reducing the plaintiff's requested damages in the Shears case. We are working with Miller Canfield and the City to get a solid estimate of the savings, but it appears to be significant. In addition, Miller Canfield believes this decision will have a beneficial impact on the other water rate case (Kincaid). As additional information is available we will keep you updated. Wayne

Subject: Re: Update on Shears v City of Flint, 1-6-16

Couple of things

(1) when was the recent order limiting the time period issued? 9 months for $3m vs $30 m for 48 months doesn't add, unless usage really changed? How did we get the $30m original estimate? Was part of it Kincaid? Is there still the ongoing $750,000 a month risk to the city?

(2) Tom or Wayne --I'm out this morning. Please send an email to the gov right away, cc the folks in the room yesterday, and tell him something like "since our meeting yesterday, we found out the court has eliminated most of the city's exposure to a refund....

Thanks

> > > All:
> > >
> > > This is an update regarding *Shears* v *City of Flint.*
> > >
> > > Background. Plaintiffs sought injunctive relief and order from

Genesee County Circuit Court declaring: (1) that a 35 percent water/sewer rate increase City officials adopted September 16, 2011, violated the City's charter; (2) that water/sewer rate increases EM Brown adopted, effective July 1, 2012, were voided by the November 6, 2012, voter disapproval of Public Act 4 of 2011; and (3) that City officials improperly commingled water/sewer funds.

In August 2015, the Court issued a preliminary injunction directing City officials: (1) to rescind the 35 percent rate increase; (2) to refrain from service shut offs for failure to pay if the 35 percent rate increase was involved; and (3) on the Court's own motion, to rescind a $15.7 million transfer from the water/sewer fund to a litigation settlement fund that City officials made in 2008 to settle claims related to sewer backups.

Recent Developments.

(1) Plaintiffs asked the Court to hold City officials in contempt for not properly

calculating how the 35 percent rate increase should be rescinded. City officials had calculated the amount to be $11.4 million and placed that amount in escrow. The Court agreed with the City's methodology.

(2) The Court has essentially limited any refunds to a nine-*month period* (i.e., mid-September of 2011 to June 2012). Miller Canfield is estimating that refunds should be roughly $3.0 million, far less than the $11.4 million City officials have escrowed.

(3) The Court agreed to drop the issue of requiring City officials to repay the $15.7 million from the water/sewer fund if the City Council retroactively ratified the transfer. The City Council adopted a resolution to that effect on December 30th and the resolution will be on the RTAB's agenda next Wednesday.

(4) Technical issues in *Shears* remain on appeal with the Court of Appeals (i.e., are Flint residents entitled to a remedy even if City officials *did* violate the City

charter/ordinances in adopting the 35 percent rate increase)? Miller Canfield believes that a favorable decision by the Court of Appeals in *Shears* can then be used to have *Kincaid* dismissed. *Kincaid* is in Genesee County Circuit Court on remand, but before a different judge than the one presiding over *Shears*.

PRELIMINARY INJUNCTION

At a Session of Said Court
Held in the Courthouse
On the 7th Day of August, 2015

PRESENT HONORABLE ARCHIE L. HAYMAN, CIRCUIT COURT JUDGE

THIS MATTER, having come on to be heard by Plaintiffs' Motion for Issuance of a Preliminary Injunction, the City of Flint having responded thereto, the Court having read the same and taken testimony and received exhibits into evidence, in Open Court, and being otherwise duly advised in the premises;

IT IS THEREFORE ORDERED AND ADJUDGED that Plaintiffs' Motion for Issuance of a Preliminary Injunction be and the same is hereby **GRANTED** for the reasons stated on the Record in Open Court, which include the following reasons:

1. The September 16, 2011 35% water and sewer rate increases, that have been collected by the City of Flint between September 16, 2011 and the date hereof, were not implemented in conformity with Flint City Ordinances 46 – 52.1 and 46 – 57.1.
2. The water readiness to serve charges that have been collected by the City of Flint from September 16, 2011 to the date hereof are not calculated nor authorized in accordance with Flint City Ordinance 46 – 52.
3. The July 1, 2012 12.5 % water rate increase and 45% sewer rate increase implemented by Emergency Manager Michael Brown under Public Act 4 of 2011 became void with the electors' referendum/rejection of Public Act 4 of 2011.
4. Following the rejection of Public Act 4 of 2011 there was no Order signed by any later Flint Emergency Manager that adopted or implemented the September 16, 2011 water and sewer rate increases and the July 1, 2012 water and sewer rate increases.
5. The liens placed against the real property of the City of Flint's delinquent water and sewer customers were due to delinquencies caused by the September 16, 2011 and July 1, 2012 water and sewer rate increases and the charging of the water readiness to serve charge from September 16, 2011 to the date hereof.

6. The City of Flint has disconnected the water service for its delinquent water and sewer customers due to their failure to pay delinquencies caused by charges related to the September 16, 2011, July 1, 2012, water and sewer rate increases, and water readiness to serve charges.

IT IS FURTHER ORDERED AND ADJUDGED that the City of Flint, its agents, employees, servants, attorneys, and those other persons in active concert or participation with it, be and the same are hereby **ENJOINED** from the following actions, until further Order of This Court:

1. Charging and collecting a water readiness to serve charge, also known as the water service charge from its water and sewer customers until it comes into compliance with Flint City Ordinance 46 – 52.
2. Charging and collecting water and sewer rates that include the September 16, 2011 35% rate increases.
3. Disconnecting the water service for its delinquent water and sewer customers wherein the delinquency arose between September 16, 2011 and the date hereof.
4. Placing any further liens against the real property of its delinquent water and sewer customers for delinquencies that occurred between September 16, 2011 and the date hereof.
5. Taking any monies from the Water Supply Fund, which include the water and sewer funds, and using those monies to pay general obligations.

IT IS FURTHER ORDERED AND ADJUDGED that no Security is required of Plaintiffs herein as this matter is in the public interest as the actions of the City of Flint that are being enjoined are actions that Defendant City of Flint has been engaged in since September 16, 2011, which violate its own Ordinances.

IT IS FURTHER ORDERED AND ADJUDGED that the parties are to meet and negotiate the repayment of 15.7 million dollars to the Sewer fund by the General Fund and are to return to this Court on November 13, 2015 if they are unable to reach agreement on the return of the 15.7 million dollars to the Sewer Fund.

The parties are to provide this Court with their proposals for repayment of the 15.7 million dollars to the Sewer fund, if they are unable to reach an agreement on the process of repayment of the 15.7 million dollars to the Sewer fund by the General Fund by October 31, 2015.

The City of Flint shall immediately establish funds for its water and sewer funds, also known as the Water Supply fund, that are in compliance with the Revenue Bond Act of 1933 as recited by the Court in open Court.

The Finance Department of Defendant City of Flint shall prepare a document/report that creates for this Court a history of the expenditures for the Sewer fund between 2007 and 2013 that reflects how those expenditures would have occurred if the 15.7 million dollars had not been transferred to the General Fund/Lawsuit Settlement Fund.

The issue of Emergency Manager Brown's July 1, 2012 12.5% water rate increase and 45% sewer rate increase is hereby preserved until the Court has reviewed the document/report prepared by the City of Flint's Finance Department.

IT IS FURTHER ORDERED AND ADJUDGED that the parties shall attend a Pre-Trial Conference for this case to be held on November 13, 2015 at 12:00 PM.

IT IS SO ORDERED

ARCHIE L. HAYMAN, P37516
CIRCUIT COURT JUDGE
AUGUST 7, 2015

Treasurer Nick A. Khouri,
Michigan Department of Treasury
Lansing, Michigan 48922

Re: ***Larry Shears v. City of Flint***

Dear Treasurer Khouri:

We are writing to respectfully request financial assistance from the State of Michigan with the cost of defending the above-reference lawsuit. This is a class action that challenges water/sewer rates set by the City. The rates were established, in part, by Emergency Manager Michael K. Brown in 2011. The plaintiffs seek a 35% reduction in rates, as well as repayment of charges that were allegedly illegal. If successful, the financial impact would be catastrophic.

Due to the gravity of the situation, and at the urging of Treasury officials, the City retained the law firm of Miller Canfield to handle its defense. Miller Canfield has an outstanding reputation and is well-suited to litigate this matter. However, a firm of this caliber is well beyond the financial means of the City of Flint. We are at a crossroads that requires careful consideration. We cannot afford to continue paying Miller Canfield, but equally cannot risk failure in this lawsuit.

The lawsuit has already caused devastating financial harm to the City due to rulings by the court. In August, the court issued a preliminary injunction order that is striking in its breadth. Among other things, it compelled the City to reduce water rates by 35% pending the outcome of litigation, and prevented readiness to serve charges.

Under the injunction, the City has been unable to collect past due water bills, leaving $11.6 million dollars of uncollected revenue. The City is losing over $600,000.00 per month, with many customers taking a wait-and-see approach to paying their bills.

In a Hobbesian choice, the City was forced to abandon desperately needed capital improvements. This will further escalate costs and exacerbate infrastructure needs.

In addition, Genesee County Circuit Court Judge Archie Hayman sue sponte ordered the City to repay $15.7 million dollars from its general fund to the water and sewer fund, on the perception that the money was wrongfully transferred. The court's ruling have consistently been pro-plaintiff. Much of the legal work is focused on appellate review.

These financial pressures are rapidly impacting the City. Despite a hiring/spending freeze, the City will soon confront the difficult question of whether to use the general fund to pay for the water/sewer system. This would necessarily compel cuts in its already short-staffed police force.

It is imperative the claims asserted in this case are confronted and reversed. The City needs a strong legal defense in this matter, as the consequences of not prevailing will be drastic.

In August of 2015, the City retained Miller Canfield at the urging of State officials. At that time, it was suggested the State would provide financial support. Unfortunately, that support has been discussed for months, but not yet provided. Legal fees from Miller Canfield, to date, total more than $80,000. The cost of defending this matter is rapidly exhausting the City's litigation reserves. We need help, or will not be able to continue with this level of defense.

Under Public Act 436, the State does not assume liability for the actions of an emergency manager. However, we believe there are practical considerations that call for financial assistance. By ensuring the City has needed litigation resources, the State can guard against a return to emergency financial crisis in Flint. Without those resources, the risk of a catastrophic judgment substantially increases. Thus, helping Flint now is a prudent investment to avoid a more costly enterprise.

Moreover, a substantial portion of this lawsuit relates to actions taken by an emergency manager under the careful watch of the State of Michigan. The City of Flint should not be left on its own to defend those choices.

Over the past four years, the City has made enormous strides in attempting to rectify its financial crisis. Pain was broadly spread to current employees, retirees and residents. The City was forced to do more with substantially less. Our residents received reduced municipal services, but increased their volunteerism. Contrary to the perception of some, the City and its residents have met the challenge of regaining financial solvency issued by each of the four emergency managers appointed by Governor Snyder. We proudly closed fiscal year 2015 with a balanced budget.

We have come far, but now confront a lawsuit that seriously threatens to undermine the enormous work, hardship and sacrifice of the past four years. We need financial assistance to avert that disaster, and we need it now.

Respectfully submitted,

Dr. Karen Weaver
Mayor

Natasha L. Henderson
City Administrator

PMB/eem

S:\P. Bade\Miscellaneous Letters\Ltr to N. Khouri re Shears, Kincaid 12.7.15.docx

[redacted]

- [redacted] stated the City is headed in the right direction, [redacted] to do various capital improvement projects.

Flint – Jan. 6 – Mayor Weaver, Council President Nelson, N. Henderson, P. Dostine, E. Cline, A. Heimann

1. Water Update:

Governor has declared a state of emergency regarding Flint's water

- GIS Mapping/Scope of issue
  - Will be documenting all lines that are made of lead (likely) so that they can have an accurate scope of the issue, and better prioritize replacements when funding becomes available
  - Will also look at the age of the infrastructure
- Health Department will be adding a nutrition component to the State of Emergency declaration

Water rate

- According to the city, their water rates adjustments need to be determined by "April at some point" was not sure of the exact day in April
- Will be looking into making changes to their rates

KWA Connection

- Temporary line may not be necessary, have been discussing a plan where "city and county would back up each other"
  - This plan would solve the problem of not having to have the Flint River as a backup water supply
  - Will also be significantly more expensive than the original plan to create a temporary pipeline to the city that will go to waste afterwards

DPW Recruitment

- Have met with two recruiters, and will be going with "Joyce" from the MML

- Will be changing the proposal slightly for recruitment, the original proposal was too minimal, and the new proposal will be more expensive
- Could take 120 days to find a candidate, but the city is optimistic that it will happen sooner

Legal fees

- Treasury sent a letter notifying the city that they (the Treasury) will be paying 75% of legal fees associated with the Spears Kincaid lawsuit.
- City will start to send us invoices shortly

Corrosion control

- No issues with the corrosion control so far, have seen significant decreases in the quantity of lead in the water

2. Other issues

City Council Meetings - Had a City Council special meeting on the 30th and regular meeting on the 21st

- Special meeting on the 30th of December
  - Judge wanted to City Council to approve a fund transfer from 2008
  - If the RTAB approves this action, the city believes that the judge will not force the city to transfer this money back

Question about PA 436 and Councilor Eric Mays

- City Council President Nelson wanted to know if the RTAB has the capacity to act on removing Councilor Mays considering he is going to be serving a prison sentence
- F. Headen suggested that this was a matter for the City Council to address, and suggested that most cities have a provision to remove a Councilor.
- The City then noted that they would explore that matter internally.

Follow-up questions from the RTAB

- RTAB member (not named) sent follow-up questions to N. Henderson that weren't returned
- N. Henderson had difficulty finding the questions in her email, but after getting them forwarded to her from E. Cline she suggested that all of these questions had been thoroughly addressed in materials that were already sent.
- She will be following up with the individual, and will send responses to her direct questions to all RTAB members so that everyone will have them.

Fellow PIOs:

This week, the governor activated the State Emergency Operation Center to address the health and safety issues related to Flint drinking water. The Joint Information Center has been established to support the SEOC by centralizing communications and streamlining public education efforts.

All media inquiries regarding Flint water and health concerns must be directed to the JIC – the media line is: 888-363-8632. Additionally, all communications materials related to Flint must be routed through the JIC to ensure consistent and accurate messaging. If you have draft social media, FAQs, or any materials you plan to share, send them to Ron Leix at leixr@michigan.gov for approval.

The JIC has created approved social media content for your use, as well as Facebook and Twitter graphics. Messaging and graphics are attached.

Some of you may be called on to staff the JIC. Currently, the governor's office and lead agencies – MDHHS and DEQ – are working side by side with MSP on location. Through close of business today, Friday, January 8, the JIC will be located at 4000 Collins Road, Lansing, MI 48910 in the SEOC. As of Monday morning at 9 a.m., the JIC will be moved to Flint, at 125 E. Union Street, 48502.

Thank you,
Dave

JOINT INFORMATION CENTER

NEWS RELEASE

FOR IMMEDIATE RELEASE
January 6, 2016; 4:50 p.m.
Release #: 01

For more information contact:
Joint Information Center
888-EMD-TODAY (888-363-8632)

State of Michigan Joint Information Center Now Operational

LANSING, Mich. – Today the State of Michigan launched its Joint Information Center (JIC) to coordinate public information from the State Emergency Operations Center, set up to help with health and safety issues caused by lead in the city of Flint's drinking water. The emergency operations center was activated after Gov. Rick Snyder declared a state of emergency for Genesee County on Jan. 5.

Public information and updates, including resources for residents such as how to obtain free water filters and lead testing, are available at www.michigan.gov/FlintWater.

The JIC will serve as the state's central communications hub for this emergency and is staffed by public information officers (PIO) from several state agencies. Hours of operation will be 9 a.m – 5 p.m., Monday – Friday, until further notice.

It is operating out of the Michigan State Police Emergency Management and Homeland Security Division in Lansing. State officials have been in contact with Flint and Genesee County officials to move the JIC to the city of Flint to better partner and coordinate with local agencies.

The declaration makes available all state resources in cooperation with local response and recovery operations

Genesee County declared a "local state of emergency" on Jan. 4, activating local emergency response and recovery plans. By requesting a governor's declaration, the county has determined local resources are insufficient to address the situation and state assistance is required to protect public health, safety and property to lessen or avert the threat of a crisis.

The city of Flint has been under a local emergency declaration since Dec. 14, 2015.

###

NOTE: ALL MEDIA INQUIRIES ARE BEING HANDLED BY THE JOINT INFORMATION CENTER AT 888-EMD-TODAY (888-363-8632).

> Hi Terry,

I'm in a meeting with the governor. He's asking for some details for a timeline regarding the switch.

Do we have dates and information about the exact communication with DWSB and Flint regarding rates, especially the part about the attempt by Detroit water and the rate demands? We are attempting to provide an accurate picture of the timeline, and difficult decisions faced by the city and EM at the time.

Thank you!

Subject: Daily Report

This is the first of daily reports from me on activity and issues concerning the Flint water situation.

MONDAY

- The Governor & Flint Mayor Weaver held a press conference in Flint to stress the use of 211 for residents in need of water, detail the water distribution system, and clarify our coordination with FEMA.
- The SEOC is improving its restocking system to make sure no water resource sites run out of supplies. Part of that effort entails the SEOC expanding its partnership with the Red Cross, which is providing expertise on warehousing, inventory and transporting supplies in emergency situations.
- The SEOC began mapping lead service lines.

COMING UP TODAY:

- Home Depot is donating over 12,700 cases of water daily starting today
- Door-to-door teams had a kick off press conference at the Genesee County Community Action Resource Department, and began distributing water resources in neighborhoods.
- A PSA will be submitted to Comcast, with MSP Capt. Kelenske providing water resource information.

STATE OF MICHIGAN
EXECUTIVE OFFICE
LANSING

RICK SNYDER
GOVERNOR

BRIAN CALLEY
LT. GOVERNOR

EXECUTIVE ORDER
No. 2016 – 1

CREATION OF
FLINT WATER INTERAGENCY COORDINATING COMMITTEE

MICHIGAN DEPARTMENT OF STATE POLICE

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, Section 2 of Article V of the Michigan Constitution of 1963 empowers the Governor to make changes in the organization of the Executive Branch or in the assignment of functions among its units that he considers necessary for efficient administration; and

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint switched its water source to the Flint River; and

WHEREAS, the County of Genesee and the City of Flint have taken actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16, 2016, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, the Flint Water Advisory Task Force was formed as an independent advisory task force charged with reviewing actions regarding water use and testing in Flint; and

WHEREAS, the Flint Water Advisory Task Force has made an interim recommendation that the state government should coordinate a sustained, public-health focused response to remedy, to the fullest extent possible, the impacts on the Flint community; and

WHEREAS, on January 5, 2016, the Governor issued a proclamation declaring a state of emergency in the County of Genesee and the City of Flint; and

WHEREAS, multiple state departments and local authorities share the responsibility for ensuring safe drinking water and the coordination of efforts to address the consequences resulting from the presence of elevated lead levels in drinking water; and

WHEREAS, ensuring safe drinking water and addressing the consequences of elevated lead levels in drinking water will require collaboration and communication between state departments, local governments, and subject matter experts; and

WHEREAS, the establishment of a Flint Water Interagency Coordinating Committee within the Michigan Department of State Police will facilitate the collaboration and

communication between state departments, local governments, and subject matter experts necessary to effectively coordinate a response and recovery effort;

NOW, THEREFORE, I, Richard D. Snyder, Governor of the state of Michigan, by virtue of the power and authority vested in the Governor by the Michigan Constitution of 1963 and Michigan law, order the following:

I. CREATION OF THE FLINT WATER INTERAGENCY COORDINATING COMMITTEE

A. The Flint Water Interagency Coordinating Committee ("Coordinating Committee") is created as an advisory body within the Michigan Department of State Police (the "Department").

B. The Coordinating Committee shall be composed of the following seventeen (17) members who shall serve an initial term expiring on December 31, 2018.

- The Director of Office of Urban Initiatives within the Executive Office of the Governor;
- The Deputy State Director of Emergency Management and Homeland Security within the Michigan Department of State Police;
- The Director of the Department of Environmental Quality, or his or her designee;
- The Director of the Department of Health and Human Services, or his or her designee;
- The Director of the Department of Licensing and Regulatory Affairs, or his or her designee;
- The State Treasurer, or his or her designee;
- The Superintendent of Public Instruction, or his or her designee;
- The elected Mayor of the City of Flint who shall be appointed to the Coordinating Committee by the Governor;
- Three (3) additional representatives of the City of Flint who shall be submitted by the Mayor of the City of Flint and appointed to the Coordinating Committee by the Governor;
- Three (3) representatives of Genesee County who shall be submitted by the Genesee County Board of Commissioners and appointed to the Coordinating Committee by the Governor; and
- Three (3) subject matter experts who shall be appointed to the Coordinating Committee by the Governor.

After the initial appointments, members of the Coordinating Committee appointed under this subsection shall serve terms of three years.

C. A vacancy on the Coordinating Committee occurring other than by expiration of a term shall be filled in the same manner as the original appointment for the balance of the unexpired term. A member may continue serving until his or her successor is appointed. A member may serve successive terms if reappointed.

II. CHARGE TO THE COORDINATING COMMITTEE

A. The Coordinating Committee shall act in an advisory capacity to the Governor and subject to the Governor's review and approval, shall do all of the following:

1. Create an incident action plan designed to assist state and local authorities in ensuring safe drinking water for the residents of the City of Flint and addressing the consequences of elevated lead levels in drinking water.

2. Review recommendations made by the Flint Water Advisory Task Force and propose statutory, regulatory, or contractual actions necessary for implementation of such recommendations.

3. Identify staff with competencies in emergency planning, operations, logistics, and finance as outlined under the National Incident Management System (NIMS) to work with the Coordinating Committee to track resource requests and document progress on the incident action plan.

4. Establish a standard process for sharing pertinent information between all members including use of the NIMS and Unified/Incident Command as appropriate.

5. Establish routine communications protocols at the local, executive, and legislative levels as appropriate.

6. Establish a public information protocol to effectively inform the community.

7. Make recommendations for acceptable standards for potable water.

8. Make recommendations regarding the health impacts for the affected population.

9. Assess the status of infrastructure and determine feasible actions to upgrade the water system.

10. Establish subcommittees among its members to specifically address, at a minimum, each of the three following topic areas: Water Quality, Community Health, and Education.

11. Assist the Governor and the Department in implementing appropriate operations permitted under the Michigan Emergency Management Act or the federal Stafford Disaster Relief and Emergency Assistance Act, including local emergency operations plans and guides.

12. Explore any avenues of funding for response and recovery efforts including federal grants, legislative appropriations, and private partners.

B. The Coordinating Committee shall provide other information or advice as requested by the Governor or the Department.

III. OPERATIONS OF THE COORDINATING COMMITTEE

A. The Coordinating Committee shall be staffed and assisted by personnel from the Department as directed by the Department Director. Any budgeting, procurement, and related management functions of the Coordinating Committee shall be performed under the direction and supervision of the Department Director.

B. The Director of Office of Urban Initiatives within the Executive Office of the Governor and the Deputy State Director of Emergency Management and Homeland Security shall together serve as the Statewide Coordinators responsible for the administrative functions of the Coordinating Committee.

C. The Coordinating Committee may utilize subcommittees and advisory panels composed of its members to assist in completing the functions of the Coordinating Committee. The Coordinating Committee may request public participation on advisory panels as the Coordinating Committee deems necessary.

D. When making recommendations to the Governor, a majority of the serving members of the Coordinating Committee must concur.

E. The Coordinating Committee shall meet at the call of either of the Statewide Coordinators and as may be provided in procedures adopted by the Coordinating Committee.

F. The Coordinating Committee may, as appropriate to perform its duties, make inquiries, conduct studies, consult with outside experts and federal agencies, and receive comments from the public.

G. Members of the Coordinating Committee shall serve without compensation but may receive reimbursement for necessary travel and expenses according to relevant statutes and the rules and procedures of the Civil Service Commission, and the Department of Technology, Management and Budget, subject to available funding.

H. The Coordinating Committee may accept donations of labor, services, or other items of value from any public or private agency or person. Any donations shall be expended in accordance with applicable laws, rules, and procedures.

I. Members of the Coordinating Committee shall refer all legal, legislative, and media contacts to the Department.

J. A writing prepared, owned, used, in the possession of, or retained by the Coordinating Committee in the performance of an official function is subject to the Freedom of Information Act, 1976 PA 442, as amended, MCL 15.231 to 15.246.

IV. MISCELLANEOUS

A. All departments, committees, commissioners, or officers of this state or of any political subdivision of this state may give to the Coordinating Committee, or to any member or representative of the Coordinating Committee, any necessary assistance required by the

Coordinating Committee, or any member or representative of the Coordinating Committee, in the performance of the duties of the Coordinating Committee so far as is compatible with its, his or her duties.

B. Any suit, action, or other proceeding lawfully commenced by, against, or before any entity affected under this Order shall not abate by reason of the taking effect of this Order.

C. The invalidity of any portion of this Order shall not affect the validity of the remainder of the Order.

The Executive Order shall become effective upon filing.

Given under my hand and the Great Seal of the state of Michigan this 11th day of January, in the year of our Lord, Two Thousand Sixteen

Subject: Water and General Fund financial information needed

Mayor Weaver,

This is to confirm our discussion on January 12, 2016 regarding the financial information Treasury needs for the City of Flint. Please submit the following:

1. Monthly cash flow reports (for both General Fund and the Water/Sewer Fund) for the period of 7/1/2015 thru 6/30/16. The report should show the actual cash flow for the months already past and the projected cash flow for the remainder of the city's fiscal year. It should show the ending cash balance assuming that the Shearer decision is upheld and a second balance assuming the Shearer decision is reversed.
2. Water shutoff history starting 1/1/2015 to present. The history should include the number of shutoffs and what that represents in terms of percentage of customers and percentage impact on revenues.
3. Water bill collection history starting 1/1/2015 to present.
4. Reports required by the emergency loan agreement issued in April 2015 (requirements will be sent in a separate letter).

As I mentioned, if the City needs additional resources to help gather this information quickly, Treasury is prepared to offer financial help for the City to retain the help of your auditors. If you want to pursue this please contact Randy Byrne regarding estimated cost.

We look forward to working with the City to identify and secure additional funds from foundations, corporations and the federal government to provide long term solutions for Flint`s water system.
Should you have any additional questions or need assistance on the formatting or content of the reports, please do not hesitate to contact Suzanne Schafer at 517-373-0533. We look forward to getting this information as soon as possible.
Thank you, Wayne

Subject: Flint Water Interagency Coordinating Committee
Importance: High

Greetings All,

Your Director, or his designee, has been appointed by Governor Snyder to serve on the Flint Water Interagency Coordinating Committee (it will be the deputy state director of Emergency Management and Homeland Security within MSP). Harvey Hollins would like to have an initial conversation via conference call as soon as possible.

Please let me know availability for a 30-minute call on Thursday (tomorrow) anytime between 8am-11am. Your prompt response will be greatly appreciated. Please feel free to email or call me with any questions.

~Stacie

Mayor Weaver,

This is to confirm our discussion on January 12, 2016 regarding the financial information Treasury needs for the City of Flint. Please submit the following:

1. Monthly cash flow reports (for both General Fund and the Water/Sewer Fund) for the period of 7/1/2015 thru 6/30/16. The report should show the actual cash flow for the months already past and the projected cash flow for the remainder of the city's fiscal year. It should show the ending cash balance assuming that the Shearer decision is upheld and a second balance assuming the Shearer decision is reversed.

2. Water shutoff history starting 1/1/2015 to present. The history should include the number of shutoffs and what that represents in terms of percentage of customers and percentage impact on revenues.

3. Water bill collection history starting 1/1/2015 to present.

4. Reports required by the emergency loan agreement issued in April 2015 (requirements will be sent in a separate letter).

As I mentioned, if the City needs additional resources to help gather this information quickly, Treasury is prepared to offer financial help for the City to retain the help of your auditors. If you want to pursue this please contact Randy Byrne regarding estimated cost.

We look forward to working with the City to identify and secure additional funds from foundations, corporations and the federal government to provide long term solutions for Flint's water system.

Should you have any additional questions or need assistance on the formatting or content of the reports, please do not hesitate to contact Suzanne Schafer at 517-373-0533. We look forward to getting this information as soon as possible.
Thank you, Wayne

Subject: RE: Review of Draft Presidential Declaration Request-Approval Needed by Today at 1:30PM

FYI – the only reference to Treasury is on page 4 of the request letter as indicated below:

With input from the Department of Treasury, MDTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

So I would say for the most part we have no other comment to make regarding this correspondence.

Subject: FW: Review of Draft Presidential Declaration Request-Approval Needed by Today at 1:30PM
Importance: High

All:

I received the attached documents from MSP EMHSD a few minutes ago. Treasury needs to review and approve the two documents: 1) the letter to President Obama and 2) an associated FEMA request form before they sent to the Governor's office for final review and editing. The approval is needed based on information provided by the Michigan Department of Treasury on page 4 of the Declaration Request Cover Letter attached.

Can any of you tell me who should approve this? This has been promised to the Governor by early afternoon, our approval needs to be returned to Tony Katarsky by no later than 1:30 PM today. Please let me know or call me at 517-[redacted]o discuss.
Thanks,

Ann Luepnitz Manager
Facility, Mail, and Data Operations

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION
COVER LETTER
MAJOR DISASTER OR EMERGENCY

January 14, 2016

The Honorable Barack Obama
President of the United States
The White House
Washington, D. C.

Through: Mr. Andrew Velasquez III, Regional Administrator
FEMA Region V
536 South Clark Street, 6th Floor
Chicago, IL, 60605

Dear Mr. President:

Under the provisions of Section [Major Disaster citation (401), Emergency citation (501)]of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5121-5207] (Stafford Act), and implemented by 44 CFR §, Emergency citation (206.35)], I request that you declare an Emergency for the State of Michigan as a result of the elevated blood lead levels of citizens, especially children, within the City of Flint which was demonstrated in October, 2015.

Impact and Trauma

As a result of the cooperative monitoring efforts in place by the City, State and Environmental Protection Agency (EPA), and the painstaking work of doctors at Hurly medical center, elevated blood lead levels (EBLLs) were discovered, and the County issued a do not drink order on October 1, 2015. As of the most recent update 2,182 Flint residents have been tested for lead levels and 43 residents have exhibited elevated blood lead levels. Of those, 23 were children under the age of six, the most likely age group to be impacted long term. One child was hospitalized, treated, and released. No deaths have been associated with this emergency.

The situation becomes more complex as the Michigan Department of Health and Human Services has observed a spike in the Flint area of Legionella which also occurred in roughly the same time frame. This too will be investigated for any potential link to the water system. While unlikely to be related to the water system, this new problem adds to the negative psychological impacts on mental health that have become extensive.

Additionally, the economic and psychological impact this has had on the community is severe. While water is flowing through the tap, it is considered unusable for any purposes by a large percentage of the populace. Mistrust in government is at a heightened level, and so, while water is safe for non-consumptive uses, people are understandably concerned. Special populations are especially vulnerable in this crisis as they are often unable to access available vital nutrition or water resources. Assistance with the Individuals and Households Program will be vital to recovery.

With the extent of time between the inception of Flint River water until the return to Detroit Water and Sewerage Department and re-treatment of the mains and pipes by the City, it is impossible to know the extent of those individuals who suffered the effects of EBLL. The duration of an EBLL can vary significantly depending on season, diet and other factors. The detection of substantial increases in EBLLs suggests a much higher rate over the duration of the emergency is likely.

Voluntary Efforts

Voluntary agencies have been assisting since early in the emergency. United Way and 2-1-1 are the central call bank and donation resource for people needing assistance or wishing to donate. The American Red Cross has established a Disaster Recovery Operation and also is providing warehousing management. On January 13, 2016, with the establishment of the (Volunteer Reception Center (VRC), the Michigan Voluntary Organizations Active in Disaster (MI-VOAD) is conducting a conference call to determine how it can more fully activate (several member organizations have already activated). Numerous local voluntary organizations including the Genesee County Community Action Resource Department and the Food Bank of Eastern Michigan are serving key roles in the acquisition and distribution of water.

A State of Emergency was declared on January 5, 2016 for the County of Genesee and City of Flint. Pursuant to Michigan's Public Act 390, both the City of Flint and the County of Genesee declared local states of emergency on December 14, 2015 and January 4, 2015, respectively.

The effect of this emergency has been the loss of potable water for the entire City of Flint. This includes its residents, businesses and worker population. It includes those who live outside and travel in to take advantage of work, school, or recreational activities. And it even includes all pets and other domestic animals living in the city.

The City of Flint has estimated the cost of replacing corroded infrastructure at $767,419,500. Of that, $54,619,500 is private and $712,800,000 is public. These numbers are based on an estimate compiled by the Genesee County Department of Equalization estimates of $25 per linear foot to remove and replace damaged private service lines. Both Individual Assistance – IHP, and Public Assistance – Category B, will be crucial to helping the city and her residents recover. The State has also invested over $10 million so far in emergency protective measures and will be expending much more, some details of which are provided in the public assistance portion of this letter.

Recognizing their responsibility to make their community as disaster-resilient as possible, be advised that all affected jurisdictions that are the subject of this request have in place a current, federally/FEMA approved, Disaster Mitigation Act of 2000-compliant Hazard Mitigation Plan. The plan was adopted January 26, 2015, and under Michigan's Emergency Management Act, Public Act 390, as amended, the City of Flint is included in Genesee County's mitigation plan and emergency management program. Similarly, the State of Michigan has also made a strong commitment to mitigate hazards and has met applicable federal standards: the Michigan Hazard Mitigation Plan was approved by FEMA on April 23, 2014 as a Standard State Hazard Mitigation Plan under the Disaster Mitigation Act of 2000.

The following information is furnished on the nature and amount of State, local, or Indian tribal government resources that have been or will be used to alleviate the conditions of this emergency:

Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD or EMHSD)

In response to Flint's water emergency, the EMHSD has undertaken bulk distribution of water, filters, filter cartridges, and test kits throughout the City of Flint. Working closely with the mayor's office, the EMHSD has identified Points of Distribution (PODs) throughout the city and have begun training troopers and volunteers to canvass the city to provide these commodities to households.

EMHSD is also maintaining overall coordination of the incident, both through the State Emergency Operations Center, and through members of an incident management assistance team in the local Genesee County EOC.

EMHSD – GIS Unit

On Friday, January 8, 2016 GIS staff met with the City of Flint's Department of Public Works (DPW) to begin defining the scope of the affected area for the incident. The critical data layers needed to define where lead pipes are present needs significant updating before an accurate picture can be created.

DPW estimated that approximately 80% of the parcels within the city may have lead piping within their services lines from the water main to the house. Based on preliminary processing of the analog map data that DPW was able to provide, we have noted that newer sections of the city (post 1950) tend to be copper piping and do not have a prevalence of lead. In contrast, the older areas of the city tend to have sparse concentrations of lead, but often the records for these areas are incomplete.

In order to effectively determine where the affected area is EMHSD is working with DPW and the University of Michigan – Flint to digitize many of DPW's old analog maps to extract the pipe status. Even when this initiative is complete, it will remain unclear if the data will prove to be very accurate as the source data is considerably out of date. With the comprehensive water testing plan that the DEQ is implementing, problem areas for the city will be identified so that manual inspections of the underground pipes can be done to confirm the presence of lead.

Michigan Department of Military and Veterans Affairs (MDMVA)

As of January 13, 2016, I authorized activation of the Michigan National Guard to assist the people of Flint and the surrounding communities served by the water department. The Guard will help to broaden the distribution of water, filters, and test kits throughout the water department's service area.

Department of Health and Human Services – Health (MDHHS – H)

MDHHS-H is unique in that it responds to the types of emergencies being experienced by Flint as part of its daily mission. The unique aspect is the potential additional impact to the department's work due to the water emergency.

The MDHHS continues to work closely with local partners to ensure that impacted individuals, especially children younger than six years of age, are being tested at the State Laboratory for elevated blood lead levels (EBLLs). Including working closely with the local primary care provider community and WIC clinics to emphasize the importance of blood lead level screening for children. A technical workgroup comprised of Medicaid data and public health surveillance experts have developed Medicaid specific EBLL testing goals. The department updated its data surveillance methods for blood lead level testing to ensure the most up-to-date, accurate information is being reviewed. Ongoing efforts include enhanced epidemiological disease surveillance. Results are made available through summary reports on the www.michigan.gov/flintwater website, indicating the number tested and with elevated levels.

The MDHHS is partnering with the Genesee County Health Department to ensure families are being offered case management support, which incorporates environmental investigations. The state continues to distribute free water filters to Flint residents with replacement cartridges available at multiple locations. In October, community outreach was initiated for distribution of educational materials for parents, families, and healthcare providers in Flint. These materials were also distributed to all children in Flint schools highlighting the importance of blood lead level testing, effects of lead exposure and the importance of nutrition. MDHHS has been proactively monitoring the Ready to Feed formula use and coordinating with manufacturers and WIC retailers to address any supply or distribution issues with infant formula availability.

MDHHS-H has generated the potential expected impact of this emergency on future health costs. They include as much as $12,000,000 in secondary prevention – education; $1,575,000 in secondary and tertiary prevention – nutrition; Direct medical health costs are estimated at $18,280,849 with $120,875,000 in secondary and tertiary medical expenses;

Department of Talent and Economic Development (MTED)

MTED is comprised of the Michigan State Housing and Development Authority (MSHDA), Michigan Economic Development Corporation (MEDC) and the Talent Investment Agency (TIA).

Our combined efforts are focused on short and long-term assistance to the Townships of Mt. Morris, Flint, and Genesee; the Cities of Flint and Burton; and Genesee County through various grants and potential infrastructure assistance. MSHDA has identified allowable funds to assist residents with MSHDA-backed mortgages and the purchase of water/water filters for low income households. MEDC is focused on infrastructure development and qualifying funds for this purpose

Based on available sources, MTED has assessed potential impacts to the economy of Flint resulting from the water crisis. We developed the attached analysis that looked at 4 potential long term costs associated with certain blood lead levels, which are:

- Lifetime earnings loss total
- Lead Health Care Treatment Costs
- ADHD Treatment Costs
- Special Education Costs

With input from the Department of Treasury, MDTED assessed that the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water, such as restaurants, will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses will also have to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems a reasonable estimate, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term, there will be the significant cost of a new water system. Direct health related costs, estimated by MDHHS, are in addition to this estimate.

Department of Environmental Quality (MDEQ)

On October 1, 2015 the State Chief Medical Officer confirms Hurley Children's Hospital blood lead level data. On this same date the Genesee County Health Department issued the customers of the Flint Water Treatment Plant a "Do Not Drink" advisory. On October 2, the state announces the Governor's Flint action plan. On October 15, 2015 the state legislature authorizes $9.35 million to help fund the City's return to purchasing treated water from the DWSD, and to fund comprehensive lead evaluations at City schools, provide free water filters for residents, provide free in-home water tests for residents, and provide free blood lead level testing and follow-up services.

On October 16, 2015 the Flint Water Treatment Plant reverted its source back to DWSD. On October 28, 2015 the MDEQ issued a construction permit for additional corrosion control treatment.

The MDEQ is supporting the response with incident management personnel, lead and copper water test kits and analysis and investigative teams. The connection to the Karegnondi Water Authority is scheduled to be completed in mid to late 2016.

MDEQ estimates cost impacts in the amount of $9.55 million. This includes $7.8 million to keep Flint on the Detroit system until January 1. It also includes $250,000 in chemicals needed for Flint to test the new water system once it is in place, and $1.5 million for 10 staff and lab equipment. The staff will be responsible for providing additional school and residential sampling and laboratory testing as well as expertise related to corrosion control and service line verification.

Department of Health and Human Services – Human Services (MDHHS- HS)

MDHHS has been working steadily to provide assistance to the local community through several different programs listed below.

Healthy foods. MSU-Extension has been giving out recipes of healthy foods that will help counter the effects of lead, but residents must be able to purchase the ingredients. Many have a Bridge Card and can utilize the double up food bucks but it still requires additional healthy fruits and vegetables. Some residents who have the elevated blood levels may not have a Bridge Card and purchasing fresh fruits and vegetables is a burden due to higher costs.

In some homes the plumbing is very poor; as a result the faucet filters may not fit. The cost of paying for city water that the residents can't use is astronomical. As a scenario, residents have to make a choice to buy food, or pay for water to flush toilets, bathe, wash clothes etc. A typical water bill in a home with good plumbing for a family of 2 is $98 per month. For a family of 4 with leaks etc. it could be about $150 or more per month.

Additional ongoing testing will be required for those with EBLs - treatment long-term, tutoring, behavior specialists, and mental health services are all long-term effects.

The state and city's poverty rates are given in the table "Michigan – Genesee – Flint Demographic Summary" on page 7.

- In addition to the general numbers in the table, the number of children age 0-17 living in poverty, has risen substantially:
  - 2012: 31.8% - 2006: 25.4%
- The median income for Flint residents between 2009 and 2013 was markedly lower than the state's median income, also shown in the table "Michigan – Genesee – Flint Demographic Summary" on page 9.
- Overall, Genesee County ranked 73 out of 83 counties for child well-being (with 1 being best). For poverty, Genesee County ranked 69 among the state's 83 counties.
- In Genesee County, 55.5% of students are eligible for free or reduced price school lunches compared to 38 % in 2006.
- Children age 0-5 eligible for Supplemental Nutrition Assistance Program (SNAP)
  - 2013: 47% - 2006: 35.4%
- 21.8% of students did not graduate on time in 2013.
- The following table, "MDHHS Program Data" shows the numbers of recipients of programs offered by MDHHS.

MDHHS Program Data

City of Flint		
Program	Cases	Recipients
Food Assistance Program (FAP)	35,231	57,974
Family Independence Program (FIP) [TANF]	1,917	4,578
State Disability Assistance (SDA)	233	234
Child Development and Care (CDC)	1,406	2,607
State Emergency Relief (SER)	460	n/a
Medicaid (MA)	52,735	82,117

Department of Agriculture and Rural Development (MDARD)

Part of MDARD's coordinated outreach includes contact with businesses, particularly food related businesses, to evaluate the safety of the water they use in their products.

Water safety also impacts animals. As a precautionary measure, MDARD included pets, service animals, and other domestic animals in their messages to families about water. They also reached out to the veterinary and animal care communities to bring their attention to this issue.

Through Michigan's funds and the USDA's Rural Development's programs, we are working to build and grow regional food systems, including the food hub and incubator kitchen at the Flint Farmers' Market. Through additional federal and state investments as well as public-private partnerships, we can help address some of the challenges to a nutritious food system. This is a critical component of responding to lead blood levels as good nutrition is one of the most effective treatments.

There are 549 Food Service establishments (includes restaurants as well as schools, which are being handled by Department of Education) and 337 Food Establishments (includes grocery, convenience stores, vending machines, etc.). In both cases we are identify higher priorities. All of those received a letter in October with guidance; all of them will receive revised guidance as soon as it is approved. There are 97 gas stations within the city which are within those food license numbers, but we are planning additional outreach to them as part of our efforts. MDARD will be working with on potential next steps with the Flint Farmers' Market.

No animal shelters exist in the water service area that we are aware of. The primary focus is and should be on residences where they also have pets. There are two vet clinics in the City, and we were making individualized follow up calls with them; all veterinarians in the region were contacted last week by Michigan Veterinary Medical Association.

MDARD has been in close coordination with DEQ, DHHS, and Genesee County Health Department on the protocol for using water. Guidance put out last fall was jointly issued by all four agencies. MDARD has also worked with other agencies on water sampling protocols. Compliance with new protocols will be a top priority.

Department of Insurance and Financial Services (DIFS)

DIFS is prepared to assist individuals with questions relating to their health insurance coverage or any health insurance claims that are not covered by their health insurer.

The losses experienced in Flint would not be a covered loss under property insurance. It is unlikely that there will be any remedy under property insurance to assist with the replacement of lead service lines. The estimate provided by the Department of Environmental Quality of $4,000 per service line would be multiplied by the ultimate number of lead service lines identified when the study is complete.

Department of Technology, Management and Budget (DTMB)

DTMB has been helping to procure water, filters and refill cartridges, 7 trucks and drivers have been deployed to assist with delivering supplies to Points of Distribution (PODs) and assisting with neighborhood visits. More are being procured.

DTMB also facilitated the establishment of the Joint Information Center (JIC) at the Flint State Office Building and provided additional security at the building. They have also established a lease agreement for 100,000 square feet of warehouse space in the city to use for water, filters and supplies and provided guidance and assistance with agencies in their contracts along with IT needs.

Procurements include:

- Truckloads of water - 32; Equating to gallons, this is approximately 250,000 gallons over two days, and this is anticipated to double.
- Brita faucet filters – 27,000
- Brita Replacement filters – 1,600

Disaster History/Long Term Recovery Continues

The State of Michigan has had two Governor's declarations in the previous 12 months, the Portland Tornado in June, 2015, and the Grand Traverse and Leelanau Straight Line Winds in August, 2015. Additionally, the state continues to work on Public Assistance and Long Term Recovery from the Southeast Michigan Flood of August, 2014.

The State, in addition to Stafford Act assistance from DR-4195, has made disaster funding available from state funds through Sections 18 and 19 of Public Act 390, the Michigan Emergency Management Act.

While the responses to Portland and Grand Traverse/Leelanau successfully responded to the impacts, the Long Term Recovery in Southeast Michigan continues to face many challenges. Several voluntary organizations work in Detroit proper to continue rebuilds and even muck-outs from the flooding of 2014. Resurgent black mold plagues many households, and the rebuild efforts continue to struggle with unmet needs such as furnaces. A Long Term Recovery committee meets regularly to establish funding opportunities, identify needs, and communicate the needs, but resources continue to be difficult to obtain, at best. The Southeast Michigan Flood Recovery Group (SEMIFRG) in cooperation with the Urban Studies Center at Wayne State University estimates that there remain 14,992 homes still in need of intervention resulting from the 2014 flood, with estimated repairs reaching as much as $144,477,500.

Demographics

Genesee County, and particularly the City of Flint, experience rates of poverty significantly higher than both the nation and the state. Genesee County's poverty rate is a full 5.6% above the national average, and the City's rate is nearly double the county's. Household income lags significantly behind national and state median income in the county, and the city is less than half the national median income. To exacerbate the problem, especially of lead, which impacts young children so significantly, the percentage of children under 5 living in Flint exceeds the national, state, and county rate. The elderly population is slightly lower in the City of Flint, but the percent disabled is significantly higher, 8.1 percentage points above the national rate. Unemployment too is significantly higher than national and state rates. As of September, 2015, prior to the emergency, The City of Flint's unemployment rate was 9%; nearly double the state rate of 5% and national rate of 5.1% However, looking at the U.S. Census American Community Survey 5 year average a prolonged period of very high unemployment is seen, over 26.3%. The table below shows the unemployment rate in Flint has been nearly three times the national average over the past 5 years.

Michigan – Genesee – Flint Demographic Summary

	Average of Persons Below Poverty Level*	Median Household Income*	Percent Children under 5	Percent Elderly*	Percent Disabled*	Percent Pre-Disaster Unemployment*
US Average	15.6%	$53,482	6.4%	13.7%	12.3%	9.2%
State of Michigan	16.9%	$49,087	5.9%	14.6%	13.9%	11.4%
Genesee County	21.2%	$41,879	6.2%	14.7%	16.1%	15.5%
City of Flint	41.6%	$24,679	7.8%	11.7%	20.4%	26.3%

* U.S. Census Bureau American Community Survey 2010-2014, Selected Social Characteristics in the U.S. (5 year estimates)

Public and Individual Assistance

The relevant category under PA is B, Emergency Protective Measures.

In the October to December time frame, the State made an emergency appropriation to return Flint to Detroit water. The appropriation included several emergency measures which included testing, case management for those affected, and short and long term health care strategies. The state's commitment to those measures was $9.35 million. As part of the return to Detroit water, the City of Flint also committed to expending $2 million, and the Charles Mott Foundation committed $4 million. Current emergency response measures include the distribution of approximately 1 gallon of water per day per resident, a filtration cartridge to every household, a cartridge refill, and a water testing kit. These measures are require approximately $9.55 million to keep Flint on Detroit water until Karagnondi is available and $22 million to distribute water, filters and testing kits until the emergency is resolved.

For Individual Assistance, under Housing Assistance, there is an estimated need of approximately $53,000,000 to help individuals eliminate damaged lead service lines on their properties.

The City's water system was damaged by the introduction of a new source of water with a different chemical composition. A "coating" that is maintained by chemical treatment at different levels, depending on the water source decomposed and underlying lead pipes and lead solders began to leach into the water. Ultimately, this lead to the significant EBL problem noted throughout this letter and numerous public reports. The extent of lead in the City's system at this time is difficult to determine. Much of the system has not been mapped, but the City's best estimate right now is that as much as 80% could contain lead components. The map attached as Figure 2, shows pipe composition in the northwest part of the city (the newest), so the percentage would be lower here than in older parts of the city. The University of Michigan – Flint is assisting the city with the digitization of historic hand-written records.

Insurance

The City of Flint is self-insured, so there is no outside insurance resource for this emergency.

Concluding Statement

In response to this emergency, I took appropriate action under state law and directed the execution of the Michigan Emergency Management Plan on January 5, 2016, in accordance with Section 401 of the Stafford Act. On that same date, under my authority as Governor I also proclaimed a State of Emergency for Genesee County, including the City of Flint, and directed state departments and agencies to utilize all available resources necessary to assist the aforementioned county and local political subdivision in responding to and recovering from this emergency. Numerous state departments and agencies had already initiated response actions prior to my formal proclamation, in accordance with their assigned missions in the Michigan Emergency Management Plan. These actions included but were not limited to: providing direct assistance to the affected communities and to individuals.

I have determined that this incident is of such severity and magnitude that effective recovery is beyond the capabilities of the State of Michigan and the affected local governments and that emergency federal relief assistance is necessary. I am specifically requesting activation of both Individual Assistance and Public Assistance for the affected county and jurisdictions specified in this request. Preliminary estimates of the types and amount of Individual Assistance and Public Assistance needed under the Stafford Act are estimated in FEMA Form 010-0-13.

I am requesting Direct Federal Assistance from other agencies who's resources and expertise can be brought to their relevant areas of expertise, including but not limited to the CDC, EPA, USDA, HHS, HUD, SBA, and USACE.

I certify that for this emergency, the state and local governments will assume all applicable non-federal share of costs required by the Stafford Act.

I have designated Capt. Chris A. Kelenske of the Michigan State Police, Emergency Management and Homeland Security Division, as the State Coordinating Officer for this request. He will work with the Federal Emergency Management Agency on recovery program implementation and may provide further information or justification on my behalf.

Sincerely,

Richard D. Snyder
Governor

OMB No. 1660-0009 Expires March 31,2016

REQUEST FOR PRESIDENTIAL DISASTER DECLARATION MAJOR DISASTER OR EMERGENCY

1. Request Date Jan 14, 2016

Burden Disclosure Notice

Public reporting burden for this form is estimated to average 9 hours per response. The burden estimate includes the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and submitting the form. This collection of information is required to obtain a benefit. You are not required to respond to this collection of information unless it displays a valid OMB control number. Send comments regarding the accuracy of the burden estimate and any suggestions for reducing the burden to: Information Collections Management, *Department of Homeland Security, Federal Emergency Management Agency*, 500 C Street SW, Washington, DC 20472, Paperwork Reduction Project (1660-0009). **NOTE: Do not send your completed form to this address.**

Completion of this form including applicable attachments satisfies legal requirements for emergency and major disaster declaration requests under 42 U.S C. §§ 5170 and 5191, respectively, as implemented at 44 C.F.R., §§ 206.35 and 206.36. Failure to use this form may result in a failure to meet these requirements and/or a delay in processing the request.

2a. Name of State (as defined in Stafford Act 102, 42 U.S.C. § 5122) or Indian tribal government requesting declaration.	2b. Population (as reported by 2010 Census) or estimated population of Indian tribal government's damaged area(s).
Michigan	9,883,640

3. Governor's or Tribal Chief Executive's Name	4. Designation of State or Tribal Coordinating Officer upon declaration (if available) and phone number
Richard D. Snyder	Captain Chris A. Kelenske Office: 517-333-5042 Cell: 517-719-1194

5 *Designation of Governor's Authorized Representative or Tribal Chief Executive Representative upon declaration (if available) and phone number*

Mr. Anthony Katarsky Office: 517-336-2686 Cell: 517-242-5371

6. Declaration Request For: ☐ Major Disaster (Stafford Act Sec. 401) ☒ Emergency (Stafford Act Sec. 501(a))

7. Incident Period: Beginning Date _____ End Date _____ or ☒ Continuing

If requesting a "continuing" incident period, enclose an official statement from a qualified Federal Government agency acknowledged as a national authority in a specific incident field (e.g., United States Geological Survey for seismic incidents, the National Weather Service for flooding).

7b. Type of Incident (Check all that apply)

☐ Drought ☐ Earthquake ☐ Explosion ☐ Fire ☐ Flood ☐ Hurricane ☐ Landslide ☐ Mudslide
☐ Severe Storm (rain, high water, wind-driven rain, hail, lightning) ☐ Snowstorm (Must Include Enclosure D: Historic and Current Snowfall Data) ☐ Straight-Line Winds
☐ Tidal Wave ☐ Tornado ☐ Tropical Depression ☐ Tropical Storm ☐ Tsunami ☐ Volcanic Eruption ☐ Winter Storm
☒ Other (please specify) Public Health

8. *Description of damages (Short description of impacts of disaster on affected area and population).* Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

In early May 2014, the City of Flint switched from the Detroit Water and Sewerage Department (DWSD) to water from its own water treatment plant drawn from the Flint River as its primary water source. The different characteristics of the water resulted in leaching of lead from lead pipes in the city's water infrastructure into the water supply. Increased exposure to lead can cause immediate negative health effects. However, the main health concerns are long-term effects in children such as developmental and cognitive delays, and behavioral disorders. Increased water lead levels and elevated blood lead levels in young children were observed in the City of Flint and confirmed by the State Chief Medical Officer. Based on the 2010 U.S. census data, the population of the City of Flint is 99,002. Census data puts the percentage of the total population under the age of 5 at 8% or approximately 8,200. Children in under 6 are high-risk stage of growth for lead exposure. Approximately 2,182 residents have been tested for lead blood levels as a result of this incident with 43 exhibiting EBL. The 2010 census data identifies 40,017 households and 51,321 housing units within the City of Flint. All of these households obtain their potable water from the city.

9. Description of the nature and amount of State and local or Indian tribal government resources which have been or will be committed. Include additional details in enclosed Governor's or Tribal Chief Executive's cover letter.

All appropriate local, regional and state resources were used to their maximum in responding to and recovering from this public health emergency. This included equipment, personnel, materials and supplies, facilities, technical expertise (including emergency contracting, as appropriate), and financial resources. When local and regional resources (including partner voluntary relief organizations and other community-based organizations) were not sufficient to address incident conditions, or very specialized resources were required to perform specialized response and/or recovery functions, State of Michigan resources were activated to address capability shortfalls. State agencies actively involved in the response and recovery activities in the SEOC and/or field include the Michigan Departments of State Police, Agriculture and Rural Development, Attorney General, Civil Rights, Corrections, Education, Environmental Quality, Health and Human Services, Insurance and Financial Services, Licensing and Regulatory Affairs, Military and Veterans Affairs, Natural Resources, and Talent and Economic Development. Details are in the cover letter.

11. Programs and Areas Requested

Individual Assistance ☐ N/A ☒ Individuals and Households Program ☐ Crisis Counseling Program ☐ Disaster Unemployment Assistance

☐ All ☐ Disaster Case Management ☐ Disaster Legal Services

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)) *If additional space is needed, please enclose additional documentation).*

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. The Individual and Households Program will be needed to assist residents/water service customers with an estimated $53,000,000 to repair damaged lead service lines on private property.

For States, identify Federally-recognized Tribes in the requested counties (if applicable).
N/A

Please see **Enclosure A: Supplemental Information for Individual Assistance** for additional information in support of this request*.

**Not Required for Emergency Declaration Request*

11. Programs and Areas Requested (Continued)

Public Assistance ☐ N/A ☐ Debris Removal (Category A) ☒ Emergency Protective Measures (Category B) ☐ Permanent Work (Categories C-G)* (not available for Emergency Declaration Requests)

For the following jurisdictions, specify programs and areas (counties, parishes, independent cities; for Indian tribal government, list tribe(s) and/or tribal area(s)). If additional space is needed or your request includes different categories of work for different jurisdictions; please enclose additional documentation.

Townships of Mt. Morris, Flint and Genesee; Cities of Flint and Burton; County of Genesee
We request all available programs. Emergency Protective Measures have been and will continue to be implemented with estimated costs in the range of $41,000,000.

For States, identify Federally-recognized Tribes included in the requested counties (if applicable).

N/A

Please see **Enclosure B: Supplemental Information for Public Assistance** for additional information in support of this request*.

Indemnification for Debris Removal Activity

☒ I do not anticipate the need for debris removal.

☐ I anticipate the need for debris removal, which poses an immediate threat to lives, public health and safety. Pursuant to Sections 403 and 407 of the Stafford Act, 42 U.S.C. §§ 5170b & 5173, the State or Indian tribal government agrees to indemnify and hold harmless the United States of America for any claims arising from the removal of debris or wreckage for this disaster. The State or Indian tribal government agrees that debris removal from public and private property will not occur until the landowner signs an unconditional authorization for the removal of debris.

Request for Direct Federal Assistance

☐ I do not request direct Federal assistance at this time.

☒ I request direct Federal assistance for work and services to save lives and protect property, and:

a. I request the following type(s) of assistance:

Emergency work and protective measures to save lives, protect public health and safety and to protect property, for state and local governments; including but not limited to the provision of food, water and other consumable commodities. Assistance from CDC, EPA, HHS, HUD, SBA and any other agencies with responsibilities related to health, nutrition, and water infrastructure.

b. List of reasons why State and local or Indian tribal government cannot perform, or contract for, required work and services.

State and local resources can not meet the demand for filters, cartridges, water, and water testing at each residence; or the physical and mental health or nutrition needs of the affected population of 40,509 households with approximately 99,002 residents. The city is not able to repair its water system and the state has responded, but the response needs far exceed the state's capability, in addition to continuing response to other disasters, including the 2014 flooding in metro Detroit.

c. In accordance with 44 C.F.R. § 206.208, the State or Indian tribal government agrees that it will, with respect to direct Federal assistance: (1) Provide without cost to the United States all lands, easements, and rights-of-ways necessary to accomplish the approved work; (2) Hold and save the United States free from damages due to the requested work, and shall indemnify the Federal Government against any claims arising from such work; (3) Provide reimbursement to FEMA for the non-Federal share of the cost of such work in accordance with the provisions of the FEMA-State or FEMA-Tribe Agreement ; and (4) Assist the performing Federal agency in all support and local jurisdictional matters.

Request for Snow Assistance

☒ N/A ☐ I request snow assistance.

Snow assistance for the following jurisdictions (Specify counties, independent cities or tribes and/or tribal areas).

Please see **Enclosure D: Historic and Current Snowfall Data** for additional information in support of this request*.

*Not Required for Emergency Declaration Request

11. Programs and Areas Requested (Continued)

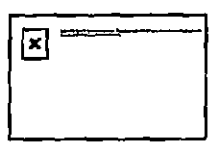
Reply-To: lonjohnson@lonjohnson.com



Sharon,
Access to clean and safe drinking water is a fundamental right for Michigan families and a top responsibility for our state's elected officials.
The current drinking water emergency in Flint demonstrates how Governor Rick Snyder and others in Lansing have failed to live up to this responsibility and protect the public's safety.
Sign on and demand Governor Snyder take action to solve the drinking water emergency in Flint >>
Instead of focusing on the health of families in our communities, our state's leadership has shifted its attention elsewhere.
It's time we return to a government that's every bit as hardworking and honest as the people who pay for it.
Will you sign on and tell our elected officials in Lansing to fix the drinking water crisis?
Sign here: http://action.lonjohnson.com/water-emergency
Thanks for your time,
Team Lon

Subject: Flint Water Crisis Economic Impact

Hi Jarrod,

I think the most significant immediate negative impact will be the economic effects of such things as decreased property values, lost business activity (new businesses will not move to Flint and existing businesses that rely on clean water like restaurants will be hurt), lost employment, population loss (renters will leave the city). Residents and businesses are also having to pay extra for bottled water, so the extra spending on water will take away from other spending. It is relatively easy for residents to move some of their economic/spending activity outside the city, so the Flint economy will be hurt. These impacts will create an economic downturn in Flint. In terms of personal income losses, a three to four percent loss in nominal personal income in the City of Flint seems reasonable, which would equal a negative impact of $85 million to $115 million per year in lost economic activity. Long-term there would be the cost of a new water system, which would have a significant cost. Direct health related costs would be on top of this estimate.

This is a very rough estimate. I would need a lot more time and a lot more information/data to develop a more thorough estimate.

Jay

Subject: RE: Daily Update

Here are Wednesday's key actions and issues in the Flint water situation:

- The Governor announced at a Detroit press conference that Genesee County has seasonal spikes in Legionella cases in 2014 & 2015. At this time, the increase cannot be directly related to the change in Flint water supply due to a lack of clinical Legionella isolates during the time period.

- Request for federal emergency declaration is being prepared.
- Our team from the Executive Office briefed Flint area state legislators on all that's being done in Flint.
- More Michigan National Guardsmen will arrive in Flint.
- Flint Mass Transportation Authority will include Fire Station water resource sites on their bus routes.
- Coordinating donations/support from donor vendors Comcast, Penske, and Google.

Coming up:

- Preparing to boost door-to-door teams up to 20.

Thanks, Terry.

And is there a known date as to when negotiations fell through? As far as I can tell, in late July, it was still reported that negotiations were ongoing.

On Thu, Jan 14, 2016 at 4:47 PM, Stanton, Terry A. (Treasury) <StantonT@michigan.gov> wrote:

Ryan...

It's my understanding the EM at the time, Ed Kurtz and city public works staff handled negotiations.

Neither treasury nor the governor's office was at the table. Both were aware of the negotiations.

... so, what I would do is make sure that someone from our shop (say Suzanne & Randy) be on the phone or at the mtg with Y&Y for the kick off. We need to have a clear scope of work as to what is needed & it (cash flow – work product) can't be filtered (no pun intended) thru the City/Natasha. We need the info 'real time' the same as the City. We can't afford the 'back & forth' as to what we are looking for. Wayne – it might be good if you make that call with the Mayor & Natasha. I am happy to participate.

Mayor Weaver:

It was good talking with you today. Confirming our discussion, MI Treasury will pay for the costs of having the City's auditors come in and secure the information requested in the memo below.

We were advised that the information could not be provided prior to February 1. I see this as a half day or day effort with the right resources. The people of Flint have been paying for or been billed for water they couldn't use and this information will help in our efforts to provide potential relief in the future and perhaps in the past as well.

But we need to determine what that looks like operationally and financially. If we are successful in securing funding, it would be our hope you could advise the people of Flint of what you were able to work out with the state and to do so in the fastest time possible.

We don't want to wait until February 1. We want to have Yeo and Yeo contacted, providing a time/expenses cost estimate, and deployed by Monday. I have copied Wayne Workman here in case I have missed something.

Thank you,

Rich

Subject: Re: Confirming our Discussion tonight

Good evening, Ms. Henderson.

In response to the email from the State regarding Yeo & Yeo's cost, availability and timeline, I reached out to Jamie Rivette. I provided her with exactly the same description of the cash flow report included in the email from Mr. Workman last week.

She provided the following response:

"Our estimated cost for performing monthly cash flow reports for both General Fund and the Water/Sewer Fund for the period of 7/1/2015 thru 6/30/16 (to include the information you specified below) would be billed at our standard hourly rates. I would expect this to take approximately 60 hours and cost around $15,000.

Dave and I would be available to start this project next week Thursday."

My original timeline of two weeks was consistent with that confirmed by Yeo & Yeo. I am happy to prepare the cash flow reports as I had intended and can make this a priority for completion by week's end now that I understand the priority and urgency placed on this item by the State. Should the State so desire to completely offset the cost of outsourcing the production of this report, I am happy to engage Yeo & Yeo, however it will cost more, take longer and require nearly the same amount of time and effort by City staff in order to provide them with the requisite information and assumptions.

Please let me know how you would like to proceed.

Best regards,

Jody N. Lundquist

Mayor Weaver,

This is to confirm our discussion on January 12, 2016 regarding the financial information Treasury needs for the City of Flint. Please submit the following:

1. Monthly cash flow reports (for both General Fund and the Water/Sewer Fund) for the period of 7/1/2015 thru 6/30/16. The report should show the actual cash flow for the months already past and the projected cash flow for the remainder of the city's fiscal year. It should show the ending cash balance assuming that the Shearer decision is upheld and a second balance assuming the Shearer decision is reversed.

2. Water shutoff history starting 1/1/2015 to present. The history should include the number of shutoffs and what that represents in terms of percentage of customers and percentage impact on revenues.

3. Water bill collection history starting 1/1/2015 to present.

4. Reports required by the emergency loan agreement issued in April 2015 (requirements will be sent in a separate letter).

As I mentioned, if the City needs additional resources to help gather this information quickly, Treasury is prepared to offer financial help for the City to retain the help of your auditors. If you want to pursue this please contact Randy Byrne regarding estimated cost.

We look forward to working with the City to identify and secure additional funds from foundations, corporations and the federal government to provide long term solutions for Flint's water system.

Should you have any additional questions or need assistance on the formatting or content of the reports, please do not hesitate to contact Suzanne Schafer at 517-373-0533. We look forward to getting this information as soon as possible. Thank you, Wayne

In response to the email from the State regarding Yeo & Yeo's cost, availability and timeline, I reached out to Jamie Rivette. I provided her with exactly the same description of the cash flow report included in the email from Mr. Workman last week.

She provided the following response:

"Our estimated cost for performing monthly cash flow reports for both General Fund and the Water/Sewer Fund for the period of 7/1/2015 thru 6/30/16 (to include the information you specified below) would be billed at our standard hourly rates. I would expect this to take approximately 60 hours and cost around $15,000.

Dave and I would be available to start this project next week Thursday."

My original timeline of two weeks was consistent with that confirmed by Yeo & Yeo. I am happy to prepare the cash flow reports as I had intended and can make this a priority for completion by week's end now that I understand the priority and urgency placed on this item by the State. Should the State so desire to completely offset the cost of outsourcing the production of this report, I am happy to engage Yeo & Yeo, however it will cost more, take longer and require nearly the same amount of time and effort by City staff in order to provide them with the requisite information and assumptions.

Please let me know how you would like to proceed.

Mayor Weaver,

This is to confirm our discussion on January 12, 2016 regarding the financial information Treasury needs for the City of Flint. Please submit the following:

1. Monthly cash flow reports (for both General Fund and the Water/Sewer Fund) for the period of 7/1/2015 thru 6/30/16. The report should show the actual cash flow for the months already past and the projected cash flow for the remainder of the city's fiscal year. It should show the ending cash balance assuming that the Shearer decision is upheld and a second balance assuming the Shearer decision is reversed.

2. Water shutoff history starting 1/1/2015 to present. The history should include the number of shutoffs and what that represents in terms of percentage of customers and percentage impact on revenues.

3. Water bill collection history starting 1/1/2015 to present.

4. Reports required by the emergency loan agreement issued in April 2015 (requirements will be sent in a separate letter).

As I mentioned, if the City needs additional resources to help gather this information quickly, Treasury is prepared to offer financial help for the City to retain the help of your auditors. If you want to pursue this please contact Randy Byrne regarding estimated cost.

We look forward to working with the City to identify and secure additional funds from foundations, corporations and the federal government to provide long term solutions for Flint's water system.

Should you have any additional questions or need assistance on the formatting or content of the reports, please do not hesitate to contact Suzanne Schafer at 517-373-0533. We look forward to getting this information as soon as possible. Thank you, Wayne

Mayor Weaver,

This is to confirm our discussion on January 12, 2016 regarding the financial information Treasury needs for the City of Flint. Please submit the following:

1. Monthly cash flow reports (for both General Fund and the Water/Sewer Fund) for the period of 7/1/2015 thru 6/30/16. The report should show the actual cash flow for the months already past and the projected cash flow for the remainder of the city's fiscal year. It should show the ending cash balance assuming that the Shearer decision is upheld and a second balance assuming the Shearer decision is reversed.

2. Water shutoff history starting 1/1/2015 to present. The history should include the number of shutoffs and what that represents in terms of percentage of customers and percentage impact on revenues.

3. Water bill collection history starting 1/1/2015 to present.

4. Reports required by the emergency loan agreement issued in April 2015 (requirements will be sent in a separate letter).
As I mentioned, if the City needs additional resources to help gather this information quickly, Treasury is prepared to offer financial help for the City to retain the help of your auditors. If you want to pursue this please contact Randy Byrne regarding estimated cost.

We look forward to working with the City to identify and secure additional funds from foundations, corporations and the federal government to provide long term solutions for Flint`s water system.
Should you have any additional questions or need assistance on the formatting or content of the reports, please do not hesitate to contact Suzanne Schafer at 517-373-0533. We look forward to getting this information as soon as possible. Thank you, Wayne

Good evening, Ms. Henderson.

In response to the email from the State regarding Yeo & Yeo's cost, availability and timeline, I reached out to Jamie Rivette. I provided her with exactly the same description of the cash flow report included in the email from Mr. Workman last week.

She provided the following response:

"Our estimated cost for performing monthly cash flow reports for both General Fund and the Water/Sewer Fund for the period of 7/1/2015 thru 6/30/16 (to include the information you specified below) would be billed at our standard hourly rates. I would expect this to take approximately 60 hours and cost around $15,000.

Dave and I would be available to start this project next week Thursday."

My original timeline of two weeks was consistent with that confirmed by Yeo & Yeo. I am happy to prepare the cash flow reports as I had intended and can make this a priority for completion by week's end now that I understand the priority and urgency placed on this item by

the State. Should the State so desire to completely offset the cost of outsourcing the production of this report, I am happy to engage Yeo & Yeo, however it will cost more, take longer and require nearly the same amount of time and effort by City staff in order to provide them with the requisite information and assumptions.

Please let me know how you would like to proceed.

Best regards.

Mayor Weaver:

It was good talking with you today. Confirming our discussion, MI Treasury will pay for the costs of having the City's auditors come in and secure the information requested in the memo below.

We were advised that the information could not be provided prior to February 1. I see this as a half day or day effort with the right resources. The people of Flint have been paying for or been billed for water they couldn't use and this information will help in our efforts to provide potential relief in the future and perhaps in the past as well.

But we need to determine what that looks like operationally and financially. If we are successful in securing funding, it would be our hope you could advise the people of Flint of what you were able to work out with the state and to do so in the fastest time possible.

We don't want to wait until February 1. We want to have Yeo and Yeo contacted, providing a time/expenses cost estimate, and deployed by Monday. I have copied Wayne Workman here in case I have missed something.

Thank you,

Rich

Kettering University

Monday, January 18, 2016

To: The Kettering Community of Parents of our Students and our Alumni

Subject: Kettering Campus Water Update

I know that you value the excellence of the education we provide, but I expect as alumni or parents of students currently enrolled at our great University that you are concerned about the barrage of news about Flint's water supply. I am a proud parent of a Kettering student, and my family and I reside in Flint, so I understand deeply and very personally how you might be feeling about the situation as reported in the media.

Last week, I sent a detailed Kettering Water Update letter to our campus and to our students. Because I know (from direct experience!) that students may not always communicate promptly with their parents on even important issues, I thought I would take a moment to update you and our alumni directly on this issue, because I know it is a subject of concern.

Unfortunately, as is often the case in public crises, a great deal of misinformation about the water supply in Flint is being reported as fact. Just as distressingly, though, a great deal of important information that we do have about the situation is also *not* being reported.

Kettering campus water is safe, and our faculty, staff, students, and campus residents are **not** being exposed to contaminated water on campus. We are, and have been even before the current crisis emerged, committed to ongoing testing of our water to ensure the safety of the campus water supply. Moreover, the entire water supply of Flint has not been contaminated with lead; although some sections of the city have experienced problems, some severe, other sections have not

All of us deplore that any single person has been exposed to unsafe levels of lead in the water; however, many, many people living in Flint have not been exposed to water containing elevated levels of lead in their residences or places of business. To date:

- Roughly 2% of all individuals tested in Flint have shown elevated blood lead levels.[1]
- Twenty-three (23) children younger than age six tested in Flint show elevated blood levels of lead.[2]
    - Children under the age of 5-6 are the most vulnerable population with respect to the long-term health effects of lead; in the U.S., 535,000 children under the age of 5 have elevated blood lead levels high enough to damage their health.[3]
- A total of 43 of 2182 of people tested in Flint show elevated blood levels of lead.[4]

I also want to clarify that *the water from the Flint River that was used as the city's water source from April 2014 through October 2015 was not contaminated with lead.* The contamination, where it occurred, was due primarily to interactions between treated river water and lead supply

[1] http://www.michigan.gov/documents/deq/Flint_Blood_Testing_Report_December_23_509464_7.pdf
[2] http://www.mlive.com/lansing-news/index.ssf/2016/01/43_flint_residents_identified.html
[3] http://www.cdc.gov/nceh/lead/infographic.htm
[4] ibid.

lines in the distribution system, particularly in lead lines connecting individual houses to local water mains. This is not a global problem with the water, but a problem with how that water - after treatment - interacted with some pipes and other elements of the city's distribution system. This interaction was often (considerably) different - even house-by-house on a single block.

In this letter I want to outline for you what we know about the nature of the contamination of the Flint system, how the university has responded to it, what we have done and are doing on an ongoing basis to ensure the integrity and safety of drinking water on the campus, and how we are working to ensure that those in the campus community who live off-campus in private housing have access to appropriate information, tests, and filters to ensure and monitor the safety of their private supplies.

Because I want to document what I write, I am also including footnotes that will lead you, if you are interested, to the sources of my information, something I learned to do as a faculty member and still highly value. We are committed to deploying every resource at our disposal to continue to ensure the safety of our entire campus community and our visitors. We value your input, and I hope that as members of the Kettering Community and of this great University that the information presented in this letter is helpful to you. If you have questions, comments, or thoughts on this issue we welcome you to send them to us at water@kettering.edu.

Introduction

Inflated lead levels have been detected in the water supply in a number of areas in the city of Flint, and these have received significant medical, political, and media attention over the last three months. The State of Michigan officially declared a state of emergency in Flint on January 6, 2016,[5] and the Federal Government followed on January 16, 2016.[6] Federal, state and local officials have now engaged and are taking more aggressive corrective action to address this situation and the public health crisis that has resulted from it. Proudly, many in the Kettering Community have taken a very active role in helping those families and children in Flint impacted by this health crisis since its beginning last year.

The levels of lead found in some areas of Flint are gravely upsetting, but I want again to stress that the problem of lead contamination in public and private drinking water supplies is not present in all of Flint. Unfortunately, this distinction has been absent from much of the reporting on this subject in the media. Reports often imply that the water was tainted at the source (i.e. the Flint River), or that contamination of the water is uniform across the entire distribution system and that every house and business has been equally affected.

I also think it important for us to recognize that this problem is widespread and in fact is not isolated to Flint.[7] For example, I am sad to report, drinking water supply contamination, in some cases at levels far worse than have been found in Flint, has been found in Washington D.C., Seattle, Baltimore, Philadelphia, and Los Angeles among other cities and areas of the country.[8] In Michigan, elevated blood-lead levels have been found in an even higher percentage of children

than Flint is experiencing in sections of Jackson, Detroit, Grand Rapids, Saginaw, Holland, and a number of other cities.[9]

The Nature of the Problem

First, the nature and cause of the contamination are reasonably well understood at this point. In brief:

- Historically, the Flint water system used and distributed treated water from Detroit Water Authority. It did so until April 2014, when it switched to treating water from the Flint River in an existing Flint water treatment plant.
- The "raw" river water to which the city switched in April 2014 was not contaminated with lead.
- The water within *some* sections of the distribution network was, however, contaminated *after* the water left the treatment plant by the leaching of metals such as lead. iron. and copper from lead service lines and lines containing lead solder

After the switch to river water, the City failed to treat the water for corrosivity by managing its chemistry,[10] which lead to the erosion (and release) of lead-bearing pipe scale in supply lines[11] and lead/copper galvanic corrosion of lead solder and lead copper joints in the distribution system.[12] Because raw water quality varies across the US, federal law requires all municipal water systems to have a corrosion control plan to address this possibility; this regulation is known as the Lead and Copper Rule.[13] Flint unfortunately did not have such a plan in place when it switched the water source to the River.

Here I want to stress that the lack of corrosion control did not, in and of itself, make the water unsafe. What it did do, however, is increase the potential for the water to react chemically with certain types of plumbing systems, and in doing so leach lead and other metals (if they were present) from those systems.

And if this isn't enough complexity, the City (out of what I'm sure were benign motives) used a relatively high level of chlorine to treat the river water to prevent bacterial growth in the supply. The unanticipated consequence of this choice, combined with a lack of activated charcoal filtration in the treatment process, led to the subsequent production of elevated levels of trihalomethanes (which are disinfection by-products of water chlorination) in the water, but these were present primarily in areas of the system where the water pooled or moved through the system slowly.

In October of last year, Flint switched its water source back to Detroit Water Authority. It took approximately 3-4 weeks for the Detroit source water to replace fully all of the water in the distribution system. In December, Flint also began introducing additional corrosion control

[9] http://www.crainsdetroit.com/article/20151210/NEWS/151219980/interactive-map-places-with-higher-lead-rates-than-flint

[10] Specifically the chloride-to-sulfate mass ratio in the treated water, which can be influenced by salt entering the source river from runoff or changes in the way that organics are removed in the treatment process. This is typically adjusted by adding lime or orthophosphates in the treatment process, see http://www.waterrf.org/publicreportlibrary/4088.pdf

[12] http://www.awwa.org/publications/journal-awwa/abstract/articleid/26682.aspx

[13] http://www.epa.gov/dwregmfo/lead-and-copper-rule and http://www.ecfr.gov/cgi-bin/text-idx?SID=531617f923c3de2cbf5d12ae4663f56d&mc=true&node=sp40.23.141.i&rgn=div6

additives to the water supply.[14] It did this expecting that the addition of these additives will, over time, help to rebuild the protective scale on the inside of the parts of the distribution system where it has been damaged.

Not All Areas of Flint were Impacted Equally

The specific mechanisms that gave rise to the contamination of the system mean that **not all areas of the system were equally impacted**. Portions of the system that do not contain lead service lines or lead solder were not as greatly impacted as those that do. Older parts of the system, especially sections built in the 1940's through the 1960's[15] that have not been upgraded since their construction are disproportionately vulnerable.[16] Other areas are far less so.

As a consequence, **the presence of lead contamination in the water supply was not uniform across the entire municipal water system, and not all areas of the city or all resident supplies were equally affected by it.** [17]

- The amount of lead that leached into a given part of the system depended upon a variety of factors, including the age of the system in the area, the specifics of its construction (e.g. are lead service lines present), and the time that water typically spends in that part of the system between treatment and use.
    - The levels of lead contamination measured in the water drawn from a particular source point depends upon the characteristics of the infrastructure through which the water passed, and how long it took to do so. **This is why water drawn in some houses on a single block might show measurable lead contamination, while others did not.**[18]
- For the same reason, as I noted earlier, only a percentage of Flint residents have been exposed to water containing elevated levels of lead in their residences or places of business [19]

Kettering's Campus Water Supply and Our Approach to Ensuring its Safety

The municipal water infrastructure that supplies Kettering is relatively modern, the flow-rates of water through the system are high, and we do not have lead-copper transitions in the main supply lines, as do many residences in some areas of the city. All of these factors reduce the chance of contamination in our supply. Even so, the University has taken a number of proactive steps to ensure that the campus drinking and cooking water supplies are free from contamination, a number of which have been described in previous communications to the campus on this issue. These include:

[14] https://www.cityofflint.com/2016/01/10/flint-city-leaders-county-state-officials-announce-relief-effort-expansion/
[15] In the early part of the last century, many municipal codes *required* the use of lead pipes when connecting homes and businesses to municipal water mains but most codes banned the use of lead pipes by the early 1970's. Chicago, for example, continued to require them as recently as 1986, see *EPA warns modernizing water system may boost levels of lead*, Chicago Tribune, September 25, 2013 Some major U.S. cities still have 100% piping bringing water from the utilities to homes and businesses, see: https://www.safeplumbing.org/health-safety/lead-in-plumbing
[16] http://nepis.epa.gov/Exe/ZyPDF.cgi?Dockey=20001R4V.txt
[17] For an example see: http://www.michigan.gov/documents/deq/Copy_of_deq-fw-Flint-Home-Owner-Data-Sept-3-thru_Nov-5-15_505529_7_505579_7.pdf
[18] ibid.
[19] ibid

- Since early 2015 (after the switch to river water but before lead contamination was suspected), the University has been engaged in recurring testing of all drinking and food service water distribution points on campus using an independent, certified laboratory (Brighton Analytical, LLC). We will continue to test all drinking and food service water distribution points (and there are almost 100 of these) indefinitely.
- We also similarly test incoming water from our (six) Flint Municipal Water system input supply lines.
- All food service water source lines are flushed for a minimum of five minutes prior to use each morning, and only cold water is used, consistent with EPA guidelines.[20]
- We use NSF/ANSI 53 certified filters on all drinking water supplies on campus; these filters are certified to remove lead and trihalomethanes in addition to a wide variety of other contaminants and suspended solids. You may find details on the NSF/ANSI 53 certification standard at nsf.org and on the websites of manufacturers that produce filters conforming to this standard. There are 31 specific performance criteria that fall under Standard 53.
- All of our filters are maintained and replaced at the intervals recommended by their respective manufacturers.
- To be conservative, we shut off all water fountains on campus where the filters for that fountain were located at a significant physical distance from the fountain itself (usually because of space restrictions in the fountain cabinet).

  We did this as a precautionary measure, since it is possible for lead (if, for example lead solder was used in its supply line) to be produced through the interaction of water with plumbing in the supply line *after* it has been filtered *if* that water is allowed to sit undisturbed for a protracted time in the supply line (such as when a water fountain is used very rarely).

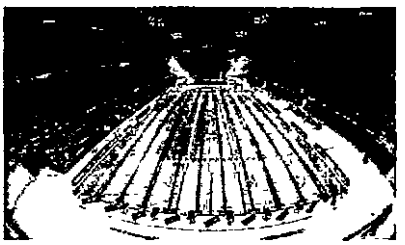
We do not test the water used in toilets, bathroom vanities, or showers, **but we do test the sources from which they draw water** (i.e. the input supply lines to campus). **Human skin does not absorb lead in water**, so bathing, washing, or showering is safe even using water containing lead over the EPA's action level.[21] [22] Adults may safely use unfiltered water for brushing their teeth.[23]

In addition, we continue to make improvements to our local system to improve convenience and ensure safety. One of the most visible of these is the replacement of many of our water fountains across campus with hydration stations; this project in fact began a number of years ago. All of our hydration stations are monitored and contain integral NSF/ANSI 53 water filtration systems.

How are Lead Levels in Water Specified and Interpreted?

The concentration of a metal, like lead, in water is often measured in parts per billion, usually denoted **ppb**. A concentration in water of 1 ppb represents one gram, or three one-hundredths of an ounce (3/100 ounce), of a substance in 260,000 *gallons* of water. One ppb is also three seconds

[20] EPA 810-F-93-001
[21] http://www.cdc.gov/nceh/lead/tips/water.htm
[22] http://www.michigan.gov/deq/0,4561,7-135-3313_3675_73946-372051--,00.html
[23] http://www.michigan.gov/documents/deq/2015-10-21_-_Lead_-_Flint_Water_FINAL_504265_7.pdf



out of 100 years. **Ten parts per billion (10 ppb) is the equivalent of approximately one teaspoon of water in an Olympic-sized swimming pool.**

The EPA has set an action level for lead in drinking water supplies at 15 ppb. In other words, if drinking water contains lead below this level, EPA regulations state that no action is required.[24]

For reference, the EPA permits faucets to be sold in the U.S. that leach 10 ppb or less of lead into water during a 19-day test.[25] Studies conducted by the EPA have found that the geometric mean of lead levels in drinking water systems in the US is 2.8 ppb.[26]

Results of Our Ongoing Testing

- As of the date of our last test series and over the past many months, we have tested the water drawn from the six input lines to campus a total of 15 times and all tests have resulted in a measured level of "ND" (for "None Detected"), with only three, single-test exceptions. In these three exceptions:
    - One detection was at 1 ppb, one was at 5 ppb, and the other was at 7 ppb. All of these are significantly lower than the EPA's allowable limit for lead of 15 ppb.[27]
    - These were single point-in-time detections; **later repeat testing of the same distribution points detected no lead.**
- **No lead has ever been detected in any water source used for food preparation.**
- As of the date of our last test series and over the past many months, all drinking water distribution points (e.g. water fountains) on campus have consistently tested "ND" (for "None Detected") for lead, with only six, single-test exceptions in well over one-hundred tests conducted. In these six exceptions:
    - All detections were at levels of less than 5 ppb (1,4,5,2,3 and 2 ppb respectively); all are significantly under the EPA's allowable action limit for lead of 15 ppb.[28]
    - These were single point-in-time detections; **later repeat testing of the same distribution points detected no lead.**

Access to Test Data

We make all results of these tests public. You may always find our latest test results along with other information related to the state of water in Flint at http://www.kettering.edu/water. We will continue to update the test reports on this site as we receive them.

[28] ibid

On this same webpage, you will also find a link to PDF copies of the certified assay reports provided to us by our independent laboratory.

We have encouraged our students to speak with their parents or guardians about this issue, and to share with them all communications they receive from us. Copies of all of our communications to students on this matter may also always be found at http://www.kettering.edu/water.

More Information

If you have further concerns, I encourage you to read the Centers for Disease Control website on lead contamination of water at http://www.cdc.gov/nceh/lead/leadinwater/ and http://www.cdc.gov/nceh/lead/tips/water.htm as well as the citations in this letter. Additional information is also available on our website at http://www.kettering.edu/water.

If you have technical questions about the campus water supply, they may be directed to Nadine Thor, Director of Auxiliary Services, at nthor@kettering.edu. Questions from students or their families of a more general nature should be directed to Dean Betsy Homsher, Dean of Students, at bhomsher@kettering.edu.

We will of course continue to update the campus as this situation evolves.

Members of the Kettering Community that Live off Campus in Impacted Areas

We have encouraged our students, faculty and staff who live off campus within Flint city limits to use bottled water, to test their water (which also supports the city's data collection and analysis efforts), and to use appropriate water filtration in drinking water sources until notified otherwise by civil authorities.[29]

In the interim, **free bottles of water, water filters, replacement cartridges, and home water testing kits are widely available to all Flint residents.**[30] There are multiple distribution points for these around the city, and the University maintains a supply of filters in the Office of Student Life for students otherwise unable to obtain them.

Information on the city's distribution of all of these items to residents may be found at www.michigan.gov/deq. Students residing off campus needing assistance in acquiring water, test kits, and/or faucet filters have been encouraged to contact the Office of Student Life at (810) 762-9871.

A Note on Water Clarity

You may see pictures of bottles of rusty or cloudy water in articles on water safety; the same has been true of the reporting surrounding the water crisis in Flint.

The presence of suspended rust in water can turn it orange, red, brown or yellow. The presence of rust in water is not an indication of the presence of lead or other contaminants in the water, nor does it necessarily indicate that the water is unsafe to drink.[31] In water, lead is colorless, odorless, and tasteless.[32] and the presence of rust in water does not indicate the presence of lead, bacteria, or other substances.

[31] http://www.quincyma.gov/CityOfQuincy_Content/documents/RustyWaterFactSheet.pdf
[32] http://extension.psu.edu/natural-resources/water/drinking-water/water-testing/pollutants/lead-in-drinking-water

> *On its own, rust in water is not a sign of harmful bacteria or lead. In fact, the limits set by the Environmental Protection Agency (EPA) for iron in drinking water are based on aesthetics (taste, odor, color), not safety concerns.*[33]

Trapped air (in the form of small bubbles) in the water can also turn it cloudy or milky. Water pipelines are pressurized systems, so any air introduced into the system can remain trapped until the water leaves a faucet. This cloudiness is not indicator of water quality.

The NSF/ANSI 53 water filtration systems we use on campus for all drinking water remove suspended particulates including the iron that can discolor water (known as "turbidity reduction")

Legionella

It has very recently been reported[34] that there were an unusually high number of cases of Legionnaire's Disease seen in Genesee County in 2014-2015.[35] It has also been suggested in the media that this increase related in some way to the switch in the Flint water supply. Roughly half of the cases identified are in individuals who live outside of the city and the Flint municipal water service zone,[36] and a possible causal link between the two has absolutely not been established

We have no evidence of any member of the University community having contracted Legionnaire's Disease.

Legionnaire's Disease is not contracted by drinking water containing *Legionella* nor is it transmitted between individuals. It is not contagious.

Legionnaire's Disease is a form of pneumonia caused by the bacteria *Legionella pneumophila*, and it is treatable with several classes of antibiotics.[37] It has an incubation period of two to ten days. *Legionella* do not survive in water above 140 °F (60 °C). *Legionella* are normally found in rivers, lakes, and streams,[38] and they are normally present in the water systems of large buildings and even in a percentage of residential water systems.[39]

Legionnaire's Disease is primarily contracted by heavy smokers, immunocompromised individuals, and individuals with chronic lung disease[40] through the aspiration of water or the inhalation of water mist contaminated with the *Legionella* bacteria.[41] Even after exposure to *Legionella* most people do not become sick.

Cooling towers for large buildings are frequently cited as potential breeding ground for *Legionella* bacteria if they are not regularly maintained and disinfected.[42] **The University has for many years routinely monitored and disinfected all cooling towers on campus.**

As part of a proactive effort, though, we have also begun ongoing and recurring testing of our water for the presence of *Legionella.* We will take appropriate action (which we will report) if elevated levels of the bacteria are detected in campus water supplies in the future. We will of

course publish the results of these tests on http://www.kettering.edu/water when they become available.

Federal Emergency Declaration

On January 16, 2016 and at the request of the state of Michigan, President Obama signed an emergency declaration the purpose of which is to make Federal aid available to the city in support of current filter and water distribution efforts to impacted persons in the city.[43] Substantively, this declaration simply mobilizes the Federal Emergency Management Agency (FEMA) to assist in these efforts and also makes certain federal funds available to the city for the purpose of supporting these activities. As stated in the order, it "is to provide water, water filters, water filter cartridges, water test kits, and other necessary related items for a period of no more than 90 days."[44]

A Kettering Professor (from the Beginning) and Our Students have been and will continue to be Part of the Solution

Last year, Kettering's Mechanical Engineering Professor Laura Sullivan was asked to co-chair Flint's Technical Water Advisory Board and was recently appointed by Mayor Karen Weaver to the Karegnondi Water Authority. This is important work, and through it she makes all of us in the greater Kettering family a key part of the solution. I want to take this opportunity to recognize her and to thank her for her service to Flint and the University.

Our students are some of the most creative in the world, and so we have been and are continuing to organize ways for our students, often in teams, to solve some of the challenging and unforeseen problems that have arisen in the distribution and installation of filters in affected areas of Flint. These efforts not only take advantage of the expertise and ingenuity of our students but they are also consistent with Kettering's ongoing commitment to Flint. We will make information on these efforts available on http://www.kettering.edu/water as it becomes available.

Please know that we are deploying every resource at our disposal to ensure the safety of our entire campus community and our visitors, and we will continue to work with federal, state, and local officials to help create long-term solutions to these problems. We value your input, and I hope that as valued members of the Kettering Community and of this great University that this letter has been helpful to you. If you have questions, comments, or thoughts on this issue or the University's response to it please send them to us at water@kettering.edu.

Thank you

Warmest Regards,

Dr. Robert K. McMahan
President

Subject: Draft Flint CIP
Attachments: Flint CIP.Draft.01-14-16.pdf

All:

FYI.

Attached is the most recent draft to the Flint Capital Improvements Plan.

It was recently submitted to the City Planning Commission for approval so note that some of the projects could change prior to final approval.

Planned Water System improvements begins on Page 47 of the .pdf.

I note that Lead Service Line Replacement is listed as an Urgent project but with a cost *TBD*. No other information is provided.

I also note about $34M in other system projects that have been identified.

There is not a great amount of detail in the document but it provides a good overview of some of the areas that the City sees as priority.

If there are any questions, let me know.

The introduction to the Capital Improvement Plan (CIP) is divided into three sections:

- What is a Capital Improvement Plan?
- Why Prepare a CIP?
- How Does the CIP Relate to the Master Plan?

WHAT IS A CAPITAL IMPROVEMENT PLAN?

A Capital Improvement Plan (CIP) is a multi-year program for expenditures by the City of Flint for rehabilitation, replacement, and balancing of the City's municipal infrastructure systems. Projects considered through the CIP process involve proposed investments in the City's infrastructure and facilities, such as police and fire stations, parks and recreation facilities, community centers, offices, roads and sidewalks, and utilities.

Definition of Capital Improvements

Capital improvements are permanent physical improvements, generally expected to have a normal life of ten years or longer. Equipment and objects needed for day-to-day use are generally not considered capital improvements. Smaller projects and projects that are intended to last for fewer than ten years are funded through the City's operating budget.

CIP and Budgeting

A CIP is typically prepared and adopted annually by the Planning Commission and is presented as a recommendation to the Mayor and the City Council.
Each year, the plan identifies the physical needs of the City's departments, estimates the costs of proposed projects, and recommends expenditures and sources of funding for priority capital improvements.

As such, the CIP plays an integral role in the process of formulating the City's annual capital budget.

20 Year Horizon

The Flint CIP is a 6-20 year plan of programmed projects for the City's municipal infrastructure systems. The first two years of this plan should form the basis for the City's two-year Capital Approval of annual budgets allocates funds to undertake projects in this period, thus beginning the implementation of the CIP. In addition, capital projects that will need to be implemented between years 7 and 20 are also included to provide a basis for future updates to this CIP.

Uncertainty about the availability of budgets does not allow for these necessary improvements to be planned in the 6-year period and are considered unfunded needs in this CIP.

BENEFITS OF THE CIP

- Assist in implementation of the Master Plan.
- Identify both short- and long-term capital expenditures to allow budgeting.
- Determine regular maintenance needs for City facilities so they remain viable.
- Provide for a more effective evaluation of alternatives and solutions than the crisis-decision process.
- Enhance opportunities for grants by allowing for long-term planning.
- Provide the ability to stabilize debt and consolidate projects to reduce borrowing costs.
- Serve as a public relations and economic development tool.
- Allow for a focus on preserving infrastructure while ensuring efficient use of public funds.
- Provide opportunities for cooperation between departments and other units of government, such as Genesee County and Flint Community Schools, by pooling resources to reduce costs in some instances.

CAPITAL IMPROVEMENT PLANNING IN FLINT

The City of Flint has been significantly impacted by factory closures and population loss, with an 18% decline in population between the 2000 and 2010 census. The loss of jobs and population and decline in local tax revenue and state-shared revenues has had a significant impact on the City's finances. The City returned to state receivership in December 2011, as a result of consistent deficits in the General Fund, a decline in pooled cash, poor budgeting practices, and unfunded liabilities for retiree benefits

Significant progress has been made in addressing the financial issues leading to the assignment of an emergency manager, as the $19.1 million deficit at the end of FY12 had been eliminated by the end of FY15, largely as the result of a $7 million emergency loan.

On April 29th, 2015 the Emergency Manager notified the Governor of Michigan that the financial emergency in Flint had been resolved. At that time, the Governor relieved the Emergency Manager of his responsibilities and a Receivership Transition Advisory Board was created to oversee the transition of city affairs, to its charter-designated officials.

For the first time in nearly a decade, the City began FY16 with positive balances in all of its funds. Cash position had drastically improved, and the FY16 and FY17 Budgets are realistically balanced.

Looking forward to FY18 and beyond however, the City will continue to face significant challenges as expenditures are projected to outpace any increases in revenues leading to operating deficits in many of the City funds. Water rate increases and the renewal of two City millage's (Public Safety and Parks and Recreation), will assist in ensuring ongoing sources of funding exist for much needed capital improvements, but will limit the amount of progress that can be made without additional sources of revenue or other decrease operational costs.

While the City continues to await resolution of litigation over retiree healthcare that could devastate the City's financial position, a number of issues emerging in Q1 of FY16 have adversely impacted the ability to complete even planned FY16 capital improvements.

On August 17, 2015 a preliminary injunction order was issued against the City requiring that the City immediately reduce its water and sewer rates. In addition, the order barred the City in shutting off a service for non-payment or collecting delinquent balances prior to August 17. This led to a projected increase of uncollectible accounts of approximately $11 million, a decrease in monthly billed revenue and a drop in the number of payments being received.

In order to respond to the loss in projected revenue, a spending freeze across the City was implemented. At this time, the freeze remains in effect. For water and sewer funds, it was necessary to identify projects which could be eliminated or postponed to lessen the financial burden of the order and maintain ongoing daily operations. To that end, many of the water and sewer capital improvements were eliminated or postponed with the exception of any projects necessary to ready the City for receipt of water from the Karegnondi Water Authority (KWA).

As a result of the spending freeze and postponement of capital improvement projects in many of the City's funds, the 2016-2021 CIP update largely repeats the City's prior capital improvement plan with projects postponed by one fiscal year. Emerging capital improvement projects have been added and all existing projects have been update to reflect any changes in priority or estimated cost.

A Common Issue

The City of Flint, like many municipalities in the United States, has been severely impacted by the recession. In the wake of the Great Recession, many local governments in Michigan have witnessed a decrease in property tax and income tax revenues while seeing the level of state- shared revenue reduced.

With less money coming in, younger communities with relatively new infrastructure have been able to cope with severe budget reductions by postponing planned infrastructure installation or expansion. In established communities like Flint, however, budget cuts have led to deferred maintenance on existing infrastructure. This has often resulted in deterioration that now requires significant expenditures to catch up.

Many of the improvements listed in the CIP are a direct response to both the years of neglect due to severe budgetary issues and the fact that there has not been a Master Plan or comprehensive CIP developed for the City in decades.

Rising Costs of Deferred Maintenance

In April 2014, the City of Flint formally transitioned its primary source of drinking water by connecting to the Flint River. As a result of this switch, the corrosive nature of the treated river water has led to an accelerated aging process of the City's water infrastructure. This unexpected result of the switch has directly led to a shortened useful of this infrastructure. While the total cost for replacement of all City-owned water mains and property service lines is estimated, this total cost could approach or exceed $1 billion dollars.

Providing ongoing maintenance, such as resurfacing streets and repairing or replacing leaky roofs, is vital for maintaining the condition of assets. When maintenance is not fully funded, it contributes to deferred maintenance and capital costs. The City has not funded required maintenance on most facilities due to tight budgetary constraints and competing priorities. As a result the City has a large backlog in deferred capital projects which is likely to significantly increase as more information is collected on the actual condition of City facilities. Compounding the problem, as assets continue to deteriorate, the cost of repair will exponentially increase and can result in peripheral damage. For example, deferring roof replacement could later result in needing to replace the roof structural members, walls, and floor of a building.

Getting the Most out of Existing Infrastructure

The challenge to maintain services in the midst of shrinking resources and increasing costs has put pressure on City government to make its limited capital resources work more efficiently. City administration, elected and appointed officials, and staff, working under the oversight of an Emergency Manager appointed by the Governor, have taken several steps to make capital expenditures more closely reflect long-range objectives. However, the population and job losses, years of neglect, and lack of regular maintenance on much of the City's infrastructure, facilities, and properties have taken their toll.

City Budget

Making progress on the budget deficit has required difficult decisions and sacrifices, including dedicating minimal resources to capital improvements beyond emergency repairs. The FY16 and FY17 budgets were balanced through a mixture of significant revenue increases, significant expenditure de- creases, and steps taken to reduce legacy costs. Past revenue increases included increases in water and sewer rates, passage of a 6 mill property tax for police and fire, establishment of a special assessment district for street lighting, and implementation of a fee sufficient to cover the cost of waste collection.

Expenditure reductions included elimination of 20 percent of the City's workforce, compensation decreases equivalent to a 20 percent wage reduction for remaining employees, and the restructuring of health and retirement benefits for current employees and retirees necessary to develop a credibly balanced spending plan. The City continues to work towards a process of realistic budgeting that will enable capital needs to be planned for, rather than reacted to.

Other Influencing Factors

In addition to adopted City policy, including the recommendations of the Master Plan, several factors and recent or on-going initiatives have shaped the development of the CIP. These influencing factors include:

Most City facilities are in urgent need of upgrades, repair, and/or replacement of critical components, such as HVAC systems, roofs, parking lots, sidewalks, plumbing and electrical systems, security upgrades, lighting, windows, etc., and there are several buildings that are closed and not being used. Completion of some energy efficiency and other projects may result in long-term net savings but require initial capital outlays. The CIP calls for several facility assessments to determine the future viability of facilities and prioritize where investments should occur.

Improvements to the City's water system are needed, not necessarily to mitigate the factors from the primary source transfer, but to maintain and replace water system components that are in dire need of improvement or replacement regardless of the water source. Previous studies have shown the current system to have very low efficiency, with losses up to $2.0 million annually.

The street system in Flint has severely deteriorated. A Pavement Surface Evaluation and Rating System (PASER) study in 2012 found only 8% of Federal-Aid eligible City streets to be in good condition. Estimates for repair of local streets exceed $50 million.

Sidewalks throughout the City are in unsatisfactory condition and have an estimated unmet need of $40-85 million for repairs. These sidewalks are old,

cracked, have separations and heaving that are potential safety hazards, creating accessibility issues for persons with certain disabilities. Grants have been used to repair sidewalks in eligible areas but do not result in significant progress to handle needs. Though no detailed inventory is known to exist, it is also extremely likely that a significant number of curb ramps in the City are in poor condition, create access issues for persons with disabilities, and do not meet current standards under the Americans with Disabilities Act. Current city ordinance requires property owners to maintain their adjacent sidewalks. A 50/50 cost share program has the potential to expedite the repairs and improve accessibility throughout the city.

The City owns and operates several dams that are critical to the water supply for the City, as well as for recreational uses. All of them require varying amounts of rehabilitation and repair, with some being mandated to be removed as they are not viable and provide no purpose given the current drinking water system design.

Inflow and infiltration (I/I) into the sanitary sewer results in significant amounts of water being treated that is clean. Much of the I/I is at manholes and perforated manhole covers in floodplain areas that are regularly under water.

Housing diversity is limited, particularly for multi-family housing. Much of the housing stock (82%) was built prior to 1970 and 14.1% of parcels contain houses in poor or substandard condition.

Many residential parcels are vacant lots (22%) and there are thousands of blighted parcels in the City.

Flint Community Schools (FCS) suffers from budget problems, outdated facilities, and loss of students. Enrollment for the '14-'15 academic year was roughly 5,700 students, 86% lower than the peak numbers in the late 1960's. A number of FCS schools have been closed and many of them currently sit vacant awaiting demolition or reuse in some manner.

The City park system, including over 67 facilities and 1,800 acres, suffers from severe neglect. Lack of regular maintenance and upkeep and elimination of most staff and programs has resulted in many facilities being closed. Equipment at most parks is severely outdated and does not meet current design and safety standards, with many parks plagued by trash and graffiti. 34 parks are currently cared for through volunteer-led efforts including park tenders and park adopter programs. This helps reduce the overall cost of trash abatement, but not mowing costs as these groups do not mow many of the city's parks.

Budget issues have led to reductions in staffing and service levels for many city departments. For instance, since 2002 the Parks and Recreation Division has eliminated 89 staff positions, leaving less than 1 full-time employee focused on parks.

WHY PREPARE A CIP?

THE BENEFITS OF CAPITAL IMPROVEMENT PLANNING

Over time, public facilities need major repair, replacement, or expansion and maintaining and upgrading a community's capital assets requires significant financial investment. This investment must be weighed against other community needs and analyzed in light of community goals. The City of Flint, like many cities, is under pressure to make efficient use of capital resources and must make difficult choices. There are more needs than can be satisfied at once, and the selection of one investment over another may shape the development of the City for years to come.

Capital improvement planning is a valuable tool to ensure that choices are made wisely. The City's development goals are implem3nt, in park, by the careful provision of capital facilities. The benefits of this systematic approach to planning capital projects include:

Focused attention and co-ordination with community goals, needs, and capabilities – By developing a CIP, capital projects can be brought into line with the City's long-range plans by balancing identified needs with financial capacities. Considered individually, a building renovation, park system improvement, and street widening may all be viable projects, but each project may look quite different when, in the course of the CIP process, it is forced to compete directly with a number of other projects for limited funds.

Optimizes use of the taxpayer's dollar – The CIP helps the Mayor and City Council make sound annual budget decisions. Careful planning of capital improvements helps prevent costly mistakes. In addition, capital planning allows the City to save money in several other ways. For example, investors in municipal bonds tend to look more favorably on communities that have a CIP; if bond financing is selected for a capital improvement project, the City may realize significant savings on interest.

Guides redevelopment and growth – The location and capacity of capital improvements shape the growth and redevelopment of the City. City decision-makers can use the CIP to develop well thought out policies to guide future land use and economic development that are consistent with the implementation of the Master Plan.

Encourages coordination between departments – Participatory efforts of multiple City service units in the planning and coordination of capital improvement planning reduces scheduling conflicts and ensures that high priority needs are addressed before those of a lower priority. In addition, the CIP can be used to promote innovative management techniques and improve governmental efficiency and effectiveness by combining projects within the same area to provide a lower overall cost than if the projects were constructed separately.

Improves the basis for intergovernmental and regional cooperation – Capital improvement planning offers public officials of all governmental units (City of Flint, MDOT, Genesee County, Flint Community Schools, Genesee County Metropolitan Planning Commission, Mass Transportation Authority, etc.) an opportunity to plan the location, timing, and financing of improvements in the interest of the community and region as a whole. Advance planning also allows these entities to seek funding opportunities that may have limited availability otherwise and provide the potential for coordination/ cost-sharing for projects that span community borders and jurisdictions of the various governmental entities.

Maintains a sound and stable financial program – Unplanned emergency expenditures can endanger the financial well-being of the City, as the lack of ability to plan generally leads to higher costs. Sharp changes in the tax structure or bonded indebtedness may be avoided when construction projects are planned in advance and scheduled at intervals over a number of years. When there is ample time for planning, the most economical means of financing each project can be selected in advance. The CIP can help the City avoid commitments and debts that would prevent the initiation of other important projects at a later date.

Enhances opportunities for participation in Federal or state grant programs – Preparing and regularly updating a CIP improves the City's chance of obtaining aid through Federal and state programs that provide funds for planning, construction, and financing of capital improvements. By knowing which projects are planned, eligibility can be determined and specific grants sought for eligible projects. The CIP should include projects that can be started quickly by having construction documents ready should grant funds become available

LEGAL BASIS FOR THE CAPITAL IMPROVEMENT PLAN

State of Michigan
The State of Michigan provides for the development and use of a capital improvement plan in the Municipal Planning Act (Section 125.3865, Act 33 of the Public Acts of 2008).

> "To further the desirable future development of the local unit of government under the master plan, a planning commission, after adoption of a master plan, shall annually prepare a capital improvements program of public structures and improvements, unless the planning commission is exempted from this requirement by charter or otherwise."

If the planning commission is exempted, the legislative body either shall prepare and adopt a capital improvements program, separate from or as a part of the annual budget, or shall delegate the preparation of the capital improvements program to the chief elected official or a nonelected administrative official, subject to final approval by the legislative body.

The capital improvements pro- gram shall show those public structures and improvements, in the general order of their priority, that in the commission's judgment will be needed or desirable and can be under- taken within the ensuing 6-year period. The capital improvements program shall be based upon the requirements of the local unit of government for all types of public structures and improvements. Consequently, each agency or department of the local unit of government with authority for public structures or improvements shall upon request furnish the planning commission with lists, plans, and estimates of time and cost of those public structures and improvements."

City of Flint
In addition, the City of Flint Charter (Section 4-504) reinforces the City's planning responsibility, with Section 4-505 calling for periodic review of the plan:

> ***4-504 Comprehensive Plan*** – "The Mayor shall propose and the City Council, after review by the Planning Commission, shall approve, with the modifications the Council deems necessary, a comprehensive plan of policies for the social, economic and physical development and conservation of the City."
>
> ***4-505 Periodic Review of Plan*** – "After approval of the plan, the Mayor shall annually propose any amendments necessary to keep the plan current; and the City Council, after review by the Planning Commission, shall consider the Mayor's proposed amendments and make the modifications in the plan that it deems necessary."

CIP & ANNUAL BUDGET PROCESS

The City's Annual Budget itemized and appropriates the funds needed for all municipal purposes. It is generally recommended that budgets separate out capital improvements from operating expenses to ensure a clear demarcation between the two.

The ***Operating Budget*** includes the day-to-day operational expenses of the City, such as salaries, supplies, and expenses for programmed activities.

A ***Capital Projects Budget*** would include the anticipated capital project costs. The first two years of projects contained in the Capital Improvement Plan should be the basis for formulating the Capital Projects Budget

The City needs to strive to maximize resources by maintaining a balance between operating and capital budgets. A continuous relationship exists between the CIP and the annual budget and a direct link can be seen between the two documents, as there should be in a strategic planning environment. Budget appropriations lapse at the end of the fiscal year as the operating budget is funded with recurring annual revenues such as taxes, licenses, fines, user fees, and interest income.

Linking Planning to the Budget

The CIP plays a significant role in the implementation of a Master Plan by providing a link between planning and budgeting for capital projects. The CIP process precedes the budget process and is used to develop the capital project portion of the annual budget.

Approval of the CIP by the Planning Commission does not mean that they grant final approval of all projects contained within the plan. Rather, by approving the CIP the Planning Commission acknowledges that these projects represent a reasonable interpretation of the upcoming needs for the City and that projects contained in the first year of the plan are suitable for inclusion in the up- coming budget to be considered and ultimately approved by the City Council

Priorities vs. Funding Availability

Priority rankings do not necessarily always correspond to funding sequence. For example, a road-widening project which is ranked lower than a park project may be funded before the park project because the road project has access to a restricted revenue source, whereas a park project may have to compete for funding from other revenue sources. A project's funding depends upon a number of factors – not only its merit, but also its location, cost, funding source, and logistics.

City Funds with Capital Spending Capacity

101- General Fund for limited capital improvements

402 – Public Improvement Fund (Millage) for capital building improvements

202–Transportation (major Roads) fund

203-Transportation (local roads) fund

590 – Utilities (sewer) capital funds

591 - Utilities (water) capital funds

RELATIONSHIP BETWEEN THE CIP & CITY MASTER PLAN

The completion of the City's "Master Plan for a Sustainable Flint" in late 2013 has formed the basis for Flint's continued recovery. The Master Plan is the first in over 50 years and was the result of collaboration between City leaders, residents, and business owners to develop a vision for Flint's recovery efforts.

The CIP is intended to complement the Master Plan to ensure infrastructure can be provided to meet the goals of the Master Plan, with a clear definition of needs and priorities to assist in budget development annually. However, it must be noted that the City's capital needs far exceed available resources, even with additional funding from non-traditional sources (grants, donations, etc.).The condition of the facilities will require difficult decisions to be made regarding prioritization of CIP projects.

Comprehensive planning influences the programming of capital improvements. As noted above, state law reinforces that link by requiring that the Planning Commission annually prepare a CIP to support and implement Master Plan recommendations.

The City also provides a strong connection between the comprehensive plan and capital improvements in the form of short-range implementation strategies. In addition to the Master Plan, several other planning documents provide implementation recommendations that link the future vision of the community to relatively short-term actions.

These documents include, but are not limited to:

- Parks & Recreation Master Plan
- Flint Parks Assessment & Amenity Inventory
- Reimagining Chevy in the Hole
- Flint River Assessment
- City of Flint Water Reliability Study
- Flint River District Strategy
- City of Flint Water Supply Assessment
- Flint River Restoration Plan
- Flint Downtown Traffic and Parking Study
- Flint Street Lights Project
- City of Flint Water and Waste- water Rate Study
- Portfolio Energy Use Analysis
- State Revolving Fund Report
- Transportation Improvement Plan (TIP)
- City Strategic Plan

CIP as a Planning Document

The CIP is a planning document that serves to consolidate necessary projects associated with the City's various infrastructure asset areas. These needs are gathered primarily from findings of the City's master planning efforts and staff identification through the operations and maintenance of the City's facilities and systems. The CIP provides a methodology for addressing the infrastructure needs to allow staff to determine anticipated funding sources and schedules for the projects necessary to meet the needs, based on priority, and the availability of the financial and staffing resources to perform these projects.

Annual Update Process

The CIP is a dynamic and needs to be reevaluated at least annually. Each year all projects included within the CIP should be reviewed, a call for new projects made, and adjustments made to existing project lists arising from changes in the amount of funding required, conditions or timeline. A new year of programming is also added each year to replace the year funded in the annual operating budget.

The CIP will continue to develop over time. Greater attention shall be devoted to provide more detailed information about individual project requests, program planning, fiscal analysis, fiscal policies and developing debt strategy.

Need for Further Study

A vast majority of Flint's infrastructure projects are not new infrastructure – it is the need to replace or rehabilitate and adjust the current aged facilities. The infrastructure in place supported a significantly higher residential population and industrial user base, so the infrastructure is generally prepared to support the "rebirth" of the City as described in the Master Plan. Other investigations should be considered to verify CIP needs and benefits, and assist in determining priorities.

PUBLIC INVOLVEMENT

The City is committed to including the public in its recovery efforts and a significant public involvement campaign was included during the Master Plan.

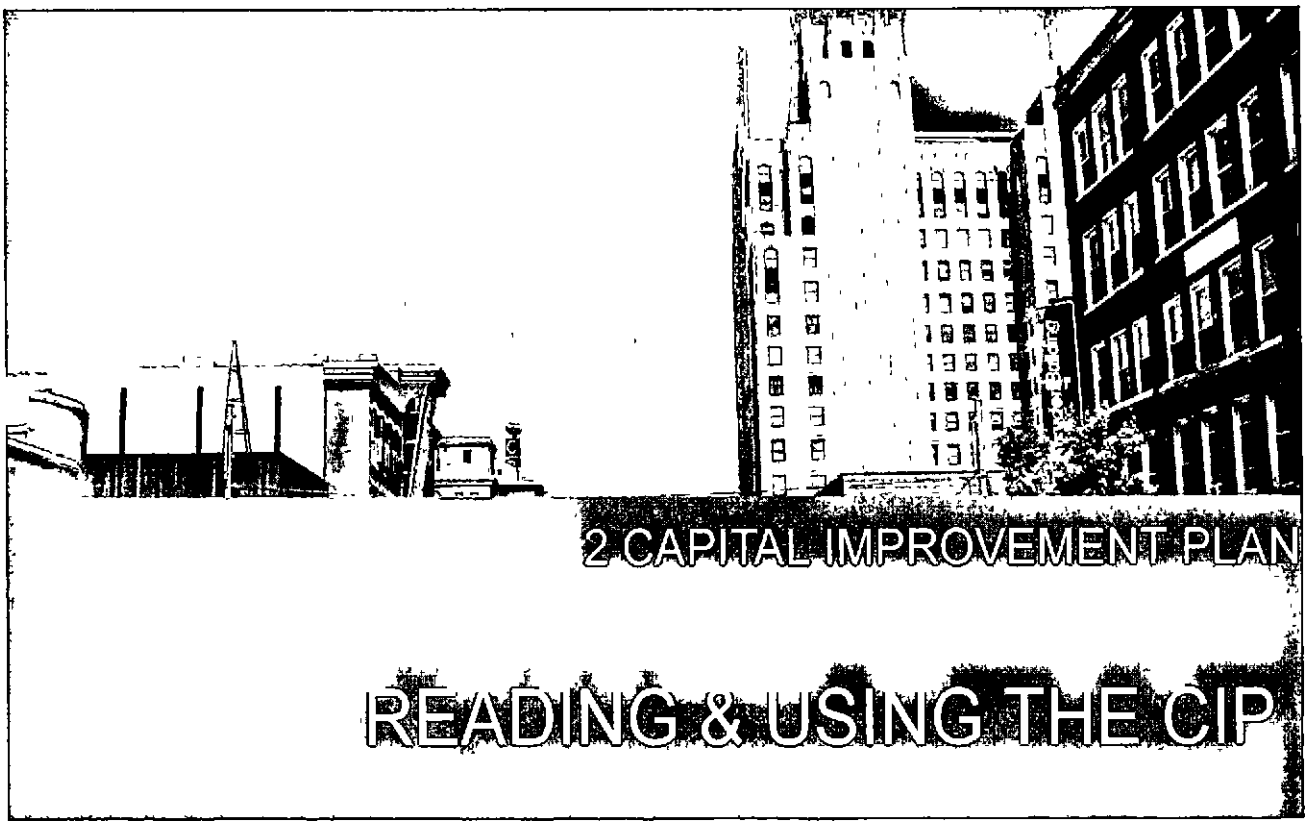
Given both the unusual and unique circumstances during the update of this document, extensive community engagement and outreach was unable to occur. As noted earlier, the current landscapes involving the water and subsequent budget stability leaves many of the projects in this document unattainable at this given time.

Court, State and even Federal decisions that currently hang in the balance all have a tremendous unknown impact on the implementation of this document. With these uncertainties noted, a traditional outreach process did not occur. Although not ideal, this document has the potential to literally change by the day, and more extensive on-gong community outreach is needed to address the public's concerns around water.

It is the hope that a targeted outreach process would continue throughout 2016 and far beyond, given the potential lasting effects of the inadequate water that has made its way into Flint households.

PUBLIC INVOLVEMENT AFTER THE CIP PROCESS

Some of the projects included in the CIP are studies and planning efforts that should incorporate public involvement as an integral part of the project. The majority of the projects that are identified for implementation in the CIP are "traditional" municipal public works projects, such as water main replacements, road reconstructions, park development, government buildings, and structures.



2016-2021 CIP POLICY

This CIP outlines a schedule of public expenditures over the ensuing six-year period. The CIP provides for large, physical improvements that are permanent in nature, including the basic facilities, services, and installations needed for the functioning of the community. These include transportation systems, parks, utilities, municipal facilities, and other miscellaneous projects. The CIP provides a list of high value capital budget items or projects for inclusion in the proposed Capital Budget of the City's Annual Budget Document.

Standards for Inclusion

The City's CIP is a document that initiates and tracks high expenditure capital projects, purchases and programs. To qualify for inclusion in the CIP, a single project or a program of projects comprised of components of a common infrastructure or capital system (e.g., neighborhood parks system, annual street program, etc.) must meet certain standards, which are to be set by the Planning Commission with assistance from City staff and input of residents.

General guidance on the standards for an item's inclusion in the CIP includes that the project:

- Is consistent with an adopted or anticipated component of the Master Plan, a state or Federal requirement, or a City Council approved policy;
- Constitutes a permanent, physical, or system improvement in excess of an established cost or significant equipment purchases in excess of an established cost; or,
- Adds to the value or capacity of the infrastructure of the City.

Unfunded Needs

The CIP cannot address all of the capital expenditure needs for the City. As with other communities throughout the region, state, and nation, the City's infrastructure systems have needs that are mounting at such a rate that they cannot be addressed within the span of a six- year CIP. Some identified needs cannot be addressed because of limits on the annual amount of available funding or staffing resources. Others cannot be addressed because of a lack of any applicable funding source, or perhaps policy or legal restrictions. Furthermore, given the current financial situation created due to legal rulings, the City of Flint finds itself with very little-to-no room for infrastructure upgrades outside of the immediate water systems.

As a result, there are needs whose solutions cannot be implemented within the CIP. Rather than discard or ignore these items, they are included in the CIP as unfunded needs and are shown as being unfunded, with many of them shown out- side of the 6-year window. This information will provide guidance to City staff in examining the limitations and restrictions currently in place and to seek alternative methods to achieve solutions.

Operational & Maintenance Needs

Many cities include within their annual budget an Operations and Maintenance (O&M) Budget and a Capital Projects budget. Projects that are considered operational, maintenance, or recurring are typically excluded from the CIP, but are captured in the O&M Budget portion of the Annual City Budget Document.

In this CIP, some O&M projects are included in the CIP. A separate O&M budget should be developed in future years to include the items that have a regular schedule for maintenance or replacement, such as:

- Minor bridge rehabilitation;
- Minor street repairs and filling of potholes;
- Replacement of roofs, doors, windows, etc.;
- Parking lot reconstruction;
- Computer system upgrades;
- Hydrant and water valve replacement;
- Security system upgrades; and,
- Water meter replacement.

Capital Projects Budget

Approval of the CIP by the City Council does not mean that the Council grants final approval or authorization for all the projects contained in the plan. Rather, by approving the CIP Council acknowledges that they agree that these projects represent a reasonable interpretation of the upcoming needs for the City, with the projects contained in the first two years of the plan being the basis for the City's next Capital Projects Budget. Until a project is contained within an approved annual budget and funding is identified, projects and schedules for each included in the CIP are only guides that are likely to be changed as conditions change.

ASSIGNING PRIORITY

The following classification system has been used to prioritize capital improvement needs and is used in the list of CIP projects in this document:

PRIORITY 1 – URGENT
Urgent, high-priority projects that should be done if at all possible.

These include projects that are required to comply with a Federal or state requirement; projects that would address an emergency or remedy a condition dangerous to public health, welfare, and safety; projects that would provide facilities for a critically needed community program; projects needed to correct an inequitable distribution of public improvements in the past; and projects vital to the economic stability of the City. A special effort is made to find sufficient funding for all of the projects in this group, realizing that this is not feasible given the significant needs

PRIORITY 2 - IMPORTANT
High-priority projects that should be done as funding becomes available.

These include projects that would benefit the community and projects whose validity of planning and validity of timing have been established.

PRIORITY 3 – DESIRABLE
Worthwhile projects to be considered if funding is available.

These are projects that are adequately planned, but not absolutely required, and should be deferred to a subsequent year if budget reductions are necessary. These projects may end up being included within a funded portion of the CIP if alternative sources of funding are identified.

CIP Project Narratives

The CIP includes an extensive inventory of capital improvement projects proposed for inclusion in the proposed Capital Budget of the City's Annual Budget Document. As a planning document with a direct impact on the physical make-up of the city, the projects included in the CIP should support long-term City policy established in the Master Plan.

2015 CIP Progress

It is important to note the significant amount of effort and progress that has been either initiated or completed over the course of the previous CIP year. Given that 2015 represent the first, official combined CIP in the City's history, the 2016 CIP update will highlight a handful of the significant projects that were addressed from the previous year, and also update on a broad basis, the total progress that has been achieved by the City, within each chapter. To make the document easier to read and follow, a color-coded system has been devised to help the reader track the progress and understand the document:

Project Completed in 2015 -

Project On-Going from 2015 -

Project Added from 2015 -

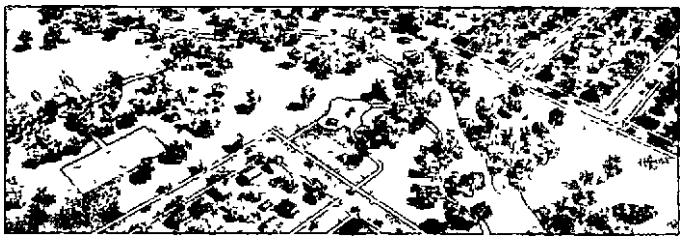
Project Removed from 2015 -

Imagine Flint Master Plan for a Sustainable Flint

The Master Plan utilizes an innovative "placemaking" approach, which defines desired places within the City. While traditional approaches to city planning are often concerned with the specific "uses", the Land Use Plan builds on the idea of establishing unique and desirable places. The Place-Based Land Use Plan is the central component of the Master Plan, the implementation of which individual capital projects should work toward.

Master Plan Place Types

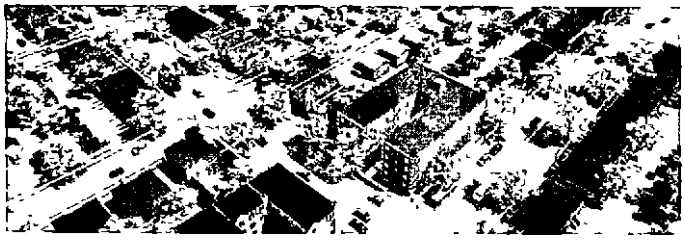
The Land Use Plan establishes 12 distinct place types within the city that provide for various land uses and types of places, essential for creating a harmonious and inviting community in which to live, work, and visit. The following summary highlights the intent of each place type. Chapter 4: Land Use Plan of the Master Plan provides detailed descriptions accompanied by a series of implementation strategies for each place type.



Community Open Space
Community Open Space areas are designated where parks, open spaces, and environmental features predominate These areas are defined by large natural features, such as large greenways along the Flint River, Swartz Creek, Gilkey Creek, and Kearsley Creek, areas around Thread Lake, Kearsley Reservoir, and Flint Park Lake, large wooded areas and urban forests, and, other City parks and open spaces.

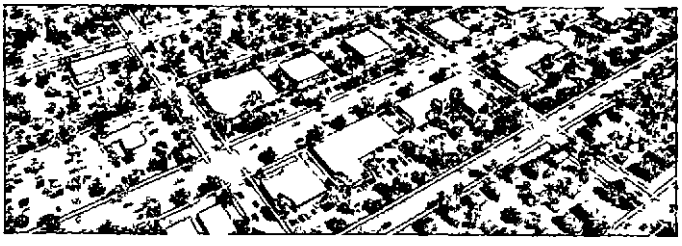
Green Neighborhoods
Flint's Green Neighborhoods are areas where previously vacant or underutilized properties have been repurposed They have become low-density, residential neighborhoods with a significant amount of land dedicated to green uses, community gardens, small-scale urban agriculture, and small open space areas.

Traditional Neighborhoods
The Traditional Neighborhood is the building block of the Flint community It is where most people live and families are raised, in primarily detached single family homes Flint's Traditional Neighbor hoods are supported by various other uses including schools, com- munity centers, religious institutions and parks.

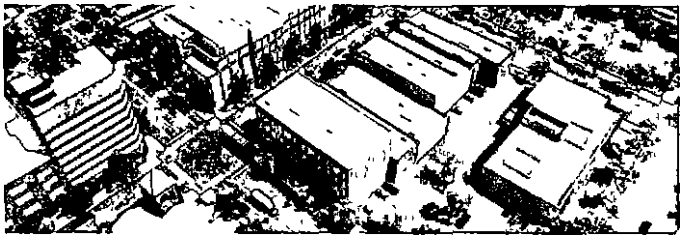


Mixed Residential
Mixed Residential areas are generally concentrated around Down- town, providing a local population to help patronize Downtown businesses Mixed Residential areas are also situated along busy corridors, providing an opportunity for transit-oriented development and more robust commercial services

Neighborhood Centers
Neighborhood Centers are a focal point of Flint's neighborhoods and are distributed throughout the City Neighborhood Centers are primarily located at the intersection of busy streets that provide ease of access for nearby residents and contribute to the overall activity of the area



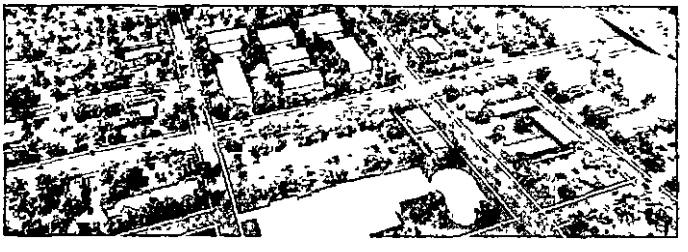
City Corridor
City Corridors are situated along Flint's busiest roads, providing areas for a range of activities on parcels easily accessible by automobiles and serviced by transit City Corridors leverage the economic potential of traffic and help minimize land use incompatibilities by containing a variety of uses in manageable areas throughout the City.



Downtown
Downtown is a dense and vibrant mixed use area near the geographic center of the City along Saginaw Street, between the Flint River and Interstate 69. Downtown is, and should continue to be, a compact area consisting of a variety of uses that together provide and foster an active pedestrian-oriented area

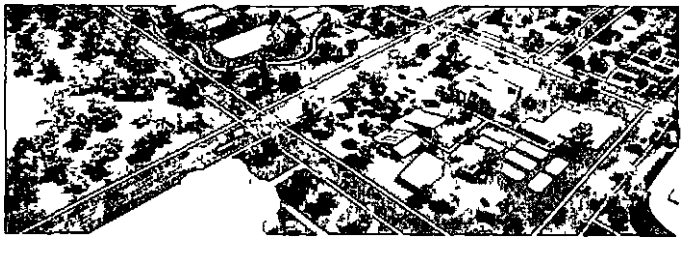
Civic/Cultural Campus
As home to Mott Community College, the Flint Cultural Center, and the Flint Central High School campus, the Civic/Cultural Campus is a unique area of the City. The Civic/Cultural Campus is a unique place type consisting entirely of institutional and public uses and any redevelopment within this place type should consist of uses that complement or strengthen the existing campus.

University Avenue Core
Flint's University Avenue Core is a unique area of the City, home to Hurley Medical Center, Kettering University, Atwood Stadium, and General Motors Tool and Die These anchor institutions form the central component of a high-intensity district outside of Downtown Flint.



Commerce and Employment Centers
Commerce and Employment Centers are areas where the development pattern is focused around a community anchor such as a large employer, regional commercial center, or a cluster of smaller employment-related uses. Commerce and Employment Centers can attract a significant number of workers and visitors from outside of the community

Production Centers
Production Centers are designated where the City's major industrial centers and economic generators exist such as GM's Flint Truck Assembly and portions of the Buick City site. These intense industrial uses are capable of generating considerable noise, traffic, and other nuisances and should be separated from residential and commercial areas



Green Innovation
The deindustrialization of the City has resulted in a significant population decline and areas of Flint that once consisted of fully built out neighborhoods are now vacant. Areas of Green Innovation represent significant redevelopment opportunities that hold the potential for a variety of eco-friendly and sustainable solutions to repurpose large vacant areas and help reinvent the City.

CIP ORGANIZATION

Several areas of the Master Plan identified infrastructure/capital projects and the CIP maintains the same chapter structure to enable a one-to-one comparison between CIP projects and Master Plan policy. The CIP is organized into the following chapters:

- Chapter 1 – Introduction & Overview
- Chapter 2 – Reading & Using This CIP
- Chapter 3 – Housing & Neighborhoods;
- Chapter 4 – Transportation & Mobility;
- Chapter 5 – Environmental Features, Open Space, & Parks;
- Chapter 6 – Infrastructure & Community Facilities;
- Chapter 7 – Economic Development & Education; and,
- Chapter 8 – Public Safety, Health, & Welfare.
- Chapter 9 – Moving Forward

To assist with implementation of the Master Plan and align CIP projects with long-term City policy, the CIP has been organized around the core chapters of the Master Plan. The CIP includes several sections with corresponding Master Plan chapters, including those in the above table.

CIP ORGANIZATION

CIP CHAPTER	MASTER PLAN CHAPTER
3	Chapter 5 – Housing & Neighborhoods
4	Chapter 6 – Transportation & Mobility
5	Chapter 7 – Environmental Features, Open Space, &
6	Chapter 8 – Infrastructure & Community Facilities
7	Chapter 9 – Economic Development & Education
8	Chapter 10 – Public Safety, Health & Welfare

Grouped CIP Projects

Within each section, CIP items have been grouped based on the various sections and sub-headings contained within the Master Plan. This will enable a one-to-one comparison between City policy identified in the Master Plan and the projects identified in the CIP. So, for example, improvements to traffic signals along Pierson Road directly relate to the "Technology & Wayfinding" section of the Transportation & Mobility chapter.

In some sections the categories are further subdivided to ensure there is clear delineation of needs for departments. This is most significant for the Infra- structure & Community Facilities section, which is subdivided for City Hall, miscellaneous City facilities, Water Department, and Sewer Department subsections in the CIP.

Information Sources

Capital projects and costs listed were obtained from a variety of sources, including:

- Lists of capital projects provided by various departments;
- Applications prepared by the City for various grants; and,
- Previous studies prepared by the City, other governmental entities, or consultants on behalf of either.

In some cases, projects listed have had very little detail prepared and cost estimates have been approximated based on the anticipated scope of the project. It is very likely that many of the costs noted for various projects will vary, sometimes considerably, when additional information or analysis is obtained.

READING CIP PROJECTS

All projects have the following information provided:

- ***Project Name*** – a short description of the project.
- ***Project Narrative*** – provides additional detail about each project that is known at the time of the CIP completion. The exact extent of the scope of all projects may not be known at this time but the narrative does give additional detail that is not always obvious in the Project Name.
- ***Priority*** – as discussed previously, all projects were given a priority based on their need. Priority is provided for projects on a case-by-case basis and there is no ranking between projects either within a department or between departments. In considering the priority, a number of factors were considered. Of primary importance was how the project might assist in implementation of the Master Plan, as well as other plans (e.g., Strategic Plan), provide a long-term cost savings or other similar benefit (e.g., roof replacement/repair prevents interior water damage to a building), or is required as a regulatory requirement (e.g., dam repair required by the state).

Priorities are stated as:

1 *URGENT*: projects that should be done if at all possible

2 *IMPORTANT*: projects that should be done as soon as funding is available

3 *DESIRABLE*: worthwhile projects that can be deferred if needed

Projects have also been ordered within each priority group such that the most important projects are at the top of the list and least important at the bottom. For example, various roadway improvements are listed as '2 – IMPORTANT', but some projects should be implemented ahead of others within that priority group based on their location and the place type they serve.

- ***Total Cost*** – the total cost of the project, which may be a one-time cost, multi-year, or continuous. For continuous cost projects (i.e., projects such as water-main replacements done every year on a 20-year cycle), the total cost shown is for the 20-year CIP duration.
- ***City Cost Share*** – the portion of the total cost assumed to be the responsibility of the City.
- ***Non-City Funds*** – funding provided by grants, donations, or other sources not part of the City's budget.

With regard to City cost share, unless a non-City fund source such as a grant has been identified and secures, it is assumed that the City will be responsible for funding 100% of the cost of the project.

CIP PROJECT SPREADSHEET

The information in the following CIP tables is a summary of the CIP Project Spreadsheet included at the end of the CIP. The project spreadsheet includes similar information in a slightly different format. The most relevant difference is that the spreadsheet includes an "Unfunded Needs FY 2015-2035" column. This column reflects the amount of the total cost of each project that is currently unfunded – essentially not included in an approved budget, has no identified funding source except for the City budget, an assumed match for a grant that is or may be sought for the improvement, etc.

Many "unfunded" projects are likely to be included in a future CIP update and may have funding from alternate sources. All projects contained on the CIP spread-sheet are included in the tables below, with some multi-phase projects on the spreadsheet lumped together into one project (e.g., design engineering, construction, and construction engineering for road projects are split into three phases on the spreadsheet but combined below).

3 CAPITAL IMPROVEMENT PLAN

HOUSING & NEIGHBORHOODS

The City of Flint has lost approximately half its population over the past fifty years. This population loss has resulted in a tremendous physical impact across Flint's neighborhoods, with some experiencing significant vacancies and degrading housing conditions, while other neighborhoods have fared more favorably, but are still fighting to remain stable

The Housing and Neighborhoods Chapter in the Master Plan outlines a wide variety of strategies needed to address the drastic changes that have occurred in Flint's neighborhood structure. In more populated neighborhoods, the City must devote resources toward vacant lot maintenance, targeted demolition, building rehabilitation, and code enforcement to prevent these neighborhoods from destabilizing

In other traditional single-family neighborhoods experiencing significant population loss, the City should focus on helping these areas evolve into well- maintained, less dense, "green neighborhoods." A few neighborhoods with extreme population loss are being repurposed to make way for non-residential development that can make productive use of largely vacant areas.

The CIP plays an important role in tying infrastructure improvements to the needs of each neighborhood place type identified in the Master Plan.

CIP Vision for Housing & Neighborhoods

Imagine thriving neighborhoods, free of blight, where a targeted demolition stabilizes traditional neighborhoods and transforms high-vacancy neighborhoods into stable green neighborhoods with larger lots, community gardens, and well-maintained open space
Imagine inclusive neighborhoods teeming with mixed-income and mixed use developments integrated into the fabric of the community and connected to transit and walkable retail options.
Imagine neighborhoods with re-tooled, modern infrastructure that is well-matched to the service needs of the population.

Capital Improvement Overview

Housing maintenance or neighborhood stabilization projects are typically not included in a Capital Improvement Plan. Unfortunately, the burden of managing vacant properties falls on local government and cities like Flint are struggling to find the resources necessary to demolish or rehabilitate vacant buildings and take care of vacant property. Moving forward, it is important to note that the City continue to commit its Community Development Block Grant Funds and pursue additional grants to fund neighborhood stabilization efforts such as owner occupied rehabilitation and new housing construction The City should also use grant funds to help stimulate multi- family supply in a fairly weak housing market

Imagine Flint Neighborhood Planning Initiative

The City has committed to completing 10 - 15 neighborhood plans within the City by 2020. Investments in improving the quality of housing, along with strategic investments in neighborhood infrastructure should be guided by this neighborhood-level planning effort. In November 2015, the City was awarded a multi-year grant from the Ruth Mott Foundation to begin this process. The grant will enable to the City to develop and implement two (2) neighborhood plans annually, over the next two years. The City should continue to work with its community partners and identify the necessary funding to carry-out this program indefinitely.

HUD Choice Neighborhoods Planning Project (CN)

The City, in partnership with the Flint Housing Commission (FHC) was awarded a $500,000 CN planning grant for the South Flint community. The grant specifically focuses on the Atherton East housing complex, one of the most isolated and crime-ridden developments within the City. Identified in the master plan as an inequitable development, the site currently lies within a floodplain. The grant will allow the City, FHC, and residents of the South Flint community the ability to craft a transformation plan for housing rehabilitation and relocation. The plan and any new potential development would focus on creating vibrant mixed-income neighborhoods that include quality, affordable housing and a multitude of options for the residents of South Flint.

Housing & Neighborhoods – 2015 CIP Progress

It's important to document and detail the tremendous amount of work being done by the City over the past year. The following details the significant progress and investment made towards improving Flint's housing and neighborhoods. In all, there are 8 on-going projects that total roughly $12.8 million dollars in capital improvements to Flint neighborhoods.

A full list of the projects can be found on the project spreadsheet listed within this chapter.

Hardest-Hit Funding.

The City and GCLBA partnered again in 2015, resulting in $12 million of Federal demolition dollars being awarded to the GCLBA, to address abandoned properties in Flint. The funding will result in 800-1,000 additional problem properties being removed from neighborhoods.

Blight Removal Activities.

The City continues to take a community-driven approach to eliminating blight. 2015 produced some astounding numbers of blight removal:

- Over 1,000 tons of trash removed.
- 31 participants of Operation Fresh Start.
- 4,208 enforcement complaints received; 3,551 responded to and 1,826 resolved.

Neighborhood Inventory Program.

The City continued to partner with the Community Foundation and their NSG program to offer $21,000 in mini-grants for neighborhood data collection work. In all, 70,000 pieces of data was collected.

Housing & Neighborhoods Policy

The following housing and neighborhood policies are derived from the Master Plan and should shape all projects moving forward. These policies provide a framework for evaluating the merits of any capital improvement project. For detailed discussion of each policy, please refer to the Master Plan section and the page referenced.

Housing options diversification.

The City partnered with MSHDA to commission a Target Market analysis report. The TMA should be used to encourage new, quality multi-family housing options to meet the new place based land use patterns.

Master Plan reference Diversifying Housing Options, pp 93-95.

Data-driven investment.

The City developed a blight-matrix that uses data to guide future block-level intervention. This has produced a data-driven foundation to make investment decisions that align with the Land Use Plan.

Master Plan reference Developing An Investment Framework, pp. 97-100

Neighborhood stabilization.

The City continues to equitably commit funds for neighborhood stabilization, with at least half allocated to Green Neighborhood.

Master Plan reference: Neighborhood Revitalization Priorities, p. 101; Eliminating Blight and Urban Decay, p 110

Code enforcement.

The City continues to develop a pro-active code enforcement program designed to first address absentee property owners in the city who are failing to adequately provide care to their property. Currently a Magistrate position is being created to help expedite citations created through Code Enforcement.

Master Plan reference Code Enforcement, p 101.

Low-Maintenance Restoration & Greening.

With funding from HHF, the City and GCLBA have begun to restore recently demolished lots with low-growth clover. The planting of clover offers a significant reduction to annual maintenance of vacant lots, resulting in two (2) mowing's a season.

Master Plan reference: Greening & Repurposing, pp. 102-103

HOUSING & NEIGHBORHOODS CAPITAL IMPROVEMENT PLAN

Blight Elimination

The Master Plan calls for the development of a multi-phase blight elimination framework that serves to stabilize neighborhoods through a collaborative approach between residents, local government, institutions, community groups, and business leaders and developers. In its important campaign to end blight in Flint, the City produced a Five-Year Blight Elimination Framework with assistance from the Genesee County Land Bank. The blight elimination framework uses the Master Plan place types to provide direction for blight removal, which can be used by institutions, residents, business owners, public officials, and the entire Flint community. Grant funding is aiding in the implementation of this document.

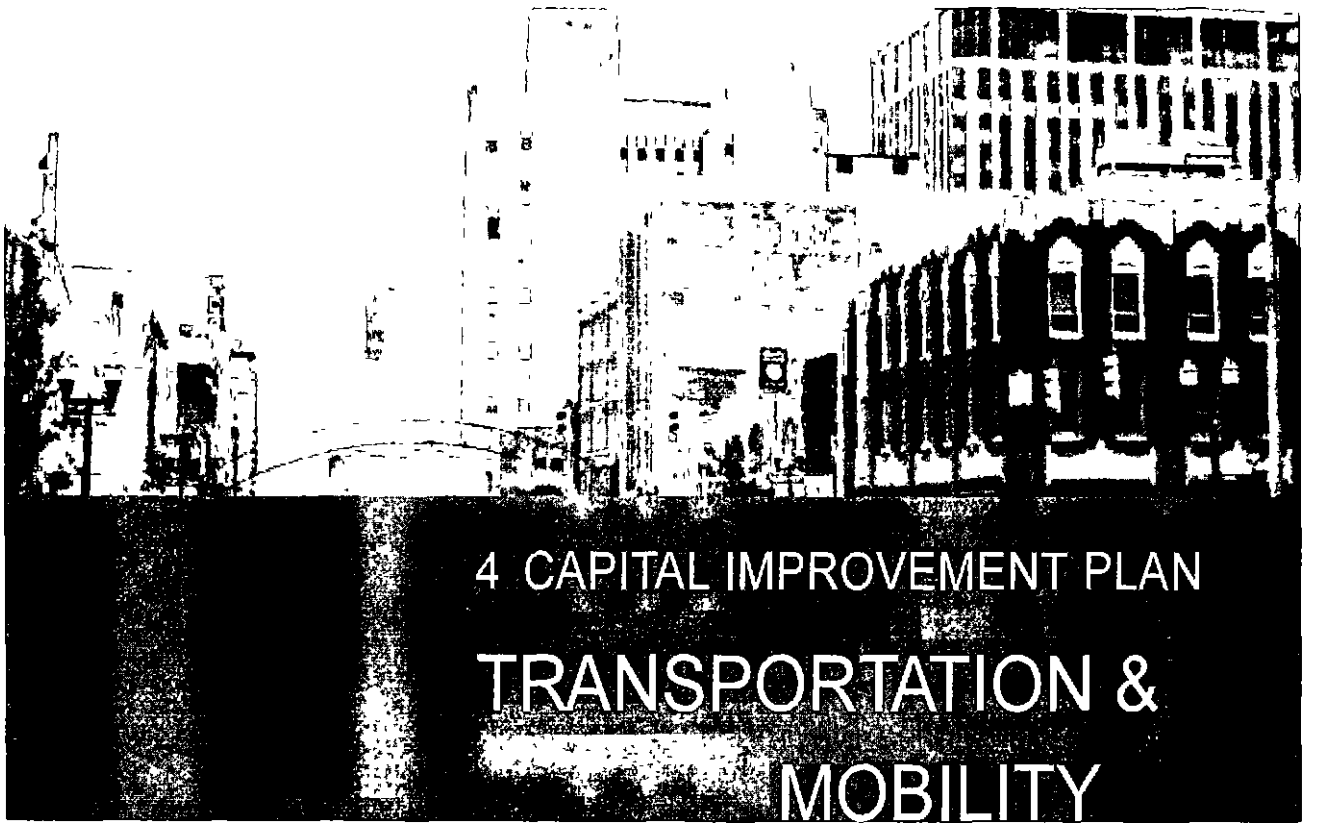
PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Code Enforcement Provide effective code enforcement to support blight removal and work to ensure that properties remain blight free. 5-year cost.	1 – URGENT	$2,500,000	TDB	TDB
Boarding Boarding of 5,000 structures. 5-year cost.	1 – URGENT	$1,100,000	TDB	TDB
Mowing Mow 20,000 properties annually with next-door support and using mow strips for properties not adjacent to occupied properties, if not reused. 5-year cost.	1 – URGENT	$17,988,300	TDB	TDB
Waste Removal Removal of 71,000 tons of trash, debris, and hazardous trees. 5-year cost.	1 – URGENT	$3,800,000	TDB	TDB
Demolition Demolish 5,000 vacant and blighted residential structures. 5-year cost.	1 – URGENT Grant Funds Secured	$63,950,000	TDB	TDB
Vacant Lot Reuse Facilitate reuse of 5,000 vacant lots. 5-year cost.	1 – URGENT Grant Funds Secured	$1,400,000	TDB	TDB

HOUSING & NEIGHBORHOODS CAPITAL IMPROVEMENT PLAN

Improving Neighborhoods

Investing in Flint's existing neighborhoods is a key component in improving quality of life, a guiding principle of the Master Plan. The City should continue to identify projects and initiatives that improve neighborhoods in accordance to the Master Plan

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Smith Village Landscaping and Green Infrastructure Plan The Renaissance of Smith Village Development is nearly complete. This plan will address remaining issues such as inconsistent grading and drainage, and make the neighborhood more attractive through better streetscape and landscape design. These issues give us the opportunity to make Smith Village a demonstration project for the implementation of green infrastructure, helping the City cut long term maintenance and utility costs while becoming more sustainable in the process.	2 – IMPORTANT	$75,000	$75,000	$0
Smith Village Landscaping and Infrastructure Improvements Implementation and construction of the above plan. Will include. streetscape and gateway improvements, landscaping and grading, sidewalk and utility repairs, and green infrastructure elements such as rain gardens.	2 – IMPORTANT	$195,000	$195,000	$0
LED streetlight program Converting existing streetlights to LED fixtures would require an initial capital outlay but the savings in energy costs was anticipated to have a payback of as soon as 3 years (based on EPICS-Purdue University study).	3 – DESIRABLE	$5,00,000	$5,000,000	$0
Residential Parcel Assessment Biennial inventory of residential parcels for structural quality and housing vacancy. Cost of undertaking one such inventory is $20,000.	2 – IMPORTANT Grant Funds Secured	$20,000	$0	$20,000
Choice Neighborhood Planning Project Development of a comprehensive Transformation Plan for the south Flint community, which specifically targets the Atherton East housing complex. The plan includes funding for "short-term" action projects to improve the quality of neighborhoods in South Flint.	1 – URGENT Grant Funds Secured	$500,000	$500,000	$0
Imagine Flint Neighborhood Planning Initiative Two-year planning project that will create at least 4 neighborhood plans across Flint.	1 – URGENT Grant Funds Secured	$487,580	$177,580	$320,000
Interactive Parcel Mapping Platform Development and implementation of a parcel based mapping platform accessible to residents to assist with City code enforcement efforts and neighborhood stabilization.	2 – IMPORTANT	$50,000	$0	$50,000



4 CAPITAL IMPROVEMENT PLAN

TRANSPORTATION & MOBILITY

The City must approach transportation and mobility with a strategy that is driven by the Master Plan. The City is primed to leverage its strategic regional location, access to the interstate highway system, and connection to Bishop International Airport for new economic development efforts The City is also faced with the challenge of restructuring its transportation and mobility systems that were designed and built for a population twice that of which they currently serve.

The Transportation & Mobility Plan of the Master Plan stresses the need to work with agencies, to better coordinate efforts, manage and maintain their roadways, and improve the transportation system in Flint. Furthermore the city must undertake and support initiatives that reduce dependence on the automobile while improving walkability and bikeability.

Land use and transportation are inherently linked. Together, they create the places people go and the ways they get there. Land use and transportation must be closely coordinated to ensure that Flint grows in a sustainable and efficient way.

All policies and projects should consider the impacts on both the City's land use pattern and transportation network based on the following questions:

- Does the existing transportation system support anticipated development?
- How can future development complement the transportation network?
- What modes of transportation are most appropriate for a given area?
- How can investment in transportation accomplish other community goals, including neighborhood stabilization; infrastructure improvement; economic development; and the promotion of public safety, health and welfare?
- How does the local environment influence transportation improvements?

CIP Vision for Transportation & Mobility

Imagine an efficient, coordinated, and reliable transportation system within Flint, where an interactive network of trails, sidewalks, bike lanes, buses, and roads afford all citizens multiple modes of safe transit. Imagine a Flint that is one of the most walkable and bike-able communities in all of Michigan. Imagine a Flint that capitalizes on its strategic regional location, access to the interstate highway system, existing railroad infrastructure, and connection to Bishop Inter- national Airport to spark new industries and grow companies.

CIP Overview

The City of Flint has the opportunity to redesign its image and develop a more efficient mode of transit throughout the city. An aging street network that is severely in excess given the cur- rent population counts should be addressed though prioritized projects that align accordingly with the future functional classification map, identifying current and future traffic counts. These roadways offer support to the areas of envisioned higher density and regional opportunities found in the land use plan. Focusing on major road way improvements that offer increased bicycle and pedestrian mobility options will aid the City towards shifting the perception of an auto-oriented town, while providing the vibrant spaces for increased recreation and reduced long-term maintenance for the city to manage.

A strong prioritization on road diet projects and streetscape improvements present lower cost options that offer higher reward returns. Furthermore, the transportation and mobility CIP has the opportunity to connect with the larger regional transit network, of which air, rail and public transit have tremendous long-term opportunities. Linking increased passenger rail options with a growing state network of public transit options provides opportunities for Flint to significantly tap into its strategic location

Transportation & Mobility – 2015 CIP Progress

It's important to document and detail the tremendous amount of work initiated by the City over the past year and document the progress being made from the previous years CIP.

In all, 4 major projects were fully completed and an additional 13 have begun and still remain in progress. This substantial progress results in roughly $2.9 million fully executed on CIP projects last year (2015) and another $19.9 million worth of capital improvements that remain "in progress".

The following details the significant projects and investment made towards improving Flint's roads and increasing mobility for all residents and visitors. A full list of the projects can be found on the project spreadsheet listed within this chapter.

Pierson Rd. CMAQ Project
$420,000 project designed to upgrade traffic signals and remove unnecessary ones.

N. Saginaw St. Rehab.
$2.5 million dollar project that rehabilitated 1.8 miles of N. Saginaw St.

Stewart St. Bridge
A $400,000 project that provided preventative maintenance that runs over Buick City.

Genesee Valley Trail
A 10-foot wide non-motorized trail was completed that connects the City with the larger, regional trail network.

Transportation & Mobility Policy

The following transportation and mobility policies are derived from the Master Plan and should shape all projects moving forward. These policies should provide a framework for evaluating the merits of any given capital improvement project. For detailed discussion of each policy, please refer to the Master Plan section and page referenced

Infrastructure Design
An increased emphasis on road diets and traffic calming is taking shape as multiple City-streets are awaiting the results of engineered road diet studies.

Master Plan reference: Infrastructure Design, p 123-126

Trail Development
The City completed and remains in negotiations to build additional non-motorized trails.

Master Plan reference Trail Improvements, p 128

Street Tree Management
A tree inventory has been conducted and a draft street tree management plan is currently under review. Once finalized, adequate dollar amounts will be appropriated in upcoming CIP updates.

Winter Plowing & Storage
There is a need to acquire a second location to store salt during the winter months to reduce reload and travel time when plowing city streets. Additionally, due to the age of the fleet, there are mechanical challenges faced by the Department. DPW will need access to an indoor storage facility to help decrease startup/down times.

Aging Fleet
Due to the aging of the fleet used to perform winter maintenance activities, the City desperately needs to start replacing the tandem trucks to reduce the repair costs and downtown currently being experienced. DPW is proposing to purchase at least two trucks/year, during the next three years.

Pedestrian Safety (Walking Audit)
The City will be partnering with community groups to begin to audit the city's sidewalk network while also assessing the ADA compatibility.

Master Plan reference: Signage & Safety, p. 130-132

Sidewalk Repair (50/50 Program)
The City launched a 50/50 program works to repair faulty sidewalks with partial payment coming from homeowners. The City should also continue to secure federal, state, and grant funding for the repair or installation of sidewalks.

Master Plan reference: Signage & Safety, p. 131

Mass Transit Authority
The MTA should be consulted to determine needs related to local infrastructure (bus turn-outs, stop locations, intersection phasing, ITS applications, etc.) and identify desirable modifications to established routes.

Master Plan reference. Transit, p. 133-136

Data Collection efforts
The City launched an aggressive program to better understand exactly "where" mobility problems are occurring. The problem spotter technology allows residents and DPW staff to identify problems in real time, through the use and collection of data.

TRANSPORTATION & MOBILITY CAPITAL IMPROVEMENT PLAN

Maintenance of Existing Streets

The street network within the City includes more than 550 miles of roadways. The current network of local streets has long been neglected, with estimates of repairs needed at $50 million, and this estimate may be well below actual costs when considering the full scope of projects. Even with the undeniable need, the FY 2012-13 maintenance programs accounted for only 4.5 miles of resurfacing. At that pace, City roadway resurfacing would be completed on a 122-year cycle even though the life expectancy of an asphalt roadway is 20 years at best. Pavement Surface Evaluation and Rating System (PASER) ratings in 2012 found only 8% of City streets to be in "Good" condition, down from 28% in 2008.

Investment in streets is vital to accomplishing the goals of the Master Plan and should be considered an investment in other aspects of the community. The goods and people transported by the street network supports commerce, industry, health, education, activity, and other important functions. Land use changes in the City and their relationship to the changing transportation needs should be analyzed in great detail as part of any redevelopment project. The Master Plan discussed a number of concepts and techniques to consider in various parts of the City to reflect the change in context, multi-modes of transportation available, and current practices in the industry.

Opportunities to make improvements, such as instituting Complete Streets, converting one-way streets to two-way in the area, consolidating curb cuts, reconnecting cul-de-sac streets, road diets, reconfiguring intersection alignments, removing traffic signals that are no longer needed, signal technology improvements, and access management (all of which are discussed in detail in the Master Plan Chapter 6), can all contribute to "right-sizing" the roadway network to meet the needs of the new Flint and be a critical infrastructure improvement for implementation of all aspects of the Master Plan. Eliminating some roadway segments can be done without compromising local mobility or character of neighborhoods, and these segments then do not compete with critical segments for maintenance dollars. There are numerous four-lane roadways throughout the City that have Average Daily Traffic (ADT) totals below 20,000, making them candidates for a road diet via conversion to three-lanes or narrow median four-lane boulevard, along with other improvements specific to the modal requirements of the corridor. A number of the projects included below include review of feasibility of a road diet implementation (see page 125 of the Master Plan for a complete list and map).

NOTE. It is anticipated that moving forward the City will spend an average of $75,000 each year for general engineering services. In addition, it is anticipated that the annual cost for bridge inspections and engineering services by consultants will be $44,000. These annual costs are not included as line items within the following CIP project table.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Lapeer Road – I-69 to Dort Hwy. Milling and resurfacing of existing pavement, pavement repairs, manhole adjustments, and reconstruction of curb ramps from I-69 to Dort Highway. Cost includes PE, construction, and CE.	2 – IMPORTANT	$1,382,973	$276,595	$1,106,378
Future TIP projects Not identified projects 1.5 million dollars for FY21 at assumed 20% cost-share. TIP projects for 2017-2020 recognized individually as new projects in CIP. FY2021 only year with unidentified projects.	2 – IMPORTANT	$1,500,000	$300,000	$1,200,000

Court Street Project to include milling the existing pavement, pavement repairs, placement of 4 inches of HMA over existing pavement, manhole adjustments, sidewalk ramps and associated sidewalks and curbs reconstructed in accordance with ADA guidelines from Crapo to Center. Cost includes PE, construction, and CE. TIP application submitted. Competing for federal funding award.	2 – IMPORTANT	$3,296,932	$659,386	$2,637,546
Davison Road Project to include milling the existing pavement, pavement repairs, placement of 4 inches of HMA over existing pavement, manhole adjustments, sidewalk ramps and associated sidewalks and curbs reconstructed in accordance with ADA guidelines from Hamilton to Dort. Cost includes PE, construction, and CE.	2 – IMPORTANT	$1,983,650	$396,730	$1,586,920
Fleming Road Project to include milling the existing pavement, pavement repairs, placement of 4 inches of HMA over existing pavement, manhole adjustments, sidewalk ramps and associated sidewalks and curbs reconstructed in accordance with ADA guidelines from Pasadena to Bell Creek. Cost includes PE, construction, and CE. TIP application submitted. Competing for federal funding award.	2 – IMPORTANT	$1,762,578	$352,516	$1,410,062
Kearsley Street Resurfacing project to include milling the existing pavement, pavement repairs, placement of 4 inches of HMA over existing pavement, manhole adjustments, sidewalk ramps and associated sidewalks and curbs reconstructed in accordance with ADA guidelines Chevrolet to Beach. Cost includes PE, construction, and CE. Wade Trim performing preliminary design. Construction anticipated FY 2017.	2 – IMPORTANT Grant Funds Secured	$1,318,891	$263,778	$1,055,113
Van Slyke Road Project to include milling the existing pavement, pavement repairs, placement of 4 inches of HMA over existing pavement, manhole adjustments, sidewalk ramps and associated sidewalks and curbs reconstructed in accordance with ADA guidelines from Atherton to Hemphill and a pedestrian crosswalk added at the Atherton Rd intersection. Cost includes PE, construction, and CE. TIP application submitted. Competing for federal funding award.	2 – IMPORTANT	$858,837	$171,767	$687,070

TRANSPORTATION & MOBILITY CAPITAL IMPROVEMENT PLAN

Technology & Wayfinding

Projects on the transportation network to improve mobility are not restricted to paving or reconstruction. There are many low cost improvements that can be considered that can have a dramatic positive impact on mobility. Given the reduction in population, it is very likely that some intersections that are currently signalized would no longer warrant them. The City has 288 signalized intersections, well over twice the number anticipated for the population according to the Institute for Transportation Engineers (ITE). Conversion of signalized intersections to two-or four-way stop control can save several thousand dollars annually in electricity costs, not to mention the cost of hardware and controllers. For intersections where signals are warranted, improvements can still be made, including coordinating a series of signals on major arterial roadways to allow vehicle platoons driving the posted speed limit to progress through a corridor. Where synchronization isn't an option, alternatives such as changing the cycle length as warranted by traffic throughout the day or addition of vehicle detection systems to modify signal phasing based on traffic volumes in real time can be considered to minimize queuing of vehicles and wasted green time. These changes, in addition to emergency signal preemption and transit signal priority can assist in improving mobility for emergency vehicles and buses

Another, often overlooked, method of improving mobility is through improved wayfinding signage. Addition of distinctive, uniform, and attractive signage along key corridors, intersections, and locations can be instrumental in directing visitors to key destinations, such as downtown, public parking, parks, hospitals, schools, colleges, motels, restaurants, etc. Within key areas such as downtown, additional pedestrian-level maps can further highlight attractions in each area. As the Master Plan is implemented it is very likely that a number of projects in addition to those listed will be identified to improve mobility. The City should collaborate with entities such as MDOT to review traffic signals on state routes and downtown business groups for ideas on wayfinding programs in the downtown. It is also feasible that student projects at one of the local colleges could be done for wayfinding recommendations and options throughout the City.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Analysis of City traffic signals Review of all City traffic signals to determine if they are war- ranted and, if so determine if synchronization, cycle length changes, etc. can	2 – IMPORTANT	TBD	TBD	TBD
Pierson Road CMAQ Project LED and wireless traffic signal upgrades at 6 of 12 intersections from Harvard to Dort Highway. Traffic signal improvements at the following locations: Pierson Road at Harvard Street, Saginaw Street, Selby Street, and Horton Ave. Improvements include full signal replacement and ADA ramp upgrades at each intersection. Traffic signal removal at the following locations: Pierson Road at North Street and Pierson Road at Industrial Ave. This is the second phase of a project completed in 2012 to	COMPLETED	$420,517	$0	$420,517

TRANSPORTATION & MOBILITY CAPITAL IMPROVEMENT PLAN

Infrastructure Design

Street network improvements that are not typical resurfacing or reconstruction can also have a dramatic impact on mobility. Implementation of "Complete Streets" designed and operated to be safe for pedestrians, bicyclists, motorists, and transit riders of all ages and abilities can often not only ease congestion but also support economic growth, improve safety, encourage walking and biking, improve air quality, and enhance mobility for children. A Complete Streets approach to roadway infrastructure promotes the development of a multi-modal transportation network where safe alternatives to cars are available. The City has adopted a non-binding Complete Streets ordinance stating its support for development of multi-modal corridors, and a logical next step is adopting a binding policy outlining how various components can be integrated into future public and private development projects. The components could include design guidelines, technological improvements, signage, education programs and outreach, road diets, one-way to two-way conversions, addition of bike lanes, access management, mid-block pedestrian crossings/pedestrian signals, traffic calming, and intersection realignment, among others. The Master Plan has already identified a number of corridors in the City that could be candidates for a road diet (conversion from four full width travel lanes, often with full length center left turn lane to generally 2 travels lanes with on-street parking, transit lanes, bike lanes, and/or medians added). A handful of projects have been identified below as a first step in the Complete Streets program for the City during implementation of the Master Plan

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Saginaw Street Milling and resurfacing of existing pavement, pavement repairs, manhole adjustments, and reconstruction of curb ramps from Hamilton Avenue to the Flint River. Cost includes PE, construction, and CE.	2 – IMPORTANT	$1,940,822	$388,164	$1,552,658
Buick City redevelopment perimeter streets Total reconstruction with storm sewer upgrades, new sidewalk, drive approaches, ADA ramps and signals to facilitate redevelopment in the area. Cost includes PE, construction, and CE.	2 – IMPORTANT	$3,750,000	$750,000	$3,000,000
South Saginaw Street road diet Planning staff received a $30,000 grant to complete the road diet for S. Saginaw St. from I-69 to Hemphill Rd. These resources will result in new bike lanes being created on Saginaw St., a streetscape plan with gateway enhancements being generated and minor streetscape improvements being implemented.	1 – URGENT Grant Funds Secured	$30,000	$0	$30,000
Harrison Street Enhancement Cost includes CE and construction. Rowe Professional Services completed preliminary design. Construction scheduled calendar year 2016	2 –IMPORTANT	$385,189	$106,884	$278,345
Saginaw Street Construction and CE for 1.77 miles of road rehabilitation, including cold-milling of existing asphalt roadway, placement of HMA surfacing, select curb repair, minor base repair including detail 7 & 8 joint repair, manhole cover adjustments, ADA compliant ramp improvements, select storm sewer improvements, traffic signal improvements, pavement markings and restoration from Hamilton to Pierson.	COMPLETE	$2,449,677	$444,616	$2,005,061

TRANSPORTATION & MOBILITY CAPITAL IMPROVEMENT PLAN

Mobility & Access

Given the fact that the City's transportation network hosted much higher traffic volumes than are expected in the future, the existing network is likely a candidate for other improvements not already mentioned that would improve mobility and access. The City should consider a comprehensive analysis of the street network within the City to ascertain what improvements best meet the needs, both current and future. The scope of this analysis should build upon that already completed in the Master Plan but go to a higher level of detail, looking at additional data such as traffic counts, crash data, land use, etc. and develop a more comprehensive listing of projects that can be discussed at a future update of this CIP. This study should also consider the need for connectivity to Bishop International Airport and the state highways and interstate highways in the City (M-21, M-54, I-69, I-75 and I-475), transit needs of MTA, and regional mobility. Other factors to consider is reconnecting cul-de-sacs where mobility would be enhanced, making new network connections to eliminate isolation from a neighborhood, and street removals that no longer serve their original purpose.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
City-Wide Transportation Network Analysis Study suggested performing a thorough analysis of the true needs of the City's roadway network.	1 – URGENT	TBD	TBD	TBD
Bus Rapid Transit The City, in partnership with the Mass Transit Authority (MTA), should pursue a feasibility study on BRT transit along Saginaw Street. Identified as the "primary artery" within Flint, BRT along Saginaw Street would provide increased accessibility and access through much of the City's core.	3 – DESIRABLE	TBD	TBD	TBD
Leith Street (Access Point) Total reconstruction with storm sewer upgrades, new sidewalk, drive approaches, ADA ramps and signals from Dort to Saginaw, which would restore east-west access across I-475 and Buick City and provide access on the north side of the City. Cost includes PE, construction, and CE.	3 – DESIRABLE	$18,750,000	$3,750,000	$15,000,000
Leith Street Bridge Preventative maintenance of the bridge over the C&O railroad includes substructure repairs of the piers under the fascia beams. Costs include construction and CE.	COMPLETED	$41,977	$2,098	$39,878

TRANSPORTATION & MOBILITY CAPITAL IMPROVEMENT PLAN

Bridges

As would be expected, bridges in the City are in a similar situation when compared to the streets. There are a number of vehicle and pedestrian bridges that are in need of regular maintenance, rehabilitation, or replacement. At least 53 bridges in the City are rated as "structurally deficient" or "functionally obsolete" according to a Highway Bridge Report prepared by MDOT in 2013. The City has a total of 32 bridges under its jurisdiction, 23 of which (72%) were found to be "structurally deficient" or "functionally obsolete" according to a Bridge Technical Report prepared by Genesee County Metropolitan Planning Commission. All of these bridges facilitate the movement of vehicles over freeways, other roadways, railroads, and watercourses and are essential to the movement of goods and people in the City. It is unlikely that any of the vehicle bridges are no longer required; however there are some pedestrian-only overpasses that no longer serve their original purpose due to the changes in population, closing of schools, etc.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Atherton Road over Carmen Creek Bridge Preventative maintenance of the bridge over Thread Creek. Cost includes PE, construction, and CE.	1 – URGENT Grant Funds Secured	$425,000	$85,000	$340,000
12th Street Pedestrian Bridge Demolish pedestrian bridge over 12th Street and railroad at Southwestern Academy. Verify that bridge no longer is needed to meet future plans of Flint Community Schools and Master Plan implementation.	3 – DESIRABLE	$150,000	$150,000	$0
Kearsley Park Boulevard Bridge Preventative maintenance of the bridge over Gilkey Creek. Cost includes PE, construction, and CE.	1 – URGENT Grant Funds Secured	$135,000	$32,400	$102,600
Barton Street Bridge Preventative maintenance of the bridge over Thread Creek. Cost includes PE, construction, and CE.	1-URGENT Grand Funds Secured	$183,750	$44,100	$139,650
Bridge Maintenance Projects Annual allocation to perform miscellaneous routine bridge maintenance projects FY2017 to FY2021. $200,000 annually.	1 – URGENT	$1,000,000	$1,000,000	$0
Torrey Road (12th Street) Bridge over Carmen Creek Bridge replacement. Costs include PE, construction, CE. Construction anticipated in FY2017	2 - IMPORTANT Grant Funds Secured	$1,227,500	$245,500	$982,000
S. Saginaw Street Bridge over Flint River Preventative maintenance project. Costs include PE, construction, CE. Construction anticipated in FY2018	2 – IMPORTANT Grant Funds Secured	$387,500	$77,500	$310,000
Stewart Street Bridge Preventative maintenance of the bridge over the C & O Railroad includes pin and hanger replacement, deck joint replacement, and cleaning and coating the beam ends. Costs include construction and CE.	COMPLETED	$414,754	$20,737	$394,016

TRANSPORTATION & MOBILITY CAPITAL IMPROVEMENT PLAN

Pedestrian Network

The City has a comprehensive sidewalk network that serves its neighborhoods, commercial areas, and recreational areas. The condition of many sidewalks is deteriorating and areas exist where gaps limit pedestrian safety and mobility. There is no detailed inventory of sidewalks but there is extensive evidence of the need for significant work being needed to maintain, repair, or replace sidewalks. Sidewalk maintenance is an on-going challenge given Flint's limited resources, a problem common in most urban areas. A walkability audit should be performed that identifies pedestrian paths and physical barriers to walking, access to transit, and accessibility to persons with disabilities

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Sidewalk repairs Repairs to sidewalks city-wide with estimated cost of $40,000,000 minimum. By ordinance, sidewalk repairs are the responsibility of the property owner and a cost-sharing program is being evaluated to facilitate city-wide improvements. An accurate, detailed inventory is needed to assess most critical areas based on Master Plan implementation goals.	2 - IMPORTANT	TBD	TBD	TBD
Walkability audit of City pedestrian network Review of entire network of City sidewalks to determine condition and ADA compliance to allow prioritization of projects. Should include extensive public involvement and be consistent with the implementation of the Master Plan.	2 - IMPORTANT	TBD	TBD	TBD

Right-of-way Maintenance

The City has recently completed a comprehensive street tree audit. These findings are under review and will determine specific monetary amounts dedicated to street tree maintenance for the upcoming years. Additionally, fleet service and upgrades are needed for winter maintenance activities.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Street Tree Maintenance Annual allocation to perform routine maintenance of urban tree system as recommended in the Street Tree Management Plan. Costs include tree removals, plantings, and routine maintenance activities.	2 - IMPORTANT	TBD	TBD	TBD
Salt Storage Facility Secure additional salt storage facility in northern section of City to decrease salt truck reload time and improve plowing efficiency.	2 - IMPORTANT	TBD	TBD	TBD
Equipment Storage Facility Facility to store vehicles to protect engines and mechanical parts to decrease startup time/downtime and improve response times.	2 - IMPORTANT	TBD	TBD	TBD
Tandem Trucks Purchase two trucks per year for the next three years, thereafter follow approved depreciation schedule for vehicle replacements ($175,000 each)	1 - URGENT	$1,050,000	$1,050,000	$0

TRANSPORTATION & MOBILITY CAPITAL IMPROVEMENT PLAN

Trail Improvements

Trails provide many benefits to the community including an improved transportation system, health and safety, environmental preservation, and economic vitality for the community. Trails and pathways are an important component of creating a livable community and attracting a talented workforce to the City of Flint and Genesee County. The Genesee County Regional Trail Plan included a number of trail projects that should be considered both within the City as well as regional trail connections. The Genesee County Plan identified the Flint River Trail, Genesee Valley Trail, and Grand Traverse Greenway as the top 3 priority trail projects in the county. Groups, such as the Genesee Regional Trail Council (GRTC), consisting of representatives from local communities, Friends of the Flint River Trail, M-15 Heritage Route, Clio Area Pathways, Genesee County Parks and Recreation Commission, Genesee County Road Commission, Genesee County Land Bank, MTA, MDOT, University of Michigan-Flint, Ruth Mott Foundation, and numerous other groups. The purpose of the GRTC is to create an interconnected system of trails linking people and communities throughout Genesee County and guide the development of the countywide trail plan. There are a number of agencies and organizations that offer funding for the development of non-motorized trail systems. The Federal and state government, non-profit organizations, and corporations all offer programs for trail funding, and several funding sources can only be used for non-motorized trail systems. Maintaining eligibility for the various funding sources and seeking funding for improvements is critical to meeting the goals for trails in the City.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Northeast Flint River trail extension (3.8 miles) Estimated from Genesee County Regional Trail Plan (2007)	3 – DESIRABLE	$1,140,000	$1,140,000	$0
Eastern Flint River trail extension (4.9 miles) Estimated from Genesee County Regional Trail Plan (2007)	3 – DESIRABLE	$1,470,000	$1,470,000	$0
Western Flint River trail extension - Carriage Town (1.3 miles) Estimated from Genesee County Regional Trail Plan (2007)	3 – DESIRABLE	$390,000	$390,000	$0
Southern Flint River trail extension - Flint Golf Club (2.0 miles) Estimated from Genesee County Regional Trail Plan (2007)	3 – DESIRABLE	$600,000	$600,000	$0
Western Flint River trail extension - Mott Park (2.2 miles) Estimated from Genesee County Regional Trail Plan (2007)	3 – DESIRABLE	$660,000	$660,000	$0
Southern Flint River trail extension - Swartz Creek (2.8 miles) Estimated from Genesee County Regional Trail Plan (2007)	3 – DESIRABLE	$840,000	$840,000	$0
Southern Flint River trail extension - CSX railroad (3.1 miles) Estimated from Genesee County Regional Trail Plan (2007)	3 – DESIRABLE	$930,000	$930,000	$0
Genesee Valley Trail Construct 10-foot wide non-motorized pathway from Chevrolet Ave. to M-21.	COMPLETED	$655,803	$131,070	$524,733

5 CAPITAL IMPROVEMENT PLAN

ENVIRONMENTAL FEATURES, OPEN SPACE & PARKS

Built around the Flint River, the City has always had a direct relationship with the natural environment. The Master Plan presents an opportunity for the City to generate greater social and capital benefits from its environmental features, open spaces, and parks.

Open space and parks are critical components of urban life. They provide opportunities for passive and active recreation, access to nature, enhanced air and water quality, and help define the character of each neighborhood and community as a whole. They also present possibilities for improving the efficiency of the City's infrastructure and capital systems.

Accordingly, the Master Plan establishes the framework for more extensive blue/green corridors throughout the City, that are complemented by linked trails, paths, parks, and other open space amenities. Investment in environmental features, open spaces, and parks capital is needed to generate greater benefits from these assets.

The Environmental Features, Open Space & Parks Plan in the Master Plan aims to balance some of Flint's most significant challenges with unique opportunities to enhance the quality of life for its residents, and create a natural framework around which to build a new, prosperous Flint. It also identifies ways that water bodies, green open spaces, and parks can dovetail into other planning efforts, including land use, transportation, community facilities, public safety, and more.

CIP Vision for Environmental Features, Open Spaces & Parks

Imagine a new national reputation for Flint, with the City positioned as a post-industrial leader in protecting the environment and building upon its natural assets to clean polluted air, land, and water, and confront climate change. Imagine an extensive network of well-kept parks, safe and accessible to all and beautifully maintained. Imagine the Flint River revitalized by an alliance of City, non-profit, volunteer, and resident partners. Imagine the Flint River as an anchor for economic growth and recreation and home to a vibrant "green waterfront" of parks and trails spanning the entire length of the river.

CIP Overview

Primary capital investments within Flint parks system should be made in conjunction with the land use and transportation and mobility plans, ensuring that any investment, even minimal in nature, over the next 5-years be targeted at the *vulnerable populations, thus* aiding neighborhood stabilization and our Youth demographics.

Increased emphasis should be placed on implementing alternative methods to address the traditional landscapes that are found throughout many Flint parks today. By identifying portions or entire public spaces that are unused, transitions to native landscapes shall be prioritized as part of a comprehensive park naturalization process.

This approach is highlighted within the Chevy Commons Greening Project that incorporates both active and passive landscapes with non-traditional greening processes, ultimately reducing long term *maintenance costs while* providing benefits to infrastructure systems through new green and blue infrastructure methods

City of Flint Parks Millage

The parks millage, which ends in 2016, is the only dedicated source of funding for City parks and open space. Maintaining our extensive network of parks is costly and the revenue brought in by our millage has been on a steady decline due to decreased property values. In 2015, the parks millage only generated $312,000 of which 90% was spent the most basic of mowing services and utilities. Staffing in parks has also been vastly decreased. In 2008 the City had the equivalent of 65 full time positions. In 2015 it had less than one full time position shared by four staffers. Renewing the parks millage in 2016 and finding additional long term funding is necessary as the parks millage alone is not sufficient to our needs. Despite budget constraints, the City continues to aggressively pursue grant funding to supplement the millage.

Parks & Open Space – 2015 CIP Progress

Over the past year, the City has made great progress on major capital projects. In all, 8 projects have been completed totaling $575,000 in capital upgrades during 2015. Additionally, 7 projects worth $1.24 million remain in progress.

The following list details the significant projects and investment made towards improving Flint's infrastructure. A full list of the projects can be found on the project spreadsheet listed within this chapter.

Brennan Park Improvements
A $55,000 community-build project that to improve the playground.

Riverbank Park Development
A $500,000 phased improvement project that will increase access to the park, complete with a new ADA ramp.

Max Brandon Park Eco-Park
A $137,500 project to naturalize parts of Max Brandon Park while incorporating community engagement through interpretative signage

Environmental Features, Open Spaces & Parks Policy

The following environmental features, open space, and parks policies are derived from the Master Plan and should shape all projects moving forward. These policies should provide a frame- work for *evaluating the merits of any* capital improvement project. For detailed discussion of each policy, please refer to the Master Plan section and the page referenced.

Flint River revitalization.
One of the defining projects in the revitalization of Flint should be transforming the Flint River and its riverfront into a clean and appealing recreational and entertainment destination. Projects should include increased waterfront park space, re-design of Riverbank Park, increased connectivity to Downtown and neighborhoods, and better utilization of University Pavilion.

Master Plan reference Flint River, pp 150-151; Flint River & Water- front, pp. 220.

River greenbelt.
Vacant land adjacent to the Flint River should be assembled for "blue/green infrastructure" that can both absorb rainwater and provide additional natural spaces for residents.

Master Plan reference Greenbelt (Blue/Green Infrastructure), pp 151-152

Water quality.
The Flint River, Thread Lake, Kearsley Reservoir, Flint Park Lake, and other waterways should be protected from pollution and contamination.

Master Plan reference Water Quality, p 150

Park access.
All residents should have reasonable access to safe and attractive parks and natural areas, including having a neighborhood park within ½ mile of their home and a larger park within 1 mile. All park improvements should be ADA compliant.

Master Plan reference· Park Standards, p. 156

Operation & maintenance.
Operational & maintenance Partnerships for shared *responsibility for each of the* City's parks should be dictated by the number of park users, with small local parks maintained by neighborhood groups and large regional parks transferred to state, county, or regional control. All parks would remain under the oversight of the City of Flint and a Parks Advisory Board comprised of residents and stakeholder
Master Plan reference· Park Maintenance, p 158.

Park Partners and Partnerships.

Park partners, who currently work in over 40 of Flint's 68 parks, have also contributed to capital improvements at Max Brandon, Flint Park Lake, Hardenbrook, Longway, Mott, Sarginson, and Bassett parks.

Master Plan reference· Park Partners, 158

Naturalization.
The transition of under-utilized parkland from manicured turf or fields to native vegetation represents an opportunity to increase park beauty and reduce *maintenance costs.*

Master Plan reference. Naturalization, pp. 160-161.

ENVIRONMENTAL FEATURES, OPEN SPACE & PARKS CAPITAL IMPROVEMENT PLAN

The City of Flint Parks and Recreation Master Plan 2013-2017 was adopted in late 2012, which includes additional information about the park system. Maintenance of a current park master plan is a requirement for eligibility of numerous grant programs and the City is urged to keep this plan updated. The City has been very successful at obtaining various grants to make improvements and, given the budget issues of the City, continued grant acquisition will be needed to make any improvements of significance. Recommendations of the park master plan should be reviewed in concert with Master Plan recommendations to ensure that the distribution of park funding is equitable, serving populations in need, and strategic investments in parks and community centers serve to stabilize neighborhoods

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
McKinley Park Improvements The City was awarded a Natural Resources Trust Fund grant from MDNR to make improvements to McKinley Park, which is located on Thread Lake. Grant to be matched by donations. Project will include tennis court renovations, improved waterfront access, new playground equipment and accessibility improvements, pavilion and overlook construction, parking improvements, and related items.	1 – URGENT Grant Funds Secured	$300,000	$0	$300,000
Riverbank Park Improvements Make upgrades to meet ADA standards, barrier-free access to amphitheater stage including new railings, landscaping enhancements, and kayak access to river. This project is funded by a grant from the Michigan DNR.	1 – URGENT Grant Funds Secured	$500,000	$0	$500,000
Brennan Park Improvements Improvements to the park and playground equipment.	1 – URGENT Grant Funds	$55,000	$15,000	$40,000
Bassett Park Master Plan CIP Improvements consistent with the park master plan developed in 2012, including filling the side yard, construct storage shed and concrete slab, improve tennis courts and ball diamonds, improve playground, and add mulch to trails.	2 – IMPORTANT	$124,000	$15,000	$110,000
Hardenbrook Park Master Plan CIP Improvements consistent with the park master plan developed in 2013, including pavilion repairs, installation of a new pavilion, benches, picnic tables and grills, landscaping, and new playground equipment.	2 – IMPORTANT	$87,000	$0	$87,000
Longway Park Improvements CIP Developed in early 2016 through the Adopt-a-Park program, project includes removal of hazardous equipment, new play scape, improvements to the soccer/rugby fields, picnic area, and wooded area.	3 – DESIRABLE	$55,000	$0	$55,000

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Mott Park Improvements CIP Project includes removal of hazardous equipment, new play equipment, improvements to the street hockey court, picnic area, and brush removal area.	3 – DESIRABLE	$60,000	$0	$60,000
Sarginson Park Improvements CIP Project includes removal of hazardous equipment, new ball field, bleachers, and improved picnic area.	3 – DESIRABLE	$65,000	$0	$65,000
Kearsley Park Softball Field Improvements Improvements to the Kearsley Park softball field, which Mott intends to use for their women's softball team. Improvements include the installation of evening lighting, dugouts, bleachers, scoreboard, fencing, and the construction of a concession stand/clubhouse.	COMPLETED	$195,000	$0	$195,000
Durant Park Master Plan CIP Improvements consistent with the park master plan developed in 2012, including basketball upgrades, playground equipment, sidewalk improvements, tree removal, and mower purchase.	COMPLETED	$54,339	$0	$54,339
Mann Hall Park Master Plan CIP Improvements consistent with the park master plan developed in 2012, including new playground equipment, flag pole, concrete pavilion pad, playground safety surfacing, benches, and landscaping.	COMPLETED	$84,021	$0	$84,021
Max Brandon Park Playground Improvements A new playground added. Completed by the County.	COMPLETED	$60,000	$0	$60,000
Flint Park Lake Playground Improvements A new playground added. Completed by the County.	COMPLETED	$50,000	$0	$50,000
Rollingwood Park Master Plan CIP Improvements include playground equipment, baseball infield and benches, horseshoe pits, flagpole lighting, fishing dock, scoreboard, bleachers, and lights.	COMPLETED	$79,100	$79,100	$0
Woodlawn Park Master Plan CIP Improvements include a shade structure, play equipment, shade trees, and repair tennis court.	COMPLETED	$43,200	$43,200	$0
Bassett Park Maintenance Partnership Crim Fitness Foundation will take on maintenance and operations oversight in Bassett Park for FY 2015 under a two-year partnership agreement beginning in FY 2014.	REMOVED			

ENVIRONMENTAL FEATURES, OPEN SPACE & PARKS CAPITAL IMPROVEMENT PLAN

Naturalization

Naturalization is the transition of parkland from manicured turf or fields to native vegetation. There are many benefits to naturalizing part of Flint's park inventory including a reduction in operating expenses, the creation of a healthier environment through increased local biodiversity, and improved storm-water management.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Park Naturalization Plan Develop a Park Naturalization Plan to identify and prioritize City- owned parks for naturalization and reduced maintenance.	2 – IMPORTANT	TBD	TBD	TBD
Max Brandon Park - Park Naturalization/Education Project Project to promote naturalization within Max Brandon Park through eco-educational curriculum, restoration of the park's wetland, increased access through construction of a boardwalk, and hazardous tree removal.	1 – URGENT Grant Funds Secured	$137,500	$50,000	$87,500
Park Forestry Management The City has secured the services of Genesee Conservation District to manage tree removal within the City's network of parks for FY 2015. Using trained forestry staff, and informed by a street and park tree inventory that is currently underway, GCD will ensure that the City's limited forestry funds will be used in a manner that is both equitable and efficient.	1 – URGENT	$10,000	$10,000	$0
Park Maintenance Partnership Genesee County and City of Flint partnership in which the County will take on maintenance and safety patrols in four of Flint's largest parks under a pilot program. 5-year cost.	1 – URGENT	$100,000	$100,000	$0
Park Naturalization Project - Tree Plantings The City is interested in working with Fresh Coast Capital in inactive and underutilized parkland to farm poplar trees. FCC would maintain the property for 15 - 18 years at no cost to the city and share 10% of sale revenue. Parkland would remain open to the public and educational signage would be installed.	3- DESIRABLE	TBD	$0	TBD

Open Space Brownfield Remediation

Brownfields are parcels of land where the presence of environmental contamination complicates redevelopment. In addition to redeveloping brownfields for economic development and community revitalization purposes, there is a rising interest among communities to redevelop brownfields as environmental assets for active and passive recreation.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Oak Park decommissioning Located in an inaccessible area surrounded on three sides by the Buick City brownfield site, this park is proposed to be decommissioned and integrated into the redevelopment plans of the area.	3 – DESIRABLE	$0	$0	$0
Chevy Commons Greening Project Phase III of remediation of Chevy Commons into an active/passive public open space.	1 – URGENT Grant Funds Secured	$200,000	$0	$200,000
Chevy Commons phytoremediation Phase III Phase III of remediation of Chevy Commons, funding is Great Lakes Restoration Initiative grant.	1 – URGENT Grant Funds Secured	$200,000	$0	$200,000

Flint River Restoration

As a prime natural resource, the Flint River served as the basis for the founding of the City of Flint. Historically, the Flint River was used for drinking water, power, and transportation. Currently, the river is utilized much less, in part due to water quality and infrastructure concerns. In order for the City to successfully achieve its goal related to environmental features and open space, revitalization and enhancement of the Flint River must be a major focal point.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Flint River Restoration Plan - Season 3 Implementation of the 2010 report "Flint Riverfront Restoration Plan".	3 – DESIRABLE	$5,300,000	$5,300,000	$0
Flint River Restoration Plan - Season 2 Implementation of the 2010 report "Flint Riverfront Restoration Plan".	3 – DESIRABLE	$6,700,000	$6,700,000	$0

Flint River Restoration Plan - Future Projects Implementation of the 2010 report "Flint Riverfront Restoration Plan".	3 – DESIRABLE	$40,000,000	$40,000,000	$0

6 CAPITAL IMPROVEMENT PLAN

INFRASTRUCTURE & COMMUNITY FACILITIES

In 1960, 197,000 people lived in Flint, and the community was bracing for rapid growth around its core industries. Infrastructure was in place to support over 200,000 people. Flint's population has dropped by 48% since that time, yet the City is still responsible for maintaining infrastructure systems capable of servicing its peak population.

Chapter 6 in the Master Plan considers ways to tailor infrastructure and services to suit local population centers and anticipated long-term development patterns.

The Master Plan establishes a coordinated vision for Flint's government facilities, infrastructure, and utilities where infrastructure and services are closely coordinated with housing, economic development, the environment, parks and open space, and transportation, as well as a community that is fiscally responsible and able to support these systems in a fair and equitable way.

This chapter represents perhaps the most substantial capital challenges to the City and consists of the highest cost items. Given the many unknowns at this time of the water infrastructure, this chapter was developed and formatted to be adaptable and flexible dependent upon further data collection and analysis that will occur extensively throughout the FY16-17 year. The attempts at project costs and timeline will fluctuate throughout the year, dependent on the emergency situation that currently exist in the City.

The City's Capital Improvement Program includes a series of projects or improvements related to facilities and infrastructure. It identifies specific actions to be completed, and considers anticipated costs, phasing and funding sources. The Master Plan should be referenced as a guide that provides context for specific decisions and priorities identified in the CIP, specifically considering:

- The potential future benefit of certain actions. These may include long-term cost savings, environmental benefits, in- creased mobility to important services, and social equity, among others.
- The relative need for specific investments. Some projects may be critical to the health safety, and welfare of the Flint community, despite also being expensive. These should be considered more immediate action as they may protect other investments in public systems or private development.
- The anticipated impact in achieving other community goals. Investment in infrastructure or municipal services is often critical to successful economic development, the advancement of arts and culture, or healthy transportation options. These are all goals that provide positive returns back to the Flint community.
- Complementary non municipal resources. While the CIP reflects the City's intended investment in certain projects, the City should consider funding partners who may make specific actions more attainable in the short-term. This may influence the phasing or priority of some projects and allow the City to attain its vision more quickly.

CIP Vision for Infrastructure & Community Facilities

Imagine an efficient and reliable system of infrastructure and community services that ensures the safety of the Flint community meets the needs of residents and supports investment in businesses, innovation, and the local economy. Imagine a Flint that serves its residents through an effective local government and quality facilities. Imagine a Flint that invests in infrastructure in order to spark new development, restore the environmental integrity of the area, meet the needs of various activities throughout the City, and is not only capable, but is also dependable.

CIP Overview

The City has an overwhelming task of addressing its numerous dated facilities and the tremendous amounts of inefficient and aging water and sewer possessions. Immediate improvements to the water and sewer system should be prioritized so they address the areas contributing to the most substantial water losses within the city.

In concert with the land use plan areas identified as primary residential and business and economic hubs, improvements should be prioritized to meet the needs of the business community while ensuring quality services for Flint's tax-paying residents. Future capital improvements in place types with lower densities should have a lower priority in order to ensure the highest cost/benefit ratio.

Immediate actions should also be taken to right-size the facilities within the city. Substantial decline in staffing levels as well as decades of inadequate preventative maintenance has resulted in millions of dollars needed to just improve these public places to satisfactory levels. A study shall be conducted to look at alternatives for major sites such as City Hall and the Police and Fire headquarters, while also considering the disposition of the buildings to be vacated and sold.

Infrastructure & Facilities – 2015 CIP Progress

It's important to document and detail the tremendous amount of work being done by the City over the past year. In all, there were 13 major projects completed, totaling $4.25 million in capital upgrades. Also, an additional 8 remain in progress. The completion of these will result in an additional $12.3 million in City-led upgrades to its systems.

The following list details the significant projects and investment made towards improving Flint's infrastructure. A full list of the projects can be found on the project spreadsheet listed within this chapter.

Bio solids Load Out Facility
Construction of a bio solids load out facility at the WPC center.

Valve Exercising
Approximately 1,430 valves were exercised throughout the system

Roof Replacements
Plant 2 lab and operations center was treated with a new roof

City Hall Campus LED Lights
Installation of energy efficient LED lights around City Hall.

IT/IS Upgrades
$639,415 was spent in 2015 Fiscal Year. Activities included maintenance for dell desktop workstations, routers, and BS&A Software, and Microsoft software. Some activities that were not completed include Backup servers, new routers, and a much needed phone system upgrade Overall $220,000 in improvements was not completed.

Infrastructure & Community Facilities Policy
The infrastructure and community facilities policies are derived from the Master Plan and should shape all projects moving forward. These policies should provide a framework for evaluating the merits of any capital improvement project. For detailed discussion of each policy, please refer to the Master Plan section and the page referenced.

Infrastructure & Land Use Plan alignment.
The provision of infrastructure and community services throughout the City should be aligned with the Land Use Plan, with land use typologies informing "right-sizing" and investment decisions.

Master Plan reference
Infrastructure & Future Land Use, pp 175-176

Sustainability.
Green technology should be leveraged to reduce energy costs, improve air quality, and increase long-term sustainability. While sustainable approaches to infrastructure improvements may require additional up-front costs, long term cost savings should be considered when evaluating project costs

Master Plan reference:
Sustainable & Renewable Infrastructure, p 177.

Facility maintenance & efficiency upgrades.
To ensure the long-term viability of City facilities, the City should conduct on-going maintenance, employ new technologies, increase energy efficiency, and identify consolidation opportunities.

Master Plan reference:
Government Facilities, p. 178.

Dams.
The Hamilton and Utah Dams should be removed, the Fabri Dam should be reconstructed, the Kearsley Dam should receive maintenance, the need for the Holloway Dam should be assessed, and a fish passage should be constructed at Thread Dam.

Master Plan reference:
Dams, p 186

Sanitary & storm sewer system.
Sewer systems should receive necessary ongoing maintenance as recommended by staff and engineers, and short- term upgrades and long-term capital improvements including investments in green infrastructure should be identified, planned, and budgeted for

Master Plan reference:
Sanitary Sewer System, p 185

INFRASTRUCTURE & COMMUNITY FACILITIES CAPITAL IMPROVEMENT PLAN

City Hall

Flint's administrative center consists of a number of buildings, including City Hall, City Hall North, City Hall South, and City Hall Dome, which collectively total more than 187,000 square feet. According to City Facilities, Grounds, & Maintenance Division staff, the condition of these buildings ranges from poor to fair. Constructed in 1956, these four buildings house a majority of Flint's governmental operations and are in need of extensive upgrades, repairs, system replacement, and maintenance. Significant reductions (well over 50% from historic levels) in staffing at departments housed at the City Hall complex has resulted in significant portions of the buildings being unused or used for storage

The list of necessary capital improvements for the four City Hall buildings is only a portion of what is likely needed, and there are serious questions as to the long-term viability of the buildings considering their age, condition, and cost of corrections needed. The City should consider a study of alternative options for right-sizing their facilities to meet projected staffing needs, either in a renovated facility that is purchased or leased or a new facility constructed in the downtown area. The study could also look at partnerships with the County for a combined City-County Government Complex. The study would also need to consider the disposition of the existing complex and buildings to be vacated if the study shows this to be the most viable option.

The administrative center complex at one time was considered to be an architectural masterpiece; but due to outdated components, lack of maintenance and energy inefficiencies the buildings require extensive emergency repairs and extensive maintenance has been deferred due to budgetary constraints. City Hall north is essentially vacant due to staff reductions and a leaking roof. The existing windows in all buildings are single pane, aluminum frame and highly inefficient, as are the light fixtures inside and outside the buildings. The boilers and chillers are 80% efficient at best and in need of replacement soon. The marble on the façade, once a major contributor to the beauty of the building, suffers from water intrusions that have caused these large marble slabs to fall off the building. Significant information technology improvements are needed throughout to modernize computer servers, other hard- ware, and cabling. The elevators at City Hall break down regularly and create a safety hazard to users trapped inside until repairs can be made. The pavement in the parking lot used by employees is in very poor condition. Sidewalks are in various states of disrepair and in need of replacement.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Study to determine options for housing City Hall staff Commission a comprehensive study of the Civic Center Complex to determine best option to right-size in the most cost-effective manner. City should enlist a committee to develop a comprehensive scope of services for a Request for Proposals that includes budget to adequately investigate the existing facilities and options and costs available to house City operations long-term.	1 – URGENT	TDB	TDB	TDB
City Hall Dome drains Repair roof drains at the City Hall Dome to fix leaks.	1 – URGENT	$1,640	$1,640	$0
City Hall North Building Roof Repairs to the roof on the City Hall North Building to fix areas that currently	1 – URGENT	$99,384	$99,384	$0
City Hall chiller Replace 1 of 2 chillers at City Hall.	1 – URGENT	$155,000	$155,000	$0
Emergency repairs Annual cost of $225,000 for emergency repairs to various City facilities.	1 – URGENT	$4,500,000	$4,500,000	$0

INFRASTRUCTURE & COMMUNITY FACILITIES CAPITAL IMPROVEMENT PLAN

Walkway between Police and City Hall Repair and seal walkway between Police Station and City Hall.	2 – IMPORTANT	$20,000	$20,000	$0
City Hall Dome repairs Various maintenance and repairs to the City Hall Dome.	2 – IMPORTANT	$90,000	$90,000	$0
Window replacement Replacement of single pane, aluminum frame windows in City Hall. Energy Analysis Report identified payback of 15 years in energy savings.	2 – IMPORTANT	$400,000	$400,000	$0
City Hall façade Remove existing and replacement of the façade of City Hall. Existing marble siding is falling off the building and is a safety hazard. Gaps behind the marble allow water intrusions, exacerbating the problem.	2 – IMPORTANT	$3,000,000	$3,000,000	$0
City Hall heating/cooling system Total replacement and upgrades of controls and boilers/chillers to the City Hall heating/cooling system.	2 – IMPORTANT	$3,300,000	$3,300,000	$0
Separate utility meters Separate the utility meter for City Hall, Police HQ, and Fire Station #1 to monitor energy use.	3 – DESIRABLE	$24,000	$24,000	$0
City Hall 7th Street parking lot Rehabilitation of parking lot at City Hall.	3 – DESIRABLE	$100,000	$100,000	$0
City Hall 5th Street parking lot Rehabilitation of parking lot at City Hall.	3 – DESIRABLE	$132,000	$132,000	$0
Information technology improvements Includes a variety of IT improvements, including backup servers, new Dell workstations, routers and switches, software, cabling and fiber, etc. Long-term needs should be assessed to prioritize and fund projects.	3 – DESIRABLE	$3,730,246	$3,730,246	$0
Building Management System Upgrades to the BMS controls are on-going.	2 – IMPORTANT	$148,000	$148,000	$0
Council Chambers light fixtures Convert existing light fixtures to LED to save energy costs.	2 – IMPORTANT	$24,000	$24,000	$0
City Hall Ceilings Replacement of ceiling tiles throughout City Hall. Improvements to multiple offices have been completed.	3 – DESIRABLE	$70,000	$70,000	$0
Council Chambers renovations Renovations to Council Chambers to include windows, painting, and ceiling, and IT upgrades to add projection screens.	3 – DESIRABLE	$350,000	$350,000	$0
City Hall Elevator Removal and installation of two new efficient elevators at City Hall	2- IMPORTANT	$400,000	$400,000	$0
South City Hall Building bridge Bridge connecting the South City Hall Building to 7th Street is closed and	COMPLETED	$30,000	$30,000	$0

INFRASTRUCTURE & COMMUNITY FACILITIES CAPITAL IMPROVEMENT PLAN

Other City Facilities

City facilities outside of the City Hall complex, public safety departments, and public works are limited. The primary facilities in this category would include the Street Maintenance & Sanitation Department, public parking lots, District Court, and anything else that does not fit into another category or department. All of these facilities have needs for various maintenance, etc. and should be considered to generally be important to fund as soon as possible. A number of projects were identified during discussion with City staff and are presented below; however, a comprehensive evaluation of the Street Maintenance & Sanitation Department facility has not been performed and is needed to ensure all projects are accounted for.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Street Maintenance & Sanitation Department facility improvements Various capital improvements needed at the facility that would be identified following a comprehensive audit of the facility.	2 – IMPORTANT	TDB	TDB	TDB
12th Street garage roof repairs Repairs to the garage used to service the City fleet vehicles (located at the Street Maintenance & Sanitation Department facility).	COMPLETED	$266,900	$266,900	$0
Parking lot lighting New lighting for the Stevens Street/7th Street/City Hall/Police Station parking lot to improve safety, lot is currently not lit.	COMPLETED	$250,000	$250,000	$0
District Court improvements Repairs, maintenance, etc. at the District Court building and grounds that are the responsibility of the City per the lease agreement with Genesee County (the owner of the building).	REMOVED	$125,000	$125,000	$0

INFRASTRUCTURE & COMMUNITY FACILITIES CAPITAL IMPROVEMENT PLAN

Water Department

The Water Department is responsible for the treatment and distribution of potable water to customers utilizing an extensive infrastructure system. Their facilities include six (6) dams, numerous buildings and related facilities, pumping stations and storage facilities, and conveyance system of approximately 600 miles of water distribution and transmission pipes and appurtenances. The existing City water system was designed to service a much larger population and significantly more industry than is currently being served.

The various facilities of the Water Department have been grouped below to allow for an individual discussion of each. The current water system has twice the storage and pumping capacity that is needed to operate the system. A number of options to reduce pumping and storage were identified in a Water Reliability Study (prepared by Rowe and Potter Consulting in 2011). Implementing these operational changes going forward will allow the city to operate more cost effectively and concentrate on upgrading and maintaining key infrastructure.

It is important to note that the City's water system suffers from a number of problems which can be at least partially corrected by making the necessary capital improvements, which should be prioritized and done to be consistent with the implementation of the Master Plan and modified as needed. The most prevalent problems were discussed in great detail in the Water Reliability Study, including the age and efficiency of the water system. Much of the water distribution sys- tem is over 70 years old and is in need of rehabilitation or replacement. There is a significant amount of water-main in the system that is over 70 years old, prone to breaks, and unable to provide modern pressures and fire flows.

Water system efficiency analysis indicated that the City of Flint system is at 68.41% (i.e., only 68.41% of the water that was purchased from Detroit was recovered by user fees). This indicates that the city has significant leaks, inaccurate meters and/or illegal connections to the system. This inefficiency results in lost revenue in the range of $1.5 million to $2.0 million dollars per year. A program to improve the water system efficiency should be put in place. A high priority should be placed on implementing a program to reduce the unaccounted for water.

INFRASTRUCTURE & COMMUNITY FACILITIES CAPITAL IMPROVEMENT PLAN

Dams

The six dams owned and operated by the City are critical to the water supply system of the City, as well as providing various recreational opportunities. This is even more important currently as the City is dependent on the Flint River as an emergency back-up source to supply water to its customers Various studies have been done on the dams to determine their condition and future plans for either replacement or removal. Improvements to Hamilton Dam, built in 1920, have been mandated by the state due to its poor condition and deteriorating structural deficiencies. A study was completed by the City in 2008 that evaluated various options. Hamilton Dam is located just upstream from Fabri Dam. Fabri Dam is an inflatable dam in the downtown area constructed in 1979 for visual and recreational enhancement. The 2008 study reviewed options for its removal.

Utah Dam was built in 1928 to prevent industrial oil discharges from entering the City's water intakes and is located downstream from both Holloway Reservoir and Kearsley Creek. Utah Dam serves no viable purpose and the gates are permanently locked in an open position. Utah Dam has been recommended for removal. Holloway Dam was constructed in 1953 for potable water supply and flow augmentation of wastewater effluent. The Holloway Reservoir serves as emergency back-up supply of water, with a storage capacity of17,500 acre-feet of water, and is the structure furthest upstream in the system. Kearsley Dam, constructed in 1928 for water and ice supply, has a storage capacity of 1,800 acre-feet and is used primarily for recreation and occasional flow augmentation. Kearsley Creek joins the Flint River a short distance downstream from the dam just upstream from Utah Dam.

Thread Dam, also build in 1928, impounds 80 acres of water on Thread Creek, providing recreational opportunities. Thread Creek joins Swartz Creek west of the lake, with Swartz Creek flowing into the Flint River downstream of the other five dams. Capital projects on the six dams that require expenditures of City funds should be kept to the minimum needed to prevent further degradation of the dams and to meet regulatory requirements until such time as higher priority projects in the City have been completed. In accordance with the Flint River Restoration Plan, dams that can be removed should be considered for removal and funding sought from various sources that promote dam removal for river restoration and removal of barriers for boating and fish movement.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Thread Dam Improvements Replace dam.	1 – URGENT	$655,600	$655,600	$0
Hamilton Dam Removal Removal of the Hamilton Dam.	1 – URGENT	$3,500,000	$1,060,000	$2,500,000

City-Wide Dam Inspection & Maintenance Plan Develop a comprehensive plan to address the City's six failing and/or obsolete dams along the Flint River.	3 – DESIRABLE	$0	$0	$0

INFRASTRUCTURE & COMMUNITY FACILITIES CAPITAL IMPROVEMENT PLAN

Buildings & Related Facilities

The Water Department has a number of buildings and related facilities for which they are responsible. The most significant is the Water Treatment Plant (WTP) located at 4500 N. Dort Highway, which includes Plant 2 (Plant 1 has been decommissioned), water testing laboratory, and a number of smaller facilities. The WTP was put into service in 1954 and significant upgrades were completed in 2006 to meet state regulatory requirements. The WTP operated an average of 20 days per year previously since water from Detroit was treated but the plant will be operated on a continual basis. A significant number of upgrades, replacement of equipment, and regular maintenance are required for the WTP to properly take in raw water, treat it through the entire process, and transmit treated water to the conveyance system. In addition to the facilities at the WTP, the Water Department is also responsible for the Water Service Center (located at 3310 E. Court Street) and the Water Department has a need for a variety of large vehicles and other equipment.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Electrical upgrades Electrical upgrades at various facilities.	1 – URGENT	$1,167,100	$1,167,100	$0
Fencing Water plant security fencing.	1 – URGENT	$109,300	$109,300	$0

Phosphoric acid feed system - Partially Complete Phosphoric acid feed system for water treatment. Temporary feed system set up, long term system for KWA system needs to be established.	REMOVED	$185,800	$185,800	$0
Post filtration system Post filtration system for water treatment process.	REMOVED	$387,200	$387,200	$0
Vehicles dump trucks, flatbed, tractor, etc. Annual cost for 6 years.	REMOVED	$13,631,400	$13,631,400	$0
SCADA upgrades - In Progress Upgrades of Supervisory Control and Data Acquisition (SCADA) to allow system to operate more efficiently and with lower labor costs by using SCADA to operate and analyze the water system and its operation.	1 – URGENT	$836,400	$836,400	$0
Security cameras - (2 installed, need 3 more) Install security cameras at water treatment plant.	1 – URGENT	$7,000	$7,000	$0
Roof replacements - Partially complete At various pump stations throughout the system. West Side reservoir & pump station complete. Cedar Street reservoir & pump station and Torrey Rd. booster station still needed.	1 – URGENT	$500,000	$500,000	$0
Water Plant rehabilitation - In Progress Rehabilitation of Phase II, Segment I.	2 – IMPORTANT	$1,030,000	$1,030,000	$0
Roof replacement - Complete Plant 2 lab and operations center.	COMPLETED	$257,500	$257,500	$0

INFRASTRUCTURE & COMMUNITY FACILITIES CAPITAL IMPROVEMENT PLAN

Pumping Stations & Storage Facilities

The Water Department operates several pumping and water storage facilities.

- Dort Reservoir and Pumping Stations No. 3. (PS #3) and No. 4 (PS #4) – located at the WTP, the reservoir is a 20-million gallon (MG) ground storage facility. This facility was constructed in 1966 and is used primarily for emergency water storage and for use during peak water demand periods. PS #4 total pumping capacities is 46 million gallons per day (MGD) with a firm pumping capacity of 26 MGD. The pumping station was rehabilitated in 1994 with two new 20 MGD pumps and one 6 MGD pump to induce turnover of the Dort Reservoir. This pumping station is primarily used to provide supply from the Dort Reservoir during emergency situations and peak demand events. A 2.0 MG elevated water storage tank is also located at the WTP that is used primarily for emergency water storage and as a pressure buffer. The elevated tank fills and drains as system demands and pressures dictate. A 3.0 MG ground storage tank is also located at the WTP complex. This storage tank was constructed in 1954 and is used primarily as an emergency water supply and pumping source during peak demand events.
- Cedar Street Reservoir and Pumping Station – the Cedar Street Reservoir is a 20 MG ground storage facility located between 1-69 and Swartz Creek, off of Cedar Street. This facility was constructed in 1948 and is primarily used as an emergency water supply and a pumping source during peak demand events. The pumping station electrical controls have not been updated since the original construction. The station requires significant upgrades to bring it up to current automatic operation standards. The pumping station is equipped with three pumps installed in 1948 and are primarily used to supply water from the Cedar Street reservoir during emergency events and peak demand periods. This pumping facility has a total pumping capacity of 30 MGD and a firm pump capacity of 18 MGD. Pump operation and filling of the reservoir can be controlled from the WTP or manually at the pumping station. The pumping station is equipped with chlorination facilities to provide additional chlorine residual as needed.
- West Side Reservoir and Pumping Station – the West Side Reservoir is a 12 MG ground storage facility located near Mackin Road and Jean Avenue. This facility was constructed in 1970 and is primarily used as an emergency water supply and a pumping source during peak demand events. The West Side Pumping Station is equipped with four pumps, all installed in 1970, and has a total pumping capacity 24 MGD with a firm pump capacity of 16 MGD. Pump operation and filling of the reservoir can be controlled from the WTP or manually at the pumping station. The pumping station is equipped with chlorination facilities to provide additional chlorine residual as needed.
- Torrey Road Pumping Station – the Torrey Road pumping station is equipped with two pumps installed in 1954. The station has a total pump capacity of 6.8 MGD and a firm pump capacity of 2.8 MGD. The primary function of this station is as an in-line booster pumping station to provide increase pressures to the southwest portion of the city. This pumping station takes suction from the 24" transmission main along Hammerburg Road and discharges to the 18" transmission main supplying the southwest pressure district. There is no standby power provided to this pumping station.

INFRASTRUCTURE & COMMUNITY FACILITIES CAPITAL IMPROVEMENT PLAN

Conveyance Systems & Appurtenances

The conveyance system of the Water Department includes all transmission and distribution pipes, valves, hydrants, and water meters. The conveyance system of the City of Flint consists of water mains ranging in size from 4" to 72" in diameter. Many of these mains exceed 70 years old, and the majority constructed of cast iron or ductile iron pipe up to 24" in diameter. Transmission mains larger than 24" are primarily constructed of steel piping. A majority of the system has adequate transmission piping to convey sufficient flows and pressure for fire protection. However, the distribution and transmission systems are old and in serious need of replacement. A large number of water main breaks occur every year and are repaired by staff, with a significant number of breaks occurring due to the harsh 2013-14 winter season. These breaks result in water service disruptions and potential water quality problems to customers. The system appurtenances are generally over 50 years old and in constant need of repair or replacement also.

As projects are considered, opportunities should be evaluated to right size the water distribution system and make the most effective and efficient use of existing infrastructure. In accordance with the Master Plan, infrastructure may be modified to provide the level of service appropriate for a given place type.

The information below if summarized directly from the Water Reliability Study

- ***Piping System.*** Much of the City of Flint's water distribution system is over 70 years old and is in need of rehabilitation or replacement. There is a significant amount of 4" water main in the system that is over 70 years old, prone to water main breaks, and unable to provide modern pressures and fire flows. The 20-year plan for the water distribution system is twofold: 1) rehabilitate or replace the primary transmission system that serves the City and 2) abandon 4" water mains where there is a suitable parallel main or replace the 4" with 8". The priority of these replacements should be consistent with the needs of the Master Plan implementation. The Water Department has also included replacement of 3,800 feet of transmission mains annually, the prioritization of which should consider severity of current problems, needs for implementation of the Master Plan, and ability to service high water users adequately.
- ***Valves*** The City of Flint distribution system currently has a total valve count of 7,258 valves to be operated and maintained (20 72" valves, 661 24"–72", 737 16"–20", 1,398 12", and 4,462 <12). Critical valves are 16" and larger valves that are on the primary transmission mains around the city and in the event of a break in a major transmission main, valve failure, or multiple valve failures, could result in shutting down a significant portion of the city. The Water Reliability Study noted that there are 1,418 critical valves in the system and these valves should receive primary attention. Primary attention would consist of operating the valves on a rotating two-year basis and making all repairs and replacements that are necessary. Approximately 700 critical valves would be operated and maintained each year. Subcritical valves are the 12" valves on minor transmission mains and the failure of one or more of these valves could result in shutting down a residential area.There are 1,398 subcritical valves in the system. These valves should receive secondary attention which would consist of a 5-year plan for operation and maintenance. This would require that approximately 280 valves be operated and maintained each year. Normal valves are any valve smaller than 12" and the failure of one or more of these valves would shut down a small residential area. There are 4462 of these valves in the system and these valves should receive operation and maintenance attention on a 10-year rotating basis. Approximately 450 valves would require attention each year. The total valve operation and maintenance program would require that approximately 1,430 valves receive routine maintenance each year in addition to any emergency repair and replacement that is required during the course of a year.
- ***Hydrants***. The City of Flint has 3,605 hydrants in the water system and many are in excess of 50 years old. In the spring of 2010 the City purchased 80 hydrants to begin replacing old hydrants. Similar to the asset management approach to the valve maintenance, the plan for hydrants would include a transition from reactive maintenance to planned maintenance and replacement. The goal would be to analyze the hydrant age in the system and begin to change out hydrants in excess of 50 years old and then over a period of twenty years create a system where hydrant age did not exceed 25 years.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Water line loop Install 24" loop at the WTP to increase distribution options.	2 – IMPORTANT	$100,000	$100,000	$0
Raw water line Provide raw water line to Pump Station 4.	2 – IMPORTANT	$636,500	$636,500	$0
Water Main Replacement Replace various sections of residential water mains with a goal of 3800' per year.	2 - IMPORTANT	$16,000,000	$16,000,000	$0
Yard valves Replace yard valves, cost is for 6 years.	2 – IMPORTANT	$1,000,000	$1,00,000	$0
Water Meters – Partially Complete Annual replacement of water meters throughout the system, cost is for 6 years.	2 – IMPORTANT	$8,500,000	$8,500,000	$0
Valve exercising Operate the approximately 8,000 system valves throughout the system on a 2 - 10 year basis.	2 - IMPORTANT	$500,000	$500,000	$0
Valve Repairs	1 - URGENT	$200,000	$200,000	$0

24" Transmission main replacement 3800' of 24" transmission main at various locations annually. Project is designed in 5 segments with one segment scheduled for completion each year.	1 - URGENT	$18,000,000	$18,000,000	$0
Lead Service Line Replacement Replace lead service lines leading to customer's residence and businesses.	1 - URGENT	TBD	TBD	TBD
Valve exercising Operate the approximately 1,430 valves throughout the system on an annual basis.	COMPLETED	$400,000	$400,000	$0
Hydrant replacement program Replace hydrants throughout the City on 20-25 year rotation, cost is for 20 years. FY 15 cost $250,000 with	REMOVED	$6,227,284	$6,227,284	$0

Sewer Department

The Sewer Department is responsible for the collection and treatment of wastewater at various facilities, most notably the 50 MGD wastewater treatment plant referred to as the Water Pollution Control Facility (WPCF) located at G-4652 Beecher Road. The City of Flint also accepts wastewater from the Beecher Metropolitan Sewer District (BMSD). The WPCF has a peak capacity of approximately 85 MGD. The City has an extensive sanitary and storm sewer collection and treatment system that includes approximately 569 miles of gravity sanitary sewers and force mains, 11 pump stations (1 additional pump station on the system is operated by BMSD), an 8-foot 6-inch deep tunnel (10 MG of storage), a 10 MG Retention Treatment Basin (RTB), WPCF and a number of associated buildings, and 350 miles of storm sewers.

The WPCF provides primary and secondary treatment to the sanitary wastewater, with primary treatment consisting of physical removal of suspended solids via grit tanks and primary sedimentation basins. Secondary treatment is performed through the activated sludge process, which consists of aeration and final settling tanks. Chlorination and dechlorination, using liquefied and gaseous chlorine and sulfur dioxide, is used to disinfect the final effluent prior to its discharge into the Flint River. Even though the sanitary and storm sewer systems are separated, the 10 MG capacity of the RTB can be exceeded, resulting in a discharge to the river. All overflows receive skimming, settling, and disinfection prior to release. Since January of 2009, the City has experienced 11 partially treated discharges.

The City was awarded a State Revolving Fund (SRF)/Strategic Water Quality Initiatives Fund (S2) Grant from the Michigan Department of Environmental Quality (MDEQ) in 2011 (study prepared by Rowe and Fishbeck, Thompson, Carr, & Huber, Inc. in 2013). The scope of the grant-funded engineering study included smoke testing in areas of the City suspected of containing sources of inflow and infiltration (I/I), as well as a sanitary manhole inspection program focusing on the manholes located along the creeks and rivers where water was suspected of entering the sanitary system during high river elevations. The Sewer System Evaluation Study (SSES) included smoke testing of approximately 2,397 manholes and the inspection of 256 manholes along the rivers. Although the sanitary system is separated, wet weather brings significant flow increases into the system. Most footing drains are connected to the sanitary system; however, during these large rain events, the City's deep tunnel and RTB's capacity can be exceeded, and it results in discharges from the RTB to the Flint River.

Green Infrastructure

The Master Plan calls for the development of green infrastructure to absorb rainwater, reduce flooding, and lessen the burden on the City's sewer infrastructure. The City should also promote the use of Best Management Practice (BMPs) and Low Impact Development (LID) techniques that help protect and restore water quality while reducing the quantity of storm water run-off throughout the City. Vacant or underutilized parcels within Green Neighborhood and Green Innovation place types may also present opportunities for large scale green infrastructure projects.

Green Infrastructure Assessment Undertake a study to identify opportunities for the implementation of large scale green infrastructure projects that will limit the volume of storm water	1 – URGENT	TDB	TDB	TDB

Buildings & Related Facilities

The Sewer Department operates the Water Pollution Control Facility (wastewater treatment plant) and 29 buildings at the WPCF grounds. The buildings on the grounds of the WPCF are of variable age and condition and require a variety of upgrades, replacement of equipment, and regular maintenance to properly treat the wastewater collected from system users and discharge it to the Flint River consistent with regulatory requirements. The Department has similar needs to that of the Water Department for large vehicles and other equipment

Pumping Stations & Storage Facilities

As mentioned above, the City operates 11 pump stations. Storage facilities include an 8-foot 6-inch deep tunnel (10 MG of storage) and a 10 MG Retention Treatment Basin (RTB). The deep tunnel was constructed of concrete in the late 1970s as part of the RTB project The flow is transported through a series of interceptors to the three main feeder pump stations (East Pump Station, Third Avenue Pump Station, and Northwest Pump Station). These three main pump stations then pump the flow to the WPCF for treatment. Both the East Pump Station and the Northwest Pump Station are located next to the WPCF. The Third Avenue Pump Station is located southeast of the WPCF and requires 18,181 feet of force main to send the flows to the WPCF.

The 8-foot 6-inch tunnel is upstream of the East Pump Station and discharges to the station. During large rain events, the tunnel is used for storage. The flow is allowed to accumulate in the tunnel and the East Pump Station pumping rate is reduced to allow the flow from the Northwest Pump Station and Third Avenue Pump Station to be pumped to the WPCF without restriction. The latter have essentially no storage capability, and must pump ac- cording to flow received. If the flows from the Northwest Pump Station and Third Avenue Pump Station exceed the capacity of the WPCF, the excess flow is diverted to the 8-foot 6-inch tunnel through the same 48" pipe that normally conveys sewage from the East Pump Station to the WPCF. Should the rain event be large enough to fill the tunnel, then flow from the tunnel will overflow to the 10 MG RTB for temporary storage. The RTB provides skimming and disinfection should its capacity be exceeded, prior to discharging flows to the river

Retention basin Improvements at retention basin at WPC, including metering, concrete work, and chemical feed upgrades.	COMPLETED	$100,000	$100,000	$0

Conveyance Systems & Appurtenances

The City has an extensive sanitary sewer collection and treatment system that includes approximately 569 miles of 8" to 72" gravity sewers and force mains, with manholes at regular intervals. The majority of the gravity sewers were constructed between the 1920s and 1950s, consisting mostly of vitrified clay, concrete, and some newer polyvinyl chloride (PVC) segments. The sanitary manholes are either block or pre-cast concrete. Televising portions of the system during the 2011 SSES revealed joint integrity to have been compromised along sections of the interceptors adjacent to Swartz and Thread Creek. Both sections of interceptors televised had root balls reducing the flow capacity at multiple locations by as much as 80 to 90%. The video also shows stretches of pipe with root infiltration at every joint, reducing flow capacity ranging from 15 to 50%. Some minor infiltration was observed; how- ever, the root balls hindered the camera progress through the sections of pipe at the creek crossings and therefore potential inflow from the creeks was not determined. The integrity of the pipe itself appeared to be sound; however, most joints appeared to have some separation where root infiltration was present. This separation could potentially allow infiltration to occur during wet weather conditions. There was some sediment buildup observed in a few spots along the interceptors; however, there was not enough to reduce capacity of the interceptor.

Manhole inspections were performed on the manholes that parallel Swartz, Carman, Gilkey and Thread Creeks. The creeks are upstream of Meter 9 which appears to have significant (I/I). Ninety-three (93) manholes with perforated covers, which would be submerged during a "design storm" or a larger wet weather event, were found. Besides the perforated covers, several manholes were found to be in poor condition structurally and leaking. The Huron-Camden and Northwest areas have been identified as problems areas with regards to I/I, based on studies conducted in the past. Additional and more recent studies had flow meters strategically placed in the sanitary trunk line sewers around the City. These flow meters identified a significant flow increase to the sanitary system during rain events throughout the City. In the past, the use of dye testing procedures was used to identify cross- connections with some degree of success. However dye testing does not allow for a complete identification of all potential inflow sources; therefore, smoke testing of the system was the most economical and timely procedure to identify additional sources of inflow. The purpose of smoke testing was to identify potential sources of significant I/I through cross connections between sanitary and storm sewer collections systems. The smoke testing was performed as a team effort between City staff and ROWE.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Manhole rehab in floodplains Replace perforated covers and rehab/lining of manholes located within floodplains to reduce water inflow/infiltration (I/I).	1 – URGENT	$1,200,000	$1,200,000	$0
Root control Root control within existing pipes to remove roots which might block waste flow, cost if for 20 years.	1 – URGENT	$9,331,830	$9,331,830	$0
Pipe lining Lining of existing pipes to reduce water infiltration, cost if for 20 years.	1 – URGENT	$15,000,000	$15,000,000	$0
Major valve repairs Repair major valves in system.	2 – IMPORTANT	$200,000	$200,000	$0
Meter replacement	2 – IMPORTANT	$8,400,000	$8,400,000	$0

7 CAPITAL IMPROVEMENT PLAN ECONOMIC DEVELOPMENT & EDUCATION

Economic development and education will form the foundation of the future of Flint and there will need to be multi- sector alignment and substantial investments in people, places, and planning to achieve the City's economic development vision.

The City of Flint was built on the automotive industry. While the auto industry continues to play an important role in the economy, other sectors are evolving including life sciences, transportation, distribution/logistics, advanced manufacturing, and information technology. The emergence of these and other industries is needed to diversify the City's economy and create growth and new opportunities for employment.

In addition, the City must also recognize that the 21st century economy is unpredictable and in constant flux. To stay competitive moving forward, the City must continually and proactively reassess its economic development strategies and targeted sectors of investment to meet changing market needs.

To realize the economic development and education vision and goals of the Master Plan, the City must support and in specifically, concentrate and coordinate work force and economic development facilities in line with the Master Plan, strive to reuse Brownfield sites for productive purposes, and ensure that educational facilities and opportunities are well connected and reinforced by the City's capital improvements and infrastructure.

CIP Vision for Economic Development & Education

Imagine Flint as a dynamic college town, a center of innovation and entrepreneurship, a top destination for medical sector companies, an international hub for trade and transportation and a community where residents of all backgrounds share equally in Flint's economic rebirth. Imagine an entrepreneurial youth population, equipped for success through a robust education system and an extensive network of local businesses and institutions. Imagine a thriving small business scene, where aspiring businesses owners are empowered to open shops in neighborhoods across the City. Imagine transforming our current liability of vacant land into new green spaces for economic growth, creating jobs for residents in alternative energy, local food production, or "green initiatives" fields.

CIP Overview

A sluggishly growing economy with a surplus of available work- force labor and inexpensive, vacant commercial space can be found throughout all areas of Flint. Reshaping the economy in Flint is a primary principle of the master plan and is addressed through a variety of new, unique place types that focus increased improvements and investment strategically within these areas.

Neighborhood Centers, City Corridors, Commerce & Employment Centers, Production Centers and the Innovation District should represent the focus of future economic development initiatives and capital upgrades.

By emphasizing repairs and enhancements to these areas of perceived development, nodes of higher density and activity can develop creating enhanced options for workforce development, employment centers and future residential market demand. By reducing the importance on capital projects within current areas of commercial build slated for future areas of non-commercial, the City can focus its limited resources to invest in the future to achieve the goal of reshaping our economy.

Key Partners

It is important to remember that some of Flint's largest institutions such as Flint Community Schools, University of Michigan- Flint, Kettering University, Mott Community College, Baker College, and Hurley and McLaren Medical Centers have significant capital improvement needs and confront similar challenges in funding projects. This presents the City with a unique opportunity to coordinate our capital improvement efforts, seek additional cost savings by combining projects, jointly applying for grants, and eliminating reiterative work.

Developing stronger ties with Flint Community Schools on capital improvements has great potential given that many schools (open and closed) are located next to City parks, such as the Stewart School and Brennan Park. This connectivity allows for cooperation on maintenance and on improvements to facilities. In the case of closed schools, this would help position the vacant buildings for adaptive reuse Examples of school adaptive reuse projects include community centers, art centers, and Flint's own Oak Street School, which is being transformed into apartments for seniors.

Economic Development & Education Policy

The economic development and education policies are derived from the Master Plan and should shape all projects moving forward. These policies should provide a framework for evaluating the merits of any capital improvement project.

For detailed discussion of each policy, please refer to the Master Plan section and the page referenced.

Community education.

The City and Flint Community Schools should work together to reestablish a sustainable version of community education, with schools serving as "homebases" within neighborhoods and providing programming, meeting space, and social services.

Master Plan reference: Community Education, p. 205

K-12 and college curriculum integration.

Social and educational partnerships should be developed between Flint's public schools, Kettering University, UM-Flint, Baker College, and Mott Community College in order to better prepare Flint's K-12 students for college.

Master Plan reference Integrating K-12 with Higher Education, p 208

Workforce development.

Adults, especially ex-offenders and those struggling with literacy should be provided with opportunities to gain additional education, skills, and training.

Master Plan reference. Adult Workforce Development, pp 208-209

Small business support.

Incentives, incubators, and assistance programs should be used to encourage small business development in the City Corridor and Neighborhood Center place types, especially in underserved areas experiencing significant levels of retail leakage.

Master Plan reference Supporting Small Businesses, pp. 210-213

Growth industries.

The City and its economic development partners should target retention and expansion efforts at the following six industries, which were determined by the Flint Regional Cluster Project to offer the highest potential for growth: life sciences; transportation, distribution, and logistics; automotive and transportation equipment manufacturing; machinery manufacturing; information technology; and food manufacturing.

Master Plan reference. Flint Regional Cluster Project, p. 203

Blue and green economy.

Leverage Green Innovation areas and the construction of the Karegnondi Water Pipeline for the creation of new "green" and "blue" jobs.

Master Plan reference Green Initiatives, p 214; Blue Economy, p. 214

Commercial demolition & revitalization.

A Commercial Areas Investment Framework, grounded in the Land Use Plan, should be developed that can created a targeted framework for demolition, public investment, and reuse of commercial properties.

Master Plan reference· Redeveloping & Repurposing Properties, p 215-216

Brownfields.

Capitalize on Flint's existing infrastructure and well-connected transportation network to spur redevelopment of the Buick City and Delphi East brownfield sites, in alignment with the Land Use Plan.

Master Plan reference: Redeveloping & Repurposing Properties, pp. 215-216

Downtown Revitalization.

Four catalyst projects were identified that can best continue revitalization efforts in the Downtown area: (1) development of the Flat Lot; (2) restoration of Capitol Theatre; (3)redevelopment of Riverbank Park, including better utilization of the University Pavilion and new waterfront park space; and (4)creation of the Flint Health and Wellness District.

Master Plan reference Downtown Flint, pp. 218-220.

Innovation District.

The City should encourage increased physical, social, and transportation linkages between key employers and institutional anchors clustered around the center of the City, from McLaren Regional Medical Center in the west through Downtown to Delphi East in the east.

Master Plan reference: Innovation District, p 221

New residents.

Residential growth into the City should be encouraged and incentivized, particularly for foreign-born immigrants, current commuters, veterans, young professionals, and city employees living in Flint.

ECONOMIC DEVELOPMENT & EDUCATION CAPITAL IMPROVEMENT PLAN

Placemaking

Flint's Innovation District encompasses the University Avenue and Court Street corridors, the Flint River, and Delphi East. This area includes the region's largest employers, research institutions, and cultural assets such as: Kettering University, Mott Community College, University of Michigan - Flint, Genesys Downtown Flint Health Center, Hurley Medical Center, McLaren Regional Medical Center, Delphi East, and the Flint Cultural Center. Capital improvements within the Innovation District should be evaluated and prioritized to maximize benefits to the district's anchor institutions and their users.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Innovation District Comprehensive Plan The Innovation district stretches from the McLaren Regional Medical center in the west, to Mott Community College in the east, and also contains Flint's Downtown, Kettering University, and other civic and cultural assets.	2 – IMPORTANT	$150,000	TBD	TBD
Wayfinding Signage – Innovation District Expand wayfinding program to roadways within the Innovation District, consistent with the design of the Downtown wayfinding program.	3 – DESIRABLE	TBD	TBD	TBD
Grand Traverse Greenway Trail Development 3-mile multi-use trail on the abandoned CSX Railroad to connect Downtown Flint, the Flint River, and surrounding neighborhoods to the southern part of the City.	2 – IMPORTANT	TBD	TBD	TBD
International Academy Safe Routes to School Improvements Improvements include: replacing sections of sidewalk along Oakley Street and Saginaw Street, updating ADA ramps and installing pedestrian heads at Oakley and Grand Traverse Street, and repainting crosswalks and updating pedestrian lights at Oakley and Saginaw.	COMPLETED			

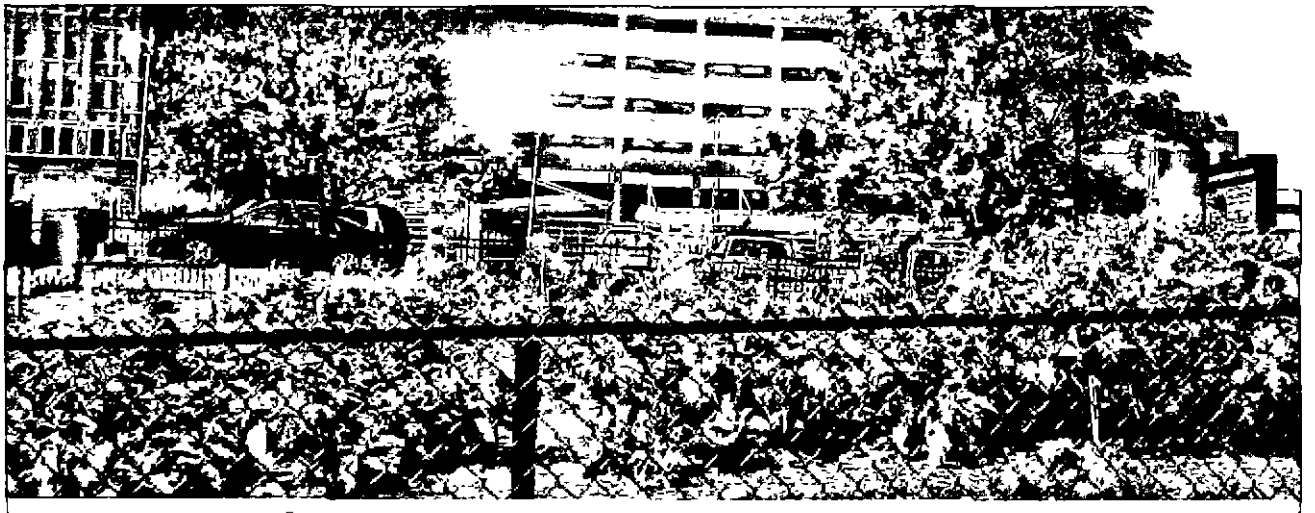
Commercial Area Enhancement

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Buick City Accelerator Building Development and construction of a spec. building that would serve as an incubator on the Buick City site and allow for organizational growth.	2 – IMPORTANT	TBD	TBD	TBD
Commercial Structure Demolition Working from the Blight Elimination Framework, 432 blighted commercial structures have been identified as priority demolitions to enhance economic development within City commercial/retail nodes.	2 – IMPORTANT	$21,600,000	TBD	TBD
Oak Business Center Facility Improvements Current large parking lot (formerly the lot of an auto dealership) needs to be replaced. Asphalt will be torn out and replaced and new striping put down.	COMPLETED	$50,000	$50,000	$0

Information Technology Upgrade

Information Technology Services for the City of Flint is responsible for planning and upgrading the information technology systems that allow the city to remain responsive and efficient when providing services to residents. A goal of the City is to develop free wireless internet accessibility in key community areas.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Consolidation and Construction of City owned Fiber Optic Network The construction and upgrade of Fiber optic communication lines that connect City offices in a Metropolitan Area Network (MAN) can strategically be done with Collaboration and consolidation partners such as the GISD and local universities can connect networks. The benefits are lower operating costs and more control and flexibility. Investment lasts 12 Years.	2 – IMPORTANT	$240,000	$240,000	$0
Mesh Wireless Internet Accessibility for Residents A community run wireless network could be created with Mesh technology. Currently this technology is being piloted in Detroit and can be applied to Flint	3 – DESIRABLE	$900,000	TBD	TBD



community organizations must

Crime affects not only the everyday quality of life for Flint's residents, but also the City's regional and national perception. Moving forward, increasing the safety of residents will be dependent upon providing adequate resources to our at-risk youth; finding innovative new strategies, technologies, and partnerships to prevent *crime; and sustaining* effective, proactive, and responsive police and fire departments.

The transportation systems that this CIP works to improve and inspire are important not for their own sake but for the public safety, health, and welfare that they work to *advance. Healthy transportation* choices will rely on investment in sidewalks, bike paths, and supporting systems that provide full accessibility to all residents, regardless of age or level of mobility.

Social service providers and reinforce agencies and institutions that provide health *care and education. Through* this holistic and collaborative approach, the Flint community will be empowered to instill positive change that leads to a healthier population and a higher quality of life.

CIP Vision for Public *Safety, Health &* Welfare

Imagine Flint as one of the safest cities in the country, with a proactive and technologically- savvy police force trusted by residents. Imagine Flint as a regional hub for fresh and locally grown produce, where a thriving movement of entrepreneurial growers transform vacant lots into gardens and provide healthy food to schools, farmers markets, restaurants, and stores across the City Imagine all of Flint's youth growing up in stable neighborhoods that *are clean, safe, and* welcoming, patrolled by police officers known to residents and home to community centers providing around-the-clock activities and services for youth

CIP Overview

The City faces a constant battle against extremely high levels of crime and the general health welfare of Flint residents. Strapped with debilitating staffing levels, public safety operations must be at the forefront of efficiency to ensure adequate service support for the Flint community. Old and dysfunctional facilities must be prioritized first and receive significant improvements and upgrades in order to meet the growing need and demand for smart, data driven policing and fire safety procedures. As noted previously in the com- munity facilities section, a study to determine the feasibility of full re- habilitation or potential new build remains of substantial importance.

Key Partners

The City only has five community centers: Haskell, Berston, Hasselbring, Brennan, and McKinley. Two of these centers are so well utilized that they have already exceeded their capacity, demonstrating a clear need for community centers in the City, especially for youth.

Throughout the Master Plan, we overwhelmingly heard from youth that there are no safe places to go. Youth often cited this fact as a reason from high crime in the City. Thus, it is critical that the City work with community partners to raise substantial funds to make much needed upgrades to these community facilities. Sadly, with the City's fiscal crisis, little has been done to these facilities, but based on the priorities outlined in the Master Plan, funding improvements to these facilities must be a priority. When cities have invested in community centers, they often have seen significant declines in crime.

Public Safety, Health & Welfare Policy

The public safety, heath, and welfare policies are derived from the Master Plan and should shape all projects moving for- ward. These policies should pro- vide a framework for evaluating the merits of any capital improvement project. For detailed discussion of each policy, please refer to the Master Plan section and the page referenced

Facility maintenance and location.

To ensure the long-term viability of the City's public safety facilities, the City should conduct on-going maintenance, employ new technologies, increase energy efficiency, and identify consolidation opportunities. The location of Neighborhood Service Centers should be aligned with the Land Use Plan

Master Plan reference State-Of- The-Art Police & Fire Departments, pp 238-239, Government Facilities, p 178

Police and Fire Department staffing.

New revenue streams and strategies should be identified that can help sustain adequate personnel levels, including grants, inter-department collaboration, and possible creation of an auxiliary or reserve force.

Master Plan reference· State-Of- The-Art Police & Fire Departments, pp 238-239.

Crime Prevention through Environmental Design (CPTED).

Environmental contributions to crime should be eliminated through strategies such as territoriality, natural access control, informal surveillance, regular maintenance, and code enforcement.

Master Plan reference Crime Prevention through Environmental Design, p 242

Community policing and holistic partnerships.

The City and law enforcement entities should take a holistic approach to public safety through partnerships with community organizations, social service providers, educators, and health providers that can built trust with residents and offer alternative paths to at-risk youth and ex-offenders. The development of "wrap-around community centers" was identified by residents as one of the most important steps towards achieving this end.

Master Plan reference Community Partnerships, p 242-244

Healthcare access.

While the City's role in healthcare is very limited, it should actively support policies, practices, and funding opportunities that increase awareness of existing services, expand services, increase accessibility of facilities, and reduce citizen dependence on drugs, alcohol, and smoking.

Master Plan reference. Community Partnerships, p. 242-244

Urban food production.

Vacant lots and green space should be used for localized food production that can generate affordable fresh foods for residents.

Master Plan reference Nutrition & Access to Produce, pp 250-252

Physical activity & exercise.

Changes in policies, programs, and the built environment (e.g. walkability and bikeability) should play a proactive role in reversing poor health trends and increasing healthy lifestyles.

Master Plan reference Physical Activity & Exercise, pp 252-253

PUBLIC SAFETY, HEALTH & WELFARE CAPITAL IMPROVEMENT PLAN

Police Department

The facilities of the FPD include Police Headquarters, located on the City Hall Complex site, along with several service centers. The headquarters facility has a number of issues associated with it. Constructed at the same time as City Hall (1956), the 62,400 square foot building suffers from many of the same problems and inefficiencies. Many building components are outdated and in need of maintenance or replacement. The building is extremely energy inefficient. The list of necessary capital improvements for FPD facilities is only a portion of what is likely needed, and there are serious questions as to the long-term viability of at least some of the buildings considering their age, condition, and cost of corrections needed. The City should consider including in a study of options for right-sizing their facilities to meet projected staffing needs the needs of the Police Department, especially the head- quarters. Opportunities could also exist as part of the implementation of the Master Plan to repurpose FCS facilities into combined police mini-stations/ community centers/senior centers.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Police Station bridge to 5th Street Improvements to the public access from 5th Street. Includes improvements for emergency exit from facility by employees.	1 – URGENT	$30,000	$30,000	$0
Flint City Lock-Up Door Replacements Replace doors in temporary lock-up facility located on the 3rd floor of Police Station. Doors currently do not operate or close as they should.	1 – URGENT	$50,000	$50,000	$0
Police Station HVAC Improvements to the heating and cooling system at Police Station.	2 – IMPORTANT	$1,685,000	$1,685,000	$0

Police Station- Women's Locker Room Replace broken toilet in handicapped stall	2- IMPORTANT	$500	$500	$0
Police Station – City Lock Up Substantial upgrades and rehabilitation to the BLOCK's, Female holding area and the Booking Room	2- IMPORTANT	$35,000	$35,000	$0
Police shooting range Improvements to police shooting range.	REMOVED			

PUBLIC SAFETY, HEALTH & WELFARE CAPITAL IMPROVEMENT PLAN

Fire Department

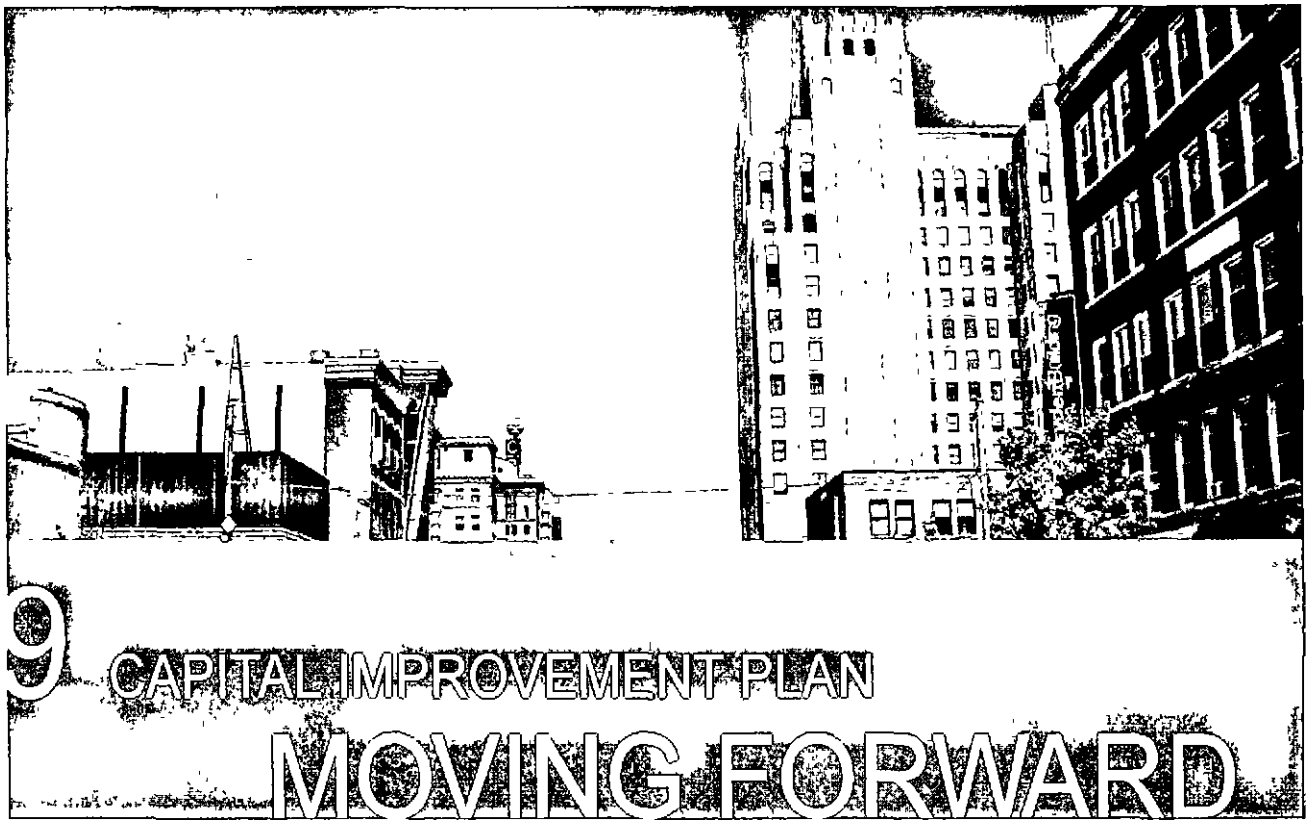
The Fire Department includes six (6) fire stations (with old Station 5 and Station 7 being closed) which are in various conditions. All have needs to varying degrees for upgrades or other improvements. There is no comprehensive facility assessment known for any of the fire stations and this should be considered. It is very likely that these facilities have many of the same issues as others of the City, with the added concerns of FFD staff being on duty 24 hours, 365 days a year. The assigned station is home to firefighters, who perform their duties as assigned, eat, and sleep at the station. This aspect presents unique issues not present in other facilities, such as kitchen remodeling and updates appliances, etc.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Atherton Road Station Roof Repair Repairs to the roof at the Atherton Road Fire Station.	1 – URGENT	$10,000	$10,000	$0
Fire Station 2 Roof Repairs to the roof at Fire Station 2.	1 – URGENT	$15,000	$15,000	$0
Fire Station 1 Kitchen Remodeling of the kitchen at the main Fire Station.	2 – IMPORTANT	$60,000	$60,000	$0
Fire Station 5 Miscellaneous Items Updates and maintenance to miscellaneous items at Fire Station 5, including security upgrades, Nederman unit, bay door, refrigerator, etc.	2 – IMPORTANT	$90,000	$90,000	$0
Fire Station 8 Miscellaneous Items Updates and maintenance to miscellaneous items at Fire Station 8, including tiles, plumbing, Nederman unit, HVAC unit, etc.	2 – IMPORTANT	$95,000	$95,000	$0
Fire Station 6 Miscellaneous Items Updates and maintenance to miscellaneous items at Fire Station 6, including minor roof repairs, HVAC unit, tiles, lighting, painting, etc.	2 – IMPORTANT	$96,500	$96,500	$0
Fire Station 1 Miscellaneous Items Updates and maintenance to miscellaneous items at Fire Station 1, including a new HVAC unit, carpeting, ceiling tiles, painting, etc.	2 – IMPORTANT	$145,000	$145,000	$0
Fire Station 3 Miscellaneous Items Updates and maintenance to miscellaneous items at Fire Station 3, including a new AC unit, minor roof repairs, parking lot gate, bay door, etc.	2 – IMPORTANT	$150,000	$150,000	$0
Fire Station 4 Miscellaneous Items Updates and maintenance to miscellaneous items at Fire Station 4, including various systems and furnishings.	2 – IMPORTANT	$150,000	$150,000	$0
Fire Station 1 HVAC Improvements to the heating and cooling system at Fire Station 1.	2 – IMPORTANT	$845,000	$845,000	$0
Fire Station 1 Roof Replacement Replace roof at Fire Station 1.	COMPLETED	$127,400	$127,400	$0

Community Wellbeing

The City currently has two senior centers (Brennan and Hasselbring), two youth centers (Berston and Haskell), and the McKinley Center (run by VISTA Drop-In Center). All are well utilized, with programming at all of the centers if provided by various non-profit partners. Some are utilized to the point that they physically cannot accommodate more users without capital investments, an indication of the need for more centers and partners to help with programming. Utilization of senior and community centers can be a key component in implementation of the Master Plan and many of the different place types, which can include adaptive reuse of FCS facilities. There is an immediate need for improvements at the two senior centers and it is likely that improvements are needed at the others. Identifying funding for necessary projects needs to be a priority, along with project partners.

PROJECT NAME	PRIORITY	TOTAL COST	CITY COST SHARE	NON-CITY FUNDS
Facility Needs Assessment Undertake a study to identify improvements needed at the various com- munity centers (Berston, Brennan, Haskell, Hasselbring, and McKinley) and identify long term goals for providing services at each center.	1 – URGENT	TBD	TBD	TBD
Soil\Turf repairs at Haskell Youth Center Soil cap design and construction for the demolished swimming pool site at Haskell Youth Center.	2 – IMPORTANT	$13,000	$13,000	$0
Pierce Community Center HVAC Replacement of air conditioning units at Pierce Community Center.	3 – DESIRABLE	$15,000	$15,000	$0
Fire Sprinkler System at Berston Field House Fire sprinkler system installation at Berston Field House. Cost estimate by Sedgewick & Ferweda Architects in on- site survey and analysis report (May 19, 2014).	3 – DESIRABLE	$150,000	$150,000	$0
LED Lighting Conversion Convert existing lights at city-owned community centers (including Berston, Haskell, Pierce, McKinley, Mott Park, Brennan, and Hasselbring) to high- efficiency LED fixtures to reduce long-term utility costs. Total cost represents a rough estimate based on the cost of conversion for gym lighting at Berston Field House.	3- DESIRABLE	$210,000	$210,000	$0
Bishop & MLK Service Center Improvements to the Service Center that are needed.	COMPLETED	$50,000	$50,000	$0
Berston Lighting Improvements Installation of new energy efficient lights	COMPLETED	$37,850	$37,850	$0
McKinley Center HVAC Repairs Emergency replacement of multiple furnaces in the McKinley Center	COMPLETED	$10,194	$10,194	$0
Hands Free Faucets **Installation of hands-free faucets at Berston, Haskell, McKinley, and Mott Park.**	REMOVED			



9 CAPITAL IMPROVEMENT PLAN
MOVING FORWARD

NEXT STEPS

The City of Flint is gathering significant momentum towards a rebirth. Implementation of the Master Plan will require significant capital investments. The projects listed in this CIP are but a fraction of what is needed for the City to once again attain its previous status.

The next steps required for the growth and development of Flint over the next 20 years include:

- Use of the Master Plan to guide City policies and decision-making;
- Review and update of the Zoning Ordinance, which is currently underway, and other development controls to reflect policies presented in the Master Plan;
- Use of this CIP to plan for recommended infrastructure improvements,
- Promote cooperation and participation among various agencies, organizations, community groups, and individuals;
- Prepare and implement a 5-year Strategic Plan to prioritize objectives and list accomplishments of preceding years;
- Explore possible funding sources and implementation techniques for projects;
- Enhance public communication and community engagement in decision-making; and,
- Update the CIP, Strategic Plan, and Master Plan at regular intervals.

ADOPTING AN ANNUAL CIP PROCESS

The CIP is a distinct element of the annual budget process that flows through City government in separate, but linked channels. The CIP process typically occurs earlier than the budget process, as the CIP will be used in developing the capital projects portion of the annual budget. The process for developing the CIP generally involves the following steps

Step 1: Organize the Process

Since the City has not had a formal process for collaborating on development of a CIP, the first step should be to develop and organize a process for doing so. Staff members whose work duties, responsibilities, and/or expertise are impacted by or affect capital improvement projects should be identified as members of the CIP Team. These meetings should occur on a regular basis throughout the year and not wait until immediately prior to the budget process, as the CIP process will take on less meaning if it is merged in any way with the budget The CIP draft should be completed well prior to beginning the budget process, with adjustments to the CIP made as needed based on budget discussions.

Step 2: Identify Needs

Each member of the CIP Team identifies the needs within or affected by its particular asset area. Team members should develop their CIP "wish list" of needs for facilities they are responsible for throughout the year and bring this list to the first CIP Team meeting. These needs can be identified by reviewing the findings of the City's various master plans, maintenance records and experiences of staff, and citizen requests submitted since the last CIP process.

Step 3: Identify Key Scope Items

Next, each member of the CIP Team identifies key scope items that are likely to influence the cost and/or schedule requirements of the project to address the needs. These items may include: impacts to natural features; changes to the character of an area; locations within established boundaries such as historic districts, DDA, Master Plan place types, etc.; impacts on other utility infrastructure systems or their operations; special assessment or other outside funding component; need to obtain right-of-way or easement area; or, require a public engagement process.

There are tools that can be utilized in this process. One is the utilization of the City's geographic information system (GIS), which should contain an inventory and status or condition of many of the key items listed above. By identifying the location of a particular need, the presence or absence of many key items can be determined. Another tool, though not as technical as the GIS, is the broad perspective of the CIP Team members. By leveraging the expertise of the various staff involved with, or affected by, the operations and improvement of a particular asset area, many critical scope items can be factored into the planning and programming of a project to address a particular need.

If these scope items are not taken into account as part of the CIP process, the implementation of many projects is likely to encounter delays and cost over- runs as these items are discovered during the actual project study and design activities.

Step 4: Prioritize Needs

The key task for the CIP Team is to evaluate and prioritize the many identified needs. This is a critical component of the CIP process. Project selection and scheduling is constrained by the amount of funding anticipated to be available for capital projects. Shrinking funds and rising costs incurred in maintaining and rehabilitating deteriorating infrastructure make the process of selecting the most vital capital projects even more crucial and difficult. The merits of each need must be judged against the policies and criteria of the CIP process and the goals of each component of the Master Plan, as well as against the other competing needs.

Collaborative Classification Process

This CIP utilizes the collaborative classification method to prioritize projects. This method considers the varied perspectives on a given project to arrive at a prioritization relative to the other needs within that project category.

Prioritization or Weighting Model

Some communities utilize a detailed, yet clear method of prioritizing projects. The City of Flint should consider use of a prioritization or weighting model, which employs the following procedure.

1. Determine the decision criteria to be used in the prioritization analysis

2 Assign relative weights to the criteria from 0 to 100, with 100 being the most important
criteria and the others weighted relative to the most important

3 Determine performance measures from 0 to 10 for each criterion

4. Score each need/project for each criterion

5. Run the model

The results of the prioritization model express the overall, relative benefit of each need/project compared to the others in that particular category. These results are reviewed to confirm that the criteria, weighting, and scoring have not produced improper results. If it is determined by the team that some aspects of the results are in- appropriate, the criteria, weighting, and/or scoring should be reviewed and adjusted and the model re- run. The purpose of this iterative process is to better calibrate the model, but care must be taken to not adjust the model to produce "desired" results.

Note that while priorities for projects are included in the project listings, it is incumbent on the City to determine the final priority for projects between departments once department heads have prioritized projects within their own area of responsibility. Regardless of the method employed (prioritization model, collaborative process, or other means), this step is to be conducted without consideration of project cost or availability of funding or staffing resources. The goal of this step is to assign a priority to each project to allow for subsequent steps to be completed.

Step 5: Schedule Projects

During previous steps, CIP Team members identified needs, developed scope, and prioritized needs based on use of some method for doing so. An item of major importance is the scheduling of projects based on the initial estimate of the project costs, proposed funding source(s) for those costs, and prioritization.

The CIP Team members should develop an initial proposed schedule for the projects based on their understanding of the need and its relative priority within its asset category. Unlike a budget, a CIP is not required to be fiscally constrained based on available dollars, but it should have some semblance of reality to be effective and serve its intended purpose of providing guidance to future budget cycles.

The projects should initially be grouped by the fiscal year in which funding is proposed. The CIP Team should then evaluate each fiscal year grouping and adjust project schedules until an overall schedule of projects is established wherein:

Higher priority needs are addressed before lower priority needs.

Available funding limits are not exceeded for the upcoming budget cycle.

Staffing resources are anticipated to have capacity to perform the projects.

Step 6: Prepare, Adopt & Approve

As the process continues, and increasingly detailed information emerges, projects may be added, altered, or abandoned. Eventually, the CIP Team arrives at a final list of projects that is submitted to the City Planning Commission for review.

The Planning Commission evaluates the CIP package in light of additional information, holds a public hearing, and makes final programming decisions before adopting the CIP and sending it on to City Council. Council approves the CIP after its review. Approval is not a commitment to finance the approved projects, but is a statement of policy regarding the City's approach to meeting its future capital needs. However, the first two years of the CIP do form the initial basis for the Capital Projects Budget portion of the City's Annual Budget.

Policy Assessment

The City Council ultimately approves the assumptions, criteria, policies, and recommendations of the CIP Team and City Planning Commission by approving the CIP. Depending on the policy orientation, modifications are expected throughout the process. This is considered an essential part of the procedure, placing the burden on those who dissent to assess the policies underlying the recommendations and to advocate their differences, resulting in the necessary evolution of the entire capital planning process.

Highlight Priority Needs Regardless of Funding

It is inevitable that the number of projects required to address all of the City's infrastructure needs will exceed the available funding. In the endeavor to provide better service to the community, capital projects are proposed at times which, unfortunately, are moved to a later date when funding is available, or are determined to be un- funded or unprogrammed. This process should not discourage staff from continuing to submit identified needs, but should develop into a mechanism to help in the effort to uncover alternate sources of funding and see that higher-priority projects get implemented.

APPENDIX

The attached Appendix includes the CIP spreadsheet that pro- vides more detailed information about budget cycles, funding sources, and project costs for projects listed in this CIP Several projects do not have a detailed scope or cost determined and there are numerous additional studies and investigations needed for the City to document existing conditions and fully understand infrastructure and capital improvement needs. Additional discussion on "Moving Forward" can be found in Chapter 12 of the Master Plan.

Importance: High

Randy,

I have reviewed our information and I can only confirm a few pieces of information that are highlighted:

- December 20, 2012 – While I have no specific information on this listing, Treasury and the City met with TYJT on December 21 to review options on either going with KWA or staying with DWSD. I believe this was a presentation of TYJT's preliminary report. I also have a reference that on December 21, the City received a new proposal from DWSD for water purchases. These points are outlined in a January 23, 2013 memo to the State Treasurer.

- March 12, 2015 – I can confirm this is the date that Veolia released its report. We have a copy of this document.

- January 9, 2015 – I have no specific information on this issue. However, it is worth noting that it was at this time that the TTHM issue also began. Much of our information from this period concerns this issue. The TTHM issue was not resolved until early September 2015. The earliest reference I see on a lead issue is late September.

This is all of the information that I can find to cross-reference.

I should note that many of these events our office was not directly involved.

If you have further questions, let me know.

To all;
Senator Ananich would like to add additional items to our timeline that I sent. They are highlighted and I think show up on this scan. Please look at and let me know if they are factual (DHHS and DEQ) (and if you say they aren't tell me why because Senator Ananich will have his info). I want to make sure we are accurate as to what happened when. Need to know as soon as possible (by end of day would be nice)
Dick

Per our conversation a lot of these dates involve DEQ et al in which we/Treasury did not play a role i.e., someone else would need to confirm their accuracy.
Items we would question from the document or need to investigate further...

12/20/12 (p.1) - we don't have the notification that is referenced

3/29/13 (p.2) – we are not aware of any veto by Kurtz.

The early offers by DWSD to reconnect were rejected because of the cost, they were long term & the fact the City had executed a contract with KWA.

3/12/15 – the Veolia report did mention corrosion control but the focus was on TTHM which was chlorination issue not related to the lead problem. I believe Treasury funded the study.

Summary of Flint Water Date Timeline and Background Information

Overall

- The health and welfare of Flint residents is a top priority and Governor Snyder is committed to a coordinated approach with resources from state agencies to address all aspects of this situation.
- Governor Snyder has requested support from the Federal Emergency Management Agency (FEMA) to coordinate with other federal agencies to provide resources to Flint as we work on short-term and long-term solutions for residents.
- About a month after Governor Snyder became aware that the city of Flint's water showed elevated lead levels and that the state's handling of the situation was being questioned, he requested funding to switch the source back to the Great Lakes Water Authority and appointed an independent task force to identify possible missteps and areas for improvement.
- On Jan. 11 Gov. Snyder created the Flint Water Interagency Coordinating Committee (FWIACC), which will bring together a wide range of experts to work on long-term solutions to the Flint water situation and ongoing public health concerns affecting residents. The FWIACC is made up of experts from government and the Flint community and will set a course of action to remedy the water situation and resulting health issues, and carry on long after the emergency declaration expires.
- The independent Flint Water Task Force is continuing a full review of all local, state and federal actions that led to the current situation in Flint. A detailed report will be released upon completion.

In response to initial findings from the Flint Water Task Force, Governor Rick Snyder accepted the resignation of the Director of the Michigan Department of Environmental Quality.

Here is a summary timeline of the Flint water events:

2006

January: Discussions regarding Karegnondi Water Authority start.

2011

July: Flint receives the results of a study they commissioned examining the feasibility of processing water from the Flint River in the Flint Water Treatment plant. That analysis says that getting the plant up to speed could take as long as five years and nearly $50 million.

November 8: The State of Michigan declares a financial emergency in Flint.

November 29: Governor Snyder appoints Flint's first Emergency Manager, Michael Brown.

2012

December 20: The City of Flint notifies the Department of Treasury that it is no longer considering using the Flint River as a primary water source.

2013

March 25: Flint City Council votes on a resolution presented to them by Emergency Manager Ed Kurtz to join the Karengondi Water Authority. Although the council approves the resolution 7-1, the council alters the quantity of water to be purchased from KWA before they vote.

March 29: Flint Emergency Manager Ed Kurtz vetoes Flint City Council's changes to the KWA resolution and signs an Executive Order to join KWA.

April 12: State of Michigan approves of the decision for Flint to join KWA.

April 16: City of Flint Emergency Manager Ed Kurtz signs agreement to switch from Detroit Water and Sewerage Department water source to KWA. DWSD sets termination of Flint water service for April 17, 2014.

April 17: DWSD says it will stop selling water to the City of Flint in April 2014.

June: Flint notifies the DEQ of intent to operate the Flint Water Treatment Plant full-time using Flint River for drinking water.

2014

February 12: DWSD writes a letter offering to continue to provide service after April 2014.

Mid-March: City of Flint decides to use the Flint River as a water source.

April 4: Flint files its application with DEQ for a permit to treat Flint River water. Reportedly, DEQ normally takes 30 to 45 days to approve these permits.

April 10: DEQ issues Flint Water Treatment Plant construction permits for full-time operation enhancements.

April 18: DEQ visits the Flint Water Treatment Plant to ensure the permitted upgrades have been completed.

April 25: City of Flint switches to Flint River water.

July: DEQ begins the first six-month Flint lead-copper monitoring report. Part of EPA corrosion control protocol. Although DEQ is requiring the city to conduct lead and copper monitoring, they are not requiring the city's water treatment plant to use any form of corrosion control, which would cost about $60 a day.

October: GM stops using Flint water because of corrosion problems.

December: First round of lead-copper monitoring results come back at 6 ppb. Flint's two prior lead results were 0 ppb. Although these results were due January 10, 2015, they were not finalized until February 27, 2015.

2015

January 1: DEQ begins second six-month Flint lead/copper monitoring period.

January 9: UM-Flint begins testing its water and ultimately finds elevated lead levels in water on campus. They alert city officials.

January 12: DWSD offers Flint's emergency manager a waiver of the $4 million reconnection fee to switch back to Detroit water.

January 26: Flint releases its Capital Improvement Plan, which includes provisions for a phosphoric acid feed system for corrosion control.

February 26: The EPA discusses a resident's water sample testing results with the DEQ. High levels of lead (104 ppb) were found in the water at the residence.

February 27: DEQ responds to the EPA saying that the Flint Water Treatment Plant has an optimized corrosion control program.

February: EPA offers to send a corrosion control expert to Flint, and DEQ ignores the offer.

March 12: Consultant Veolia, which was hired by Flint's emergency manager, releases its final water quality report for Flint that includes the recommendation for corrosion control.

March 23: Flint City Council votes 7-1 to return to DWSD water. The city's Emergency Manager does not approve the switch, so the city continues to rely exclusively on the Flint River for water.

April 24: DEQ indicates no corrosion chemical (orthophosphate) in place. DEQ staff were following an incorrect interpretation the EPA protocol for two six month testing periods (to end in July), which requires corrosion control.

May 28: Sample results from the residence noted with high lead levels on Feb. 26 show lead levels improved after a new copper service line installation.

June 24: EPA official Miguel Del Toral releases a memo about high lead levels in Flint.

July 9: Flint water treatment official emails DEQ admitting that Flint was in violation for having two few samples. The deadline for the January-June 2015 report is July 10.

July 10: DEQ staffer replies to Flint water treatment official saying that DEQ was "discussing options" regarding the number of samples Flint was required to collect.

July 13: DEQ spokesman Brad Wurfel says, "anyone who is concerned about lead in the drinking water in Flint can relax."

July 21: A conference call between EPA and DEQ officials reveals that EPA experts do not agree with DEQ's interpretation of the Lead and Copper Rule with respect to corrosion control requirements.

July 28: Flint WTP sends a lead and copper report to DEQ. Its results are above the EPA action level, but this report is ultimately labeled a draft.

July 28: Excerpt response from Childhood Lead Poisoning Prevention program head:

"We compared lead testing rates and lead testing results to the same time frame for the previous 3 years, to see if there were any patterns that suggested that there were increased rates of lead poisoning after the water supply was switched.

- Lead testing rates remained about the same from year to year
- There was a spike in elevated blood lead tests from July-September 2014
- However that pattern was not terribly different from what we saw in the previous three years,

especially in 2011-2012 (we are working with our Epidemiologist to statistically verify any significant differences).

- We commonly see a 'seasonal effect' with lead, related to people opening and closing windows more often in the summer, which disturbs old deteriorating paint on the windows, sills and sashes. Window fans frequently blow and spread the lead dust from the deteriorating paint to other parts of the room/house. We suspect that the summer data spike may be related to this effect.
- If the home water supply lines and/or river water were contributing to elevated blood lead tests, we expected that the increased rates would extend beyond the summer, but they drop quite a bit from September to October, stayed low over the winter, and are just starting to tail up again in the spring of 2015.

"So upon review, we don't believe our data demonstrates an increase in lead poisoning rates that might be attributable to the change in water source for Flint. We recognize that lead exposure via the water is only a small piece of what may be happening for families in Flint, however, we hope the information is helpful."

August 4: Meeting with Governor's Office and Flint pastors.

August 17: DEQ notifies the Flint WTP of the second six-month lead/copper monitoring results that show lead levels at 11 ppb. These results reflect an increase above the last report, which had results of 6 ppb, and the two most recent pre-switch results, which had results of 0 ppb. DEQ arrives at 11 ppb result after it, unprompted, removes two high-lead samples from the pool. If those samples are included, Flint's lead levels would be above the EPA action level.

August 23: Virginia Tech researcher, Marc Edwards, notifies the DEQ that he will begin a study of the City of Flint water quality.

August 24: Dr. Mona Hanna Attisha from Hurley Hospital contacts Genesee County Health Department for blood lead level data/information.

August 28: Concerned Pastors announce water filter giveaway in Flint.

September 1: Concerned Pastors holds giveaway of 1,500 lead-reducing water filters in Flint, which was coordinated by Governor's Office.

September 1: Virginia Tech professor Marc Edwards releases an independent analysis of Flint water finding elevated lead levels.

September 2: Virginia Tech researcher, Marc Edwards, indicates that the corrosiveness of the Flint water is causing lead to leach into the residents' water.

September 24: Dr. Mona Hanna-Attisha of Hurley Medical Center issues study showing high blood lead levels in City of Flint children.

September 24: DHHS spokeswoman says Dr. Mona Hanna-Attisha's lead data are a seasonal anomaly.

September 25: Flint issues lead advisory regarding drinking water.

September 27: Free Press analyzes state lead data and finds elevated levels, confirming Dr. Hanna-Attisha's results.

September 27: Governor's spokeswoman called Hurley's lead data "spliced and diced."

September 28: DEQ spokesman Brad Wurfel comments on Dr. Edwards's results saying, "this group specializes in looking for high lead problems. They pull that rabbit out of that hat everywhere they go."

September 29: Dr. Eden Wells, State Medical Officer, contacts Dr. Mona Hanna Attisha regarding her study results.

September 30: Briefing to Director Lyon comparing Lead Copper Rule Testing (EPA protocol) and Marc Edwards protocol.

October 1: Michigan Department of Health and Human Services confirms results of Hurley Medical Center Study.

October 1: DHHS provides information for Flint Water website, including the following documents: Parent Handbook: Is Your Child Safe From Lead Poisoning, Blood Lead Level Quick Reference for Primary Care Providers, Lead Screening & Testing for Safe, Healthy Michigan Kids, and finally, Pregnant and Nursing Mothers: What You Need to Know.

October 1: City of Flint, Genesee County Health Department urge residents to not drink water and issues "Do Not Drink" Advisory.

October 2: DEQ falsely claims that Flint's use of lime softeners constitutes corrosion control. Lime softeners are not traditionally considered a corrosion control measure.

October 2: DHHS determines its study results are now consistent with Hurley findings, Gov. Snyder announces comprehensive action plan to address Flint water issues. State Budget Office approval to use carryover emergency funds and transfer of DEQ funds to purchase water filters.

October 2: Genesee County Health Department school screening water samples collected for analysis.

October 5: DHHS announces water filters will be available to the public on Oct. 6.

October 7: Flint Technical Advisory Board meets, recommends reconnection to Detroit water.

October 8: Gov. Snyder conducts press conference in Flint, where he Snyder publicly admits that there is a problem with Flint's water for the first time and announces plan to reconnect to Detroit water.

October 8: City of Flint develops plan to reconnect to DWSD.

October 15: Gov. Snyder signs bill authorizing funding for Flint to move back to Detroit water system.

October 16: City of Flint reconnects to DWSD.

October 19: DEQ Director Dan Wyant states: "Staff made a mistake while working with the City of Flint. Simply stated, staff employed a federal (corrosion control) protocol they believed was appropriate and it was not."

October 21: Gov. Snyder announces Flint Water Task Force to review state, federal and municipal actions, offer recommendations.

October 28: DEQ issues construction permit for additional corrosion control treatment.

December 9: Flint begins adding supplemental corrosion controls to the water.

December 29: Gov. Snyder takes action on initial findings from Flint Water Task Force.

2016

January 4: Genesee County Commission votes for emergency declaration.

January 5: Gov. Snyder declares emergency for Genesee County due to the ongoing health and safety issues caused by lead in the city of Flint's drinking water. This emergency declaration did not require any preceding emergency declaration by local authorities.

- *By declaring a state of emergency, The Governor has made available all state resources in cooperation with local response and recovery operations.*
- *The declaration authorizes the Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) to coordinate state efforts.*
- *In addition to the emergency declaration, the Governor activated the State Emergency Operations Center to coordinate state departments, the state's response, resources, and relief and recovery activities.*
- *The SEOC is the emergency operations center for the state of Michigan. Located in Lansing, the center is overseen by the MSP/EMHSD and coordinates response and recovery efforts by state agencies and local government. The SEOC is staffed by members of state agencies and other partners for decision making and information coordination during disasters or emergencies in the state of Michigan.*
- *On Jan. 6, the Joint Information Center was opened to lead the state's messaging and information response in coordination with the local Emergency Operations Center, Genesee County, and the City of Flint.*

January 8: Gov. Snyder and Flint Mayor Weaver meet to discuss how city and state can work on water issues.

January 9: MSP Emergency Management Division announces water resource sites established in Flint with bottled water, filters and testing kits

FEMA/National Guard/Resources

- Governor has requested support from FEMA
  - Coordinate interagency recovery plan
  - Identify federal agencies that have programs, authorities, and technical expertise to assist
  - At this point there is not a federal declaration. FEMA is not currently sending supplies to this incident.
- In addition to requesting support from FEMA, the Governor has activated the Michigan National Guard to help our local volunteers distribute supplies at the five water resource sites.
  - The resource sites are open seven days a week from 9 a.m. to 9 p.m. at Flint fire stations.

        - Fire Station #1 310 East 5th St. Flint, MI 48502
        - Fire Station #3 1525 Martin Luther King Ave. Flint, MI 48503
        - Fire Station #5 3402 Western Rd. Flint, MI 48506
        - Fire Station #6 716 West Pierson Rd. Flint, MI 48505
        - Fire Station #8 202 East Atherton Rd. Flint, MI 48507
    - There are water resource teams going door to door to ensure every resident has a water filter and additional water resources
    - Residents who need immediate help should call 211 or the governor's office at 517-335-7858
        - 211 is open 24/7/365
        - To assist the residents of Flint, Governor Snyder's office has committed ensure the constituent relations division will be open 7 days per week from 8 am until 5 pm until further notice.
- The Michigan State Police continue to lead the door to door mission of reaching every Flint resident. They are assisted by the Genesee County Sheriff's office, state of Michigan employees, and volunteers from organizations such as the American Red Cross.
- One of our top priorities is ensuring Flint residents know the resources that are available to them. We have used direct mail, automated calls, emails and bill boards to ensure residents know that information on water resources is available by calling 211 or visiting www.michigan.gov/FlintWater

Additional information

Corrosion Control

- On October 16, 2015 Flint returned to using water supplied by DWSD. The water supplied by DWSD is a finished product ready to use and already has phosphate added to it to assist with corrosion control.

- Recognizing that the level of phosphate in the water from DWSD was designed to be a maintenance dosage, the DEQ and the Flint worked together to bring online supplemental phosphate addition so as to speed up the rebuilding of the protective layer in the distribution system.

- The DEQ is now partnering with Flint, the U.S. EPA and other governmental entities to proactively identify bottlenecks so that the eventual switch from DWSD to the KWA can be done smoothly and with safety being the top priority.

- Even with similarities between DWSD and KWA water, precautionary measures are being taken.
    - These measures will include running the Flint Water Treatment Plant on a trial basis for a period of time without sending the water into the distribution system so that all of the treatment processes can be thoroughly evaluated.
    - In addition, bench top testing will be conducted to assist in determining how the Water Treatment Plant processes can be optimized.

- The KWA will be supplying raw water. This water will need to be treated by each of the respective water supplies.

- When KWA comes on line, Flint will be receiving raw water that is similar to the raw water that DWSD treats.
    - Flint will then need to operate the water treatment plant for an (as of yet) undetermined period of time.
    - Once Flint has demonstrated that it is capable of generating water with the desired background characteristics it will then be able to then send water to the distribution system.

- For non-Flint residents who want to test their water for lead – they can purchase a testing kit from DEQ for $18 – details follow:
    - Anyone in Michigan who wants to test their water for lead can call the State Drinking Water Lab at 517-335-8184.
    - The lead testing kit costs $18, which includes the sample bottle and instructions shipped to your home as well as the lab test. It does not include the cost of shipping your filled sample bottle back to the lab.
    - Depending on the lab workload, results are typically available within 1-2 weeks.
    - Your results will include information about the EPA's lead recommendations as well as contact information for your local health department, which can help you interpret your results further, if needed.

If it's about the current year budget, please send him to the city. They'd be in the best position to answer that.

> Dear Mr. Roberts,
>
> I hope this message finds you well. I am a researcher with Vice, which is a television show on the HBO network. We have a film crew covering the issue of lead contamination in Flint, and I am trying to make sense of reports that the City of Flint had a budget forecast of $5 million over a two year period. I've been trying to see if these figures are accurate, and I'm wondering if they came from a draft of the 2016-2020 budget? I was trying to identify where in the budget these figures came from, and I saw that under the Water Fund on Page 26 of the budget, there is a section that says "ending unreserved fund balance" that accumulates to $5.7 million in 2018 and 2019. Would this reflect the savings reported in the piece? Or am I looking in the wrong place? I'm also not sure if your office handles the Flint budget, or just the state budget?

Thank you very much for your time and help on this!

Very best,
Sara

Subject: Timeline Follow-up Questions

Hello Randy,

I have finished reviewing the follow-up questions that you sent to me, and after reviewing all of our documents, here are my responses:

Timeline questions follow-up

Response

1. Most of these dates involve DEP et al in which we/Treasury did not play a role i.e., someone else [DEQ] would need to confirm their accuracy

2. Just quickly, items we would question from the document or need to investigate further...

3. 12/20/12 (p.1) – we don't have the notification that is referenced
"The City of Flint notifies the Treasury that it is no longer considering using the Flint River as a water supply"

- Cannot find documentation that this occurred.
- During that time period, the Treasury was analyzing the report from Tucker and Young study, and had not even received a proposal from DWSD.

4. 3/29/13 (p.2) – we are not aware of any veto by Kurtz
"EM Kurtz Vetoes Flint City Council's changes to the KWA resolution, and signs an executive order to join KWA"

- We were able to confirm that the City Council voted to connect to water from KWA
- No Executive Order was filed with the Treasury overriding the City Council's changes to the KWA agreement, nor was there an Executive Order filed with the Treasury to join the KWA

5. The early offers by DWSD to reconnect were rejected because of the add'l cost, they were long term and the fact the city had executed a contract with KWA. On Jan 12 '15 they waived the reconnect fee but were still issues re length/term of commitment.

- Per Jerry Ambrose's memo dated 3/3/15 (attached), the water from DWSD would still cost the city an additional estimated $12M annually, which would have raised water rates by an additional 30%. As such, he strongly disagreed with restoring the water to DWSD at the time.

6. 3/12/15 – The Veolia report did mention corrosion control but the focus was on TTHM which was chlorination issue not related to the lead problem. I believe Treasury funded the study.

- No documentation was found to conclude that this study was funded by the Treasury.

Attachment #20

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

TO: Wayne Workman, *Deputy Treasurer*
Treasury Department
State of Michigan

FROM: Jerry Ambrose, Emergency Manager
City of Flint

DATE: March 3, 2015

As the Emergency Manager for the City of Flint, I am charged with restoring the City government to financial solvency, and working to assure that the City moves forward on a financially sustainable basis. The steps taken over the past three years have been difficult. Taxes and fees have been raised, services and workforce reduced, and ongoing costs, including legacy costs, have been constrained.

The current controversy surrounding the provision of water, and the path for resolution, has a potentially significant impact on the progress that is being made. I am satisfied that the water provided to Flint users today is within all MDEQ and EPA guidelines, as evidenced by the most recent water quality results conducted for MDEQ. We have a continuing commitment to maintain water safety and to improve water quality, and have dedicated resources to assure this commitment will be made.

The oft-repeated suggestion that the City should return to DWSD, even for a short period of time, would, in my judgment, have extremely negative financial consequences to the water system, and consequently to the rate payers. By the most conservative estimates, such a move would increase costs by at least $12 million annually, with that amount achieved only by eliminating virtually all budgeted improvements in the system. For a system with Unrestricted Assets of only $740,745, according to the June 30, 2014 audited financial statements, the only recourse within the City's control would be to increase revenues significantly. And in my judgment, that would come from raising rates for water by 30% or more . Further, changing the *source* of the city's water would not necessarily change any of the *aesthetics* of the water, including odor and discoloration, since those appear to be directly related to the aging pipes and other infrastructure that carry water from the treatment facility to our customers.

This direction of discussion also deviates from what, in my judgment, should be the focus: How can we not only operate and maintain a system to assure the delivery of safe and quality water dependably, but significantly reduce the cost of water and sewer to the users? At an average of $149 per month for water and sewer service for a residential user, the cost is extremely high in comparison to surrounding areas, as well as most areas across the state, and creates a significant financial burden for many users. In my judgment, we should all be concentrating on how to reduce rates by 50% or more. Unfortunately, there are no easy or evident answers, and continuation of the status will be an impediment to the sustainable recovery of the City of Flint. It is a conversation that I expect we will have with the recently created Water Quality Advisory Committee.

My reasoning for this conclusion is as follows:

One of the decisions made in the context of beginning to eliminate deficits and to restore financial stability to the City of Flint was to increase water and sewer rates significantly – the only choice available to financially stabilize a system that as of June 30, 2012, had a deficit of $8,758,091. Another was to leave DWDS for the KWA because it offered the opportunity to lower future rate increases. A third decision was to utilize the Flint River on an interim basis when DWSD unilaterally terminated the City's contract for water purchase. That decision was made because it also offered an immediate cost savings opportunity which translated into the ability to upgrade the Water Treatment Plant without having to seek financing. It was a reasonable decision because of our experience in using the river in a back-up capacity, including test runs on a quarterly basis for several decades.

Unfortunately, the switch to the river as a primary source was more challenging than anticipated, and the harsh winter of 2013-2014 resulted in much more damage to the aging water infrastructure than in previous years. The result was the issuance of required notices that water exceeded established guidelines for safety as it could affect certain vulnerable populations, and some users of the system experienced unpleasant odors and discoloration. Some users also appeared to have had some negative reactions to the new source of water. However, as soon as the test results were known, City staff took immediate actions to address the concerns. These actions are evidenced today by the fact that MDEQ has certified that our most recent testing shows water from all testing sites to be well within acceptable guidelines. Additionally, the City is continuing to taking the necessary actions to assure that the water supply remains safe and that water quality continues to improve.

As the City has moved to address the situation, the suggestion continues to be made that the City should re-engage with DWSD and purchase water at least until the KWA pipeline is supplying water. As evidenced by the most recent letter from DWSD, such a decision would immediately increase the City's cost by $846,700 per month, or $10,160,400 per year, just for the fixed cost portion of the price. The actual *purchase* of water would be an additional fee, and dependent upon

the quantity purchased. We estimate the actual water purchase cost to average more than $1 million per month, for a grand total of approximately $22 million per year. Finally, the DWSD offer is conditioned upon the City (or presumably the KWA) agreeing to negotiate a long term contract (30 years) for back-up.

The $22 million annual estimate of increased costs to purchase water from DWSD would be minimally offset by an approximate $3 million in reduced operating costs, and could be further offset by an additional $9 million, but only if all funding for capital improvements to the system are eliminated. To eliminate all funding dedicated to repairing, stabilizing, and improving the system would be totally irresponsible and would have long term negative consequences to the City and to future rate payers.

As you are aware we have recently brought in outside expert assistance to evaluate the steps we have taken to assure that the water is safe and to continue to improve water quality. We are expecting specific recommendations within the next few weeks, and are committed to implementing those recommendations in a timely manner. Many steps have already been taken. I am confident that implementing their recommendations will assure a continuing supply of safe water as well as improved quality, and at far less cost than re-engaging DWSD.

We have also created a 40-member Water Advisory Committee and a 13-member Technical Advisory Committee to assure two-way communication with the public and users of the system. Those committees will begin to meet this week, and we look forward to answering their questions and receiving their input.

It is unfortunate that problems and concerns with quality have arisen, and we are working every day to address the issues that caused them. Maintaining safe water and improving quality is a top priority as we work to make the City of Flint an attractive place to live, work, study, and play.

Summary of Flint Water Date Timeline and Background Information

Overall

- The health and welfare of Flint residents is a top priority and Governor Snyder is committed to a coordinated approach with resources from state agencies to address all aspects of this situation.
- Governor Snyder has requested support from the Federal Emergency Management Agency (FEMA) to coordinate with other federal agencies to provide resources to Flint as we work on short-term and long-term solutions for residents.
- About a month after Governor Snyder became aware that the city of Flint's water showed elevated lead levels and that the state's handling of the situation was being questioned, he requested funding to switch the source back to the Great Lakes Water Authority and appointed an independent task force to identify possible missteps and areas for improvement.
- On Jan. 11 Gov. Snyder created the Flint Water Interagency Coordinating Committee (FWIACC), which will bring together a wide range of experts to work on long-term solutions to the Flint water situation and ongoing public health concerns affecting residents. The FWIACC is made up of experts from government and the Flint community and will set a course of action to remedy the water situation and resulting health issues, and carry on long after the emergency declaration expires.
- The independent Flint Water Task Force is continuing a full review of all local, state and federal actions that led to the current situation in Flint. A detailed report will be released upon completion.

In response to initial findings from the Flint Water Task Force, Governor Rick Snyder accepted the resignation of the Director of the Michigan Department of Environmental Quality.

Here is a summary timeline of the Flint water events:

2006

January: Discussions regarding Karegnondi Water Authority start.

2011

July: Flint receives the results of a study they commissioned examining the feasibility of processing water from the Flint River in the Flint Water Treatment plant. That analysis says that getting the plant up to speed could take as long as five years and nearly $50 million.

November 8: The State of Michigan declares a financial emergency in Flint.

November 29: Governor Snyder appoints Flint's first Emergency Manager, Michael Brown.

2012

December 20: The City of Flint notifies the Department of Treasury that it is no longer considering using the Flint River as a primary water source.

2013

March 25: Flint City Council votes on a resolution presented to them by Emergency Manager Ed Kurtz to join the Karengondi Water Authority. Although the council approves the resolution 7-1, the council alters the quantity of water to be purchased from KWA before they vote.

March 29: Flint Emergency Manager Ed Kurtz vetoes Flint City Council's changes to the KWA resolution and signs an Executive Order to join KWA.

April 12: State of Michigan approves of the decision for Flint to join KWA.

April 16: City of Flint Emergency Manager Ed Kurtz signs agreement to switch from Detroit Water and Sewerage Department water source to KWA. DWSD sets termination of Flint water service for April 17, 2014.

April 17: DWSD says it will stop selling water to the City of Flint in April 2014.

June: Flint notifies the DEQ of intent to operate the Flint Water Treatment Plant full-time using Flint River for drinking water.

2014

February 12: DWSD writes a letter offering to continue to provide service after April 2014.

Mid-March: City of Flint decides to use the Flint River as a water source.

April 4: Flint files its application with DEQ for a permit to treat Flint River water. Reportedly, DEQ normally takes 30 to 45 days to approve these permits.

April 10: DEQ issues Flint Water Treatment Plant construction permits for full-time operation enhancements.

April 18: DEQ visits the Flint Water Treatment Plant to ensure the permitted upgrades have been completed.

April 25: City of Flint switches to Flint River water.

July: DEQ begins the first six-month Flint lead-copper monitoring report. Part of EPA corrosion control protocol. Although DEQ is requiring the city to conduct lead and copper monitoring, they are not requiring the city's water treatment plant to use any form of corrosion control, which would cost about $60 a day.

October: GM stops using Flint water because of corrosion problems.

Myalgy

December: First round of lead-copper monitoring results come back at 6 ppb. Flint's two prior lead results were 0 ppb. Although these results were due January 10, 2015, they were not finalized until February 27, 2015.

2015

January 1: DEQ begins second six-month Flint lead/copper monitoring period.

January 9: UM-Flint begins testing its water and ultimately finds elevated lead levels in water on campus. They alert city officials.

January 12: DWSD offers Flint's emergency manager a waiver of the $4 million reconnection fee to switch back to Detroit water.

January 26: Flint releases its Capital Improvement Plan, which includes provisions for a phosphoric acid feed system for corrosion control.

February 26: The EPA discusses a resident's water sample testing results with the DEQ. High levels of lead (104 ppb) were found in the water at the residence.

February 27: DEQ responds to the EPA saying that the Flint Water Treatment Plant has an optimized corrosion control program.

February: EPA offers to send a corrosion control expert to Flint, and DEQ ignores the offer.

March 12: Consultant Veolia, which was hired by Flint's emergency manager, releases its final water quality report for Flint that includes the recommendation for corrosion control.

March 23: Flint City Council votes 7-1 to return to DWSD water. The city's Emergency Manager does not approve the switch, so the city continues to rely exclusively on the Flint River for water.

April 24: DEQ indicates no corrosion chemical (orthophosphate) in place. DEQ staff were following an incorrect interpretation the EPA protocol for two six month testing periods (to end in July), which requires corrosion control.

May 28: Sample results from the residence noted with high lead levels on Feb. 26 show lead levels improved after a new copper service line installation.

June 24: EPA official Miguel Del Toral releases a memo about high lead levels in Flint.

July 9: Flint water treatment official emails DEQ admitting that Flint was in violation for having two few samples. The deadline for the January-June 2015 report is July 10.

July 10: DEQ staffer replies to Flint water treatment official saying that DEQ was "discussing options" regarding the number of samples Flint was required to collect.

July 13: DEQ spokesman Brad Wurfel says, "anyone who is concerned about lead in the drinking water in Flint can relax."

July 21: A conference call between EPA and DEQ officials reveals that EPA experts do not agree with DEQ's interpretation of the Lead and Copper Rule with respect to corrosion control requirements.

July 28: Flint WTP sends a lead and copper report to DEQ. Its results are above the EPA action level, but this report is ultimately labeled a draft.

July 28: Excerpt response from Childhood Lead Poisoning Prevention program head:

"We compared lead testing rates and lead testing results to the same time frame for the previous 3 years, to see if there were any patterns that suggested that there were increased rates of lead poisoning after the water supply was switched.

- Lead testing rates remained about the same from year to year
- There was a spike in elevated blood lead tests from July-September 2014
- However that pattern was not terribly different from what we saw in the previous three years,

especially in 2011-2012 (we are working with our Epidemiologist to statistically verify any significant differences).

- We commonly see a 'seasonal effect' with lead, related to people opening and closing windows more often in the summer, which disturbs old deteriorating paint on the windows, sills and sashes. Window fans frequently blow and spread the lead dust from the deteriorating paint to other parts of the room/house. We suspect that the summer data spike may be related to this effect.
- If the home water supply lines and/or river water were contributing to elevated blood lead tests, we expected that the increased rates would extend beyond the summer, but they drop quite a bit from September to October, stayed low over the winter, and are just starting to tail up again in the spring of 2015.

"So upon review, we don't believe our data demonstrates an increase in lead poisoning rates that might be attributable to the change in water source for Flint. We recognize that lead exposure via the water is only a small piece of what may be happening for families in Flint, however, we hope the information is helpful."

August 4: Meeting with Governor's Office and Flint pastors.

August 17: DEQ notifies the Flint WTP of the second six-month lead/copper monitoring results that show lead levels at 11 ppb. These results reflect an increase above the last report, which had results of 6 ppb, and the two most recent pre-switch results, which had results of 0 ppb. DEQ arrives at 11 ppb result after it, unprompted, removes two high-lead samples from the pool. If those samples are included, Flint's lead levels would be above the EPA action level.

August 23: Virginia Tech researcher, Marc Edwards, notifies the DEQ that he will begin a study of the City of Flint water quality.

August 24: Dr. Mona Hanna Attisha from Hurley Hospital contacts Genesee County Health Department for blood lead level data/information.

August 28: Concerned Pastors announce water filter giveaway in Flint.

September 1: Concerned Pastors holds giveaway of 1,500 lead-reducing water filters in Flint, which was coordinated by Governor's Office.

September 1: Virginia Tech professor Marc Edwards releases an independent analysis of Flint water finding elevated lead levels.

September 2: Virginia Tech researcher, Marc Edwards, indicates that the corrosiveness of the Flint water is causing lead to leach into the residents' water.

September 24: Dr. Mona Hanna-Attisha of Hurley Medical Center issues study showing high blood lead levels in City of Flint children.

September 24: DHHS spokeswoman says Dr. Mona Hanna-Attisha's lead data are a seasonal anomaly.

September 25: Flint issues lead advisory regarding drinking water.

September 27: Free Press analyzes state lead data and finds elevated levels, confirming Dr. Hanna-Attisha's results.

September 27: Governor's spokeswoman called Hurley's lead data "spliced and diced."

September 28: DEQ spokesman Brad Wurfel comments on Dr. Edwards's results saying, "this group specializes in looking for high lead problems. They pull that rabbit out of that hat everywhere they go."

September 29: Dr. Eden Wells, State Medical Officer, contacts Dr. Mona Hanna Attisha regarding her study results.

September 30: Briefing to Director Lyon comparing Lead Copper Rule Testing (EPA protocol) and Marc Edwards protocol.

October 1: Michigan Department of Health and Human Services confirms results of Hurley Medical Center Study.

October 1: DHHS provides information for Flint Water website, including the following documents: Parent Handbook: Is Your Child Safe From Lead Poisoning, Blood Lead Level Quick Reference for Primary Care Providers, Lead Screening & Testing for Safe, Healthy Michigan Kids, and finally, Pregnant and Nursing Mothers: What You Need to Know.

October 1: City of Flint, Genesee County Health Department urge residents to not drink water and issues "Do Not Drink" Advisory.

October 2: DEQ falsely claims that Flint's use of lime softeners constitutes corrosion control. Lime softeners are not traditionally considered a corrosion control measure.

October 2: DHHS determines its study results are now consistent with Hurley findings, Gov. Snyder announces comprehensive action plan to address Flint water issues. State Budget Office approval to use carryover emergency funds and transfer of DEQ funds to purchase water filters.

October 2: Genesee County Health Department school screening water samples collected for analysis.

October 5: DHHS announces water filters will be available to the public on Oct. 6.

October 7: Flint Technical Advisory Board meets, recommends reconnection to Detroit water.

October 8: Gov. Snyder conducts press conference in Flint, where he Snyder publicly admits that there is a problem with Flint's water for the first time and announces plan to reconnect to Detroit water.

October 8: City of Flint develops plan to reconnect to DWSD.

October 15: Gov. Snyder signs bill authorizing funding for Flint to move back to Detroit water system.

October 16: City of Flint reconnects to DWSD.

October 19: DEQ Director Dan Wyant states: "Staff made a mistake while working with the City of Flint. Simply stated, staff employed a federal (corrosion control) protocol they believed was appropriate and it was not."

October 21: Gov. Snyder announces Flint Water Task Force to review state, federal and municipal actions, offer recommendations.

October 28: DEQ issues construction permit for additional corrosion control treatment.

December 9: Flint begins adding supplemental corrosion controls to the water.

December 29: Gov. Snyder takes action on initial findings from Flint Water Task Force.

2016

January 4: Genesee County Commission votes for emergency declaration.

January 5: Gov. Snyder declares emergency for Genesee County due to the ongoing health and safety issues caused by lead in the city of Flint's drinking water. This emergency declaration did not require any preceding emergency declaration by local authorities.

- *By declaring a state of emergency, The Governor has made available all state resources in cooperation with local response and recovery operations.*
- *The declaration authorizes the Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) to coordinate state efforts.*
- *In addition to the emergency declaration, the Governor activated the State Emergency Operations Center to coordinate state departments, the state's response, resources, and relief and recovery activities.*
- *The SEOC is the emergency operations center for the state of Michigan. Located in Lansing, the center is overseen by the MSP/EMHSD and coordinates response and recovery efforts by state agencies and local government. The SEOC is staffed by members of state agencies and other partners for decision making and information coordination during disasters or emergencies in the state of Michigan.*
- *On Jan. 6, the Joint Information Center was opened to lead the state's messaging and information response in coordination with the local Emergency Operations Center, Genesee County, and the City of Flint.*

January 8: Gov. Snyder and Flint Mayor Weaver meet to discuss how city and state can work on water issues.

January 9: MSP Emergency Management Division announces water resource sites established in Flint with bottled water, filters and testing kits

FEMA/National Guard/Resources

- Governor has requested support from FEMA
  - Coordinate interagency recovery plan
  - Identify federal agencies that have programs, authorities, and technical expertise to assist
  - At this point there is not a federal declaration. FEMA is not currently sending supplies to this incident.
- In addition to requesting support from FEMA, the Governor has activated the Michigan National Guard to help our local volunteers distribute supplies at the five water resource sites.
  - The resource sites are open seven days a week from 9 a.m. to 9 p.m. at Flint fire stations.

        - Fire Station #1 310 East 5th St. Flint, MI 48502
        - Fire Station #3 1525 Martin Luther King Ave. Flint, MI 48503
        - Fire Station #5 3402 Western Rd. Flint, MI 48506
        - Fire Station #6 716 West Pierson Rd. Flint, MI 48505
        - Fire Station #8 202 East Atherton Rd. Flint, MI 48507
    - There are water resource teams going door to door to ensure every resident has a water filter and additional water resources
    - Residents who need immediate help should call 211 or the governor's office at 517-335-7858
        - 211 is open 24/7/365
        - To assist the residents of Flint, Governor Snyder's office has committed ensure the constituent relations division will be open 7 days per week from 8 am until 5 pm until further notice.
- The Michigan State Police continue to lead the door to door mission of reaching every Flint resident. They are assisted by the Genesee County Sheriff's office, state of Michigan employees, and volunteers from organizations such as the American Red Cross.
- One of our top priorities is ensuring Flint residents know the resources that are available to them. We have used direct mail, automated calls, emails and bill boards to ensure residents know that information on water resources is available by calling 211 or visiting www.michigan.gov/FlintWater

Additional information

Corrosion Control

- On October 16, 2015 Flint returned to using water supplied by DWSD. The water supplied by DWSD is a finished product ready to use and already has phosphate added to it to assist with corrosion control.

- Recognizing that the level of phosphate in the water from DWSD was designed to be a maintenance dosage, the DEQ and the Flint worked together to bring online supplemental phosphate addition so as to speed up the rebuilding of the protective layer in the distribution system.

- The DEQ is now partnering with Flint, the U.S. EPA and other governmental entities to proactively identify bottlenecks so that the eventual switch from DWSD to the KWA can be done smoothly and with safety being the top priority.

- Even with similarities between DWSD and KWA water, precautionary measures are being taken.
    - These measures will include running the Flint Water Treatment Plant on a trial basis for a period of time without sending the water into the distribution system so that all of the treatment processes can be thoroughly evaluated.
    - In addition, bench top testing will be conducted to assist in determining how the Water Treatment Plant processes can be optimized.

- The KWA will be supplying raw water. This water will need to be treated by each of the respective water supplies.

- When KWA comes on line, Flint will be receiving raw water that is similar to the raw water that DWSD treats.
    - Flint will then need to operate the water treatment plant for an (as of yet) undetermined period of time.
    - Once Flint has demonstrated that it is capable of generating water with the desired background characteristics it will then be able to then send water to the distribution system.

- For non-Flint residents who want to test their water for lead – they can purchase a testing kit from DEQ for $18 – details follow:
    - Anyone in Michigan who wants to test their water for lead can call the State Drinking Water Lab at 517-335-8184.
    - The lead testing kit costs $18, which includes the sample bottle and instructions shipped to your home as well as the lab test. It does not include the cost of shipping your filled sample bottle back to the lab.
    - Depending on the lab workload, results are typically available within 1-2 weeks.
    - Your results will include information about the EPA's lead recommendations as well as contact information for your local health department, which can help you interpret your results further, if needed.

Subject: update on Flint

We are in receipt of a narrative summary of the status of the unpaid accounts for Flint water. I spoke with Jody Lundquist at length this afternoon to let her know that we would have Suzanne and Cary share the cashflow format with her and work to clarify what we are asking her to provide. I expect Cary and Suzanne will discuss this first thing on Thursday and will talk with Jody about that format and her timeline of when she could provide the information. I should note that Jody was being conservative about her timeline so as to not under-deliver and is being careful to be as accurate as possible because she knows this information will be used at a high level and does not want to make mistakes. I will follow-up with Cary and Suzanne after the morning session with the Department leadership which should be around noon.

Ryan...

Mr. Muchmore was referring to Treasurer Dillon's decision to approve the move to KWA, which was needed under statutory provisions regarding contracts of $60k or more.

ject: Flint water

issue of Flint water and its quality continues to be a challenging topic. The switch over to use Flint river water has rred most of the controversy and contention. The DEQ and DCH feel that some in Flint are taking the very sensitive e of children's exposure to lead and trying to turn it into a political football claiming the departments are lerestimating the impacts on the populations and particularly trying to shift responsibility to the state.

have put an incredible amount of time and effort into this issue because of the impacted neighbors and their dren, and the KWA/DWSD controversy and Dillon's involvement in the final decision. Kildee is asking for a call with . That's tricky because he's sure to use it publicly, but if you don't talk with him it will just fan the narrative that the e is ducking responsibility. I can't figure out why the state is responsible except that Dillon did make the ultimate ision so we're not able to avoid the subject.

real responsibility rests with the County, city and KWA, but since the issue here is the health of citizens and their dren we're taking a pro-active approach putting DHHS out there as an educator.

not sure how much background you need on all this so I don't want to flood you with stuff. Jarrod and Dave have a of info that we can supplement your understanding and we can put a briefing or face to face with Wyant and Lyon if want to go there.

Subject: RE: Timeline Follow-up

Hello Tom,

Randy and I have one more follow-up from our email yesterday:

"8. January 26, 2015 - CIP plan includes phosphoric acid to act as a corrosion control agent
- Does phosphoric acid act as a corrosion control agent? We know that the city is current using orthophosphate, but we will research what the usages are for phosphoric acid. "

It appears that phosphoric acid **CAN** indeed be used as a corrosion control agent.

Subject: Timeline Follow-up

Hello Tom,

Randy and I have just had a discussion about the Flint timeline, and we had some more feedback to add to the document that we distributed to you earlier.

1. November 29, 2011 Governor Snyder appoints Flints first Emergency Manager, Michael Brown.
- According to our database, the first Emergency Manager was Kurtz appointed in 2002

2. March 25, 2013: Flint City Council votes in favor of switching to KWA, but alters the quantity of water purchased
- Can find documentation that confirms that they voted in favor of KWA, cannot find documentation that determines whether or not they changed the proposal first

3. April 12th, 2013 – State of Michigan approves the decision for Flint to join KWA
- Decision was actually April 11th, 2013

4. June 2013 – Flint notifies the DEQ to use the Flint River as a primary, and to operate the Water Plant full time
- Was able to confirm this with signed documentation

5. February 12, 2014 – DWSD writes a letter offering to continue to provide service to Flint after April 2014
- Cannot find documentation to support this in our records

6. Mid-March 2014 – City of Flint decides to use the Flint River as a water source
- Cannot find any formal document to support this, unclear what this decision is, the decision to switch to the Flint River seems to have been made long in advance of this.

7. January 12, 2015– DWSD offers Flint a waiver on $4M reconnection fee

- Cannot find documentation to support this in our files

8. January 26, 2015 - CIP plan includes phosphoric acid to act as a corrosion control agent

- Does phosphoric acid act as a corrosion control agent? We know that the city is current using orthophosphate, but we will research what the usages are for phosphoric acid.

9. March 23rd, 2015 – Flint City Council votes to return to DWSD Water

- We don't have this City Council decision on file

Please let us know if you have any questions or concerns with this feedback.

MEMORANDUM

SUBJECT: Eligibility of Replacement of Lead Service Lines on Private Property Under the DWSRF.

FROM: Joanne Hogan
Attorney- Advisor
Civil Rights and Financial Law Office
Office of General Counsel

THROUGH: Wendel Askew
Assistant General Counsel
Civil Rights and Financial Law Office
Office of General Counsel

Ken Redden
Deputy Associate General Counsel
Civil Rights and Financial Law Office
Office of General Counsel

TO: Peter Shanaghan
Team Leader
Drinking Water State Revolving Fund Team
Office of Ground Water and Drinking Water, Office of Water

Question Presented.

You have asked whether financial assistance from a State's Drinking Water State Revolving Loan Fund can be used by eligible entities to fund projects that involve replacing lead service lines that may be on private property and that connect to private dwellings.

Brief Answer

We believe that lead service line projects, regardless of the ownership of the property on which the pipe is placed, may be funded by a State's DWSRF so long as the loans are made to an eligible entity and all other requirements of the DWSRF are met.

Analysis

The statute and the regulatory provisions governing the use of State DWSRF funds, though defining which entities may receive funds, do not require the Public Water System to have control over all portions of a project that is funded by the DWSRF. Congress gave EPA's Administrator the clear authority to determine which projects would be eligible under §1452: "Financial assistance. . . may be used. . . only for expenditures of a type or category which the Administrator has determined, through guidance, will facilitate compliance with national primary drinking water regulations." PHSA §1452 (a)(2). The only broad statutory limitations on the types of projects that cannot be funded are projects which include monitoring, operation, or maintenance expenditures, or projects for the acquisition of real property unless the purchase is made from a willing seller and the acquisition is integral to the project.

40 CFR §35.3520 (b)(2) sets forth the categories of projects that can be funded by a DWSRF. This provision includes the transmission and distribution of water to be a category of eligible projects. Specifically, the regulation provides examples of such projects to include: "installation or replacement of transmission and distribution pipes to improve water pressure to safe levels or to prevent contamination caused by leaks or breaks in the pipes." See 40 CFR §35.3520 (2)(ii).

Lead pipes can contaminate water at any point, including on its way to a private home. Allowing a public water system to use its funds to replace such pipes is consistent with this allowable category of projects, and is similarly consistent with the overall health protections of the Safe Drinking Water Act. See PHSA 1452 (a)(1)(A). Note that if a Public Water System wishes to purchase and retain an easement so that it maintains control of such infrastructure, that purchase is authorized as well: "Funds shall not be used for real property or interests therein unless the acquisition is integral to the project authorized... and the purchase is from a willing seller. . ." PHSA 1452(a)(2).

This determination that replacement of lead pipes on privately owned property is an eligible project cost so long as it otherwise complies with the PHSA is consistent with prior approved eligible projects, such as water efficiency projects, that do not require all elements of a project to be under the control of a Public Water System. In a Memorandum dated July 25, 2003, then Assistant Administrator for Water G. Tracy Mehan III informed Water Division Directors in the regions that projects such as the installation or retrofit of plumbing fixtures and appliances, installation of water meters, and implementation of incentive programs to conserve water, such as rebates or conservation rate structures were all eligible projects under the DWSRF. Therefore, so long as the assistance is given to an eligible entity, and the project otherwise meets the requirements of the DWSRF, the project may be funded regardless of ownership or control of the resulting infrastructure.

Subject: Question on Veolia study on Flint water from March 2015

Terry,

I wanted to see if you could provide me some more context on what looks like a third-party study on Flint water that was conducted for EM Jerry Ambrose by Veolia in March 2015. I found this as part of the emails the Governor released yesterday.

The study starts on pg. 151 (I would attach the PDF but it is too large to send, I trust you have access to these emails).

I just wanted to see if you could provide the backstory on this -- who initiated the study, what was the goal and were any of the recommendations implemented in Flint? Let me know more when you get a chance today. Thanks!

Jacob...

It is my understanding the City of Flint retained Veolia for the study and received the final report. I believe it was done as a result of the TTHM issue in Flint water. You should contact the city.

Good evening, Ms. Henderson.

I sent you an email this afternoon regarding the media coverage on the City's intent to begin issuing shut off notices effectively immediately. At this point in time, I have not given such an instruction to Treasury staff nor provided them with a rate schedule to restore water and sewer rates to their pre-injunction amounts. However, there are a number of matters for which I must make you aware.

Water Rates

On August 17, 2015, Honorable Judge Archie Hayman issued a preliminary injunction order requiring the City to reduce its water and sewer rates. Billing was postponed for a number of weeks while the City awaited an opinion from the Court of Appeals. Having not received a stay, the City moved forward with implementing the reduced rate structure and regular monthly billing resumed on September 1, 2015.

On Monday, January 11, 2016, the Judge signed an amended preliminary injunction order restoring the City's water and sewer rates to those set by the master fee schedule as adopted by emergency manager order. City Council and RTAB approved a first quarter budget amendment recognizing the reduced revenue resulting from the rates currently in effect as ordered by the original preliminary injunction order. The court-ordered rates result in rates being insufficient to meet the operations, maintenance, and bond obligations necessary to fulfill

the requirements as set forth in the Revenue Bond Act, however the budget amendment authorized the use of unrestricted fund balance to offset the gap between rates and revenue requirements.

If the City were not to restore rates pursuant to the master fee schedule, the budget has already been updated accordingly. However, I request that the legal department provide an opinion as to the City's obligation to restore the EM adopted rates as failure to do so may be a violation of PA436. Not doing so, would require further action to set a new master fee schedule.

I would also note that with the current financial position of the City, this method of subsidizing insufficient rates cannot be maintained past the end of this fiscal year.

Shut off Notices

The preliminary injunction order prohibited the City from performing shut off notices on delinquent balances prior to the implementation of the reduced rates. Upon receiving the verbal order on August 7, 2015 the City immediately ceased disconnection of service for non payment. When the reduced rates became delinquent in October, the City worked through some administrative hurdles to "set aside" the balances outstanding prior to September 1 when regular billing resumed. In November the City held a press conference announcing that shut off notices were going to resume. (At the time, lead was not as widely present in the media coverage.) The last cycle to be sent shut off notices were mailed on or around 12/9 with a due date of 12/29/2015. Processing of additional notices was then postponed in consideration of the holidays.

No disconnection for nonpayment of an active account has occurred since August.

The City has seen a dramatic decline in its collection rate since August. As with any utility, the City performs shut offs to enforce timely payment. The Finance and Treasury Departments have been reviewing the financial impact of the reduced billed revenue and decrease in collections on a regular basis. In August the City's collection rate was 99%. With the issuance of shut off notices, the City received in payments each month approximately the same amount that it billed although payments were often trailing. For instance, many customers were constantly in a state of delinquency, but they were at least coming in each month and making a payment.

Without the issuance of shut off notices, the City's collection rate fell to 70% in October before increasing (through issuance of shut off notices) to 89% in December. Average collection rate for the period August to December has now fallen to 84%.

As I noted in my previous email, there is an incredible amount of media attention and public outcry regarding the City's policy on shutting off service for nonpayment of "poisonous" water. This does NOT absolve the City from state law or its responsibility to maintain a functional water and sewer system. Rates and enforcement of payment are necessary in order to ensure we have the resources to maintain the system unless financial support is going to be provided from an external entity.

While we may have some time as we request financial assistance from the State and Federal government and review both our policy and legal positions, we must be considerate of our obligations to the system and long term financial stability of the City. Per our conversation, Treasury has been instructed not to take any action at this time and will wait until further notice to update the rate schedule and issue shut off notices.

Thank you for your time and consideration of these matters. Please let me know if you have any questions or would like any additional information.

Best regards,

Flint
Weekly Phone Call
01/20/16

Present:
N. Henderson (Flint)
Council President Nelson (Flint)
F. Headen (Treasury)
W. Lamphier (Treasury)
P. Dostine (Treasury)
E. Cline (Treasury)
A. Heimann (Treasury)
R. Byrne (Treasury)

Not Present:
Mayor Weaver (Flint)

1. Water Update:

Water, Lead Test Kits, and Filter Distribution Update:

- ~~Councilor~~ Council President Nelson has been uplifted by the significant donations of water, filters, and volunteers to help distribute water
- The City has a partnership with the MTA to distribute water to people who are homebound, or who lack transportation to retrieve water on their own.
- The City has been strained financially and operationally in its response to the emergency. ~~by this process.~~ Henderson also said, "It's becoming a really big strain for staff." ~~N.~~ Henderson ~~suggests~~ said that the city ~~has had to utilize~~is using ~~significant~~ ~~Public Safety and Sanitation~~ resources that: ~~have either~~
    - Accrue ~~additional~~unbudgeted financial costs to the city, ~~as is the case with their~~like its sanitation contractor being dispatched to fire stations to clean-up from distribution efforts , or
    - ~~Remove~~ Borrow ~~city~~ limited resources that are needed in other areas. ~~N.~~ Henderson told an anecdote about how the city ~~y~~ wanted to place a police officer by all of the fire stations to help manage traffic (~~which is~~ where water distribution is happening) and that they could not justify removing officers from their duties in the neighborhoods where crime is a problem. ~~to help manage traffic~~.
- ~~N.~~ Henderson ~~expressed interest in getting~~ said Flint needs to be reimbursed for the additional expenses that the city is accruing. Asked the Treasury participants on the call to help if there is "anything that we can do about that". Said that she has been keeping a record of how much this has cost the city, and will be sending that document to E. Cline from Treasury.
- Deloitte has offered to help the city with crisis management. They are sending in (3) consultants, and one of them has worked with cities to manage the aftermath of hurricane Katrina.

Water Billing/Water Fund

- ~~N.~~ Henderson stated that the City was attempting to combat false information about water bills.
- The city says that "the judge's ruling" allows them to send out water shut off notices, but they currently are not doing so.
- People are still not paying their water bills, the city suggests that part of the reason is that there is so much confusion about the bills, especially around whether or not the state is going to pay for the past-due bills from when the water was tainted with lead, which the city suggests is the common conception. The city expressed concern that they did not find money to pay ~~off~~ delinquent water bills in the Governor's Supplemental Budget.
- The water usage rate has not decreased since the news broke about the lead.

Water Operations

- The city is working to formalize a plan to connect the city to its neighboring communities to back up each other's water supply. This plan would cost $6.4 Million, but ~~N.~~ Henderson feels confident that the city would only be responsible for paying a portion of the costs. This plan would serve two purposes:
    - It would prevent the city from having to spend an estimated $3.1M to build a temporary above ground water line for testing the connection to the KWA
    - It would allow the city to use its neighbors for a water supply backup and not have to rely on the Flint River as a back-up source
- Efforts to control the corrosion from city water are going well. ~~N.~~ Henderson ~~suggests~~ said that they have been doing field testing of water, and that lead levels are decreasing.

Drinking Water Emergency Loan Fund

- The city intends to apply for this fund, and hopes that a portion of this loan money is forgivable.
- The city's proposal would likely be $25M annually (the maximum is $15M according to the city) for (5) years, at a total of $125M
- Would be working on public and private infrastructure by prioritizing areas in the highest need of infrastructure improvement. The city knows, for example, where water sits in the system. Areas like those would be targeted for these monies.
- The city is aware that their initial estimates of over a b~~B~~illion d~~D~~ollars to replace all lead infrastructure is an unrealistic request
- The city has already conducted a Reliability and Sanitary Sewer study, which they say is a requirement of the application
- Their data suggests that the city has about 600 Miles of water infrastructure, but their engineering consultant suggests that this number might be 100 Miles low

2. Other issues

Police and Fire Department updates

- There is not much to report in crimes, the city is about at where it would expect to be at this point in the year
- Fire stations are being utilized as water and filter distribution centers

Shears v Flint

- The $15M transfer from the Sewer Fund has been resolved. The City Council voted to approve that transfer, and now it is awaiting RTAB approval.

Steckelberg, Larry (TREASURY)

Subject: Re: DRAFT 18 Month Cash Flow Attached
Attachments: City of Flint 18 Mo. Water Cash Flow 1-21-2016 jnl v2.pdf; City of Flint 18 Mo. Water Cash Flow 1-21-2016 jnl v2.xlsx

Good evening, Cary.

Please find responses to each of your inquiries below:

1. As noted in the assumptions narrative, the activity shown summarized total recorded debits and credits to the GL and NOT actual cash receipts and disbursements. I have removed this completely so as not to give any other user a false impression of cash receipts and disbursements being greater than they were. In response to your question, during the months of September and October the City recorded a number of entries as it implemented various components required by the Preliminary Injunction Order. Among these requirements was to separate water and sewer cash accounts from pooled cash. The debit and credit activity reflected journal entries among which the establishment of these accounts were recorded. In the process of doing so, my staff posted, reversed then corrected such an entry.

2. For the "As budgeted" tab, you are correct. Annualized receipts and disbursements differ from total budget. If you unhide columns B-D on either tab, you will find the underlying Budget, YTD Activity and Available Balances for the Fund through 12/31/2015. For revenues, $28.3 million was budgeted. As a result of the Preliminary Injunction Order, the City had to "set aside" over $10.2 million in billed water and sewer revenue. When the Utility Billing Department posted these changes to the customer accounts, it reversed current year billed revenue recorded to our GL. This was taken into account for the RTAB reports submitted to the State yesterday. It appears that the AJE has not been posted yet. I have adjusted YTD activity shown on this report accordingly. Even as such, with 50% of the year complete the City is slightly below its revenue projection. Projected revenue was reduced with the first quarter budget amendment based upon estimates and early assumption immediately following issuance of the Preliminary Injunction Order. The lower projected revenue is included in the amended budget amounts. As we continue to analyze the ongoing impact of the order on billed revenue and collections, further adjustment may be reflected in future quarterly amendments.

Similar to revenue, as of 12/31/2015 only 33% of total expenditures had been recorded. This would leave approximately two-thirds of the total budget to be expended during the remaining 6 months of the fiscal year. Annualizing the monthly amounts shown does not make sense in this case. As discussed, there are items within the budget that may not be equally divided over a 12-month or even 6-month period. Capital expenditure and debt service payments for instance, may be paid in lump sums. Total budgeted depreciation for the water fund is $1.5 million. I have removed depreciation from Water Plant Operations line for now so that net cash flow will reflect this item as removed.

3. Debt service payments are reflected by the line item "Transfers out to fund 493".

Again, this is a rough draft for your review and remains a document in progress. As I begin to populate actual cash receipt and disbursement activity for July 1-December 31, 2015, the line item descriptions shown may be

subject to change. If anything, they will be more detailed as opposed to less and I will do my best to mirror the audit. I will touch base with you again tomorrow to discuss this further.

Please let me know if you have any additional questions, comments or concerns regarding the revised report and information provided.

Thanks,

Jody N. Lundquist

On Thu, Jan 21, 2016 at 5:38 PM, Vaughn, Cary J. (Treasury) <VaughnC2@michigan.gov> wrote:

Jody,

Thank you for getting me this information so quickly. I appreciate your understanding related to the necessity of getting it under such a short timeline. This is very helpful. I have a few questions for you though.

1. It looks like September and October of 2015 had unusually high receipts and disbursements. Please explain those higher numbers.

2. I annualized the average receipts and disbursements projections for January 2016 through June 2016 and it calculates to be yearly receipts of $40 million and disbursements of $63.36 million (does not include noted transfers out). Your 2015 audit shows annual revenues to be $33.8 million and expenses to be $20.6 million (which includes depreciation that would not be included on the cash flow). What is the reason for the higher projections going forward *in broad terms?*

3. Where are the debt service payments reflected?

As discussed, please go forward with filling in the detail for the actual numbers for July through December 2015 as well as the projections of July through December 2016. You also mentioned that you would tweak the numbers by estimating more closely the monthly flow instead of evenly spreading the estimates. That would be good.

Thanks for your help! It's nice to work with you again. If I or anyone here at Treasury can be of assistance including coming to Flint for whatever reason, let me know.

Subject: DRAFT 18 Month Cash Flow Attached

Cary,

Please find attached a draft 18-month cash flow with the preliminary formatting and content assumptions that we discussed this morning.

I'd like to highlight the following two matters:

1. The "As Budgeted" projection is overly optimistic as it includes the 5% increase as originally projected in the EM Adopted FY16 and FY17 Budget. Further, it continues to (falsely) assume a near 98% collection rate. Both tabs include the same assumptions for the remaining FY16 expenditures.

2. Although the emergency was declared over a water crisis, the impact of the preliminary injunction order affected rates and collections for both the Water AND Sewer funds and the further decline in collections as a result of public perception over water impacts sewer equally as the City issues combined utility bills.

If the State is to provide support for the Water Fund, I would implore them to consider the devastating impact this is having on the Sewer Fund as well. Indeed, the large majority of capital improvement projects eliminated with the City's 1st quarter budget amendment were from sewer. If financial support as a result of the combined billing process of the City is not an option for the State, then we will absolutely need the State and elected officials support for billing sewer separately and forcefully pursuing non payment, otherwise both funds will go under.

Please let me know if you have any questions regarding the information as shown. I am stepping into a meeting but should be available around 4:45 to discuss.

As always, it is a pleasure working with you.

Best regards,

Jody N. Lundquist

Subject: Fwd: Summary of Water Crisis Financial Needs

Good morning, Mr. Steckelberg.

On behalf of City Administrator Henderson, I am forwarding the draft summary of financial needs provided to the Governor on January 15, 2015. As we discussed on our call yesterday, an estimate of collections resulting from the 35% 9/16/2011 rate increase is included. The City received in total payments for the period October 2011 through July 2012 approximately $46 million for all Water and Sewer rates and charges. Of that approximately 35% or $16,1 million would have been a direct result of the rate increase (35% x $46,000,000).

This summary of financial impact is in the process of being updated further as two more class action lawsuits have now been filed against the City as a result of lead allegations. We are also experiencing a tremendous threat to our IT security causing a number of increased costs in order to mitigate ongoing attacks by Anonymous and other such organizations.

Please let me know if you have any questions regarding the information included in this summary.

This is Jody on Natasha's computer.

Please find attached the updated draft of the financial needs summary.

I have not had a chance to include the capital improvement projects that were suspended across the City's other funds as a result of the spending freeze following the judge's preliminary injunction order (i.e. facilities improvements, IT upgrades, and vehicle/equipment purchases).

Thanks,

CITY OF FLINT
SUMMARY OF WATER CRISIS FINANCIAL NEEDS

Shears v. City of Flint Litigation

Description	Amount
Loss in monthly billed revenue The Preliminary Injunction Order issued by Honorable Judge Archie Hayman on August 17, 2015 required the City to reduce water and sewer rates to exclude the September 16, 2011 rate increases This resulted in a loss of monthly billed revenue of approximately $616,000 per month for approximately 5 months	$ 3,080,000
Loss in monthly revenue collections As a result of the City's inability to enforce payment through shut offs, which was later accelerated by the declaration of the water emergency, the City's collection rate has fallen from 98% in August to 75% in November before improving slightly in December. The average collection rate for the period August to December is now 84%. The City issued its first round of shut off notices in November but has not resumed processing as of January 14, 2015 No disconnection of service for nonpayment on active accounts has occurred since August 2015. Based on the reduced average monthly billed revenue of $4 6 million and the increased delinquency rate, the City's allowance for uncollectible accounts must be increased. The collection rate is expected to remain low until shut off notice processing is resumed and processed consistently. ($4.6 million x 15% x 7 months)	$ 4,830,000
Loss due to uncollectible delinquent accounts at August 17, 2015 The original preliminary injunction order enjoined the City from disconnecting any accounts for non payment for which the delinquency arose between September 16, 2011. This effectively forced the City to set aside approximately $10.9 million in outstanding customer balances as uncollectible	$ 10,890,947
Rate increase for the period September 16, 2011 through June 30, 2012 Judge Hayman has stated in open court that the rate increase from September 16, 2011 to June 30, 2012 was illegal. While a ruling regarding this matter is anticipated, the increase to rates and charges during that time period resulted in approximately $15 million of billed revenue. Should the judge order the City to repay these billings or provide credits to customer accounts in that amount, the City's current revenue will need to offset this enormous cost. Collections for the period October 2011-July 2012 for which the September 16, 2011 rate increase would have been billed in received total $46 million Refunding the amount of collections during that period resulting from the rate increase will cost the City over $16 million.	$ 16,100,000
Capital Improvement Projects removed from Fiscal Year 2016 Budget As a result of the immediate and drastic impact of the preliminary injunction order, the City issued a spending freeze for all non-critical items In order to offset the reduction in billed revenue and collections, the City reviewed its capital improvement plan and cancelled or postponed nearly all projects with the exception of those necessary to prepare for the Karegnondi Water Authority (KWA). The removal of $3.9 million and $1 7 million in planned capital improvement projects for the Sewer and Water funds, respectively, were included in the adopted FY16 First Quarter Budget Amendments	$ 5,600,000
Legal costs associated with litigation The State has agreed to reimburse the City 75% of legal costs associated with this litigation not to exceed a total reimbursement of $300,000 Total legal expense of representation by external legal counsel is anticipated to reach $600,000 leaving a gap of $300,000 borne entirely by the City. (25% of the first $400,000 = $100,000 plus an additional $200,000 through final ruling)	$ 300,000
TOTAL FINANCIAL IMPACT OF SHEARS V. CITY OF FLINT LITIGATION	**$ 40,800,947**

CITY OF FLINT
SUMMARY OF WATER CRISIS FINANCIAL NEEDS

Declaration of State of Water Emergency

Description	Amount
Additional Corrosion Control Procedures Implementation of the additional corrosion control procedures totaled approximately $45,000 and is being maintained at an estimated cost of $100/day ($45,000 + $100/day x 365 days/year x 5 years)	$ 227,500
Purchase of DWSD Water The City expended $2 million towards the $10 million escrow required by the Detroit Water and Sewage Department (DWSD) to resume purchasing water through June 30, 2016 It is expected that the City will need to continue purchasing water from Great Lakes Water Authority (formerly DWSD) for an additional three months until the City is ready to begin receiving water through KWA.	$ 6,000,000
Backflow system necessary for testing and future back flow supply As a result of switching the City's water supply to DWSD, the pipe that would have been used to transport raw water from Lake Huron to the City's water plant is in use The City must develop an alternate path from which to receive water during the period for which raw water must be tested prior to full conversion to KWA as the City's water supplier.	$ 6,342,326
PSI contractor for locating and mapping lead lines Historical data maintained by the City is incomplete and inaccurate. A third party contractor has been engaged to assist in locating lead lines and testing water samples obtained from those sites Additional services may include integrating the results of their efforts with the City's GIS maps	$ 75,000
University of Michigan for data compilation The University of Michigan has agreed to assist the City in its efforts to compile historical data on the location of lead lines and any additional data obtained through the course of this emergency.	$ 3,600
Excavation of residential service lines The excavation of 6 residential services lines is necessary for additional testing ($5,000/line x 6 lines)	$ 30,000
Replacement of service lines Replacement cost included in other estimates provided to the State of Michigan detailed each residential line to cost $1,500 to replace. ($1,500/line x 15,000 lines)	$ 22,500,000
8" residential water mains and 24" transmission mains It is estimated that there are approximately 600 miles of 8" residential lines and 60 miles of 24" transmission mains needing replacement. Preliminary estimates place replacement of residential lines at $145 per foot and $800 per foot for transmission mains. ($145/foot x 600 miles x 5,280 feet/mile plus $800/foot x 60 miles x 5,280 feet/mile)	$ 712,800,000
Loss of monthly County backup revenue ($40,000/month x 9 months) As a result of the media coverage and declaration of a health emergency, Genesee County has decided to discontinue its contractual payment to the City per its backup agreement. The City has not received payment since September 2015 Assuming another agreement for backup supply is negotiated with Genesee County, $360,000 in revenue adopted in the City's FY16 budget will be lost or remain uncollectible without litigation	$ 360,000
Fire Department overtime The Fire Department is now operating an additional fire station as a distribution center 7 days per week. With the necessity to designate staff to the EOC and overseeing distribution at each of the other sites, overtime costs are being incurred daily ($2,000/day x 180 days)	$ 360,000
PTO's for counter ($3,000/month x 6 months) In order to carryout staffing of the EOC and distribution counter at City Hall, civilian staff within the police department has been assigned to fulfilling this specific function. Additional wages are estimated at $3,000 per month. ($3,000/month x 6 months)	$ 18,000
TOTAL FINANCIAL IMPACT OF DECLARATION OF WATER EMERGENCY	**$ 748,716,426**

TOTAL POLICE DEPARTMENT EXPENSES INCURRED RELATED TO WATER EMERGENCY ASSISTANCE FOR PERIOD 1/10/16-1/20/16

$2,693.60

January 22, 2016

Governor Rick Snyder
Office of Governor
P.O. Box 30013
Lansing, Michigan 48909

Dear Governor Snyder:

The Flint Water Advisory Task Force (FWATF) appreciates your recent efforts to secure federal and mobilize state emergency response resources to address the immediate water supply issues in Flint.

This letter is to encourage a similarly robust response to the challenges of re-establishing a reliable, trusted potable water distribution system in Flint. This is required as soon as possible to replace the unsustainable and expensive bottled water and filter distribution program that has been necessitated, but which clearly must serve as an interim, emergency response.

Consistent with the priorities identified in the Safe Drinking Water Emergency Order issued by the EPA on January 21, 2016, we recommend the following actions to address scientifically grounded concerns that the water system in Flint remains unsafe because of lead contamination and Legionella. Public trust in the safety of the water supply may only begin to be re-established through the state's forthright engagement of the scientific experts who overcame state and federal agency intransigence to expose the lead poisoning.

Our recommendations are:

- Engage US EPA staff experts versed in Lead and Copper Rule (LCR) requirements – specifically Miguel del Toral, Darren Lytle and Michael Shock. These individuals should be empowered to guide implementation of a comprehensive LCR sampling program in Flint that will monitor lead levels now and throughout the conversion to raw water supply by the Karegnondi Water Authority (KWA) and full-time use of the Flint Water Treatment Plant.
- Establish an inter-disciplinary work group comprising subject matter experts drawn from respected public utility associations and institutions of higher learning in Michigan and elsewhere (including Marc Edwards of Virginia Tech), to oversee the conversion to KWA-supplied raw water.
- Commission and/or contract with an unbiased third-party organization or consortium (hereafter: Flint water safety scientific assessment team [FWSSAT]) that will be responsible for assessing the quality and safety of drinking water in residences, schools and child care settings in Flint, and hospitals and other healthcare facilities served by the

Flint water system. The explicit focus of FWSSAT activities will be lead and Legionella; however, the FWSSAT may include other considerations in its work.

The FWSSAT will be invested with the responsibility of declaring when the public water supply in Flint is safe for routine consumption. The FWSSAT will employ the most rigorous scientific standards, using a sampling strategy that is designed to optimize detection of water contamination in home, school, and child-care settings, and healthcare environments. All schools and healthcare facilities must be included in the sampling approach. Rigorous sampling of residences and child-care settings (whether centers or in-home) will also be implemented, using any and all available information about lead water service lines. In addition, if a homeowner or renter whose dwelling has not been included in sampling wishes to have the dwelling included, they will also be sampled. The sampling efforts and reporting process of the FWSSAT will be fully transparent to the public; results of testing should be published on local, state, and federal (EPA) websites.

- To assure the re-building of community trust and assure sufficient expertise for future water quality and safety, the FWSSAT should partner with local (Flint Water Treatment) and state (MDEQ) personnel in its activities. The FWSSAT should have an inter-disciplinary advisory committee that includes local community leaders, local and state officials, national scientific authorities regarding water quality and safety and public health, and the leader of the interagency state effort regarding the Flint water crisis. When the FWSSAT advisory committee is satisfied that the FWSSAT scientific procedures have thoroughly assessed water quality and safety in Flint residences, schools and child care settings, and healthcare facilities and found the water to be sufficiently free of contamination, then the committee will advise the public of the findings. The FWSSAT will then organize the transfer of responsibility to local and state authorities to sustain the sampling and reporting methods thereafter, including the conversion to KWA raw water in the future.

We also believe that a forthright response to the Legionella outbreak must similarly engage trusted, scientific experts drawn from independent institutions. Accordingly, we recommend:

- The Michigan Department of Health and Human Services (MHHS) should make a formal request to the federal Centers for Disease Control and Prevention (CDC) for assistance in assessing the outbreak of Legionnaire's disease in Flint, if they have not already done so. MHHS, working with CDC, should develop a strategy for improving prevention, rapid detection, and timely treatment of cases of Legionellosis in Michigan in 2016 and beyond. While the MDHHS evaluation of the dozens of cases of Legionellosis in 2014 and 2015 has strongly suggested a link to the shift to drinking water from the Flint River in 2014, further and more intensive evaluation of clinical isolates (i.e., samples from infected patients) is necessary to understand the route(s) of transmission from contaminated water to humans. The unique set of outbreak circumstances in the setting of a change in water source strongly indicates that support from federal public

health authorities would be a welcome way to amplify the public's collective understanding of risk of contracting Legionella in residences served by the Flint water system, and in Flint healthcare facilities.

- The state should specifically request federal support from the CDC – and, as appropriate, additional federal experts and agencies – to advise and assess Flint healthcare facilities and Flint-based healthcare providers regarding: (a) appropriate application and timely re-application of biocides to air treatment systems and cooling towers in all healthcare facilities in Flint, in order to prevent colonization with Legionella; and (b) proper assessment and timely diagnosis of Legionella among patients in Flint who present with characteristic signs and symptoms and have a history of potential exposure to contaminated water. Of note, the risk of resurgent Legionellosis in Spring 2016 is on the horizon; the first cases of Legionellosis in the 2014 and 2015 outbreaks were diagnosed in June and May, respectively, and Legionella is known to be much more common in the spring, summer, and fall than in the winter months. Time is of the essence.

- MDHHS should work with its federal partners to assure that investigative efforts related to Legionella regarding quality and safety of water are conducted in coordination with the FWSSAT described above. Furthermore, MDHHS should regularly communicate its findings to the Flint community regarding its efforts to prevent, detect, and treat cases of Legionella until case levels return to pre-2014 levels.

We expect that these measures will provide members of the Flint community with assurance that the quality of their tap water is being appropriately monitored and that forthcoming announcements that Flint's tap water is safe to drink are well-founded. Notwithstanding earnest state agency actions, we believe that the engagement of independent subject matter experts, whether to assess drinking water quality or public health concerns, is critical to overcome, over time, the understandable skepticisms that prevail in the Flint community.

We hope that you will receive these recommendations in the same spirit with which they are offered – to advance the recovery and reinvigoration of the Flint community.

Respectfully,

Matthew Davis, M.D.
Chris Kolb
Lawrence Reynolds, M.D.
Eric Rothstein, CPA
Ken Sikkema

Weekly Conference Call Notes – Jan. 25, 2016

Allen Park –Jan. 25 –Mayor Matakas, M. Kibby, B. Cady, P. Dostine, A. Heimann, D. Hudson

- **Priorities**
  - Order 55-A. CBRE marketing the 11 acres where old city hall is located. Allen Park wants permission to allow CBRE to market the property rather than issuing a RFP as required by Order 55-A. Question: would using CBRE satisfy or be non-compliant with Order 55-A? Treasury-LGFSD to take the city's request to management for a decision.

  - Order 29. This order mandates that city comply with the 80/20 cost-sharing model as provided for pursuant to Public Act 152 of 2011. Cady said by offering the city the option of a hard-cap, it would save families $2,500 per year or singles $1,200 per year. A real money saver for Allen Park employees and, Cady adds, would help the city recruit employees, especially police.

  - The Mayor expressed concern over the delay in the RTAB Evaluation. Treasury explained that there have been some extenuating circumstances and staff unavailability and assured the Mayor that a delayed evaluation report would not negatively affect the outcome.

  - Treasury discussed the possible cancellation of the Feb. 3 RTAB. The city was ok with the cancellation. There was agreement that there were no pressing agenda items that needed consideration in Feb. They just requested that they be informed of the Chair's decision by early next week.

- **Claims and Accounts (Dec. v Jan. numbers)**
  - The city explained that Dec was near normal ($1.8M from Nov. activity) and Jan. was low ($346K) because December was a short month due to the holidays and time off from many department heads, including Cady. Invoices simply weren't processed.

- **Two, F 250 Trucks. Not enough money in the Capital Outlay Fund ($47,968) to cover $65,805 cost.**
  - Cady reminded Treasury that that was one of eight budget amendments the city recently submitted for RTAB approval (in Jan.) and now is awaiting State Treasurer approval. City was told the paperwork was submitted early last week (wk of Jan. 11).

Benton Harbor –Jan. 21 – D. Watson, D. Hudson, E. Cline

- **Public Notice – Personnel & Finance Committee Meeting 1/27/16**
  - Settlement of Public Safety – discussing end of negotiations of FOP

- City Manager Contract Renewal – Mayor appears to be on board with renewing contract for 2 years. Darwin believes all but possibly 2 commissioners will support his renewal.

- **Commissioner Replacement**
  - Special meeting being held on 1/25/16 for interviews
  - Planning to announce replacement on 2/1/16
  - 5 candidates being considered

- **Personnel Issues**
  - Met with Joyce Parker on 1/20/16. Cemetery audit on schedule for 2/1/16. Infrastructure valuafion report requesting additional time to submit. Thinking the information will be available by 4/1/16.

- **Community & Economic Director**
  - Interviewed a candidate on 1/20/16. Darwin feels he is a great candidate. He wants to offer him the position but is concerned regarding the salary expectations. The position salary range is $60k - $70k. He is thinking of offering $68k with room for re-evaluation once he is on the job (would like to observe his interaction with staff/community).

- **Lawsuits**
  - Lange – A closed session was scheduled but postponed. Looking to resolve this case in March 2016.
  - Unruh and O'Brien are slated to be complete November 2016 – strongly suggesting mediation for these cases.
  - The insurance company wants Benton Harbor to contribute $300k to the settlement of the lawsuits. A representative from the insurance company is scheduled to attend a commission meeting to discuss the city's contribution.

- **Meeting schedule**
  - Our meetings will continue to occur bi-weekly beginning 1/28.

Ecorse – Dec. 22 – W. O'Neal, R. Byrne, D. Van de Grift, P. Dostine, A. Heimann, R. Widigan

- **Priorities:**
  - Council will receive and file the audit tonight – shows a decrease in fund balance, had to "book liabilities for lawsuits and pensions"
    - Ended with an overall debt of $34K
  - Council will be approving a $1.9M payment on the E-Loan
    - City would like a DEP schedule
  - 47% cash fund balance – the restriction on the U.S. Steel payment has ended.
    - However, this will drop after the $1.9M payment for debt service
  - 5-year budget is being reviewed by treasury

        - Wayne said to fund police and fire it is coming from PA 33 assessment
        - Wayne said if the arc payment goes up, the city has a judgment levy (Order) against it, the city can then levy it.
            - Drew said that the city attorney needs to review the Order before the next RTAB meeting.
            - Wayne said he will read it and talk to the attorney about it
    - City will do training every two months with employees – will have an employee book everyone will sign.
    - Wayne will be meeting with city council on an individual basis to discuss where he would like to head in regards to city attorney and DPW.
        - Wayne thinks he can bring a full time attorney on board for current cost or less.

- **SEV. Assessments:**
    - Decrease of 10% on residential tax base
        - Roughly $250K

- **Miscellaneous:** Wayne stated the City is headed in the right direction, needs to do various capital improvement projects, etc…

Flint – Jan. 20 –Council President Nelson, N. Henderson, P. Dostine, E. Cline, A. Heimann, W Lamphier, F. Headen

1. Water Update:

Water, Lead Test Kits, and Filter Distribution Update:

- Council President Nelson has been uplifted by the significant donations of water, filters, and volunteers to help distribute water
- The City has a partnership with the MTA to distribute water to people who are homebound, or who lack transportation to retrieve water on their own.
- The City has been strained financially and operationally in its response to the emergency. Henderson also said, "It's becoming a really big strain for staff." Henderson said that the city is using resources that:
    - Accrue unbudgeted financial costs to the city, like its sanitation contractor being dispatched to fire stations to clean-up from distribution efforts ; or
    - Borrow limited resources that are needed in other areas. N. Henderson told an anecdote about how the city wanted to place a police officer by all of the fire stations to help manage traffic (where water distribution is happening) and that they could not justify removing officers from their duties in the neighborhoods where crime is a problem. .

- N. Henderson said Flint needs to be reimbursed for the additional expenses that the city is accruing. Asked the Treasury participants on the call to help if there is "anything that we can do about that". Said that she has been keeping a record of how much this has cost the city, and will be sending that document to E. Cline from Treasury.
- Deloitte has offered to help the city with crisis management. They are sending in (3) consultants, and one of them has worked with cities to manage the aftermath of hurricane Katrina.

Water Billing/Water Fund

- N. Henderson stated that the City was attempting to combat false information about water bills.
- The city says that "the judge's ruling" allows them to send out water shut off notices, but they currently are not doing so.
- People are still not paying their water bills, the city suggests that part of the reason is that there is so much confusion about the bills, especially around whether or not the state is going to pay for the past-due bills from when the water was tainted with lead, which the city suggests is the common conception. The city expressed concern that they did not find money to pay delinquent water bills in the Governor's Supplemental Budget.
- The water usage rate has not decreased since the news broke about the lead.

Water Operations

- The city is working to formalize a plan to connect the city to its neighboring communities to back up each other's water supply. This plan would cost $6.4 Million, but N. Henderson feels confident that the city would only be responsible for paying a portion of the costs. This plan would serve two purposes:
    - It would prevent the city from having to spend an estimated $3.1M to build a temporary above ground water line for testing the connection to the KWA
    - It would allow the city to use its neighbors for a water supply backup and not have to rely on the Flint River as a back-up source
- Efforts to control the corrosion from city water are going well. N. Henderson said that they have been doing field testing of water, and that lead levels are decreasing.

Drinking Water Emergency Loan Fund

- The city intends to apply for this fund, and hopes that a portion of this loan money is forgivable.
- The city's proposal would likely be $25M annually (the maximum is $15M according to the city) for (5) years, at a total of $125M
- Would be working on public and private infrastructure by prioritizing areas in the highest need of infrastructure improvement. The city knows, for example, where water sits in the system. Areas like those would be targeted for these monies.

- The city is aware that their initial estimates of over a billion dollars to replace all lead infrastructure is an unrealistic request
- The city has already conducted a Reliability and Sanitary Sewer study, which they say is a requirement of the application
- Their data suggests that the city has about 600 Miles of water infrastructure, but their engineering consultant suggests that this number might be 100 Miles low

2. Other issues

Police and Fire Department updates

- There is not much to report in crimes, the city is about at where it would expect to be at this point in the year
- Fire stations are being utilized as water and filter distribution centers

Shears v Flint

- The $15M transfer from the Sewer Fund has been resolved. The City Council voted to approve that transfer, and now it is awaiting RTAB approval.

Hamtramck – Jan. 14 – K. Powell, P. Dostine, A. Heimann

Miscellaneous

- The city started plowing its own streets for the first time since 2001. Using pick-up trucks purchased through Act 84 monies, Katrina said the crew plowed every street during the last snow event. The cost was $5K. Katrina said under the old contract with CPI, the cost would have been $46K.
- Katrina reported that the city settled a lawsuit for $999.00. The plaintiff originally wanted $175K.
- Katrina had a question about whether or not the FO applies to the court. The court wants to make personnel changes and increase salaries. Does the FO prevent the courts from doing that?
- Since the recent exchange of emails between Councilman Miah and K Powell, things have settled down. Katrina said the last council meeting was actually cordial.

'15 Budget Audit

- Katrina expects the audit to be completed week of January 18.

Police Study

- Katrina reported that the new Chief is expecting up to 4 proposals from firms interested in conducting a study.

Election fraud

- No update.

Highland Park– Oct. 14 – C. Square, R. Byrne

- The collection firm has approximately $7M in past due accounts to collect. However, many of these accounts are no longer active.
- Meadowbrook will be providing an updated report on OPEB costs which show a substantial reduction of the annual costs. The new estimated annual costs will be between $200K and $300K.
- New water bills with the new water and sewer rates have been sent out to the customers.
- Wade-Trim has opened its customer service center on Woodward Avenue.
- BSA software installation has been completed.
- The City will be submitting several FDCVT grant applications including master water meters, LED streetlights, and building improvements.
- Wade-Trim has received several shipments of residential water meters that will be installed soon.

Inkster – Jan. 14 – M. Stuhldreher, R. Byrne, A. Heimann, D. Hudson, P. Dostine

Charter Change

Attempt to revise the role of the Mayor by using a charter amendment has not been fruitful

Will attempt to put a Charter revision on the ballot for March

If it is successful, there will be a charter commission established in May

Financials

2nd Qtr Budget amendment will be voted on by the City Council on February 1st

- The city will be maintaining a positive operating surplus or $600k even after this amendment

Drop in residential property values

- **Residential property values are slated to decrease by 17% next year, which will be a $700,000 decrease in revenues**

- Suggests that the City, who will have approximately a $2M fund balance, and alluded to potentially using this as a financial buffer

Treasury Financial Assistance - City Manager Search/Economic Development

Has not heard anything about whether or not the city will be receiving some assistance to pay for this search from the Treasury. Eric and Pat will be following up with Randy and finding out what the status of this is, and getting back to him.

Relationship with new Mayor and City Council

Currently struggling to build a working relationship. Told a story about how one City Councilor asked to sit in on a staff meeting, and was outraged to be denied.

Rouge Valley Lawsuit

$4.7M lawsuit that has been ongoing

- Had gotten approval from the previous City Council for this
- Wayne County has agreed to, and signed the lawsuit
- Awaiting a judge's order to put payment of this lawsuit on 5 years of tax rolls

Regional Service Authority

- Has expressed interest in doing some kind of service consolidation, Eric will have Randy follow-up with him to find out where MMSA is, and what they are currently working on

Lincoln Park – Jan. 25 –M. Coppler, A. Heimann, P Dostine, R Byrne

- **Priorities**

- Coppler said he is working to get financial policies of the city in-line with the Final Order and Best Practices. Historically, Coppler said Lincoln Park has not amended its ordinances. The city council has always changed or revised policy by way of resolution. Going forward, Coppler will be eventually bring the ordinances up-to-date with previously passed resolutions by the amendment process.

- Coppler said Lincoln Park residents have been requesting a lot of documents from the city. In an effort to build back trust, Coppler generally has been giving residents what they ask for without having them file a Freedom for Information Act request. (Soon, many of these documents will be on the city's website, Coppler added.) Coppler did note that attorneys have been filing FOIAs to get information on addresses with delinquent

water bills (and most likely taxes too). They are trying to get ahead on the process to purchase homes that have been left vacant but not yet turned over to the county.

- **MERs**
- Coppler said he has not heard anything from MERs regarding the city's under-payment and whether or not MERs is going to sue the city or kick the city out of MERs. MERs met either Jan. 14 or 15 about Lincoln Park.

Pontiac – Jan. 15 - Deputy Mayor Jane Bais-DiSessa, J. Sobota, N. Narzarko, R. Widigan,

- Weekly **priorities:**
  - Will be meeting with the mayor to go over proposed budget amendments of FY 16
  - Departments will be turning in annual reports today

- **What is the taxable value 14-15:** 1.6%

- **What is the assessed value 14-15:** 4.9%

- **OPED Mediation**: Actively working on counter proposal; meeting with plaintiff's on Tuesday.

- **Phoenix Center:** Nothing new, Nowak & Fraus Engineers did a presentation on the center, regarding all engineering that had been done.
  - Structure is not in danger of collapse, but identified required structural repairs.
-

Royal Oak Township – Dec. 14 – Supervisor Squall, R. Burgess, P. Dostine, D. Hudson

- **Priorities**

- Burgess and Fedewa are working to complete reports that are owed to Treasury per the Consent Agreement and F & O plan.
- Burgess said with police service agreement still uncertain the township has only produced a '16 budget. Can't project without the police agreement in place. The 5-year is on hold.
- Burgess put two Capital Improvement Projects into the '16 budget. He is not currently working on the 6-year CIP.
  - The two projects are 1) Widening of Wyoming Road, and 2) Updating of the accounting system.
- Burgess said for years the township has paid $20K annually for use of Grant School.

- **MERS**

- Burgess did not want to discuss this issue. He said he would like to bring it up during the next call. (Note: Because the supervisor was on the line I think Burgess was reluctant to talk about the MERS money.)

- **Police Update**

  - The Supervisor said she had recently talked to the city of Southfield. The city told her it was interested in providing police services, but currently was under-staffed. Southfield said it was a year away from being at full capacity. Until then, it couldn't talk agreements with the township.
  - Supervisor said Treasury told the township it could continue to collect the special assessment while it looked for an agreement with a local unit.
  - Supervisor pledged to continue to work hard at finding a solution to the issue of no police service.

- **Clerk**
  - Supervisor expressed great frustration at the Clerk's unwillingness to perform her statutory responsibilities.
  - Supervisor said this happens every year around Christmas time.
  - Supervisor will be sending a letter to Treasury requesting advice on handling the situation.

Gentlemen: I'm forwarding the attached motion for temporary restraining order that was filed in federal court. Darnell Earley is a named defendant. I and writing to seek guidance on whether the Attorney General will be representing him.

I do not have Darnell's new email address. I left a message on his cell phone this morning. I'm not sure if he's been served.

EX PARTE MOTION FOR A TEMPORARY RESTRAINING ORDER WITH ASSET FREEZE AND OTHER EQUITABLE RELIEF

NOW COMES the Plaintiff, *in pro per, sui juris*, being an indigent brings this matter before this honorable Court in the public interest to respectfully moves this Court to Grant his Ex Parte Motion for a Temporary Restraining Order with Asset Freeze and Other Equitable Relief pursuant to Rule 65 of the Federal Rules of Civil Procedure, Fed. R. Civ. P. 65 and moves the court to issue a temporary restraining order without written or oral notice to the adverse party or its attorney pursuant to Fed. R. Civ. P 65 (b) under Racketeer Influenced and Corrupt Organizations Act (RICO), Uniform Commercial Code (UCC), Federal Safe Water Act, Michigan Safe Water Act, State of Michigan Constitution and these United States Federal Constitution for Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) ongoing violations of the causes for action set forth in Plaintiff's *ex parte* Complaint for the reasons contained in his accompanying Memorandum.

WHEREFORE, Anderson Lee Fernanders prays that this Honorable Court make him whole by granting recovery of and all other relief sought in his Ex Parte Motion for a Temporary Restraining Order with Asset Freeze and Other Equitable and other relief that this Court finds as may be just and proper in the premises.

Respectfully

1-15-15

Anderson Lee Fernanders

Memorandum in Support

I. STATEMENT OF FACTS

Plaintiff's Statement of Facts as written in his *ex parte* Complaint are hereby incorporated as if fully set forth herein as facts in this Memorandum in Support.

II. STANDARD OF REVIEW

Plaintiff's motion is governed by Fed R. Civ. P. 65. The decision whether or not to grant a request for interim injunctive relief falls within the sound discretion of the district court. Friendship Materials, Inc. v. Michigan Brick, Inc., 679 F.2d 100, 102 (6th Cir. 1982).

III. ARGUMENT

INTRODUCTION

Plaintiff moves the Court for a preliminary injunction and temporary restraining order pursuant to Fed. R. Civ. P. 65.

Plaintiff makes this motion on the grounds that:

1. Plaintiff is likely to prevail on the merits of his claim;
2. Plaintiff will suffer irreparable harm if preliminary relief is not granted;
3. Third parties will not be harmed by the relief sought; and
4. The public interest will be served by granting the relief sought.

Plaintiff requests that the Court issue a temporary restraining order and Preliminary Injunction relief sought specifically written in his *ex parte* Complaint; and

Plaintiff moves the court to issue a temporary restraining order without written or oral notice to the adverse party or its attorney pursuant to Fed. R. Civ. P. 65 (b).

Plaintiff makes this motion on the grounds that:

1. Plaintiff's attached affidavit clearly shows that immediate and irreparable injury will result to the movant before the Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) can be heard in opposition.

2. Plaintiff's certifies in writing his efforts made to give notice Defendants and Mr. and Ms/Mrs Jane and John Doe/Unknown (1 to 1000).

3. Plaintiff's gives reasons why notice Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) should not be required.

PRELIMINARY INJUNCTION AND TEMPORARY RESTRAINING ORDER

In the present case, Plaintiff satisfy the standard for obtaining a temporary restraining order and a preliminary injunction because (1) Plaintiff has a strong likelihood of success on the merits; (2) the Plaintiff will be irreparably harmed if a temporary restraining order and preliminary injunction is not issued; (3) an injunction in favor of Plaintiff will not cause substantial harm to others; and (4) an injunction in favor of Plaintiff serves the public interest. *Leary v. Daeschner, 228 F.3d 729, 736 (6th Cir. 2000); McPherson v. Michigan High Sch. Athletic Ass'n, 119 F.3d 453, 459 (6th Cir. 1997) (en banc) (quoting Sandison v. Michigan High Sch. Athletic Ass'n, 64 F.3d 1026, 1030 (6th Cir. 1995)); Frisch's Restaurant Inc. v. Shoney's Inc., 759 F.2d 1261, 1263 (6th Cir. 1985).* "These factors are to be balanced against one another and should not be considered prerequisites to the grant of a preliminary injunction." *Leary*, 228 F.3d at 737, (*citing United Food & Commercial Workers Union, Local 1099 v. Southwest Ohio Reg'l Transit Auth.*, 163 F.3d 341, 347 (6th Cir. 1998))

The equities weigh solidly in favor of granting preliminary relief to ensure that Plaintiff and all City of Flint residents and business along with their employees of ceasing buy, drink and otherwise using water contaminated with Trihalomethanes (THMs) above 80 parts per billion,

the city causes the Plaintiffs and all City of Flint residents and business along with their employees to suffer a spontaneous and acute gastrointestinal reaction and other physical injuries as contained in Plaintiff's Affidavit, as well as but not limited to suffering emotional pain, suffering, inconvenience, mental anguish, loss of enjoyment of life, the clear and present treat of law suits on the City of Flint business and medical professionals, and other nonpecuniary losses such results of Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) actions and lack of action illuminated in the statements of fact caused the type of harm that the Uniform Commercial Code (UCC), Federal Safe Water Act, and Michigan Safe Water Act were intended to prevent and furthermore, denies us our right to enjoyment as conferred in Michigan Constitution ARTICLE 18 Section 13 and right to domestic Tranquility as conferred in the Federal Constitution's Preamble. The equities also weigh in favor of granting preliminary relief to Plaintiffs and all City of Flint residents and business along with their employees to ensure they do not continue to buy, drink and otherwise using water contaminated with Trihalomethanes (THMs) above 80 parts per billion for any longer, especially given the fact too much time has passed since Plaintiffs and all City of Flint residents and business along with their employees first unknowingly and unwittingly to drink, shower in, bathe in, and otherwise use domestic water supplied by the City of Flint which "exceeded the trihalomethanes (TTHM) MCL" and recently reported "that the location reporting the highest TTHM level was 99 ug/L."[1]

The public interest of Plaintiffs and all City of Flint residents and business along with their employees along with City of Flint business and medical professionals will not suffer harm if an injunction is issued:

Plaintiffs and all City of Flint residents and business along with their employees along with City of Flint business and medical professionals suffer from having to buy, drink

[1] Exhibit 4

and otherwise using water contaminated with Trihalomethanes (THMs) above 80 parts per billion. As reported throughout the news media for a time now a like and similarly to Ron Fonger's January 11, 2015 article entitled "*City to enlist water experts*" in The Flint Journal, he writes quoting City Council President Josh Freeman "Perception is reality, and the perception of a large number of people in that the water is unsafe." (p A7). The article speaks of indicated that City Councilmen Eric Mays and Kerry Nelson invited all of the City of Flint residents to a town hall meeting. (p A7).

The harm to Plaintiff and all City of Flint residents and business along with their employees along with City of Flint business and medical professionals in the absence of injunctive relief outweighs the harm to the Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) if Plaintiff's Motion is granted:

> At the outset, when the Court balances the hardships of public interest against a private interest under a statutory injunction, the public interest receives the greater weight.[2] In such cases involving violation of law, harm to the public interest is presumed.[3] The injunctive relief request granted centers on the governance of water supplied by the City of Flint. The Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) being removed from the governance of water supplied by the City of Flint does not render him or her unable to fulfill their other work duties unless any duty is connected to the governance of water supplied by the City of Flint whereby the Flint's City Council will carry out in the manner detailed Plaintiff injunctive relief numbered 11 and 12. Given the task of the governance of water supplied by the City of Flint, the injunctive relief as written puts the Flint's City Council in control of the monies and freezes on

[2] *FTC v. Nat'l Testing Servs., LLC*, No. 3:05-0613, 2005 WL 2000634, at *3 (M.D. Tenn. Aug. 18, 2005).
[3] Nat'l Testing Servs., LLC, 2005 WL 2000634, at *3.

assets Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) connected with their governance of water supplied by the City of Flint to ensure and protect the Flint's City Council ability to be successful at governance of the water supplied by the City of Flint.

The foregoing antitrust cases establish that equitable relief to prevent and restrain future violations is not limited to relief prohibiting future conduct, but also broadly encompasses relief designed to cure the ill effects of violators' past and/or ongoing misconduct and to deprive them of the fruits of their misconduct. For the reasons stated above, RICO's equitable relief must be interpreted to be at least as broad as antitrust equitable relief. Moreover, it is important to bear in mind that the Supreme Court has admonished that "once the Government" has established a violation of law, "all doubts as to the remedy are to be resolved in its favor." United States v. E. I. du Pont de Nemours & Co., 366 U.S. 316, 334 (1961). Accord United States v. Bausch & Lomb Optical Co., 321 U.S. 707, 726 (1944).

Thus, federal courts have held that evidence of past violations may establish the requisite **reasonable likelihood of future violations** in view of the totality of the circumstances, particularly where the defendant's past violations were: (1) "part of a pattern" and not isolated; (2) were "deliberate" and not "merely technical in nature"; and (3) "the defendant's business will present opportunities to violate the law in the future."[4]

---

[4] SEC v. First City Financial Corp., Ltd., 890 F.2d 1215, 1228-29 (D.C. Cir. 1989). Accord SEC v. Bilzerian, 29 F.3d 689, 695 (D.C. Cir. 1994); SEC v. Gruenberg, 989 F.2d 977, 978 (8th Cir. 1993); CFTC v. Hunt, 591 F.2d 1211, 1220-21 (7th Cir. 1979); SEC v. Savoy Indus., Inc., 587 F.2d 1149, 1168 (D.C. Cir. 1978); SEC v. Commonwealth Chemical Securities Inc., 574 F.2d 90, 98-100 (2d Cir. 1978); SEC v. Management Dyn. Inc., 515 F.2d 801, 807-08 (2d Cir. 1975); SEC v. Advance Growth Capital Corp., 470 F.2d 40, 53 (7th Cir. 1972); SEC v.Manor Nursing Ctrs., Inc., 458 F.2d 1082, 1100-01 (2d Cir. 1972); Pullum v. Greene, 396 F.2d 251, 256-57 (5th Cir. 1968); United States v. Philip Morris USA, Inc., 449 F. Supp. 2d at 909-10; United States v. Philip Morris USA, 316 F. Supp. 2d 6, 10 n. 3 (D.C. Cir. 2004) (collecting cases); United States v. Philip Morris, Inc., 116 F. Supp. 2d 131, 148-49 (D.D.C. 2000).

Plaintiff elects to raise information and belief be heard in this matter that Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) in a scheme for City of Flint residents and business along with their employees as well as the medical profession to buy, drink and otherwise using water contaminated with Trihalomethanes (THMs) above 80 parts per billion, supplied by the City of Flint past violations of RICO, Uniform Commercial Code (UCC), Federal Safe Water Act, Michigan Safe Water Act, State of Michigan Constitution and these United States Federal Constitution this Court establish the requisite reasonable likelihood of future violations in view of the totality of the circumstances, since these violation started at Trihalomethanes (THMs) above 80 parts per billion and have continued to Trihalomethanes (THMs) levels reaching 99 parts per billion. Second, Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) knowingly, recklessly, wantonly, and/or negligently poisoned the Plaintiff and all City of Flint residents and employees by causing City of Flint residents and business along with their employees as well as the medical profession who unknowingly and unwittingly to buy, drink and otherwise using water contaminated with Trihalomethanes (THMs) above 80 parts per billion, failed to rectify this problem, which it could and should have resolved, attempted to cover up the problem by issuing inadequate and misleading information, did not warn Plaintiff and all City of Flint residents and employees by causing City of Flint residents and business along with their employees as well as the medical profession the true nature and extent of the danger to those exposed to the water supplied by the City of Flint. Finally, Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) continued governance and or connection has continued the Scheme were Plaintiff and all City of Flint residents and employees by causing City of Flint residents and business along with their

employees as well as the medical profession who unknowingly and unwittingly to buy, drink and otherwise using water contaminated with Trihalomethanes (THMs) above 80 parts per billion

1962(d) It shall be unlawful for any person to conspire to violate any of the provisions of subsections (a), (b), or (c) of this section.

A RICO conspiracy is composed of two agreements:

(1) An agreement to commit at least two predicate acts which form the pattern of racketeering activity; and

(2) An agreement to the conduct which violates subsection (a), (b) or (c) of '1962, e.g. an agreement to conduct or participate in the affairs of an enterprise (sub-section(c)).[5]

- A RICO conspiracy generally involves two groups of people- the conspirators and the enterprise.
- Under agency law, a corporation cannot conspire with its officers or employees.
- An overt act in furtherance of the conspiracy is required in civil cases. This requirement is distinct from the predicate act requirement, although the predicate act may satisfy the overt act requirement.

Plaintiff elects to raise information and belief be heard in this matter that Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) in a scheme for City of Flint residents and business along with their employees as well as the medical profession to ceasing buy, drink and otherwise using water contaminated with Trihalomethanes (THMs) above 80 parts per billion, supplied by the City of Flint. Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) this scheme to earn money derived from water continued being supplied by the City of Flint. See other predicate acts which were enacted during the conspiracy in the Plaintiff's ex parte Complaint.

[5] US. v. Campione, 942 F.2d 429, 438 (7th Cir. 1991)

Plaintiff is likely to prevail the merit even if the some facts remain unclear or some merits cannot be determined without a full hearing:

As alleged in Plaintiff's *ex parte* Complaint, Plaintiff contends that concerning all of the material elements to sustain a recovery as a Breach of duty to Statutory Standard of Care (Negligence per se), Negligence, Breach Of Express Or Implied Contracts Or Even Speculation Of Bad Faith And Unfair Dealing, Civil Conspiracy, Breach of Express and Implied Good Faith and Fiduciary, and Constitutional Tort action under Uniform Commercial Code (UCC), Federal Safe Water Act, Michigan Safe Water Act, State of Michigan Constitution and these United States Federal Constitution which put the Defendants on notice of her claims and the grounds on which they rest.

Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) will not suffer irreparable injury from the preliminary injunction:

Properly stated, the definition of irreparable harm is whether there is or will be a "wrong which cannot be adequately redressed by relief on the merits." N.Y. Pathological and X-Ray Laboratories, Inc., v. Immigration and Naturalization Service, 523 F. 2d 79, 81 (2d Cir. 1975). Plaintiff's Injunctive relief in on forcible manner restrains Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) from any other method other than through their governance of the water supplied by the City of Flint for obtaining adequate compensation for their inability to their governance of the water supplied by the City of Flint.

Plaintiffs and all City of Flint residents and business along with their employees along with City of Flint business and medical professionals acute and long term exposure to Trihalomethanes (THMs) develop but not limited to certain cancers, such as bladder and colon

cancer, reproductive issues such as miscarriages, birth defects and low birth rates, damage to the heart, lungs, kidney, liver and central nervous system in the absence of an injunction will cause a noncompensable injury for which there is no legal measurement of damages or for which damages cannot be determined with a sufficient degree of certainty·

> ""Trihalomethane (THM) contamination was found in the municipal water supply during the 1990s. City officials have been accused of not telling the truth about the levels of THM in the Chesapeake area. Hiding test information on THM levels, failure to provide adequate warning of the high levels of THM in the water, and failure to let the public know about the THM and possible miscarriages, still births and birth defects. Some studies link THMs (Bromodichloromethane [BDCM]), to possible stillbirths, miscarriages and birth defects, and bladder and rectal cancers." (Exhibit 3, p 3). In 2007, Taiwanese researchers found people who drank water with trihalomethane concentrations of more than 21 parts per billion had twice the odds of dying from bladder cancer than those who did not. (Exhibit 2, 2). Exhibit one, explain "[t] ypically, the following four THMs are found as a result of chlorination: trichloromethane (chloroform), bromodichloromethane (BDCM), dibromochloromethane (DBCM), tribromomethane (bromoform)." Further that, "[c]hloroform may be absorbed into the body through ingestion, inhalation, and through the skin. The largest source of human exposure to THMs in the U.S. is from the consumption of chlorinated drinking water. Besides consuming water, other water uses in the home may contribute significantly to total chloroform exposure both from breathing in chloroform vaporized into the air and from it passing through the skin during bathing. Swimming in chlorinated pools will also contribute to the total exposure from the same exposure paths. One study observed that a

greater percentage of chloroform passed through the skin when bathing water temperatures were increased." (p 1).

TEMPORARY RESTRAINING ORDER WITHOUT WRITTEN OR ORAL NOTICE

In the present case, Plaintiff's attached affidavit clearly shows that immediate and irreparable injury will result to the movant before the Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) can be heard in opposition, such as in Exhibit one on page 2:

Short-Term (Acute) Effects

Evidence of chloroform's acute effects on humans has been obtained primarily during its past use as an inhalation anesthetic. In addition to central nervous system effects, chloroform anesthesia was associated with cardiac arrhythmias and abnormalities of the liver and kidneys. Inhalation exposure experiments with animals revealed that high levels are toxic to the liver and secondarily to the kidneys. Skin contact with undiluted chloroform may cause a burning sensation, redness, and blistering. Acute effects of exposure to the other THMs are not documented in the literature, but are expected to be similar to chloroform.

Long-Term (Chronic) Effects

Chronic oral exposure of humans to chloroform at high doses results in adverse effects on the central nervous system, liver, kidneys and heart. Animal studies have shown decreased body weights in rats and mice given chloroform at high oral doses and an increased incidence of respiratory disease at higher doses. At still higher doses given orally, liver abnormalities and decreased size of the reproductive organs were observed in rats. In animal studies investigating effects of chronic exposure to each of the other THMS, liver toxicity was observed. BDCM also caused kidney toxicity.

Carcinogenic (cancer-causing) Effects Chloroform has been demonstrated by several studies to produce kidney and liver tumors in rats and mice when given orally. In studies of human populations using chlorinated drinking water in which chloroform is the predominant THM, small increases in the incidence of rectal, colon and bladder cancer have been consistently observed, with evidence strongest for bladder cancer. However, because other possible carcinogens were found in this water, it is impossible to identify chloroform as the sole carcinogenic agent. Therefore, chloroform has been classified by the U.S. Environmental Protection Agency (EPA) as a Group B2 or "probable human carcinogen," based on sufficient animal evidence and inadequate human evidence of carcinogenicity. Evidence from animal studies now strongly indicates that chloroform exposure causes cancer only after first producing sustained cell toxicity. Because a certain threshold level of exposure is necessary to cause cell toxicity, cancer from chloroform exposure can only occur if that threshold is exceeded. Based on the results of animal studies in which BDCM exposure increased tumors of the large intestine, kidney, and liver, and bromoform increased tumors of the large intestine, they are also classified in Group B2. DBCM is classified in Group C, "possible human carcinogen," based on limited animal evidence of an increase in liver tumors.

Developmental/Reproductive Effects

Reports in the scientific literature in which chloroform was administered to animals indicate that chloroform has the potential to cause birth defects, miscarriages, and delays in fetal development. Results have generally been inconclusive regarding exposure to THMs and adverse developmental or reproductive effects in humans. However, the results of a recent study suggest an increased risk of early-term miscarriage from high

levels of THMs in tap water, particularly BDCM. Additional studies are underway to determine the significance of the association found in this study.

Plaintiff's Proof of Service evidences his efforts to give notice Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000). Plaintiff's Affidavit along with the above arguments combined with Statement of Facts gives reasons why this Court should issue a temporary restraining order without written or oral notice to Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000).

BOND

Plaintiff, *in pro per, sui juris*, being an indigent brought this matter before this honorable Court in the public interest to respectfully move this Court to Grant his Ex Parte Motion for a Temporary Restraining Order with Asset Freeze and Other Equitable Relief pursuant to Rule 65 of the Fed. R. Civ. P. 65 under Uniform Commercial Code (UCC), Federal Safe Water Act, and Michigan Safe Water Act.

The bond requirement's of Fed. R. Civ. P. 65 (c) serves two functions - deterrence of frivolous claims and compensation of the Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) - are often cited by commentators as compelling reasons for courts ordinarily to require security from injunction applicants. The requirement assumes that applicants will not be willing to lose money over cases in which they have no valid interest, or in which the factual or legal arguments are less than compelling. This assumption, however, is based on a further assumption: that the applicant can afford to post a bond. Only where the applicant can afford to post a bond does its failure to provide security reflect its lack of good faith or the lack of meritoriousness of its petition. The typical public interest plaintiff's failure to post a bond says nothing about its good faith or confidence of success, or the strength of its claim

for relief. For in the public interest context, the bond operates not as a screening device, eliminating some claims, but as a financial bar, blocking all claims. This argument was made by the Supreme Court with respect to double appeal bonds required by Oregon's wrongful detainer statute.[6]

Although the federal courts interpreted Rule 65(c) as a mandatory provision for the first forty years of its history, about half of the circuits now consider it a discretionary provision, reasoning that the phrase "such sum as the court deems proper" literally allows the trial judge to dispense with the bond.[7] Recognizing that bond requirements can bar public interest litigants' access to court, the federal courts have fairly consistently decided not to require bonds in cases brought by indigents[8] and those brought in public interest.

Denny v. Health and Social Services Board, [9] Bass v. Richardson,[10] Bartels v. Biernat[11], and Crowley v. Local No. 82 Furniture and Piano Movers[12] establish the general principle that the federal courts have been unwilling to condition preliminary relief upon the applicant's financial resources, at least when the applicant is a poor individual.

In Denny, two inferences can be drawn from the court's waiver of the security requirements. First, since the court did not rely on constitutional authority to waive the security requirement, it must have relied on its equity powers. Second, while it did not expressly state its

[12] 697 F.2d 978 (1st Cir. 1982).

rationale for granting the waiver, its decision would appear to be based on the theory that it would be unjust to an individual to block adjudication for want of money, or on the theory that the legal system itself has an interest in having justiciable issues adjudicated in the judicial forum (rather than the streets), or both. Faced with blocking the indigent plaintiffs' access to court by requiring a bond they could not provide, the court waived the security requirement in a clear demonstration of its reluctance to condition judicial access upon the parties' financial resources.

Bass v. Richardson, decided in 1971, reiterated the Denny court's holding that bond should not be required of indigents. Like Denny, the Bass decision was based on the idea that it was unjust to require bonds of individuals when such a requirement blocked judicial access. The principle that bond requirements should be waived where necessary to affect a congressionally-intended private enforcement scheme adds the further equitable theory that the legal system has a positive interest in citizen enforcement, and that courts sitting in equity should waive bond requirements to encourage citizen suits. As then-Circuit Judge Burger stated in Church of Christ, in the context of listener intervention in agency proceedings:

> The theory that the Commission can always effectively represent the listener interests in a renewal proceeding without the aid and participation of legitimate listener representatives fulfilling the role of private attorneys general is one of those assumptions we collectively try to work with so long as they are reasonably adequate. When it becomes clear, as it does to us now, that it is no longer a valid assumption which stands up under the realities of actual experience, neither we nor the Commission can continue to rely on it.

The Bass court's approach was extended in 1975, by the court in Bartels v. Biernat, it stated: "because the Court determined that the action concerns important social considerations,

the Court would exercise [its] discretion to issue preliminary injunctive relief ... without security." [13] Bartels seems to contemplate, therefore, an equitable private attorney general exemption triggered by the court's equitable determination that the public interest impact of the litigation requires a waiver of Rule 65(c). The shift in judicial focus from Denny to Bartels from the **applicant's identity as an indigent**, to whether **cases involve significant social considerations**.

In 1982, First Circuit decided in, Crowley v. Local No. 82 Furniture and Piano Movers[14] created the first and the only bond exemption test developed by a federal court. First, the court in Crowley viewed the plaintiff access problem posed by Rule 65(c) as a recurring one that required a general test. Unlike the NEPA courts, the Crowley court fashioned a bond exemption test applicable to all public interest cases. Second, as discussed in the following section, the test in Crowley was a fundamentally "equitable" test whose triggering event was the noncommercial, public interest status of the plaintiff. On appeal, the First Circuit It divided bond cases into two types. The first type involved commercial cases where an unsecured injunction exposed the defendant to a risk of monetary IOSS.[15] In these cases, the courts required bonds.[16] The second type of case involved "important federal rights or 'public interests'" brought, often by indigents, under remedial social legislation.[17] In these cases, the courts waived or nominalized bond requirements.[18] After dividing the federal case law into "commercial" and "public interest" types, the court constructed its exemptions test. In making bond exemptions available to public interest

litigants, the Crowley decision ensures that federal public interest litigation will not be barred by the applicants' limited financial resources.

IV. CONCLUSION

The harm suffered by Plaintiffs and all City of Flint residents and business along with their employees may not be remedied by any but the most immediate and comprehensive action by this Court. Each day that Plaintiffs and all City of Flint residents and business along with their employees along with City of Flint business and medical professionals are forced to go without domestic water supplied by the City of Flint which does not exceeded the trihalomethanes (TTHM) MCL" neglectfully impacts our well-being and that of our families continues prolonged duress. Therefore, an order protecting Plaintiffs and all City of Flint residents and business along with their employees, as well as, along with City of Flint business and medical professionals from Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) actions and lack of action illuminated in the statements of fact is clearly in the public interest. Under RICO, Uniform Commercial Code (UCC), Federal Safe Water Act, Michigan Safe Water Act, State of Michigan Constitution and these United States Federal Constitution this Court has ample authority to grant the Debtor the relief requested in his *ex parte* Motion for a Temporary Restraining Order with Asset Freeze and Other Equitable against Defendants and Mr. and Ms/Mrs. Jane and John Doe/Unknown (1 to 1000) and should do so to permit the Anderson Lee Fernanders to be made whole.

V. RELIEF

WHEREFORE, Anderson Lee Fernanders prays that this Honorable Court make him whole by granting recovery of and all other relief sought in his Ex Parte Motion for a Temporary

Restraining Order with Asset Freeze and Other Equitable and other relief that this Court finds as may be just and proper in the premises.

Respectfully

Trihalomethanes: Health Information Summary

Trihalomethanes (THMs) are a group of organic chemicals that often occur in drinking water as a result of chlorine treatment for disinfectant purposes and, therefore, are also known as "disinfection byproducts" or DBPs. THMs are formed when chlorine reacts with naturally occurring organic material found in water such as decaying vegetation. Typically, the following four THMs are found as a result of chlorination: trichloromethane (chloroform), bromodichloromethane (BDCM), dibromochloromethane (DBCM), tribromomethane (bromoform).

Untreated or raw water rarely contains THMs in significant concentrations. Since chloroform is the THM found in highest concentrations and about which the most is known, the bulk of the information contained in this summary will pertain to chloroform.

Chloroform was once used as an anesthetic during surgery. Most chloroform produced today is used to make other chemicals. Chloroform is produced in the bleaching process of the pulp and paper industry and may also be formed in wastewater, which is often chlorinated in order to kill bacteria. Environmental release of chloroform is largely to air during pulp and paper bleaching and chlorination of drinking and wastewater, with a small amount released to water.

Information regarding the production and use of bromoform, BDCM, and DBCM is very limited. Bromoform appears to be produced in small quantities for use as a chemical intermediate and the other two THMs are thought to be produced in small quantities for laboratory use. Environmental release of these three THMs is largely to air during water chlorination.

Health Effects

Absorption and Exposure

Chloroform may be absorbed into the body through ingestion, inhalation, and through the skin. The largest source of human exposure to THMs in the U.S. is from the consumption of chlorinated drinking water. Besides consuming water, other water uses in the home may contribute significantly to total chloroform exposure both from breathing in chloroform vaporized into the air and from it passing through the skin during bathing. Swimming in chlorinated pools will also contribute to the total exposure from the same exposure paths. One study observed that a greater percentage of chloroform passed through the skin when bathing water temperatures were increased. Chloroform does not concentrate in plants; therefore, the contribution from food to total chloroform exposure is small.

Short-Term (Acute) Effects

Evidence of chloroform's acute effects on humans has been obtained primarily during its past use as an inhalation anesthetic. In addition to central nervous system effects, chloroform anesthesia was associated with cardiac arrhythmias and abnormalities of the liver and kidneys. Inhalation exposure experiments with animals revealed that high levels are toxic to the liver and secondarily to the kidneys. Skin contact with undiluted chloroform may cause a burning sensation, redness, and blistering.

Acute effects of exposure to the other THMs are not documented in the literature, but are expected to be similar to chloroform.

Long-Term (Chronic) Effects

Chronic oral exposure of humans to chloroform at high doses results in adverse effects on the central nervous system, liver, kidneys and heart.

Animal studies have shown decreased body weights in rats and mice given chloroform at high oral doses and an increased incidence of respiratory disease at higher doses. At still higher doses given orally, liver abnormalities and decreased size of the reproductive organs were observed in rats. In animal studies investigating effects of chronic exposure to each of the other THMS, liver toxicity was observed. BDCM also caused kidney toxicity.

Carcinogenic (cancer-causing) Effects

Chloroform has been demonstrated by several studies to produce kidney and liver tumors in rats and mice when given orally. In studies of human populations using chlorinated drinking water in which chloroform is the predominant THM, small increases in the incidence of rectal, colon and bladder cancer have been consistently observed, with evidence strongest for bladder cancer. However, because other possible carcinogens were found in this water, it is impossible to identify chloroform as the sole carcinogenic agent. Therefore, chloroform has been classified by the U.S. Environmental Protection Agency (EPA) as a Group B2 or "probable human carcinogen," based on sufficient animal evidence and inadequate human evidence of carcinogenicity. Evidence from animal studies now strongly indicates that chloroform exposure causes cancer only after first producing sustained cell toxicity. Because a certain threshold level of exposure is necessary to cause cell toxicity, cancer from chloroform exposure can only occur if that threshold is exceeded.

Based on the results of animal studies in which BDCM exposure increased tumors of the large intestine, kidney, and liver, and bromoform increased tumors of the large intestine, they are also classified in Group B2. DBCM is classified in Group C, "possible human carcinogen," based on limited animal evidence of an increase in liver tumors.

Developmental/Reproductive Effects

Reports in the scientific literature in which chloroform was administered to animals indicate that chloroform has the potential to cause birth defects, miscarriages, and delays in fetal development. Results have generally been inconclusive regarding exposure to THMs and adverse developmental or reproductive effects in humans. However, the results of a recent study suggest an increased risk of early-term miscarriage from high levels of THMs in tap water, particularly BDCM. Additional studies are underway to determine the significance of the association found in this study.

Health Standards and Criteria

The EPA has established a Maximum Contaminant Level (MCL) for total THMs in public drinking water systems. MCLs are enforceable drinking water standards determined by balancing the adverse health effects of a particular chemical against the feasibility and costs of treating contaminated water, and in the case of THMs, a consideration of the benefits of chlorination in reducing the risk from acute gastrointestinal diseases. The MCL for total THMs is 80 parts per billion (ppb = micrograms per liter (ug/l).

Although chloroform is considered to be a probable human carcinogen, sufficient evidence has accumulated to indicate that it causes cancer only if, as previously explained, exposure exceeds the threshold level needed to cause cell toxicity. That threshold exposure has been calculated to be greater than the exposure level at which the most sensitive non-cancer adverse health effect, fatty cyst formation in the liver, may occur. Therefore, exposure at or below the state drinking water standard for chloroform of 70 ppb is not anticipated to result in either adverse non-cancer health effects or cancer.

The standard is based on an average daily intake of two liters (0.53 gallons) of water per day by a 70-kilogram (154 lb.) adult for a chronic time period. It is important to note that the 70 ppb state standard for chloroform is actually only 20 percent of the total safe exposure. This allows for a margin of safety and for water exposures that occur during bathing by inhalation of vaporized chloroform and absorption through the skin.

State drinking water standards developed for the other three THM compounds are 0.6 ppb for BDCM, 60 ppb for DBCM, and 5 ppb for bromoform. The drinking water standards for the four individual contaminants apply only if a water source was not intentionally chlorinated. If the well or water body was chlorinated, the federal MCL for the sum of the four THMs applies.

Report points to cancer risk from chemicals used to treat drinking water

Filed under Bulldog Extra, Environment, Public Health {no comments}

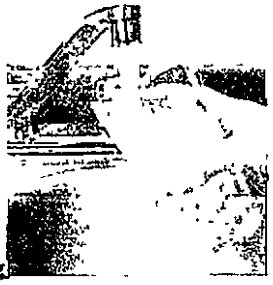
Share:



By Bridget Huber, FairWarning

Chemicals used to treat drinking water for millions of Americans may raise the risk of cancer and lead to other unintended health hazards, according to a report released today by the Environmental Working Group, an advocacy organization.

The group is urging the U.S. Environmental Protection Agency to reevaluate its standards for the byproducts created when water is disinfected. The Environmental Working Group also is pushing officials to clean up sources of public drinking water to reduce the need for chemical treatment in the first place

"By failing to protect source water, Congress, EPA and polluters leave Americans with no choice but to treat it with chemical disinfectants and then consume the residual chemicals generated by the treatment process," the report says. (See page 13 of the report for a list contaminant levels at waters suppliers in Florida and elsewhere).

Chlorine and other chemicals are added to public drinking water to kill disease-causing bacteria and other microorganisms. But when they come into contact with organic material such as fallen leaves, sewage or livestock manure, reactions occur that create toxic byproducts.

Some of the resulting compounds are regulated, but most are not. "We're talking about 600 known disinfection byproducts and probably many hundreds more that haven't been identified," said Renee Sharp, a senior scientist at the Environmental Working Group and a co-author of the report.

Researchers analyzed results from water quality tests done in 2011 at 201 large municipal water systems that serve more than 100 million people in 43 states. They found trihalomethanes, a byproduct of chlorination, in every system. The EPA calls some members of this class of chemicals "probable human carcinogens" and studies have linked them to bladder cancer, birth defects and miscarriages. However, only one water treatment system exceeded the EPA's limits for the chemicals, which was set at 80 parts per billion in 1998.

But the report argued that the EPA's limits are too lax, citing several studies linking even lower levels of the chemicals to health problems. For example, in 2011 a French research team analyzing data from three countries found that men exposed to more than 50 parts per billion of trihalomethanes [try-hal-o-MEH-thanes] had significantly increased cancer risks.

In 2007, Taiwanese researchers found people who drank water with trihalomethane concentrations of more than 21 parts per billion had twice the odds of dying from bladder cancer than those who did not. In 2010, California environmental health regulators proposed a public health goal for trihalomethanes of 0.8 parts per billion — one-hundredth of the federal standard. The goal, which would not be legally binding, is in the process of being finalized.

But David Savitz, a professor of community health at Brown University who has studied the issue, says the chemical byproducts created by disinfection are only of "modest concern." He faulted the report's authors for selectively focusing on studies that suggested evidence of harm while ignoring ones that did not. "The general tone of this report is alarmist and exaggerated," he said.

In response, Sharp said both the EPA and California health officials have concluded that lowering the levels of trihalomethanes in drinking water would cut the number of bladder cancer cases. "We are not the only ones saying this," she said.

The EPA, which previously has considered lowering the limit for trihalomethanes, declined to comment on the new report. In 2005, it proposed a rule that would have lowered the limit to 40 parts per billion, a move that it calculated would prevent nearly 1,300 cases of bladder cancer and save the U.S. between $2.9 and $7.1 billion annually. Instead of adopting the rule, however, the agency made what the report called "marginal" improvements in its system for measuring compliance with existing regulations. The EPA said these changes will prevent 280 cases of bladder cancer annually.

Analysts also found that levels of trihalomethanes in public water systems vary throughout the year, depending on factors including farming cycles. The EPA, however, regulates the chemicals based on an annual average, which means that spikes in the byproducts may go undetected.

This is of particular concern for pregnant women, said Sharp, since a fetus could be exposed to higher levels of the chemicals during crucial stages in development. "If you are thinking about pregnancy and the possibility for miscarriage or birth defects or stillbirth or any number of pregnancy or reproduction-related effects, then having short-term spikes can really make a difference."

Health concerns have prompted some public water systems to switch from chlorine to chloramines, compounds made from chlorine and ammonia gases. This substitution, however, may usher in other problems.

For example, Environmental Working Group researchers cited EPA data reporting that drinking water treated with chloramines had the highest levels of an unregulated and potentially highly toxic class of chemicals called idoacids Chloramine also forms nitrosamine compounds, which are related to chemicals "reasonably anticipated" to be human carcinogens, according to the federal National Toxicology Program.

The Environmental Working Group recommends all people drinking tap water to use carbon filtration systems and released a guide for consumers. Savitz, in contrast, said, "It's really an individual judgment."

But Sharp said the real solution is reducing pollution farther upstream. "The answer is truly to have cleaner source water and put more resources into cleaning up source water to begin with."

Exhibit 3

Trihalomethanes in Drinking Water

SPECIAL REPORT
March 2002

Trihalomethane is a by-product that comes from chlorination.

It is one of the toxic carcinogens created when Chlorine reacts with organic matter in water. When this matter decays - somewhat like compost materials (leaves, bark, sediments) Trihalomethanes are formed. This includes chemicals called chloroform, bromoform and dichlorobromethane. Even in small amounts they are all very carcinogenic.

Since the publication of the study by Environmental Working Group and the Public Interest Research Groups, trihalomethanes have been the focus of news articles across the United States. Following are a few excerpts from articles that relate to nationwide water issues, followed by the Water Quality Association's recommendation of a home water filtration system to protect consumers from potential health problems associated with trihalomethanes.

THMs (Trihalomethanes)in blood increase after shower
Chapel Hill, NC, May 3, 2002 (Water Tech Online)

THMs, by-products from chlorination, appear to increase significantly in the bloodstream after showering, says a study by researchers at the University of North Carolina (UNC) at Chapel Hill School of Public Health.

Public health experts suspect the chemicals might boost the risk of cancer and contribute to reproductive problems such as miscarriages, a release by UNC said.

Through blood sample analysis, researchers measured THMs in the blood of 25 women at each site before and soon after they showered, and compared those levels to concentrations found in tap water in their houses.

THM concentrations were around 1,000 times lower in blood than in tap water, but after the showers, median levels in blood increased by a factor of four.

February 10, 2002, - From Washington, DC (Washington Post)

"Annette Spaven already had three children when she found out she was pregnant again four years ago. She and her husband were surprised but pleased by the prospect of welcoming another child into their Chesapeake, VA home. So when she suffered a miscarriage in the first trimester, they tried again. Six months later, she lost another baby.

About the same time, two women on her block had miscarriages. Across town, a woman gave birth to a boy who died shortly after birth. For more than a decade, they and others wondered why they'd suddenly lost their pregnancies.

Today, many are wondering if they might have lost their babies simply because they drank tap water while they were pregnant. It's a question that has roiled this booming port

community ever since residents became aware of controversy surrounding chemicals in the public drinking supply. Now, 25 women are suing the city, and nearly 170 more have filed their intentions to do so.

In a statement last month, the EPA called the issue of chlorination byproducts in drinking water an important health concern.

Meanwhile, however, millions of Americans are unaware of what their water utilities know: The levels of chlorination byproducts in their drinking water often spike higher than the EPA's allowable annual average.

The EPA does not require this information to be included in regular water quality reports from utilities."

---

February 8, 2002, - From Alamo, Texas (The Monitor)

"A woman has filed a lawsuit against the city of Alamo, claiming that trihalomethanes (THMs) caused her to miscarry three times.

In the suit, Judith Expericueta says she drank Alamo's tap water during her pregnancies and the chemicals in it caused her to have three spontaneous miscarriages.

The EPA says that concentrated exposure to THMs may elevate the risk of spontaneous miscarriages during the first trimester. The TNRCC said the city of Alamo has the highest levels of THMs in Texas, but stressed that there is no immediate cause for alarm. The agency has cited the city several times in the past two years for exceeding the acceptable limit.

Alamo's THM levels for two years has been between 88.83 and 141.03 parts per billion. The state on January 1st set the maximum acceptable limit at 80 parts per billion."

January 22, 2002, - From Boston, Massachusetts (Ascribe News)

"Environmental epidemiologists from the Harvard School of Public Health analyzing tap water samples from 36 surface water systems throughout Massachusetts have found high levels of disinfection by-products (DBPs), which form during water treatment and transport, and a wide range of by-product activity in the water supplies they tested.

Using 88 tap water samples form 36 Massachusetts communities taken between spring 1997 and fall 1998, the researchers studied how the formation of DBPs is influenced by water treatment. Within the communities in the study, 24 used chlorine to disinfect the water supply with 10 of those towns chlorinating their water twice prior to distribution. One town used ozone and another used chlorine dioxide for disinfection. The remaining 12 used chloramine to disinfect their water supply. The researchers found that water that had been chlorinated multiple times prior to distribution was associated with higher THM levels and that THM levels are generally higher in the spring. "

February 19, 2002, - Westminster, Maryland (Carroll County Times)

"Maryland's tap water may be putting women at risk of having pregnancies end in miscarriage or having children with birth defects, according to a report by two environmental groups (Public Interest Research Groups and Environmental Working Group).

14 communities in Maryland had a relatively high proportion of people projected to be at risk from using their local drinking water. The group arrived at its findings after reviewing data on tap water contaminated by trihalomethanes, one of the principal byproducts of chlorination. The Maryland Department of the Environment, Water Management Administration, provided these results."

The full report is available at: Click or Paste - http://www.marypirg.org

---

January 11, 2002, - Florida (Florida Today)

"The water they drink puts more than 1,700 pregnant women in Florida at risk of miscarriages or birth defects each year, according to a study released by two environmental groups (Public Interest Research Groups and Environmental Working Group).

Florida ranked 14th worst in the nation for the number of pregnancies at risk of exposure to high levels of chlorination byproducts, the study found. Boca Raton was the worst in the state and 36th in the nation with 654 pregnancies at risk. "

THM victims group formed
Chesapeake, VA, March 21, 2001 (Water Tech Online) –

"Trihalomethane (THM) contamination was found in the municipal water supply during the 1990s. City officials have been accused of not telling the truth about the levels of THM in the Chesapeake area. Hiding test information on THM levels, failure to provide adequate warning of the high levels of THM in the water, and failure to let the public know about the THM and possible miscarriages, still births and birth defects.

Some studies link THMs (Bromodichloromethane [BDCM]), to possible stillbirths, miscarriages and birth defects, and bladder and rectal cancers. The Virginian Pilot reported that Chlorine mixes with organic materials, like algae and leaf particles, which includes chloroform and BDCM. In 1998, THM was suspected as a carcinogen and possible cause of miscarriages. Around that time, a new water treatment plant was being upgraded and reports say the levels of THM were higher than normal for about nine months. "

January 11, 2002, - Lisle, Illinois (PR Newswire)

"Chlorination of public drinking water may lead to harmful chemical byproducts such as chloroform, trihalomethanes, and haloacetic acids flowing from home taps according to a study released by the Environmental Working Group and the Illinois Public Interest Research Group.

The study reports that such byproducts in drinking water may put pregnant women at a

higher risk for miscarriages, neural tube defects, and reduced fetal growth. At the same time, physicians universally recommend that pregnant women drink plenty of water.

The issue is complex. Chlorination of public drinking water ensures that consumers have safe drinking water according to the Water Quality Association. Together with filtration, chlorination is one of the greatest public health advancements of this millennium, notes WQA Executive Director Peter Censky. Unfortunately, however, chlorination does introduce potentially toxic contaminant byproducts.

There is a solution to the dilemma, however. Consumers can have the best of both worlds when it comes to their household water supply. Municipal water treatment systems must continue to use essential chlorination processes to safeguard against bacteria, viruses, and protozoa. Fortunately, there are several at-home devices that cheaply and simply remove possible chlorine byproducts, Harrison notes.

In addition to safeguarding pregnant women and potential bladder cancer victims from more than 100 potentially toxic chlorination byproduct compounds, commonly available home filtration units can also remove unpleasant tastes and smells associated with chlorinated water."

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

City of Flint Did Not Meet Treatment Requirements

Our water system was recently found to be in violation of a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Samples were collected for total trihalomethanes (TTHM) analysis from eight locations on a quarterly basis (May 21, August 21, and November 20 of 2014). The average of the results at ANY of the eight locations must not exceed the maximum contaminant level (MCL) for TTHMs, otherwise our water system exceeds the Maximum Contaminant Level (MCL). The standard for TTHMs is 80 ug/L. The location reporting the highest TTHM level was 99 ug/L; thus, our water system exceeds the TTHM MCL.

What should I do?

- There is nothing you need to do unless you have a severely compromised immune system, have an infant, or are elderly. In that case, you may be at increased risk and should seek advice about drinking water from your health care provider.
- You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

What does this mean?

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

People who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer.

What is being done?

We are currently working on solutions to correct the problem. We anticipate resolving the problem in 2015.

For more information, please contact Mr. Brent Wright or Mike Glasgow at 810-787-6537 or the Water Plant at 4500 North Dort Highway, Flint, MI 48505.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by the City of Flint.

CERTIFICATION: F1 S3 WSSN: 02310

I certify that this water supply has fully complied with the public notification requirements in the Michigan Safe Drinking Water Act, 1976 PA 399, as amended, and the administrative rules. Reminder to water supplier: This notice/ certification must be sent to the DEQ.

<McCarthylettertoRickSnyder.pdf>

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON D C 20460

THE ADMINISTRATOR

The Honorable Rick Snyder
Governor of Michigan
P.O. Box 30013
Lansing, Michigan 48909

Dear Governor Snyder:

Thank you for your time today to talk about our shared concerns for the people of Flint. As we discussed, today I am issuing an Order, pursuant to Section 1431 of the Safe Drinking Water Act, directing the Michigan Department of Environmental Quality and the City of Flint to take immediate action to address serious and ongoing concerns with the safety of Flint's drinking water system. The U.S. Environmental Protection Agency is deeply concerned by continuing delays and lack of transparency and has determined that the actions required by the Order – the key elements of which are summarized below – are essential to ensuring the safe operation of Flint's drinking water system and the protection of public health. The Order, which has been transmitted separately, directs that the state notify the EPA in writing within one day of its intent to comply. Recognizing that you have made changes to the leadership at MDEQ, it is imperative that our respective teams set up a meeting no later than next week to begin the work that is before the state, the city and the EPA.

The EPA and other federal agencies are working closely with the state and city to address the public health emergency that is now unfolding as a result of the failure to properly operate Flint's system, leading to multiple health-based drinking water violations and unsafe lead levels in the city's drinking water. As part of these efforts, this past October the EPA established the Flint Safe Drinking Water Task Force (the "EPA Task Force"), composed of EPA scientists who are recognized experts in the field of corrosion control in drinking water systems. The EPA Task Force has provided written recommendations to the city and MDEQ, clearly addressing specific steps needed to re-optimize corrosion control, as well those needed to ensure that the system maintains optimal corrosion control throughout the transition of Flint's water supply from the Great Lakes Water Authority (Detroit) to the Karegnondi Water Authority (KWA) that the city is planning for the summer of 2016. These recommendations have been publicly posted at http://www.epa.gov/mi/flint-drinking-water-documents

As you and I discussed, some progress has been made in addressing these recommendations; but there continues to be inadequate transparency and accountability with regard to provision of test results and actions taken and those are critical for the people of Flint. In addition, there is an increasing concern about capacity to carry out the recommended actions and to safely manage Flint's drinking water system – especially in the context of the intended transition to KWA water in summer 2016. The EPA Task Force, the city, and the state have had to devote substantial effort to issues related to the planned

Recycled/Recyclable ... Printed with Vegetable Based Inks ... Postconsumer Process Chlorine Free Recycled Paper

transition from treated water purchased from Detroit to untreated water from KWA. That transition presents complex technical and managerial challenges, above and beyond those related to the immediate need to reduce lead levels in Flint's drinking water, that have serious implications for drinking water safety and public health. Finally, it must be recognized that the EPA Task Force's expertise and technical advisory role are narrowly focused on corrosion control, and that there is a much broader set of issues that must be addressed to ensure the safety of drinking water provided by the Flint system.

For these reasons, the EPA's Order requires the state and the city to take a number of actions, summarized below, to ensure that Flint's drinking water system is re-optimized for corrosion control, that the city establishes the capacity to safely and effectively operate its drinking water system, and that there is public transparency and accountability with regard to these actions:

1. Promptly provide the EPA and the public with official, public and timely responses to the recommendations of the EPA Task Force, including status and plans with regard to implementation of recommended actions.

2. Fully implement the EPA Task Force's recommendations with regard to lead sampling; promptly and continuously share the results of all lead sampling and other relevant Flint drinking water data with the EPA and the public, with proper protections for personally identifiable information; and cooperate with the independent EPA sampling effort described below.

3. Ensure, including through the provision of state resources as necessary, that the city has the full complement of qualified professionals needed to safely operate Flint's drinking water system.

4. Obtain, through a publicly transparent process and with the support of state resources as necessary, advice from independent, nationally-recognized experts on drinking water treatment, sampling, and distribution system operation – in order to ensure safe and effective management of that system and to restore public confidence.

5. Prior to implementing any transition to KWA water, make an affirmative determination, with appropriate expert advice and an opportunity for public input, that the city has the technical, managerial, and financial capacity to safely and effectively operate its drinking water system, and that all necessary infrastructure upgrades, analysis, and testing have been completed, in order to ensure a safe transition to KWA.

To help ensure transparency and accountability, the EPA will work with the city in the near term to oversee and participate in the collection of Lead and Copper Rule drinking water samples by Flint residents, will have these samples analyzed in a certified laboratory, and will provide this data to the public, with appropriate protections for personally identifiable information. Further, the EPA will conduct additional, sequential sampling at locations throughout the distribution system, which will be used to further inform the treatment optimization process. The EPA underscores that the state and city ultimately will need to work with independent recognized experts to undertake a broader effort to fully assess and verify the safety of Flint's drinking water system-wide.

The steps outlined above are essential to fulfill our shared interest in the protection of public health against further harm from drinking water contamination, and to restoring public confidence that the ongoing drinking water crisis will be promptly and fully remedied. I expect to receive prompt written notice of the state's intention to promptly and fully comply with the requirements of the Order.

Sincerely,

Gina McCarthy

cc: The Honorable Karen Weaver
Mayor of Flint

Flint Drinking Water Task Force (FTF 15-5)

Task Force Recommendations Regarding Flint Drinking Water Treatment Performance Evaluation

For protection of public health, Flint must avoid significant distribution system issues similar to those experienced following the source water switch to the Flint River and subsequent operation of Flint's water treatment plant.

The EPA Flint Safe Drinking Water Task Force recommends that Flint develop and implement a Performance Assessment Plan prior to distribution of water from the Karegnondi Water Authority (KWA) source. The plan must address how the treatment plant will be brought on-line, and how finished drinking water will be introduced to the distribution system. This plan is particularly important given the City has no experience treating the KWA-supplied water, and is operating a distribution system that is still recovering from the past upset.

Flint should work with its consultant and MDEQ to establish objective water quality and plant performance criteria. The plan must include operation of Flint's drinking water treatment plant for a reasonable period of time to treat KWA-supplied water until:

(1) the treated water meets finished water quality goals;
(2) the finished water quality is consistently maintained;
(3) potential plant operational and mechanical start-up issues are identified and addressed; and
(4) water plant operations staff are proficient in treating the new source.

KWA water should not be distributed to the public until these conditions are satisfied.

During this performance evaluation period, Flint must distribute to the public water from an alternate source. As water is already received from Detroit (Great Lakes Water Authority), that is an obvious and appropriate choice for that interim period. The length of the performance evaluation period will be dependent on the amount of time it takes for the treatment plant to consistently and reliably meet the performance criteria.

Because of similarities in source water and in treatment processes with Detroit's Huron plant, the Flint water plant will likely be configured to produce treated water with similar quality to that of the water currently being received from Detroit. Continued use of Detroit water during the performance evaluation period will minimize the risk of distribution system upsets.

We encourage Flint and the City's consultant to perform a number of assessments prior to the completion of the KWA pipeline and availability of the Lake Huron source water to expedite the plant transition period. For example, the planned bench-scale jar tests will be helpful in establishing full-scale treatment plant operating parameters. Assessment of corrosion control treatment using Detroit source water with lead pipe loop rigs in advance of switching to the KWA source may also be transferrable to the KWA source water. Pipe loops rigs operated during the performance assessment period will help predict whether lead release will be an issue when the new plant goes on line. EPA will work with the City to set up pipe loops at the Flint treatment plant.

Per our conversation a lot of these dates involve DEQ et al in which we/Treasury did not play a role i.e., someone else [DEQ] would need to confirm their accuracy.

Just quickly, items we would question from the document or need to investigate further...

12/20/12 (p.1) - we don't have the notification that is referenced

3/29/13 (p.2) – we are not aware of any veto by Kurtz.

The early offers by DWSD to reconnect were rejected because of the add'l cost, they were long term & the fact the City had executed a contract with KWA. On Jan 12 '15 they waived the reconnection fee but there were still issues re the length/term of the commitment.

3/12/15 – the Veolia report did mention corrosion control but the focus was on TTHM which was chlorination issue not related to the lead problem. I believe Treasury funded the study.

Summary of Flint Water Date Timeline and Background Information

Overall

- The health and welfare of Flint residents is a top priority and Governor Snyder is committed to a coordinated approach with resources from state agencies to address all aspects of this situation.
- Governor Snyder has requested support from the Federal Emergency Management Agency (FEMA) to coordinate with other federal agencies to provide resources to Flint as we work on short-term and long-term solutions for residents.
- About a month after Governor Snyder became aware that the city of Flint's water showed elevated lead levels and that the state's handling of the situation was being questioned, he requested funding to switch the source back to the Great Lakes Water Authority and appointed an independent task force to identify possible missteps and areas for improvement.
- On Jan. 11 Gov. Snyder created the Flint Water Interagency Coordinating Committee (FWIACC), which will bring together a wide range of experts to work on long-term solutions to the Flint water situation and ongoing public health concerns affecting residents. The FWIACC is made up of experts from government and the Flint community and will set a course of action to remedy the water situation and resulting health issues, and carry on long after the emergency declaration expires.
- The independent Flint Water Task Force is continuing a full review of all local, state and federal actions that led to the current situation in Flint. A detailed report will be released upon completion.

In response to initial findings from the Flint Water Task Force, Governor Rick Snyder accepted the resignation of the Director of the Michigan Department of Environmental Quality.

Here is a summary timeline of the Flint water events:

2006

January: Discussions regarding Karegnondi Water Authority start.

2011

July: Flint receives the results of a study they commissioned examining the feasibility of processing water from the Flint River in the Flint Water Treatment plant. That analysis says that getting the plant up to speed could take as long as five years and nearly $50 million.

November 8: The State of Michigan declares a financial emergency in Flint.

November 29: Governor Snyder appoints Flint's first Emergency Manager, Michael Brown.

2012

December 20: The City of Flint notifies the Department of Treasury that it is no longer considering using the Flint River as a primary water source.

2013

March 25: Flint City Council votes on a resolution presented to them by Emergency Manager Ed Kurtz to join the Karengondi Water Authority. Although the council approves the resolution 7-1, the council alters the quantity of water to be purchased from KWA before they vote.

March 29: Flint Emergency Manager Ed Kurtz vetoes Flint City Council's changes to the KWA resolution and signs an Executive Order to join KWA.

April 12: State of Michigan approves of the decision for Flint to join KWA.

April 16: City of Flint Emergency Manager Ed Kurtz signs agreement to switch from Detroit Water and Sewerage Department water source to KWA. DWSD sets termination of Flint water service for April 17, 2014.

April 17: DWSD says it will stop selling water to the City of Flint in April 2014.

June: Flint notifies the DEQ of intent to operate the Flint Water Treatment Plant full-time using Flint River for drinking water.

2014

February 12: DWSD writes a letter offering to continue to provide service after April 2014.

Mid-March: City of Flint decides to use the Flint River as a water source.

April 4: Flint files its application with DEQ for a permit to treat Flint River water. Reportedly, DEQ normally takes 30 to 45 days to approve these permits.

April 10: DEQ issues Flint Water Treatment Plant construction permits for full-time operation enhancements.

April 18: DEQ visits the Flint Water Treatment Plant to ensure the permitted upgrades have been completed.

April 25: City of Flint switches to Flint River water.

July: DEQ begins the first six-month Flint lead-copper monitoring report. Part of EPA corrosion control protocol. Although DEQ is requiring the city to conduct lead and copper monitoring, they are not requiring the city's water treatment plant to use any form of corrosion control, which would cost about $60 a day.

October: GM stops using Flint water because of corrosion problems.

Mychugh

December: First round of lead-copper monitoring results come back at 6 ppb. Flint's two prior lead results were 0 ppb. Although these results were due January 10, 2015, they were not finalized until February 27, 2015.

2015

January 1: DEQ begins second six-month Flint lead/copper monitoring period.

January 9: UM-Flint begins testing its water and ultimately finds elevated lead levels in water on campus. They alert city officials.

January 12: DWSD offers Flint's emergency manager a waiver of the $4 million reconnection fee to switch back to Detroit water.

January 26: Flint releases its Capital Improvement Plan, which includes provisions for a phosphoric acid feed system for corrosion control.

February 26: The EPA discusses a resident's water sample testing results with the DEQ. High levels of lead (104 ppb) were found in the water at the residence.

February 27: DEQ responds to the EPA saying that the Flint Water Treatment Plant has an optimized corrosion control program.

February: EPA offers to send a corrosion control expert to Flint, and DEQ ignores the offer.

March 12: Consultant Veolia, which was hired by Flint's emergency manager, releases its final water quality report for Flint that includes the recommendation for corrosion control.

March 23: Flint City Council votes 7-1 to return to DWSD water. The city's Emergency Manager does not approve the switch, so the city continues to rely exclusively on the Flint River for water.

April 24: DEQ indicates no corrosion chemical (orthophosphate) in place. DEQ staff were following an incorrect interpretation the EPA protocol for two six month testing periods (to end in July), which requires corrosion control.

May 28: Sample results from the residence noted with high lead levels on Feb. 26 show lead levels improved after a new copper service line installation.

June 24: EPA official Miguel Del Toral releases a memo about high lead levels in Flint.

July 9: Flint water treatment official emails DEQ admitting that Flint was in violation for having two few samples. The deadline for the January-June 2015 report is July 10.

July 10: DEQ staffer replies to Flint water treatment official saying that DEQ was "discussing options" regarding the number of samples Flint was required to collect.

July 13: DEQ spokesman Brad Wurfel says, "anyone who is concerned about lead in the drinking water in Flint can relax."

July 21: A conference call between EPA and DEQ officials reveals that EPA experts do not agree with DEQ's interpretation of the Lead and Copper Rule with respect to corrosion control requirements.

July 28: Flint WTP sends a lead and copper report to DEQ. Its results are above the EPA action level, but this report is ultimately labeled a draft.

July 28: Excerpt response from Childhood Lead Poisoning Prevention program head:

"We compared lead testing rates and lead testing results to the same time frame for the previous 3 years, to see if there were any patterns that suggested that there were increased rates of lead poisoning after the water supply was switched.

- Lead testing rates remained about the same from year to year
- There was a spike in elevated blood lead tests from July-September 2014
- However that pattern was not terribly different from what we saw in the previous three years,

especially in 2011-2012 (we are working with our Epidemiologist to statistically verify any significant differences).

- We commonly see a 'seasonal effect' with lead, related to people opening and closing windows more often in the summer, which disturbs old deteriorating paint on the windows, sills and sashes. Window fans frequently blow and spread the lead dust from the deteriorating paint to other parts of the room/house. We suspect that the summer data spike may be related to this effect.
- If the home water supply lines and/or river water were contributing to elevated blood lead tests, we expected that the increased rates would extend beyond the summer, but they drop quite a bit from September to October, stayed low over the winter, and are just starting to tail up again in the spring of 2015.

"So upon review, we don't believe our data demonstrates an increase in lead poisoning rates that might be attributable to the change in water source for Flint. We recognize that lead exposure via the water is only a small piece of what may be happening for families in Flint, however, we hope the information is helpful."

August 4: Meeting with Governor's Office and Flint pastors.

August 17: DEQ notifies the Flint WTP of the second six-month lead/copper monitoring results that show lead levels at 11 ppb. These results reflect an increase above the last report, which had results of 6 ppb, and the two most recent pre-switch results, which had results of 0 ppb. DEQ arrives at 11 ppb result after it, unprompted, removes two high-lead samples from the pool. If those samples are included, Flint's lead levels would be above the EPA action level.

August 23: Virginia Tech researcher, Marc Edwards, notifies the DEQ that he will begin a study of the City of Flint water quality.

August 24: Dr. Mona Hanna Attisha from Hurley Hospital contacts Genesee County Health Department for blood lead level data/information.

August 28: Concerned Pastors announce water filter giveaway in Flint.

September 1: Concerned Pastors holds giveaway of 1,500 lead-reducing water filters in Flint, which was coordinated by Governor's Office.

September 1: Virginia Tech professor Marc Edwards releases an independent analysis of Flint water finding elevated lead levels.

September 2: Virginia Tech researcher, Marc Edwards, indicates that the corrosiveness of the Flint water is causing lead to leach into the residents' water.

September 24: Dr. Mona Hanna-Attisha of Hurley Medical Center issues study showing high blood lead levels in City of Flint children.

September 24: DHHS spokeswoman says Dr. Mona Hanna-Attisha's lead data are a seasonal anomaly.

September 25: Flint issues lead advisory regarding drinking water.

September 27: Free Press analyzes state lead data and finds elevated levels, confirming Dr. Hanna-Attisha's results.

September 27: Governor's spokeswoman called Hurley's lead data "spliced and diced."

September 28: DEQ spokesman Brad Wurfel comments on Dr. Edwards's results saying, "this group specializes in looking for high lead problems. They pull that rabbit out of that hat everywhere they go."

September 29: Dr. Eden Wells, State Medical Officer, contacts Dr. Mona Hanna Attisha regarding her study results.

September 30: Briefing to Director Lyon comparing Lead Copper Rule Testing (EPA protocol) and Marc Edwards protocol.

October 1: Michigan Department of Health and Human Services confirms results of Hurley Medical Center Study.

October 1: DHHS provides information for Flint Water website, including the following documents: Parent Handbook: Is Your Child Safe From Lead Poisoning, Blood Lead Level Quick Reference for Primary Care Providers, Lead Screening & Testing for Safe, Healthy Michigan Kids, and finally, Pregnant and Nursing Mothers: What You Need to Know.

October 1: City of Flint, Genesee County Health Department urge residents to not drink water and issues "Do Not Drink" Advisory.

October 2: DEQ falsely claims that Flint's use of lime softeners constitutes corrosion control. Lime softeners are not traditionally considered a corrosion control measure.

October 2: DHHS determines its study results are now consistent with Hurley findings, Gov. Snyder announces comprehensive action plan to address Flint water issues. State Budget Office approval to use carryover emergency funds and transfer of DEQ funds to purchase water filters.

October 2: Genesee County Health Department school screening water samples collected for analysis.

October 5: DHHS announces water filters will be available to the public on Oct. 6.

October 7: Flint Technical Advisory Board meets, recommends reconnection to Detroit water.

October 8: Gov. Snyder conducts press conference in Flint, where he Snyder publicly admits that there is a problem with Flint's water for the first time and announces plan to reconnect to Detroit water.

October 8: City of Flint develops plan to reconnect to DWSD.

October 15: Gov. Snyder signs bill authorizing funding for Flint to move back to Detroit water system.

October 16: City of Flint reconnects to DWSD.

October 19: DEQ Director Dan Wyant states: "Staff made a mistake while working with the City of Flint. Simply stated, staff employed a federal (corrosion control) protocol they believed was appropriate and it was not."

October 21: Gov. Snyder announces Flint Water Task Force to review state, federal and municipal actions, offer recommendations.

October 28: DEQ issues construction permit for additional corrosion control treatment.

December 9: Flint begins adding supplemental corrosion controls to the water.

December 29: Gov. Snyder takes action on initial findings from Flint Water Task Force.

2016

January 4: Genesee County Commission votes for emergency declaration.

January 5: Gov. Snyder declares emergency for Genesee County due to the ongoing health and safety issues caused by lead in the city of Flint's drinking water. This emergency declaration did not require any preceding emergency declaration by local authorities.

- *By declaring a state of emergency, The Governor has made available all state resources in cooperation with local response and recovery operations.*
- *The declaration authorizes the Michigan State Police, Emergency Management and Homeland Security Division (MSP/EMHSD) to coordinate state efforts.*
- *In addition to the emergency declaration, the Governor activated the State Emergency Operations Center to coordinate state departments, the state's response, resources, and relief and recovery activities.*
- *The SEOC is the emergency operations center for the state of Michigan. Located in Lansing, the center is overseen by the MSP/EMHSD and coordinates response and recovery efforts by state agencies and local government. The SEOC is staffed by members of state agencies and other partners for decision making and information coordination during disasters or emergencies in the state of Michigan.*
- *On Jan. 6, the Joint Information Center was opened to lead the state's messaging and information response in coordination with the local Emergency Operations Center, Genesee County, and the City of Flint.*

January 8: Gov. Snyder and Flint Mayor Weaver meet to discuss how city and state can work on water issues.

January 9: MSP Emergency Management Division announces water resource sites established in Flint with bottled water, filters and testing kits

FEMA/National Guard/Resources

- Governor has requested support from FEMA
  - Coordinate interagency recovery plan
  - Identify federal agencies that have programs, authorities, and technical expertise to assist
  - At this point there is not a federal declaration. FEMA is not currently sending supplies to this incident.
- In addition to requesting support from FEMA, the Governor has activated the Michigan National Guard to help our local volunteers distribute supplies at the five water resource sites.
  - The resource sites are open seven days a week from 9 a.m. to 9 p.m. at Flint fire stations.

        - Fire Station #1 310 East 5th St. Flint, MI 48502
        - Fire Station #3 1525 Martin Luther King Ave. Flint, MI 48503
        - Fire Station #5 3402 Western Rd. Flint, MI 48506
        - Fire Station #6 716 West Pierson Rd. Flint, MI 48505
        - Fire Station #8 202 East Atherton Rd. Flint, MI 48507
    - There are water resource teams going door to door to ensure every resident has a water filter and additional water resources
    - Residents who need immediate help should call 211 or the governor's office at 517-335-7858
        - 211 is open 24/7/365
        - To assist the residents of Flint, Governor Snyder's office has committed ensure the constituent relations division will be open 7 days per week from 8 am until 5 pm until further notice.
- The Michigan State Police continue to lead the door to door mission of reaching every Flint resident. They are assisted by the Genesee County Sheriff's office, state of Michigan employees, and volunteers from organizations such as the American Red Cross.
- One of our top priorities is ensuring Flint residents know the resources that are available to them. We have used direct mail, automated calls, emails and bill boards to ensure residents know that information on water resources is available by calling 211 or visiting www.michigan.gov/FlintWater

Additional Information

Corrosion Control

- On October 16, 2015 Flint returned to using water supplied by DWSD. The water supplied by DWSD is a finished product ready to use and already has phosphate added to it to assist with corrosion control.

- Recognizing that the level of phosphate in the water from DWSD was designed to be a maintenance dosage, the DEQ and the Flint worked together to bring online supplemental phosphate addition so as to speed up the rebuilding of the protective layer in the distribution system.

- The DEQ is now partnering with Flint, the U.S. EPA and other governmental entities to proactively identify bottlenecks so that the eventual switch from DWSD to the KWA can be done smoothly and with safety being the top priority.

- Even with similarities between DWSD and KWA water, precautionary measures are being taken.
    - These measures will include running the Flint Water Treatment Plant on a trial basis for a period of time without sending the water into the distribution system so that all of the treatment processes can be thoroughly evaluated.
    - In addition, bench top testing will be conducted to assist in determining how the Water Treatment Plant processes can be optimized.

- The KWA will be supplying raw water. This water will need to be treated by each of the respective water supplies.

- When KWA comes on line, Flint will be receiving raw water that is similar to the raw water that DWSD treats.
    - Flint will then need to operate the water treatment plant for an (as of yet) undetermined period of time.
    - Once Flint has demonstrated that it is capable of generating water with the desired background characteristics it will then be able to then send water to the distribution system.

- For non-Flint residents who want to test their water for lead – they can purchase a testing kit from DEQ for $18 – details follow:
    - Anyone in Michigan who wants to test their water for lead can call the State Drinking Water Lab at 517-335-8184.
    - The lead testing kit costs $18, which includes the sample bottle and instructions shipped to your home as well as the lab test. It does not include the cost of shipping your filled sample bottle back to the lab.
    - Depending on the lab workload, results are typically available within 1-2 weeks.
    - Your results will include information about the EPA's lead recommendations as well as contact information for your local health department, which can help you interpret your results further, if needed.

So in re-reviewing the timeline are you guys good with the timeline other than the points I outlined/noted yesterday i.e., are there any other refinements?

Subject: Timeline Follow-up Questions

Hello Randy,

I have finished reviewing the follow-up questions that you sent to me, and after reviewing all of our documents, here are my responses:

Timeline questions follow-up

Response

1. Most of these dates involve DEP et al in which we/Treasury did not play a role i.e., someone else [DEQ] would need to confirm their accuracy

2. Just quickly, items we would question from the document or need to investigate further...

3. 12/20/12 (p.1) – we don't have the notification that is referenced
"The City of Flint notifies the Treasury that it is no longer considering using the Flint River as a water supply"

- Cannot find documentation that this occurred.
- During that time period, the Treasury was analyzing the report from Tucker and Young study, and had not even received a proposal from DWSD.

4. 3/29/13 (p.2) – we are not aware of any veto by Kurtz
"EM Kurtz Vetoes Flint City Council's changes to the KWA resolution, and signs an executive order to join KWA"

- We were able to confirm that the City Council voted to connect to water from KWA
- No Executive Order was filed with the Treasury overriding the City Council's changes to the KWA agreement, nor was there an Executive Order filed with the Treasury to join the KWA

5. The early offers by DWSD to reconnect were rejected because of the add'l cost, they were long term and the fact the city had executed a contract with KWA. On Jan 12 '15 they waived the reconnect fee but were still issues re length/term of commitment.

- Per Jerry Ambrose's memo dated 3/3/15 (attached), the water from DWSD would still cost the city an additional estimated $12M annually, which would have raised water rates by an additional 30%. As such, he strongly disagreed with restoring the water to DWSD at the time.

6. 3/12/15 – The Veolia report did mention corrosion control but the focus was on TTHM which was chlorination issue not related to the lead problem. I believe Treasury funded the study.

- No documentation was found to conclude that this study was funded by the Treasury.

MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY

PERMIT APPLICATION FOR WATER SUPPLY SYSTEMS

(CONSTRUCTION - ALTERATION - ADDITION OR IMPROVEMENT) AS DESCRIBED HEREIN

Required under the Authority of 1976 PA 399, as amended

This application becomes an Act 399 Permit only when signed and issued by authorized Michigan Department of Environmental Quality (DEQ) Staff. See instructions below for completion of this application.

1. **Municipality or Organization, Address and WSSN** that will own or control the water facilities to be constructed. This permit is to be issued to: City of Flint 4500 North Dort Highway Flint, MI 48505 **WSSN:** 02310	Permit Stamp Area (DEQ use only) MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY PERMIT NO W 140026 APR 09 2014 EXAMINED AND APPROVED FOR COMPLIANCE WITH ACT 399, P.A. 1976	
2. **Owner's Contact Person** (provide name for questions): Contact: Brent Wright Title: Plant Supervisor Phone: 810-787-6537		
3. **Project Name** (Provide phase number if project is segmented): Flint WTP Phase II, Segment II - Lime Residual Disposal	4. **Project Location** (City, Village, Township): City of Flint	5. **County** (location of project): Genesee County

ISSUED UNDER THE AUTHORITY OF THE DIRECTOR OF THE DEPARTMENT OF ENVIRONMENT QUALITY

☐ **If this box is marked see attached special conditions.**

Instructions: Complete items 1 through 5 above and 6 through 21 on the following pages of this application. Print or type all information except for signatures. Mail completed application, plans and specifications, and any attachments to the DEQ District Office having jurisdiction in the area of the proposed construction

Please Note:

a. This **PERMIT** only authorizes the construction, alteration, addition or improvement of the water system described herein and is issued solely under the authority of 1976 PA 399, as amended.
b. The issuance of this **PERMIT** does not authorize violation of any federal, state or local laws or regulations, nor does it obviate the necessity of obtaining such permits, including any other DEQ permits, or approvals from other units of government as may be required by law.
c. This **PERMIT** expires two (2) years after the date of issuance in accordance with R 325.11306, 1976 PA 399, administrative rules, unless construction has been initiated prior to expiration.
d. Noncompliance with the conditions of this permit and the requirements of the Act constitutes a violation of the Act.
e. Applicant must give notice to public utilities in accordance with 1974 PA 53, (MISS DIG), being Section 460.701 to 460.718 of the Michigan Compiled Laws, and comply with each of the requirements of that Act.
f. All earth changing activities must be conducted in accordance with the requirements of the Soil Erosion and Sedimentation Control Act, Part 91, 1994 PA 451, as amended.
g. All construction activity impacting wetlands must be conducted in accordance with the Wetland Protection Act, Part 303, 1994 PA 451, as amended.
h. Intentionally providing false information in this application constitutes fraud which is punishable by fine and/or imprisonment.
i. Where applicable for water withdrawals, the issuance of this permit indicates compliance with the requirements of Part 327 of Act 451, Great Lakes Preservation Act.

6. **Facilities Description** – In the space below provide a detailed description of the proposed project. Applications without adequate facilities descriptions **will be returned.** SEE EXAMPLES BELOW. Use additional sheets if needed.

Improvements to the City of Flint Lime Sludge Lagoons at Bray Road to allow lime sludge from the the Flint WTP to be stored during the interim period when the plant will be treating Flint River water. The lagoons will not be needed for continuous use when the plant switches to treatment of raw water from the KWA Lake Huron Water Supply:

PHASE II, SEGMENT II - LIME RESIDUAL DISPOSAL (@BRAY ROAD):
* Plugging and abandonment of 8" inlet piping; construction of 306 LF of new 10" inlet piping; installation of bulkhead on existing outlet structure to prevent discharge to surface water.
* Clay Berm barrier improvements to separate concrete debris pile from lime sludge.
* Construction of new decant tower structure, 8" gravity sewer, and decant pump station (duplex submersible) with CO2 feed system for pH adjustment. Vortex impeller pumps (2) shall each be rated at 140 gpm at 22' TDH; CO2 feed consists of 6 ton storage tank, 15 pph pH controlled feed system, SS gas piping, and diffusers installed in the decant tower.
* Construction of approx. 3,800 LF of 6" HDPE decant forcemain and connection to existing City santiary sewer system.

EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES	
Water Mains	500 feet of 8-inch water main in First Street from Main Street north to State Street. **OR** 250 feet of 12-inch water main in Clark Road from an existing 8-inch main in Third Avenue north to a hydrant.
Booster Stations	A booster station located at the southwest corner of Third Avenue and Main Street, and equipped with two, 15 Hp pumps each rated 150 gpm @ 200 feet TDH. Station includes backup power and all other equipment as required for proper operation.
Elevated Storage Tank	A 300,000 gallon elevated storage tank located in City Park. The proposed tank shall be spherical, all welded construction and supported on a single pedestal. The tank shall be 150 feet in height, 40 feet in diameter with a normal operating range of 130 – 145 feet. The interior coating system shall be ANSI/NSF Standard 61 approved or equivalent. The tank will be equipped with a cathodic protection system, and includes a tank level control system with telemetry.
Chemical Feed	A positive displacement chemical feed pump, rated at 24 gpd @ 110 psi to apply a chlorine solution for Well No. 1. Chlorine is 12.5% NaOCL. ANSI/NSF Standard 60 approved and will be applied at a rate of 1.0 mg/l of actual chlorine.
Water Supply Well	Well No. 3, a 200 foot deep well with 170 feet of 8-inch casing and 30 feet of 8-inch, 10 slot screen. The well will be equipped with a 20 Hp submersible pump and motor rated 200 gpm @ 225 feet TDH, set at 160 feet below land surface.
Treatment Facilities	A 5 million gpd water treatment plant located at the north end of Second Avenue. The facility will include 6 low service pumps, 2 rapid mix basins, 4 flocculation/sedimentation basins, 8 dual media filters, 3 million gallon water storage reservoir and 6 high service pumps. Also included are chemical feed pumps and related appurtenances for the addition of alum, fluoride, phosphate and chlorine.

General Project Information – Complete all boxes below.

7. Design engineer's name, engineering firm, address, phone number, and email address:	8. Indicate who will provide project construction inspection:
Jeremy N. Nakashima, PE Lockwood, Andrews & Newnam, Inc. 1 Oakbrook Terrace, Suite 207 Oakbrook Terrace, IL 60181 630-495-4123 / jnnakashima@lan-inc.com	☒Organization listed in Box 1. ☒Engineering firm listed in Box 7. ☐Other - name, address, and phone number listed below.

9. Is a basis of design attached?
☒YES ☐NO

If no, briefly explain why a basis of design is not needed. Submitted previously under separate cover.

10. Are sealed and signed engineering plans attached?
☒YES ☐NO

If no, briefly explain why engineering plans are not needed. Plans and specs submitted previously under separate cover.

11. Are sealed and signed construction specifications attached?
☒YES ☐NO

If specifications are not attached, they need to be on file at DEQ.

12. Were Recommended Standards for Water Works, Suggested Practice for Water Works, AWWA guidelines, and the requirements of Act 399 and its administrative rules followed?
☒YES ☐NO

If no, explain which deviations were made and why.

13. Are all coatings, chemical additives and construction materials ANSI/NSF or other adequate 3rd party approved?
☒YES ☐NO

If no, describe what coatings, additives or materials did not meet the applicable standard and why.

14. Are all water system facilities being installed in the public right-of-way or a dedicated utility easement? (For projects not located in the public right-of-way, utility easements must be shown on the plans.)
☐YES ☒NO

If no, explain how access will be obtained. Most work will be on City owned property, except forcemain.

15. Is the project construction activity within a wetland (as defined by Section 324.30301(d)) of Part 303, 1994 PA 451?
☐YES ☒NO

If yes, a wetland permit must be obtained.

16. Is the project construction activity within a 100-year floodplain (as defined by R 323.1311(e)) of Part 31, 1994 PA 451, administrative rules?
☐YES ☒NO

If yes, a flood plain permit must be obtained.

17. Is the project construction activity within 500 feet of a lake, reservoir, or stream?
☒YES ☐NO

If yes, a Soil and Erosion Control Permit must be obtained or indicate if the owner listed in box 2 of this application is an Authorized Public Agency (Section 10 of Part 91, 1994 PA 451) ☐ Owner is APA.

18. Will the proposed construction activity be part of a project involving the disturbance of five (5) or more acres of land?
☐YES ☒NO
If yes, is this activity regulated by the National Pollutant Discharge Elimination System storm water regulations?
☐YES: NPDES Authorization to discharge storm water from construction activities must be obtained.

☐NO: Describe why activity is not regulated:
Please call 517-241-8993 with questions regarding the applicability of the storm water regulations.

19. Is the project in or adjacent to a site of suspected or known soil or groundwater contamination?
☐YES ☒NO

If yes, attach a copy of a plan acceptable to the DEQ for handling contaminated soils and/or groundwater disturbed during construction. Contact the local DEQ district office for listings of Michigan sites of environmental contamination.

20. IF YOU ARE A CUSTOMER/WHOLESALE/BULK PURCHASER, COMPLETE THE FOLLOWING

1) Name and WSSN of source water supply system (seller) _____

2) Does the water service contract require water producer/seller to review and approve customer/wholesale/bulk purchaser water system construction plans?
☐YES ☐NO

If yes to #2, the producer/seller approval letter must be attached when submitted to DEQ.

21. **Owner's Certification** The owner of the proposed facilities or the owner's authorized representative shall complete the owner's certification. It is anticipated that the owner will either be a governmental agency (city, village, township, county, etc.) or a private owner (individual, company, association, etc.) of a Type I public water supply.

OWNER'S CERTIFICATION

I, BRENT F. WRIGHT (print) (name), acting as the WATER PLANT SUPERVISOR (print) (title/position) for CITY OF FLINT (print) (entity owning proposed facilities) certify that this project has been reviewed and approved as detailed by the Plans and Specifications submitted under this application, and is in compliance with the requirements of 1976 PA 399, as amended, and its administrative rules.

Signature* 3-31-2014 Date (810) 787-6537 Phone

*Original signature only, no photocopies will be accepted.

PROJECT BASIS OF DESIGN – FOR WATER MAIN PROJECTS

PROJECT NAME: _____

For this PROJECT the following information must be provided per Act 399 unless waived by the Department. For projects other than water main installation, or if additional space is needed, attach separate sheet(s) with detailed Basis of Design calculations.

A. A general map of the initial and ultimate service areas
☐ Included on engineering plans ☐ Attached separately

B. Number of service connections served by this permit application _____

C. Total number of service connections ultimately served by entire project _____

D. Residential Equivalent Units (REUs) served by this permit application _____

E. Total Residential Equivalent Units (REUs) ultimately served by entire project _____

F. Water flow rates for proposed project based on REUs listed in "D' and "E" above

1. Initial design average day flow (mgd) _____
2. Initial design maximum day flow (mgd) _____
3. Total design average day flow (mgd) _____
4. Total design maximum day flow (mgd) _____
5. Required fire flows: (1) _____ gpm for _____ hours

G. Actual flows and pressures of existing system at the connection point(s) (2)
_____ gpm at _____ psi
_____ gpm at _____ psi
_____ gpm at _____ psi
_____ gpm at _____ psi

H. Estimated minimum flows and pressures within the proposed water main system (3) _____ gpm at _____ psi

(1) Every water system must decide what levels of fire fighting flows they wish to provide. Fire flow should be appropriate for the area (residential, commercial, industrial) being served by the project. Typical fire flow rates can be obtained from the water supply, local fire dept., ISO or AWWA. The water system must then be designed to be able to provide the required fire flows while maintaining at least 20 psi in all portions of the distribution system.

(2) Flows and pressures at the connection points must be given to determine if the existing water main(s) are able to deliver water to the new service area. These numbers can be obtained from a properly modeled and calibrated distribution system hydraulic analysis or hydrant flow tests performed in the field. If more than one connection is proposed, list as needed.

(3) List what the estimated minimum flows can be expected in the proposed water mains based on estimated water demands, head losses, elevation changes and other factors that may affect flows, such as dead end mains.

PERMIT APPLICATION FOR WATER SUPPLY SYSTEMS

(CONSTRUCTION - ALTERATION - ADDITION OR IMPROVEMENT) AS DESCRIBED HEREIN

Required under the Authority of 1976 PA 399, as amended

This application becomes an Act 399 Permit only when signed and issued by authorized Michigan Department of Environmental Quality (DEQ) Staff. See instructions below for completion of this application.

1. Municipality or Organization, Address and WSSN that will own or control the water facilities to be constructed. This permit is to be issued to:

City of Flint
4500 North Dort Highway
Flint, MI 48505

WSSN: 02310

2. Owner's Contact Person (provide name for questions):

Contact: Brent Wright
Title: Plant Supervisor
Phone: 810-787-6537

Permit Stamp Area (DEQ use only)

MICHIGAN DEPARTMENT OF ENVIRONMENTAL QUALITY

PERMIT NO. W 140025 APR 09 2014

EXAMINED AND APPROVED FOR COMPLIANCE WITH ACT 399, P.A. 1976

3. Project Name (Provide phase number if project is segmented):

1) Flint WTP Phase II, Sement I - Initial Watermain Cut-In / Rehabilitation; 2) Flint WTP Phase II, Segment II - Lime Residual Disposal; 3) Flint WTP Phase II, Segment III - Electrical Improvements

4. Project Location (City, Village, Township):
City of Flint

5. County (location of project):
Genesee County

ISSUED UNDER THE AUTHORITY OF THE DIRECTOR OF THE DEPARTMENT OF ENVIRONMENT QUALITY

cc:

Issued by: _____

Reviewed by: Robert Cook for MPP
for Mike Prysby

☐ **If this box is marked see attached special conditions.**

Instructions: Complete items 1 through 5 above and 6 through 21 on the following pages of this application. Print or type all information except for signatures. Mail completed application, plans and specifications, and any attachments to the DEQ District Office having jurisdiction in the area of the proposed construction.

Please Note:

a. This **PERMIT** only authorizes the construction, alteration, addition or improvement of the water system described herein and is issued solely under the authority of 1976 PA 399, as amended.
b. The issuance of this **PERMIT** does not authorize violation of any federal, state or local laws or regulations, nor does it obviate the necessity of obtaining such permits, including any other DEQ permits, or approvals from other units of government as may be required by law.
c. This **PERMIT** expires two (2) years after the date of issuance in accordance with R 325.11306, 1976 PA 399, administrative rules, unless construction has been initiated prior to expiration.
d. Noncompliance with the conditions of this permit and the requirements of the Act constitutes a violation of the Act.
e. Applicant must give notice to public utilities in accordance with 1974 PA 53, (MISS DIG), being Section 460.701 to 460.718 of the Michigan Compiled Laws, and comply with each of the requirements of that Act.
f. All earth changing activities must be conducted in accordance with the requirements of the Soil Erosion and Sedimentation Control Act, Part 91, 1994 PA 451, as amended.
g. All construction activity impacting wetlands must be conducted in accordance with the Wetland Protection Act, Part 303, 1994 PA 451, as amended.
h. Intentionally providing false information in this application constitutes fraud which is punishable by fine and/or imprisonment.
i. Where applicable for water withdrawals, the issuance of this permit indicates compliance with the requirements of Part 327 of Act 451, Great Lakes Preservation Act.

6. **Facilities Description** – In the space below provide a detailed description of the proposed project. Applications without adequate facilities descriptions **will be returned**. SEE EXAMPLES BELOW. Use additional sheets if needed.

Improvements to the City of Flint WTP to enable treatment of Flint River water on an interim basis until the KWA Lake Huron Water Supply is available for connection and use by the City of Flint:

PHASE II, SEGMENT I - INITIAL WATERMAIN CUT-IN / REHABILITATION (@WTP):
* Replace existing 25 MGD HSP #1 at Pump Station No. 4 with a new 700 HP, vertically mounted, split-case centrifugal pump rated for 15 MGD at 185' TDH. New pump suction and discharge piping, valves and supports will also be provided.
* Construction of new ozone system LOX/LIN storage facility to provide system redundancy and a minimum of 30 days chemical storage. A new concrete containment structure will be constructed adjacent to the existing LOX/LIN storage facility. The new LOX and LIN tanks will have nominal capacities of 9000 gal. and 525 gal., respectively.
* Installation of Midpoint Chlorination. A 3"x6" dual walled chlorine solution line, approx. 665 LF, will be installed from the existing chlorine room at Pump Station No. 4 to a diffuser in the filter influent channel at Plant 2. The chlorine gas feed system shall consist of four 500 ppd feed systems (total 2000 ppd) to be installed by City personnel. Each 500 ppd system consists of a ton cylinder mounted vacuum regulator, control panel, ejector, and misc. piping, tubing & valves.
* Approx. 850 LF 42" raw watermain connection from existing 48" and 36" mains that feed the plant to convey KWA raw water to the Ozone Building. Work includes a 54x48 cross to make the initial connection at the Ozone Building, buried yard butterfly valves, access and air release manholes, and cathodic protection test stations.

PHASE II, SEGMENT III - ELECTRICAL IMPROVEMENTS (@WTP):
* Plant substation improvements, including two new 2500 kW transformers and switchgear. The substation switchgear has been fabricated with two utility main breakers, one generator breaker and two tie breakers. So provisions are in place for a future permanent generator. If a temporary generator is needed in the event of an outage to both independent utility services, provisions are in place to temporary cable a large portable generator through a manhole, duct bank and cable tray system to the generator breaker in the substation switchgear
* Plant 2 electrical improvements, including two new 500 kW transformers and switchgear.
* Pump Station No. 4 improvements, including new switchgear and VFD for HSP #1.

EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES – EXAMPLES	
Water Mains	500 feet of 8-inch water main in First Street from Main Street north to State Street. **OR** 250 feet of 12-inch water main in Clark Road from an existing 8-inch main in Third Avenue north to a hydrant.
Booster Stations	A booster station located at the southwest corner of Third Avenue and Main Street, and equipped with two, 15 Hp pumps each rated 150 gpm @ 200 feet TDH. Station includes backup power and all other equipment as required for proper operation.
Elevated Storage Tank	A 300,000 gallon elevated storage tank located in City Park. The proposed tank shall be spherical, all welded construction and supported on a single pedestal. The tank shall be 150 feet in height, 40 feet in diameter with a normal operating range of 130 – 145 feet. The interior coating system shall be ANSI/NSF Standard 61 approved or equivalent. The tank will be equipped with a cathodic protection system, and includes a tank level control system with telemetry.
Chemical Feed	A positive displacement chemical feed pump, rated at 24 gpd @ 110 psi to apply a chlorine solution for Well No. 1. Chlorine is 12.5% NaOCL, ANSI/NSF Standard 60 approved and will be applied at a rate of 1.0 mg/l of actual chlorine.
Water Supply Well	Well No. 3, a 200 foot deep well with 170 feet of 8-inch casing and 30 feet of 8-inch, 10 slot screen. The well will be equipped with a 20 Hp submersible pump and motor rated 200 gpm @ 225 feet TDH, set at 160 feet below land surface.
Treatment Facilities	A 5 million gpd water treatment plant located at the north end of Second Avenue. The facility will include 6 low service pumps, 2 rapid mix basins, 4 flocculation/sedimentation basins, 8 dual media filters, 3 million gallon water storage reservoir and 6 high service pumps. Also included are chemical feed pumps and related appurtenances for the addition of alum, fluoride, phosphate and chlorine.

General Project Information – Complete all boxes below.

7. Design engineer's name, engineering firm, address, phone number, and email address:

Jeremy N. Nakashima, PE
Lockwood, Andrews & Newnam, Inc.
1 Oakbrook Terrace, Suite 207
Oakbrook Terrace, IL 60181
630-495-4123 / jnnakashima@lan-inc.com

8. Indicate who will provide project construction inspection:
☒Organization listed in Box 1.
☒Engineering firm listed in Box 7.
☐Other - name, address, and phone number listed below.

9. Is a basis of design attached?
☒YES ☐NO

If no, briefly explain why a basis of design is not needed. Submitted previously under separate cover.

10. Are sealed and signed engineering plans attached?
☒YES ☐NO

If no, briefly explain why engineering plans are not needed. Plans and specs submitted previously under separate cover.

11. Are sealed and signed construction specifications attached?
☒YES ☐NO

If specifications are not attached, they need to be on file at DEQ.

12. Were Recommended Standards for Water Works, Suggested Practice for Water Works, AWWA guidelines, and the requirements of Act 399 and its administrative rules followed?
☒YES ☐NO

If no, explain which deviations were made and why.

13. Are all coatings, chemical additives and construction materials ANSI/NSF or other adequate 3rd party approved?
☒YES ☐NO

If no, describe what coatings, additives or materials did not meet the applicable standard and why.

14. Are all water system facilities being installed in the public right-of-way or a dedicated utility easement? (For projects not located in the public right-of-way, utility easements must be shown on the plans.)
☐YES ☒NO

If no, explain how access will be obtained. Most work will be on City owned property, except forcemain.

15. Is the project construction activity within a wetland (as defined by Section 324.30301(d)) of Part 303, 1994 PA 451?
☐YES ☒NO

If yes, a wetland permit must be obtained.

16. Is the project construction activity within a 100-year floodplain (as defined by R 323.1311(e)) of Part 31, 1994 PA 451, administrative rules?
☐YES ☒NO

If yes, a flood plain permit must be obtained.

17. Is the project construction activity within 500 feet of a lake, reservoir, or stream?
☒YES ☐NO

If yes, a Soil and Erosion Control Permit must be obtained or indicate if the owner listed in box 2 of this application is an Authorized Public Agency (Section 10 of Part 91, 1994 PA 451) ☐ Owner is APA.

18. Will the proposed construction activity be part of a project involving the disturbance of five (5) or more acres of land?
☐YES ☒NO
If yes, is this activity regulated by the National Pollutant Discharge Elimination System storm water regulations?
☐YES: NPDES Authorization to discharge storm water from construction activities must be obtained.

☐NO: Describe why activity is not regulated:
Please call 517-241-8993 with questions regarding the applicability of the storm water regulations.

19. Is the project in or adjacent to a site of suspected or known soil or groundwater contamination?
☐YES ☒NO

If yes, attach a copy of a plan acceptable to the DEQ for handling contaminated soils and/or groundwater disturbed during construction. Contact the local DEQ district office for listings of Michigan sites of environmental contamination.

20. IF YOU ARE A CUSTOMER/WHOLESALE/BULK PURCHASER, COMPLETE THE FOLLOWING

1) Name and WSSN of source water supply system (seller) _____

2) Does the water service contract require water producer/seller to review and approve customer/wholesale/bulk purchaser water system construction plans?
☐YES ☐NO

If yes to #2, the producer/seller approval letter must be attached when submitted to DEQ.

21. **Owner's Certification** The owner of the proposed facilities or the owner's authorized representative shall complete the owner's certification. It is anticipated that the owner will either be a governmental agency (city, village, township, county, etc.) or a private owner (individual, company, association, etc.) of a Type I public water supply.

OWNER'S CERTIFICATION

I, BRENT F. WRIGHT (print) (name), acting as the WATER PLANT SUPERVISOR (print) (title/position) for

CITY OF FLINT (print) (entity owning proposed facilities) certify that this project has been reviewed and approved as detailed by the Plans and Specifications submitted under this application, and is in compliance with the requirements of 1976 PA 399, as amended, and its administrative rules.

Signature* 3-31-2014 Date (810)787-6537 Phone

*Original signature only, no photocopies will be accepted.

PROJECT BASIS OF DESIGN – FOR WATER MAIN PROJECTS

PROJECT NAME: _____

For this PROJECT the following information must be provided per Act 399 unless waived by the Department. For projects other than water main installation, or if additional space is needed, attach separate sheet(s) with detailed Basis of Design calculations.

A. A general map of the initial and ultimate service areas
☐Included on engineering plans ☐Attached separately

B. Number of service connections served by this permit application _____

C. Total number of service connections ultimately served by entire project _____

D. Residential Equivalent Units (REUs) served by this permit application _____

E. Total Residential Equivalent Units (REUs) ultimately served by entire project _____

F. Water flow rates for proposed project based on REUs listed in "D' and "E" above

1. Initial design average day flow (mgd) _____
2. Initial design maximum day flow (mgd) _____
3. Total design average day flow (mgd) _____
4. Total design maximum day flow (mgd) _____
5. Required fire flows: (1) _____ gpm for _____ hours

G. Actual flows and pressures of existing system at the connection point(s) (2)
_____ gpm at _____ psi
_____ gpm at _____ psi
_____ gpm at _____ psi
_____ gpm at _____ psi

H. Estimated minimum flows and pressures within the proposed water main system (3) _____ gpm at _____ psi

(1) Every water system must decide what levels of fire fighting flows they wish to provide. Fire flow should be appropriate for the area (residential, commercial, industrial) being served by the project. Typical fire flow rates can be obtained from the water supply, local fire dept., ISO or AWWA. The water system must then be designed to be able to provide the required fire flows while maintaining at least 20 psi in all portions of the distribution system.

(2) Flows and pressures at the connection points must be given to determine if the existing water main(s) are able to deliver water to the new service area. These numbers can be obtained from a properly modeled and calibrated distribution system hydraulic analysis or hydrant flow tests performed in the field. If more than one connection is proposed, list as needed.

(3) List what the estimated minimum flows can be expected in the proposed water mains based on estimated water demands, head losses, elevation changes and other factors that may affect flows, such as dead end mains.

To: Salzman, Eric (NBCUniversal)
Cc: Stanton, Terry A. (Treasury); Brown, Melanie (DEQ)
Subject: RE: Cost Estimate for Flint

Hi Eric,

It's my understanding the City of Flint and their public works team have done previous infrastructure studies that you can see. The $500,000 that was put into the January supplemental is for a new study, to be conducted by an outside engineering firm yet to be determined, so there isn't anything to see yet on the new study. I've looped in Melanie Brown at DEQ to see if she has anything else to add regarding the new study, but it's my understanding that it will be done by outside experts in conjunction with the city.

Thanks!

Kurt

This is fantastic. Thank you so much for the detailed response. Is there anywhere I can read more background on the infrastructure study?

Cc: Stanton, Terry A. (Treasury)
Subject: Cost Estimate for Flint

Hi Eric,

Terry Stanton at Treasury passed along your question about cost estimates for Flint. To address immediate needs, two supplemental budget requests for Flint have been made for the current year budget. The first was a supplemental of $9.3 million approved by the Legislature in October which included funding for emergency water services for Flint to reconnect to Detroit, water inspections and public health monitoring, water filters, blood screening and plumbing inspections in educational and health facilities. The second supplemental was submitted to the Legislature last week for $28 million and it's expected to be passed this week. The $28 million January supplemental includes funding for bottled water, water filters, replacement filter cartridges, fixture replacements in schools, daycares and hospitals, treatment of children, experts to asses potential linkages to Legionnaire's disease, an infrastructure integrity study using outside experts, as well as funding for lead abatement in Flint homes, additional nurses in Flint schools, and epidemiologists to analyze blood lead levels. Again, these two supplementals to the current year budget are for the immediate needs. When it comes to the longer term needs for infrastructure and health that you are referencing, the governor will be releasing his fiscal year 2017 budget recommendation on Feb. 10 where he will outline additional funding for Flint in the next fiscal year. The results of the infrastructure study which was included in the January supplemental will help to determine the long-term costs for replacing pipes and infrastructure.

I hope this helps.

Thank you.

Subject: MSNBC inquiry - cost estimate for Flint repair

Hi Terry

Is there any big picture cost estimate for Flint at this point?
Be it pipe replacement, current water delivery, health treatment to come ... looking for any sense of what kind of budgeting is being done for the near and long term future.

Thanks

Eric

>
> Colleagues,
>
> As you know, the Governor has declared a state of emergency for Genesee County due to the ongoing health and safety issues caused by lead in the City of Flint's drinking water. The State has established an incident command operations center at the State Emergency Operations Center (SEOC). Louis Burgess, our Emergency Management Coordinator, and other staff have been representing MDE at the SEOC. This is currently operating seven days a week. MDE leadership is being kept up to date of the State's on-going efforts in Flint. A Joint Information Center (JIC) has been established. All messages regarding Flint and water safety issues are to be coordinated through the JIC.

Any MDE staff conducting business in the Flint area should be aware that there is some resentment towards the State concerning the handling of the water crises. Staff should not travel in State-owned cars through Flint neighborhoods. Any MDE logo clothing should be avoided. (This is more an issue for uniformed staff of other state agencies.)

State officials from the Department of Environmental Quality have been working with schools, child care centers, and other institutions to ensure that they are taking proper safety precautions related to water. The State is actively coordinating water filter distribution, water quality testing, blood level testing, and distribution of bottled water with local county emergency managers. MDE staff in the Office of School Support Services have also been working with child nutrition program providers since last October. OSSS staff continues to reach out to Flint-area MDE-approved child nutrition program providers (both school meals and Child and Adult Care food programs) to ensure they are aware of available resources regarding water quality.

The State is maintaining an up-to-date website on the Flint water crises at http://Michigan.gov/Flintwater. The "Taking Action of Flint Water" link on the MDE Homepage (left side) will take you to the same webpage.

If you have any communication going out to the field that is related to the Flint water crises, you should coordinate your message with Marty Ackley. Marty will coordinate with the JIC to ensure that we have a consistent, accurate message.

If you have any questions on the Flint water crises, feel free to contact me or Louis. If you are interested in this issue, be aware that Dr. Eden Wells will be making a presentation on the Flint water crises tomorrow at the State Board meeting (Tuesday, January 12). Dr. Wells is the Chief Medical Executive of the Michigan Department of Health and Human Services (MDHHS).

All:

Here is what I have that specifically pertains to the City's Water System:

1. **April 10, 2015** – Lockwood, Andrews and Newnam for GAC Filter procurement and construction - **$1,601,740.**
2. **December 10, 2014** – Metron-Farnier for water meter purchases - **$110,811.**
3. **August 28, 2014** – Idexx Distribution for water testing supplies - **$70,000.**
4. **April 24, 2014** – Ozonia North America for Water Plant ozone generators - **$55,815.**
5. **March 18, 2014** – Zito Construction for initial watermain cut-in at the Water Plant - **$676,300.**
6. **March 11, 2014** – Metron-Farnier for water meter purchases - **$199,645.**
7. **February 25, 2014** – McNaughton-McKay for electrical distribution upgrades at the Water Plant - **$16,850.**
8. **February 25, 2014** – Xylem Water Solution for a pump and large motor purchase - **$277,000.**
9. **February 25, 2014** – Newkirk for replacement of obsolete electrical equipment at the Water Plant - **$852,000.**
10. **February 20, 2014** – Purchase of High Voltage Distribution equipment for the Water Plant - **$225,000.**
11. **December 16, 2013** – McNaughton-McKay for Water Plant Transformer Upgrade - **$238,306.**
12. **November 21, 2013** – Wachs Valve and Hydrant Services for Water Valve Exercising/Maintenance Program - **$60,000.**
13. **November 21, 2013** – HD Supply Waterwork for Water Distribution Parts - **$200,000.**
14. **November 15, 2013** - McNaughton-McKay for Cedar St. Pumping Station Switchgear Upgrades - **$505,000.**
15. **November 15, 2013** - McNaughton-McKay for Water Plant Electrical Distribution Upgrades - **$1,512,000.**
16. **November 15, 2013** - Lockwood, Andrews and Newnam for Water Plant Operations implementation - **$1,133,800.**
17. **November 14, 2013** - McNaughton-McKay for Variable Frequency Drive - **$349,710.**

18. **September 24, 2013 –** Ace-Saginaw for Asphalt Paving Materials - **$194,062.**
19. **August 27, 2013** – Ace-Saginaw for Paving at the Water Service Center - **$124,236.**
20. **August 27, 2013** – Rowe Engineering for Engineering Services - **$149,600.**

Rob is also compiling his list. This will be forwarded as soon as it is finished.

If there are any questions, let me know.

Subject: FW: Treasury approvals regarding Flint WTP

This is from Ananich's office.....

From: Sarah Studley [mailto:SStudley@senate.michigan.gov]
Sent: Monday, January 25, 2016 12:26 PM
To: Ryan, Howard (Treasury) <RyanH1@michigan.gov>
Subject: Treasury approvals regarding Flint WTP

Howard,

My understanding is that Treasury had to sign off on any purchases in Flint over $50,000 while it was under the control of an Emergency Manager. Is it possible for me to get either a list of purchases with respect to the

Water Treatment Plant that were presented to Treasury and whether each was signed off on or rejected? Alternatively, documentation related to each would also be helpful.

Thank you,

Sarah Studley

Subject: Flint Status Update

All,

As of January 21, Rich Baird has assumed the Lead Point of Contact role for Flint. This has been communicated to the existing team working on the Flint water emergency. As of today, an office has been opened in the State of Michigan building located at 125 Union Street in downtown Flint. In addition to the individual team members listed below, a representative from DEQ, DHHS and the Department of Civil Rights will join Rich's team.

Per Rich, here is a list of the "Mission Flint" team and a summary of roles and responsibilities:

LG Calley—Will establish an office in Flint and provide input to POC Leader. He will also be focused on sustaining a quality partnership with Dr. Mona Hanna-Attisha and DHHS to attest to blood sampling protocols and interpretation, and begin executing additional monitoring/education and remediation for those impacted. He will also provide input and guidance to the EO communications team on ways to be more proactive with messaging and the public narrative (drawing attention to volunteers, community groups, and stories that are happening but not getting into the narrative).

Harvey Hollins—Harvey will continue (with R. Baird) to nurture a quality partnership with Mayor Weaver and her team, pastor groups, and provide grass roots community leadership so that we can stay acutely attuned to the needs of the Flint Community and bring resources to bear. Harvey will also serve as the co-facilitator for the FWIACC with the first meeting occurring on January 27.

Bill Nowling—Bill will step back from the role he is playing as Crisis Leader for Communications Department. Meegan Holland will work closely with LG Calley to improve (department wide) proactive efforts in messaging and narrative. Bill will approve all communications from our Flint Team. He will coordinate the Mercury team communications engagement and engage with Mark Davidoff and the Deloitte team to provide more support to Mayor Weaver (through his associate Ms. Cockrell).

Tori Sachs—Tori will continue playing a "utility" role on a variety of fronts, including supporting the philanthropic

campaign, eliciting University engagement (Community Scholars, etc.), monitoring vendors and follow up with third party validation groups, assisting with messaging and volunteer deployment, and supporting Col. Greg Durkac in tracking our critical matters and decisions organization framework.

Colonel Greg Durkac—SME for project management, logistics, and organizational frameworks for critical matters and decisions. He lives in Linden (just outside Flint) and is deferring his retirement for this assignment.

Captain Chris Kelenske--As Chris winds down from Phase 1 Emergency Stabilization, it is important he remain engaged as a spokesperson, coordination expert, and leveraging his expertise as we continue a different model of community outreach (testing, monitoring, engaging resources, etc.). He will also work with Harvey on the FWIACC and in continued community outreach.

Nat Forstner/Ben Geiger— Will take the lead on data collection, analytics, comparative interpretation and communication to Governor Snyder and principals. Need more benchmarking and historical data not just from Michigan but around the country.

Others who have agreed to engage as appropriate are Mike Finney (community outreach), Nick Khouri (treasury support and financing), Chris Rizik (Entrepreneurial recruitment and identification of venture capital/other capital) Peter Remington (Philanthropic and Campaign Strategy) and Matt Rizik (Intergovernmental relations City/County).

Clearly there will many more connection points as represented in the FWIACC but the above represent a type of "executive committee" to lead us into Phase 2 and 3 of "Mission Flint".

Please feel free to reach out to me, Rich or Jarrod if you have any questions or suggestions.

Thanks,

Beth

Subject: City of Flint Water Fund Cash Flow Attached
Attachments: City of Flint Water Fund 18 Month Cash Flow.xlsx; City of Flint Water Fund 18 Month Cash Flow.pdf

Good afternoon, Suzanne.

As Cary is out of the office this afternoon, I was instructed to provide you with the updated 18 month cash flow for the City's Water Fund for review.

There are three tabs. Assumptions for each scenario are listed. The tab "Water CF-With Variables" is set to allow users to manipulate and modify the assumptions by entering data into the grey highlighted cells.

Because reviewing the financial position of the City's Water Fund only illustrates half of the financial picture for the City's utility services, I encourage all users to be mindful of the impact that the Shears Lawsuit and Water Crisis has also had on the Sewer Fund. I will begin working on creating a cash flow for the Sewer Fund this week to be reviewed in conjunction with the Water Fund cash flow attached.

Please let me know if you have any questions regarding the information provided.

Best regards,

Jody N. Lundquist
Chief Financial Officer

CITY OF FLINT
WATER FUND
18 MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH DECEMBER 31, 2016
Actual Activity Reported through December 31, 2015

Status Quo Maintained

1. Revenue assumptions were based on YTD billing activity and current collection rates projected through FY1 and held constant into FY17
2. Assuming that the City continues to delay issuance of shut off notices, the collection rate will continue to decline drastically
3. Expenditure activity for the period January 2016-June 2016 reflect unspent funds as of December 31, 2015 divided equally over the remaining 6 months of the fiscal year
4. Expenditure activity for the period July 2016-December 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by emergency manager order
5. The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17. An amount for illustrative purposes is shown

	Until 6/30/2016	After 7/1/2016
Average Monthly Collection Rate	80%	60%
Rate Increase	0%	0%
GLWA Water Purchase $		1,333,333

CITY OF FLINT
WATER FUND
18 MONTH CASH FLOW
FOR THE PERIOD JULY 1, 2015 THROUGH DECEMBER 31, 2016
Actual Activity Reported through December 31, 2015

Assumptions Defined Below

REVENUE ASSUMPTIONS:

1. User Charges for the period January 2015-December 2016 were based on YTD billing activity and collection rates.
2. Rate increase assumptions effective March 1, 2016 and July 1, 2016 may be modified in the grey box below
3. Restoring the FY16 Master Fee Schedule rates per the amended preliminary injunction order would result in a rate increase of approximately 22% and would impact collections beginning in March 2016
4. If the Master Fee Schedule rates are restored in FY16 then any rate increase assumption for FY17 must also include 22%.
5. Issuance of shut off notices and disconnection of services has a tremendous impact on the City's ability to enforce payment for services rendered. In August, prior to the Preliminary Injunction Order the City's average monthly collection rate was 98%. The average collection rate for the period August through December 2015 has fallen to 83%, with a low point in October of 70%

EXPENDITURE ASSUMPTIONS:

1. Expenditure activity for the period January 2016-June 2016 reflect unspent funds as of December 31, 2015 divided equally over the remaining 6 months of the fiscal year
2. Expenditure activity for the period July 2016-December 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by emergency manager order
3. The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17. An amount for illustrative purposes is shown.

	Until 6/30/2016	After 7/1/2016
Average Monthly Collection Rate	85%	85%
Rate Increase	22%	27%
GLWA Water Purchase $	1,333,333	

- Regarding Rate Increases:
  FY16 has been set such that an increase would impact bills beginning in March 2016.
  Any rate increase assumption for FY17 must also include any rate assumption made for FY16
  For Example, FY16 restoration of Master Fee Schedule equals approximately 22%. Budgeted FY17 projection of 5% must be entered as 27%

January 24, 2015 Call Notes

Call arranged by Emily Barson – HHS
Included representatives from Michigan Governor's office, MDEQ, USEPA headquarters and Region 5

On the call the Governor's office requested information regarding press related to $80M in infrastructure funds going to Michigan. USEPA responded that this was the annual appropriation of Clean Water State Revolving Funds (CWSRF) and Drinking Water State Revolving Funds (DWSRF) and these funds are awarded to the state as a grant and then state provide these funds to communities primarily in the form of low interest loans. It would be up to the state to determine the amount of funds provided to Flint.

There was then discussion of the state revolving fund and options under the fund to provide resources to Flint. The State asked about the eligibility of lead service line replacement and USEPA responded that they were eligible. The state also asked about eligibility of items inside the home and USEPA indicated that this would be investigated.

Options discussed for further investigation:

- Old Debt – The Michigan Finance Authority holds approximately $20M in DWSRF Flint Debt. The state should examine any savings that could be provided to Flint on this old debt including lowering the interest rate which is at 2.5% and possible extending the term of the debt from 20 year to 30 year. The extended term may make the semi-annual payments more affordable but costs more in the long run. Also, the State could pay off a portion of the debt. The Michigan Finance Authority may also have other ideas of actions that could be taken.
- New Funding - FY15 USEPA Funding – In September 2015, the MI DWSRF program identified $35M in projects they plan to fund in 2016 and provide $5.5M in principal forgiveness for those projects. The FY15 USEPA funding allowed stated to provide 20%-30% of the grant to the state as principal forgiveness to communities. This would be approximately $5.5M-$8M. The state should investigate the ability to award Flint a DWSRF loan that provides principal forgiveness up to the maximum allowed.
- FY16 USEPA Funding – FY16 CWSRF and DWSRF allocations to states have not yet been released. It is anticipated that MI would receive a similar allocation to FY15 – in FY15 USEPA awarded approximately $60M in CWSRF and $27M in DWSRF. If Flint applies for funding, the state could provide a loan to Flint and provide principal forgiveness up to the amount allowed under the FY16 appropriation language which is 20% of the DWSRF grant. The issue is that these funds would not be available for some time if the normal state SRF process is followed. The state normally applies for the funds in summer and provides funds to communities in the fall.

All options for new funding are dependent on Flint providing detailed information on needs, prioritizing the needs, and applying for funds.

Action items:

- USEPA look into eligibility options for SRF related to internal home plumbing replacement – Peter Grevatt (USEPA)
- USEPA, Michigan Finance Authority and MDEQ to investigate SRF funding options listed above and any other possible options. – John Barton (Michigan Finance Authority), Sonya Butler (MDEQ), Steve Marquardt (USEPA R5)
    - Look for most effective, economic and efficient way to approach needs
- USEPA Finance Center offered assistance – Jim Gebhardt (USEPA)
- Investigate the ability to transfer funds from the CWSRF to the DWSRF and the pros and cons of approach
- MDEQ requested the formation of a Municipal Finance Team - The USEPA Region 5 representative is Steve Marquardt and the request was made by EPA to have Sonya Butler from MDEQ and John Barton from the Michigan Finance Authority.

Subject: Cost Estimate for Flint

Hi Eric,

Terry Stanton at Treasury passed along your question about cost estimates for Flint. To address immediate needs, two supplemental budget requests for Flint have been made for the current year budget. The first was a supplemental of $9.3 million approved by the Legislature in October which included funding for emergency water services for Flint to reconnect to Detroit, water inspections and public health monitoring, water filters, blood screening and plumbing inspections in educational and health facilities. The second supplemental was submitted to the Legislature last week for $28 million and it's expected to be passed this week. The $28 million January supplemental includes funding for bottled water, water filters, replacement filter cartridges, fixture replacements in schools, daycares and hospitals, treatment of children, experts to asses potential linkages to Legionnaire's disease, an infrastructure integrity study using outside experts, as well as funding for lead abatement in Flint homes, additional nurses in Flint schools, and epidemiologists to analyze blood lead levels. Again, these two supplementals to the current year budget are for the immediate needs. When it comes to the longer term needs for infrastructure and health that you are referencing, the governor will be releasing his fiscal year 2017 budget recommendation on Feb. 10 where he will outline additional funding for Flint in

Treasury's Role in Three Primary Areas

Flint has critical needs in many areas. We see our role in three primary areas.

- Infrastructure development and finance.
- Fiscal stability of both the water/sewer and overall city government.
    - Short term (cash)
    - Long term
- Flint's economic development.

Infrastructure Development and Finance

- Treasury's goal is to work with others to develop a long-term water infrastructure investment plan for distressed local units.
- Once a quality study is created to determine an accurate picture of the scope and cost for the necessary system improvements, Treasury is confident we can come up with a method to help finance improvements.
- We will look at alternative funding sources, including bonds, surcharges, and existing Federal and State dollars.

Fiscal Stability

- In April of 2015, Flint was on a path to exit financial emergency with its funds showing comfortable cash balances.
- The cash balance in the water system was $20 million in July 2015. Now, the system is in the red and Flint's water system will potentially be out of cash as early as November. The sewer fund faces a similar situation. Eventually this will become an obligation of the city's general fund.
- Develop strategies to stabilize near term finances of water and sewer system.
- Doing all we can to make sure Flint's water rates are affordable.
- Assist city in continuing on path to financial stability across all accounts.

Economic Development

- We need to address the long term impact of the recent months on the city's economic development.
- Start by assessing the impact on property values and business location decisions.
- Partner with economic development agencies to assist in growing Flint's economy.
- The support needs to be targeted to the needs of the city.

Flint Water Discussion Points
Updated Jan. 26

Current Issues Talking Points

Medicaid/Federal Asks

- Governor Snyder today announced that a request will be sent to the federal government that asks for all Flint residents under age 21 to receive additional healthcare services to address potential problems brought on from exposure to lead.
- We want to make sure comprehensive medical care services are available, and we hope the federal government will partner in our efforts.
- Request will include:
    - Expanded Medicaid eligibility for all residents in the impacted areas up to age 21, regardless of income level.
    - Lead-abatement programs to help minimize and/or prevent any long term adverse health problems associated with lead exposure.
    - Additional, community-based resources to ensure all children, regardless of health insurance coverage, have access to comprehensive medical treatment.

House passage of the $28 million supplemental bill (unanimous vote)

- The supplemental request includes short-term funding to address immediate needs in the city, including bottled water, filters and testing kits.
    - The supplemental request will also include funds to address the most critical needs of Flint residents.
    - The Governor has asked to completely re-open the budget proposal the administration has been working on since last fall to assess all of the resources available to provide long-term support for the health of Flint residents.
- The health and safety of Flint residents remains a top priority. The Governor has worked closely with the Legislature to encourage quick passage of the supplemental to encourage immediate action.
- We look forward to the Senate taking action on this bill this week.

General High-level talking points

- There are people in the state of Michigan that can't drink their water, and that is unacceptable to all of us. As Governor, Rick Snyder has taken responsibility, taken emergency response measures and is committed to dedicate all the resources needed to make this right for the people of Flint.

- The top priority for Governor Snyder and his administration is ensuring every Flint resident has access to clean, safe drinking water. We are committed to providing affected children and families access to medical and educational resources to ensure long-term care and treatment.

- The Flint water crisis has been a systemic failure of government at all levels: from the city of Flint, the state of Michigan, the civil servant scientists and the U.S. Environmental Protection Agency (EPA).

- The Governor has held himself and his government accountable. The Governor replaced the leadership of Michigan Department of Environmental Quality (MDEQ) and has taken disciplinary measures on the staff and civil servant scientists responsible for the crisis. Actions have been taken to ensure a new and capable team is overseeing Flint water and creating a department culture focused on the health and safety of Michigan residents. Two DEQ officials involved in the testing of Flint water have been suspended pending an investigation, in accordance with civil service rules.

- The Governor has asked to completely re-open the budget proposal the administration has been working on since last fall to assess all of the resources available to provide long-term support to the health of Flint residents. In addition, the supplemental budget request will provide funds to the city to help alleviate the need for utility shutoffs.

- Governor Snyder and his administration are committed to working in partnership with Flint Mayor Karen Weaver, independent experts, and the federal government to ensure both short-term and long-term solutions.

Resources distributed (as of 1/25/2016):

- 176,118 cases of water
- 93,048 filters
- 29,320 testing kits
- 198,552 filter cartridges

Homes visited by Flint Water Response Teams (as of 1/24/16): 37,844

To whom it may concern:

Please find the Fiscally Distressed Cities, Villages, and Townships Grant application for the City of Flint, Michigan attached. This application seeks reimbursement for the DWSD reconnection made by the City last fall and is intended to supplant the Dupont Street Project submitted by the City in October 2015.

Please let me know if the information submitted is sufficient.

Thank you.

Re: Letter of Support for Financially Distressed Cities, Villages, and Townships Grant

County: Genesee Local Unit Code: 252040

To whom it may Concern:

Please accept this letter as the City of Flint's commitment to the Michigan Department of Treasury's Financially Distressed Cities, Villages, and Townships Grant Program for the Detroit Water and Sewerage Department Reconnection reimbursement.

On October 16, 2015, the City of Flint reconnected to the Detroit Water and Sewerage Department as its source of water, ceasing the use of the Flint River. The water from the river, combined with the absence of corrosion control additives, caused severe damage to the City's water infrastructure. It negatively affected the water quality in terms of color, smell, and taste. It was the cause of several threats to the public health, most notably, the leeching of heavy metals from solder and old pipes. Many children in the City were found with elevated levels of lead in their blood, placing them in direct harm of the irreversible effects of lead poisoning. The City contributed two million dollars to a total cost of $12 million for the reconnection to Detroit, which was a safer source of water. The City seeks to recuperate this two million dollars while it faces financial challenges posed by this State of Emergency.

Even though the City has progressed to strategically reduce deficits by seeking new millages, reducing staff, and reducing services, the City still faces critical financial obstacles. The City does not have the financial stability to expend this level of resources. The FDCVT Grant is essential for the successful reimbursement of this project, which has contributed to improving the safety, reliability, and sustainability of the City's water system, so that the City can continue operations in a time of financial stress.

Respectfully,

Natasha L. Henderson, City Administrator
City of Flint, Michigan

1-26-2016
Date

Application Due Date:
October 15, 2015

Financially Distressed Cities, Villages, and Townships Application (FY 2016)

Issued under authority of 2015 Public Act 64

PART 1: APPLICANT INFORMATION

1. Applicant Name	2. Applicant Local Unit Code
City of Flint	252040
3. Applicant FEIN	**4. Applicant County**
38-6004611	Genesee

5. Mailing Address	6. City	7. State	8. ZIP Code
1101 South Saginaw	Flint	MI	48502

PART 2: PROPOSAL OVERVIEW

9. Proposal Title
Detroit

10. Estimated Start Date	11. Estimated Completion Date
06/01/2016	08/30/2016
12. Estimated Total Proposal Cost	**13. Grant Amount Requested**
$ 3,985,267.00	$ 2,000,000.00

14. Additional Local Units, if Participating in a Shared Service Project (include county and local unit code). Attach letters of support from each of the participating local units.

NA

15. Is the applicant(s) willing to devote appropriate resources and time to this proposal?

☒ Yes ☐ No If no, explain why the applicant(s) is unable to devote appropriate resources and time to the proposal.

16. Plan for Partial Funding: If full funding is not awarded, how will you fund the proposal? Can you go forward with the proposal if partial funding is awarded?

Due to the City's fiscally distressed condition, the City seeks reimbursement of the $2 million the City incurred to reconnect to the Detroit Water and Sewerage Department (DWSD) as its water supply on October 16, 2015.

PART 3: PROPOSAL CONTACT INFORMATION

Note: The proposal contact individual should be a vital part of the grant proposal and will be the Michigan Department of Treasury's contact.

17. Contact Name	18. Contact Title

City of Flint

PART 4: CONDITIONS OF PROBABLE FINANCIAL DISTRESS

23. Indicate the conditions affecting the applicant that indicate probable financial distress (check all that apply and attach proof of existence for each condition checked).

☐ 1. The governing body or the chief administrative officer of the city, village or township has requested a preliminary review. The request shall be in writing and shall identify the existing or anticipated financial conditions or events that make the request necessary.

☐ 2. The state financial authority has received a written request from a creditor with an undisputed claim, that remains unpaid 6 months after its due date, against the city, village, or township that exceeds the greater of $10,000.00 or 1% of the annual general fund budget of the city, village, or township, provided that the creditor has notified the city, village or township in writing at least 30 days before the creditor's request to the state financial authority of the creditor's intention to submit a written request.

PART 4: CONDITIONS OF PROBABLE FINANCIAL DISTRESS, CONTINUED

- ☐ 3. The state financial authority has received a petition containing specific allegations of financial distress signed by a number of registered electors residing within the city's, village's, or township's jurisdiction equal to not less than 5% of the total vote cast for all candidates for governor within the city's, village's, or township's jurisdiction at the last preceding election at which a governor was elected. The petition shall not have been filed within 60 days before any election of the city, village, or township.
- ☐ 4. The state financial authority has received a written notification that the city, village, or township has not timely deposited its minimum obligation payment to the city's, village's, or township's pension fund, as required by law.
- ☐ 5. The state financial authority has received a written notification that the city, village, or township has failed, for a period of 7 days or more after the scheduled date of payment, to pay wages and salaries or other compensation owed to employees or benefits owed to retirees.
- ☐ 6. The state financial authority has received a written notification from a trustee, paying agent, bondholder, or auditor engaged by the city, village, or township of a default in a bond or note payment or a violation of 1 or more bond or note covenants.
- ☐ 7. The state financial authority has received a resolution from either the senate or the house of representatives requesting a preliminary review of the city, village, or township.
- ☐ 8. The city, village, or township has violated a requirement of, or a condition of an order issued pursuant to, former 1943 PA 202, revenue bond act of 1933, 1933 PA 94, MCL 141.101 to 141.140, the revised municipal finance act, 2001 PA 34, MCL 141.2101 to 141.2821, or any other law governing the issuance of bonds or notes.
- ☐ 9. The city, village, or township has violated the conditions of an order issued by the local emergency financial assistance loan board pursuant to the emergency municipal loan act, 1980 PA 243, MCL 141.931 to 141.942.
- ☐ 10. The city, village, or township has violated a requirement of sections 17 to 20 of the uniform budgeting and accounting act, 1968 PA 2, MCL 141.437 to 141.440.
- ☐ 11. The city, village, or township has failed to timely file an annual financial report or audit that conforms with the minimum procedures and standards of the state financial authority and is required for cities, villages, and townships under the uniform budgeting and accounting act, 1968 PA 2, MCL 141.421 to 141.440a.
- ☐ 12. The city, village, or township is delinquent in the distribution of tax revenues, as required by law, that it has collected for another taxing jurisdiction, and that taxing jurisdiction requests a preliminary review.
- ☒ 13. The city, village, or township is in breach of its obligations under a deficit elimination plan or an agreement entered into pursuant to a deficit elimination plan.
- ☐ 14. A court has ordered an additional tax levy without the prior approval of the governing body of the city, village, or township.
- ☐ 15. The city, village, or township has ended a fiscal year in a deficit condition as defined in section 21 of the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.921, or has failed to comply with the requirements of that section for filing or instituting a financial plan to correct the deficit condition.
- ☒ 16. The city, village, or township has been assigned a long-term debt rating within or below the BBB category or its equivalent by 1 or more nationally recognized credit rating agencies.
- ☒ 17. There is an existence of other facts or circumstances that, in the state treasurer's sole discretion for a city, village or township, are indicative of probable financial stress

PART 5: PROPOSAL DETAILS

24. Describe Current State of Affairs: What is working well? What is not working? Explain the current condition of infrastructure/equipment

See attached.

PART 5: PROPOSAL DETAILS, CONTINUED

25. Describe Strategy, Project, or Service Proposal:

The City of Flint reconnected to the Detroit Water and Sewerage Department on October 16th, 2015, due to the contamination of the water caused by the Flint River supply. The cost to the City to reconnect to DWSD was $2 million. These funds were taken from an already distressed Water and Sewer Fund.

26. Describe How Grant Funding will Lead the Applicant Toward Financial Stability

Reimbursement of the City's two million dollars will offer some financial relief when revenues to the Water and Sewer fund are at a devastating low. Based on current projections, the City has estimated that the Water and Sewer Fund will become insolvent by the end of 2016. Returning this sum will help to reduce the urgency of the impending fiscal crisis.

27. Goals, Measures, and Business Objectives of this Proposal: What are the outcomes you hope to achieve? How will you measure the outcomes? Provide the measures which will be used to determine the success of the proposal.

The anticipated goal is to recouperate some of the losses the City has incurred during the Flint Water crisis. Successful completion of this goal will be the reimbursement of the Water and Sewer Fund to help the City continue operations during a time of financial stress.

28. Potential Barriers: Describe any barriers that currently exist that may have an impact on the implementation of the proposal.

The City returned to Detroit water on October 16, 2015. This proposal is seeking reimbursement of the City's cost to reconnect.

29. Continuity of Proposal: How do you plan to fund the proposal going forward once awarded grant funds are exhausted?

There are no significant residual costs. This is a one-time request for reimbursement of already expended funds.

PART 5: PROPOSAL DETAILS, CONTINUED

30. Cost Savings: Will the proposal save money? Attach a detailed calculation of the cost savings and provide an explanation of how the cost savings were calculated. Do not include any anticipated FDCVT grant funding as part of the cost savings calculation.

☒ Yes ☐ No

A. SHORT-TERM (1 year or less)	☐ Yes	☒ No	Estimated Short-Term Savings
B. LONG-TERM (Greater than 1 year)	☐ Yes	☒ No	Estimated 5 Year Total Savings

31. Work Plan and Proposal Timeline: What are the implementation steps to ensure this proposal's success? What are the projected outcomes at each step? Attach a detailed work plan, if the narrative will not fit in the space provided.

On October 12, 2015, City Council authorized a budget amendment to contribute $2 million from the Water and Sewer Fund to the total $12 million cost of reconnecting the City to DWSD. On October 16, 2015, that reconnection was executed. The projected outcome was to improve water quality by ceasing the use of the Flint River as a primary water source.

32. Total Grant Budget Worksheet: For each budget category, attach a detailed list of proposed expenditures, including an indication of the priority for each budgeted item. Explain how the expenditures support and are essential to the proposal.

Budget Category	Estimated Total Proposal Cost	Grant Budget Amount Requested (Total Limited to $2.0 million)
Reconnection to DWSD	$ 2,000,000.00	$ 2,000,000.00
	TOTAL ESTIMATED PROPOSAL COST $ 2,000,000.00	TOTAL GRANT AMOUNT REQUESTED $ 2,000,000.00

33. Additional Information and Comments:

The total cost to reconnect was $12 million, with the State of Michigan contributing $6 million, the Ruth Mott Foundation contributing $4 million, and the City of Flint contributing $2 million. To this date, the Ruth Mott Foundation has contributed half of its pledge ($2 million). Consequently, $10 million has been paid to DWSD.

PART 6: ATTACHMENTS

34 Check the appropriate boxes and attach the following items to the application All attachments must be included and labeled appropriately

☒ Attached	☐ N/A	1 Letter of support from each of the participating local units identified in Part 2, Box 14
☒ Attached		2 Proof of existence for each condition of probable financial distress checked in Part 4, Box 23
☒ Attached	☐ N/A	3 Detailed calculation of cost savings and an explanation of how the cost savings were calculated in Part 5, Box 30
☐ Attached	☒ N/A	4 Detailed work plan, if the narrative will not fit in Part 5, Box 31
☒ Attached		5 Detailed list of proposed expenditures to support Part 5, Box 32, including an indication of the priority for each budgeted item and an explanation of how the expenditure will support and is essential to the proposal

PART 7: CERTIFICATION

35 I certify that all statements in this application, including all requested supplemental information, are true complete and accurate to the best of my knowledge If awarded, I agree to allow the Michigan Department of Treasury and the State Auditor General's Office (and/or any of their duly authorized representatives) access, for the purposes of inspection, audit, and examination, to any books, documents papers, and records of the grantee which are related to this proposal I agree to allow the Michigan Department of Treasury to conduct periodic program reviews of the proposal The purpose of these reviews will be to determine adherence to stated proposal goals and to review progress of the proposal in meeting its objectives I agree to submit semiannual and final narrative and financial status reports and a one-year Final Follow-up Report to the Michigan Department of Treasury I understand that failure to submit any required reports may result in the termination of the grant I understand that this grant may be terminated if the Michigan Department of Treasury concludes that I am not in compliance with the conditions and provisions of this grant, or have falsified any information By way of signature, I agree with all conditions of this grant program

Applicant's Chief Administrative Officer Signature (as defined in MCL 141 422b)	Date
	01/26/2016
Printed Name of Applicant's Chief Administrative Officer (as defined in MCL 141 422b)	**Title**
Natasha L. Henderson	City Administrator

Applications are due October 15 2015 Completed applications submitted via mail or e-mail must be received by the Michigan Department of Treasury no later than 11 59 p m on Thursday, October 15, 2015 Incomplete applications may not be considered.

A signed and completed application (including attachments) can be submitted by e-mail to **TreasRevenueSharing@michigan.gov** or by mail to

PO Box 30722
Lansing MI 48909

Appendix A
FDCVT Supplemental Answers

Part 5: Proposal Details

Question 24. Describe the current state of affairs. What is working well? What is not working? Explain the current condition of infrastructure/equipment.

The City is currently in a Federal state of emergency. Water from the Flint River, the City's water source, had been leeching lead from old pipes and solder, contaminating the water supply. Elevated lead levels in children were discovered by physicians at Hurley Hospital. Genesee County, the State of Michigan, and the United States Federal Government have elevated the emergency to their levels as well.

The City of Flint is also currently in a state of fiscal distress at a time in which considerable demands are placed upon it relating to the provision of clean and safe water. The City is attempting to cope with these demands, while revenues are down or drastically reduced. Even though the City has progressed to strategically reduce deficits by seeking new millages, reducing the number of city employees and related costs, and ultimately reducing the services to the public, the City continues to face critical financial challenges. Both the income tax and property tax revenue bases have declined by 55% since the economic downturn in 2008. The current resources available to the City are very restricted and limited.

The City of Flint has been in receivership since December 2011. At that time, the State of Michigan Financial Review Team found that the City has a General Fund deficit of $14,621,546 as of June 30th, 2010, which was not eliminated within the two year preceding period.

The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of $7,046,820 as of June 30th, 2008. However, by June 30th, 2010, the cumulative general fund deficit had grown to $14,621,546. An updated plan submitted for 2010 did not purport to eliminate cumulative deficit until 2030 and that relied upon the issuance of an additional $12 million of debt in 2013.

A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010, and the General Fund was projected to have a $6,768,864 deficit as of June 30, 2011.

The Comprehensive Annual Financial Report for the fiscal year ended June 30, 2011 was received in December 2011. The City's General Fund, which had a $14.6 million deficit at the beginning of the year, ended it with an $8.9 million deficit. The reduction in the deficit was due solely to an $8 million Fiscal Stabilization Bond issued by the city in March 2011. In total, excluding the impact of the FSB proceeds and the Genesee Towers judgment levy, expenses in the General Fund exceeded revenues. The City's Comprehensive Financial Report revealed an unassigned deficit in the General Fund of $8,961,427 as of June 30, 2014, which had resulted from operating deficits.

The City does not have a current bond rating. The most recent bond rating was from over a decade ago and received a score of Ba1, a qualifying indicator of fiscal distress.

As part of a recent judgment, the City was ordered to repay its Water and Sewer Fund 15.7 million from its General Fund. The recent water challenges have also resulted a lower frequency of bill payments from residents, further reducing revenues. This places considerable strain on the City's path to recovery as it struggles to emerge from receivership.

Appendix A
FDCVT Supplemental Answers

The City has transitioned back to the Detroit Water and Sewerage Department as the source of water. This project cost of $2 million from the City's fund balance, an unanticipated expense. It is imperative that old pipes and water lines need to be addressed in order to arrive at a long term solution that will safeguard the public health, return public confidence in the Water System, resulting in a return to a sustainable Water and Sewer Fund. The City is the water provider, and as such, it has an obligation to provide clean and safe water for residents.

RESOLUTION NO.: CA10028 15 '16

PRESENTED: 10-12-15

ADOPTED: RTAB 10-14-15

RESOLUTION AUTHORIZING A BUDGET AMENDMENT TO INCREASE THE WATER AND SEWER BUDGET BY $12,000,000.00 AND TO ALLOW FOR EXPENDITURES FROM THOSE FUNDS TO FACILITATE THE SWITCH BACK TO THE DWSD WATER SUPPLY

BY THE CITY ADMINISTRATOR:

Due to the serious health threat facing the residents of the City of Flint, the Administration has been diligently working toward a feasible and speedy resolution to the City's water crisis; and

Through the commitment of $6 million from the State of Michigan and $4 million from the C.S. Mott Foundation, a total of $10 million in contributions have been pledged to assist the City with the cost of purchasing water from the Detroit Water and Sewerage Department and its successor, the Great Lakes Water Authority, until the City is able to receive water from the Karegnondi Water Authority (KWA).

The City Administrator and the Mayor have agreed to the acceptance of these funds. At this time, the KWA reports that construction is on schedule to be completed by June 30, 2016. The City estimates that the total cost to purchase water through DWSD will be $12 million for 9 months. The balance of $2 million not covered by the generous pledges of State and Local resources is the responsibility of the City.

A budget amendment is necessary to reflect both an increase in revenues for the receipt of $10 million in assistance and $2 million of budgeted Use of Fund Balance and an increase in expenditures of $12 million for the purchase of DWSD water supply.

IT IS RESOLVED that the Finance Department is authorized to process a budget amendment to the appropriate Water and Sewer funds to facilitate the switch back to the Detroit water system as soon as practicable. Specific revenue and expenditure line items will be provided by the Chief Financial Officer.

RE: November, 2015 Invoice for Water Supply Service

Included with this letter is the November invoice from the City of Detroit Water and Sewerage Department ("DWSD") for water services provided from October 16, 2015 to October 31, 2015. Per the Water Services Agreement, effective October 16, 2015, the invoiced amount of $581,722.75 will be paid from the $10 million Estimated Prepayment previously transferred to DWSD by the City of Flint on October 19, 2015. The remaining balance in the Estimated Prepayment account after payment of this invoice is $9,418,277.25. We will continue to monitor the balance in the Estimated Prepayment account to ensure sufficient funds remain to pay subsequent invoices. Should you have any dispute with, or questions regarding this invoice, please contact me immediately.

Sincerely,

Jon Wheatley

1 Revenue assumptions were based on YTD billing activity and current collection rates projected through FYE and held constant into FY17
2 Assuming that the City continues to delay issuance of shut off notices the collection rate will continue to decline drastically
3 Expenditure activity for the period January 2016-June 2016 reflect unspent funds as of December 31 2015 divided equally over the remaining 6 months of the fiscal year
4 Expenditure activity for the period July 2016-December 2016 assumes the FY17 budget projection as included in the planned FY16 & FY17 Budget as adopted by emergency manager order
5 The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the last quarter of FY17 An amount for illustrative purposes is shown

	Until 6/30/2016	After 7/1/2016

REVENUE ASSUMPTIONS

1 User Charges for the period January 2015 December 2016 were based on YTD billing activity and collection rates
2 Rate increase assumptions effective March 1 2016 and July 1 2016 may be modified in the grey box below
3 Restoring the FY16 Master Fee Schedule rates per the amended preliminary injunction order would result in a rate increase of approximately 22% and would impact collections beginning in March 2016
4 If the Master Fee Schedule rates are restored in FY16 then any rate increase assumption for FY17 must also include 22%
5 Issuance of shut off notices and disconnection of services has a tremendous impact on the City s ability to enforce payment for services rendered In August prior to the Preliminary Injunction Order the City s average monthly collection rate was 98% The average collection rate for the period August through December 2015 has fallen to 88% with a low point in October of 70%

EXPENDITURE ASSUMPTIONS

1 Expenditure activity for the period January 2016- June 2016 reflect unspent funds as of December 31 2015 divided equally over the remaining 6 months of the fiscal year
2 Expenditure activity for the period July 2016 December 2016 assumes the FY17 budget projection as included in the Biennial FY16 & FY17 Budget as adopted by emergency manager order
3 The City will likely have to continue purchasing treated water from the Great Lakes Water Authority through the first quarter of FY17 An amount for illustrative purposes is shown

	Until 6/30/2016	After 7/1/2016
Average Monthly Collection Rate	85%	85%
Rate Increase	22%	27%

GLWA Water Purchase $ 1,833,333

- Regarding Rate Increases
  FY16 has been set such that an increase would impact bills beginning in March 2016
  Any rate increase assumption for FY17 must also include any rate assumption made for FY16
  For Example FY16 restoration of Master Fee Schedule equals approximately 22% Budgeted FY17 projection of 5% must be

Frank:

Please find attached a copy of a complaint entitled *Concerned Pastors for Social Action, Melissa Mays, ACLU, and Natural Resources Defense Council* v *State Treasurer, Flint RTAB, and Flint City Administrator*. The case appears to have been filed this morning in United States District Court, Eastern District. I received a copy of the complaint by e-mail a short time ago.

You will recall that plaintiffs served a Notice of Intent to Sue upon the defendants and your Office on November 16, 2015. In addition to the State Treasurer, Flint RTAB members, and City Administrator, the Notice of Intent to Sue also listed as defendants the Governor, now former DEQ Director Dan Wyant, and Flint Mayor Weaver. The latter three officials have been dropped from the filed complaint.

Please consider this e-mail a request for legal representation for the State Treasurer and Flint RTAB members. Should you need further information or wish to discuss, let me know. Thanks.

Fred

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF MICHIGAN
SOUTHERN DIVISION

CONCERNED PASTORS FOR SOCIAL ACTION; MELISSA MAYS; AMERICAN CIVIL LIBERTIES UNION OF MICHIGAN; and NATURAL RESOURCES DEFENSE COUNCIL, INC.,

Plaintiffs,

v.

Case No. 16-10277

NICK A. KHOURI, in his official capacity as Secretary of Treasury of the State of Michigan; FREDERICK HEADEN, in his official capacity as Chairperson of the Flint Receivership Transition Advisory Board; MICHAEL A. TOWNSEND, in his official capacity as Member of the Flint Receivership Transition Advisory Board; DAVID MCGHEE, in his official capacity as Member of the Flint Receivership Transition Advisory Board; MICHAEL A. FINNEY, in his official capacity as Member of the Flint Receivership Transition Advisory Board; BEVERLY WALKER-GRIFFEA, in her official capacity as Member of the Flint Receivership Transition Advisory Board; NATASHA HENDERSON, in her official capacity as City Administrator; and CITY OF FLINT,

Hon.

Defendants. /

COMPLAINT FOR DECLARATORY AND INJUNCTIVE RELIEF

INTRODUCTION

1. The water in Flint, Michigan is not safe to drink. It has not been safe to drink since April 2014, when city and state officials began using the Flint River as a source of drinking water and caused lead to leach into the city's water supply.

2. This case is about the government's failure to comply with the federal law that requires cities to deliver safe drinking water to the public. The Safe Drinking Water Act directs officials who operate water systems to test drinking water for harmful contaminants and to treat the water to control for those contaminants. City and state officials' complete disregard for those requirements is exposing the people of Flint to lead, a powerful toxin that is devastating to the human body.

3. Flint was once a prosperous city with a strong economy built around the automotive industry. But the closing and relocation of automotive plants over the past thirty years hurt the city's economy and tax base, contributing to a shrinking population and resulting in increased unemployment, poverty, and crime. Flint is now a struggling city. More than forty percent of Flint residents live below the poverty level, and more

than a quarter of its working-age residents are unemployed.

4. In November 2011, in response to Flint's budget deficit and mounting debt, Michigan Governor Rick Snyder declared a financial emergency in the city. He stripped local elected officials of all of their authority and installed a state-appointed Emergency Manager to take over and run the city's operations. The Emergency Manager was not removable by Flint voters or otherwise accountable to the Flint electorate.

5. To save the city money, the Emergency Manager and other state officials decided to switch the city's drinking water source from Lake Huron to the Flint River. The Flint River has long been known to residents as a contaminated dumping ground for nearby industries. In making this switch, city and state officials sent Flint River water flowing into the homes, schools, and churches in Flint without following federal requirements for treating and testing drinking water for lead.

6. These decisions have endangered the health of Flint's residents. When run through the city's aging metallic pipes, the corrosive Flint River water ate away at those pipes, causing lead to leach into drinking water. The people of Flint have been exposed and are still being exposed to high levels of lead in their water. In the past two years, the percentage of Flint

children with elevated levels of lead in their blood has doubled and in some areas has nearly tripled.

7. Flint residents began raising concerns about the safety of their drinking water nearly two years ago. Government officials dismissed their concerns and insisted that the water was safe to drink. State officials even disregarded researchers' findings that the water contained dangerously high levels of lead. Not until a national spotlight was focused on Flint did city and state officials belatedly acknowledge a problem.

8. Despite this far-too-late acknowledgement, the problems in Flint have not been fixed. Public trust has been eroded by government officials' efforts to evade responsibility in this crisis. The damage done to city pipes from the Flint River water means that lead will continue to contaminate Flint's drinking water. This contamination poses an ongoing health risk to the city's residents, especially young children, who are most vulnerable to the effects of lead.

9. The harms suffered by Flint residents will not be addressed until city and state officials properly treat Flint's water to control lead, properly test the water for lead contamination, promptly notify residents of testing results, and report their activities to state regulators, all as required

by the Safe Drinking Water Act.

10. Plaintiffs are individuals and citizens' groups whose members live in homes served by Flint's water system. They bring this suit as citizens to ensure that the water provided to their homes will no longer threaten their health, and to address the medical and health harms they have suffered.

JURISDICTION AND VENUE

11. This Court has subject matter jurisdiction over this action pursuant to the Safe Drinking Water Act, 42 U.S.C. § 300j-8(a), and the federal-question jurisdiction statute, 28 U.S.C. § 1331. The Court may award Plaintiffs all necessary injunctive relief pursuant to the Safe Drinking Water Act, 42 U.S.C. § 300j-8(a), (e), and declaratory relief pursuant to the Declaratory Judgment Act, 28 U.S.C. §§ 2201-2202.

12. Venue is proper in this district under 28 U.S.C. § 1391(b)(2) because a substantial part of the events or omissions giving rise to Plaintiffs' claims occurred in this judicial district, in Flint, Michigan.

13. Plaintiffs have provided Defendants, the Administrator of the U.S. Environmental Protection Agency (EPA), and the Michigan Attorney General with at least sixty days' written notice of the violations of law

alleged here in the form and manner required by the Safe Drinking Water Act. 42 U.S.C. § 300j-8(b); 40 C.F.R. §§ 135.11-.13. A copy of Plaintiffs' November 16, 2015 notice letter is attached as Exhibit A to this Complaint.

THE PARTIES

14. Plaintiffs consist of organizational plaintiffs Concerned Pastors for Social Action (Concerned Pastors), American Civil Liberties Union of Michigan (ACLU-MI), and Natural Resources Defense Council, Inc. (NRDC), and individual plaintiff Melissa Mays.

15. Concerned Pastors is a nonprofit association of religious leaders and congregations from more than thirty predominantly African American churches and ministries in the City of Flint (City) and its surrounding communities. The association was founded nearly fifty years ago to protect the rights of the underserved and improve the lives of the people of Flint. Concerned Pastors has been organizing and advocating for safe drinking water in Flint for nearly two years. Its efforts include holding public rallies and meetings, liaising with state and local elected officials, and distributing thousands of cases of bottled water and water filters to community members. Concerned Pastors is committed to protecting the health of Flint's children and families from the City's contaminated drinking water.

Concerned Pastors is organized under the laws of Michigan and has an office address of 2200 Forest Hill, Flint, Michigan 48504.

16. Plaintiff ACLU-MI is a nonprofit organization founded in 1959. ACLU-MI's mission is to protect the freedoms and rights of all Michigan citizens. Through public education, advocacy, organizing, and litigation, ACLU-MI works to guarantee the benefits of our nation's laws to everyone. ACLU-MI played a significant role in investigating the water problems in Flint while the City was under emergency management and exposing the lead contamination in its drinking water. ACLU-MI has approximately 9,000 members, more than ninety-five of whom live in Flint. ACLU-MI is incorporated under the laws of Michigan and has an office address of 2966 Woodward Avenue, Detroit, Michigan 48201.

17. Plaintiff NRDC is an international, nonprofit environmental organization. NRDC engages in research, advocacy, and litigation to protect public health and reduce the exposure of all communities to toxic substances. NRDC's work includes advocacy aimed at ensuring that all Americans have access to safe and affordable drinking water that is free from dangerous contaminants. Founded in 1970, NRDC has more than 294,000 members nationwide, including more than 8,600 members who

reside in Michigan, eighty of whom live in Flint. NRDC is incorporated under the laws of New York and is headquartered at 40 West 20th Street, New York, New York 10011.

18. Concerned Pastors, ACLU-MI, and NRDC bring this action on behalf of their members. Members of these organizations are residents of Flint whose homes are served by the City's water system (Water System). These members and their families live, work, recreate, attend church, and go to school in buildings that receive Flint's water.

19. Members of Concerned Pastors, ACLU-MI, and NRDC living in Flint are harmed, and will continue to be harmed, by Defendants' violations of the Safe Drinking Water Act unless this Court grants the requested relief. These members are harmed, and will continue to be harmed, because they have an increased risk of exposure to elevated levels of lead in their drinking water.

20. High levels of lead have been found in drinking water in homes and schools throughout Flint. Members of Concerned Pastors, ACLU-MI, and NRDC are reasonably fearful of exposure to lead from their drinking water. They are concerned about their health and the health of their children, including potential long-term developmental problems.

21. Because of these members' reasonable concerns about lead exposure, they use bottled water and/or install water filters in their homes to minimize their risk. Members of these organizations would prefer to use unfiltered tap water that they purchase from the Water System, rather than having to incur additional costs and inconvenience to use bottled water and/or install water filters. These filters, if not used, changed, and maintained regularly and properly, can stop working or even make lead problems worse. Members also have visited and will continue to visit doctors to have their blood tested for lead.

22. Members of Concerned Pastors, ACLU-MI, and NRDC are harmed by these and other actions they are taking to protect themselves and their families from Flint's water. Their injuries will be redressed by an order requiring Defendants to monitor and control for lead in Flint's drinking water in accordance with the Safe Drinking Water Act and to comply with the Act's reporting and notification requirements. Such an order will enable members to make informed decisions about whether their tap water is safe to drink and will remediate the dangerous conditions and health risks that the members continue to be exposed to as a result of Defendants' continued noncompliance.

23. Plaintiff Melissa Mays and her husband live in Flint with their three sons, ages eleven, twelve, and seventeen. From when she moved to Flint in 2002 until September 2014, Ms. Mays and her family used tap water supplied by the Water System for drinking and cooking. In September 2014, after the City issued a temporary advisory instructing all residents to boil their drinking water, Ms. Mays and her family stopped drinking Flint's water. In January 2015, Ms. Mays and her family stopped cooking with the City's water.

24. Ms. Mays is concerned about her health and the health of her family. She is harmed because she and her family have an increased risk of exposure to elevated levels of lead in their drinking water. She is reasonably fearful that she and her family have been exposed and will continue to be exposed to lead if they drink and cook with Flint's water. She is harmed, and will continue to be harmed, by Defendants' violations of the Safe Drinking Water Act, unless this Court grants the requested relief.

25. Ms. Mays' concerns have caused her to stop using Flint's water for drinking and cooking, to minimize her risk of exposure to lead. Although Ms. Mays would use her home's tap water if it were safe to

drink, Ms. Mays' reasonable fears about lead in her tap water have forced her to purchase water filters and bottled water for herself and her family and to visit doctors routinely to monitor her family's health. Ms. Mays has been forced to take these actions, including incurring considerable costs and inconvenience, to protect herself and her family from lead in Flint's drinking water.

26. Ms. Mays' injuries will be redressed by an order requiring Defendants to monitor and control for lead in Flint's drinking water and report information in accordance with the Safe Drinking Water Act.

27. Defendant Nick A. Khouri is sued in his official capacity as Secretary of Treasury of the State of Michigan. He oversees and manages the City's operations while the City remains under state control. Pursuant to his authority under the Michigan Local Financial Stability and Choice Act, *see* Mich. Comp. Laws § 141.1561(2), Defendant Khouri must approve amendments to the City budget, including amendments resulting from large contracts the City enters. He or his designee must also sit on the Flint Receivership Transition Advisory Board (Board), a group of state-appointed officials presently monitoring the City. *Id.* §§ 141.1552(3), .1563(2). Defendant Khouri is an operator of the Water System within the

meaning of the Safe Drinking Water Act.

28. Defendant Frederick Headen is sued in his official capacity as Chairperson of the Board, and Defendants Michael A. Townsend, David McGhee, Michael A. Finney, and Beverly Walker-Griffea are sued in their official capacities as Members of the Board. The Board directs the City's affairs alongside city officials. The Board must approve certain contracts and all resolutions, ordinances, and budget amendments adopted by the City Council before they can take effect, including those concerning the operations of the Water System. Defendants Headen, Townsend, McGhee, Finney, and Walker-Griffea are operators of the Water System within the meaning of the Safe Drinking Water Act.

29. Defendant Natasha Henderson is sued in her official capacity as the City Administrator of Flint. She directs and supervises the day-to-day operations of the City, including the operations of the Water System. Flint's Emergency Manager appointed Defendant Henderson to her position. Defendant Henderson is an operator of the Water System within the meaning of the Safe Drinking Water Act.

30. Defendant City of Flint is the owner and an operator of a "public water system" as defined by the Safe Drinking Water Act. 42 U.S.C.

§ 300f(4); 40 C.F.R. § 141.2. A public water system is a system that provides drinking water through pipes to at least twenty-five people, and includes water collection, treatment, storage, and distribution facilities. 42 U.S.C. § 300f(4); 40 C.F.R. § 141.2. As an owner and operator of a public water system, the City is also a "supplier of water." 42 U.S.C. § 300f(5); 40 C.F.R. § 141.2. The Water System is a large public water system for purposes of the Act. 40 C.F.R. § 141.2.

FACTS

Harmful effects of lead

31. Lead can harm nearly all of the body's functions and organs, and is particularly damaging to the nervous system.

32. Young children are especially vulnerable to lead. Lead exposure in children can cause a wide array of problems, but is most harmful to a child's developing brain. Even low levels of lead exposure during childhood can result in lower intelligence, poorer academic performance, developmental delays, attention deficits, impulsivity, and other behavioral problems. Some of these effects appear to be irreversible.

33. Lead can pass from a pregnant woman to her developing baby, which can cause the baby to be born premature or underweight, and can

harm the baby's brain. Lead can also pass from nursing mothers to their babies through breastmilk.

34. Exposure to lead also harms adults, including by causing nerve disorders, decreased kidney function, reproductive problems, and gastrointestinal damage. Adults exposed to lead may also suffer from muscle and joint pain, memory and concentration problems, and high blood pressure.

35. Lead is uniquely harmful because, after it enters the bloodstream, it is distributed throughout the body just like iron and calcium. It settles in bones, where it interferes with the production of blood cells and the absorption of calcium. Calcium is necessary for muscle and nerve function, and for bone growth in children. Lead may remain stored in bones for years, from where it can be reabsorbed into blood during times of physiological change, including stress, pregnancy, lactation, broken bones, and advanced age.

36. People can be exposed to lead by breathing air containing lead particles or by ingesting water, food, or dust contaminated with lead.

37. Children and adults who have been exposed to lead may not immediately show symptoms. The effects of exposure often do not appear

for years, even long after measures of lead levels in blood have returned to normal.

38. There is no safe level of lead in blood.

Lead in drinking water

39. Water sources vary in terms of their chemical properties. When water displays certain characteristics including an acidic pH, it is considered corrosive.

40. Corrosive water dissolves metals from metallic pipes at a high rate. This can cause lead contained in pipes and the solder joining pipes to leach into drinking water in significant amounts. *See* 56 Fed. Reg. 26,460, 26,463, 26,466 (June 7, 1991). This leaching can continue indefinitely. *Id.* at 26,466.

41. The amount of lead that leaches into drinking water depends heavily on the corrosivity of the source water. *Id.*

42. Over the past several decades, drinking water has become a more significant source of lead exposure, as regulation has reduced the risk of lead exposure from other sources such as lead paint and leaded gasoline. Infants who rely on formula may receive more than eighty-five percent of their exposure to lead from drinking water. *Id.* at 26,470.

43. There is no safe level of lead in drinking water.

The Safe Drinking Water Act's approach to controlling lead in drinking water

44. The Safe Drinking Water Act (the Act), 42 U.S.C. § 300 *et seq.*, is the federal law that protects Americans from harmful contaminants in their drinking water.

45. To achieve this goal, the Act requires owners and operators of public water systems to test their water for specified contaminants, treat the water to control for those contaminants, and provide certain reports and notices to customers and regulators. *See, e.g.*, 42 U.S.C. § 300g-1; 40 C.F.R. §§ 141.22-.26, .31, .61-.66, .151, .201. Each of these steps is essential to reducing lead levels in tap water and informing the public about the health risks posed by their drinking water. *See* 42 U.S.C. § 300g-1(b)(1)(A).

46. The Act also requires public water systems to control for lead. The requirements for controlling lead in drinking water are set forth in regulations issued under the Act known as the Lead and Copper Rule (the Rule). 40 C.F.R. §§ 141.80-.91.

47. EPA is charged with issuing regulations to implement the Safe Drinking Water Act and enforcing the Act's requirements if states fail to do

so. 42 U.S.C. § 300g-2. Almost every state, including Michigan, has been delegated primary responsibility for ensuring that public water systems comply with the Act's requirements. The Michigan Department of Environmental Quality (MDEQ) is responsible for enforcing the Safe Drinking Water Act in Michigan. *See* Mich. Comp. Laws § 325.1003.

Corrosion control

48. EPA promulgated the Lead and Copper Rule in 1991. *See* 56 Fed. Reg. at 26,460. The Rule requires public water systems to treat drinking water to control the leaching of lead from pipes and solder. *See* 40 C.F.R. § 141.80(b), (d).

49. The Rule directed all large public water systems to identify and implement an "optimal" treatment program to reduce corrosion of lead pipes and solder by January 1, 1997. *Id.* § 141.81(d)(4). "[O]ptimal corrosion control treatment" is defined as the treatment that minimizes lead concentrations in consumers' tap water. *Id.* § 141.2. It often involves adding chemicals to the water to reduce its corrosivity and control its effect on leaded pipes and solder.

50. Certain treatment chemicals, such as phosphates, inhibit corrosion. They work by forming a protective coating inside of water pipes.

This protective coating develops over many years. The coating helps slow the corrosion of leaded pipes and solder, reducing the amount of lead that leaches into drinking water. When highly corrosive water that is not treated with an inhibitor flows through leaded water pipes, this protective coating is destroyed, increasing the amount of lead that enters into drinking water. Corrosive water can irreversibly damage water pipes.

51. Once a water system has optimized its corrosion control treatment program, it is required by the Rule to "continue to operate and maintain optimal corrosion control treatment." 40 C.F.R. § 141.82(g).

Tap water monitoring

52. The Rule also requires water systems to conduct periodic monitoring for lead in household tap water. *Id.* § 141.86. Monitoring for lead at consumers' taps is necessary to measure lead levels in drinking water. This is because lead can enter the water after it leaves the water system's treatment plant, as it travels through pipes towards consumers' homes.

53. The Rule's tap water monitoring requirements are designed to test for lead under worst-case conditions, including by testing at homes that are most at risk for elevated lead levels. Homes are at high risk if they

contain lead plumbing or if they are served by lead service lines. 56 Fed. Reg. at 26,514; *see* 40 C.F.R. § 141.86(a). Service lines are pipes that connect household plumbing to the main water distribution pipe in the street. In older water distribution systems, such as the system in Flint, these service lines often are made of lead.

54. Monitoring at high-risk homes is critical to ensuring that elevated lead levels in drinking water are detected, because lead is not distributed uniformly throughout a water system. 56 Fed. Reg. at 26,514. Instead, lead pieces may break away from a lead service line and travel into a customer's home without dissolving and spreading evenly throughout the water in the distribution system. These lead pieces result in intermittent but large spikes in the water's lead levels. Even a single sample showing elevated levels of lead indicates that these dangerous lead pieces may be present more widely in the system.

55. Targeting high-risk homes thus makes it more likely that a water system will detect whether lead is breaking off or leaching from the Water System's pipes or solder. Such targeting also helps water systems and regulators determine whether a system has minimized lead levels in drinking water by operating an optimized corrosion control treatment

program. *Id.*

56. The Rule requires public water systems serving more than 100,000 people to collect a set of at least 100 tap water samples twice each year. 40 C.F.R. § 141.86(c), (d)(1). Water systems serving between 10,001 and 100,000 people must collect at least sixty tap water samples twice each year. *Id.* A water system has six months to collect each set of tap water samples. *Id.*

57. Each time a water system completes a six-month monitoring period, it must calculate whether more than ten percent of the samples collected have a lead concentration greater than 15 parts per billion (ppb). *See id.* §§ 141.80(c), .90(a)(1)(iv). EPA found that lead levels of 15 ppb or less were representative of effective corrosion control treatment. 56 Fed. Reg. at 26,490. EPA concluded that when more than ten percent of tap water samples collected by a water system exceed this 15 ppb threshold, known as the "lead action level," additional treatment of drinking water would be "appropriate to protect public health." *Id.* at 26,491.

58. If more than ten percent of samples collected during a monitoring period have a lead concentration in excess of the lead action level (15 ppb), the water system must take additional steps to protect its

customers from lead exposure. 40 C.F.R. §§ 141.84(a), .85-.86; 56 Fed. Reg. at 26,478. These steps include identifying and reporting to the state the number of lead service lines in the water system, 40 C.F.R. § 141.90(e); replacing a portion of the system's infrastructure with pipes and solder that are "lead free" as defined by the Safe Drinking Water Act, *id.* § 141.84; conducting additional monitoring of the system's source water to determine whether additional treatment is needed, *id.* §§ 141.83, .88(b); and conducting additional tap water monitoring, *id.* § 141.86(d)(4)(vi)(B).

59. As part of these additional steps, water systems must also offer to sample the tap water of any customer who requests it, *id.* § 141.85(c), and educate the public about the risks of lead and ways consumers can reduce their exposure to lead in drinking water, *id.* § 141.85(b).

60. A water system may reduce the number of tap water samples it collects and the frequency of its monitoring if it meets certain criteria for two consecutive monitoring periods. First, less than ten percent of tap water samples collected during each monitoring period may exceed the lead action level. *Id.* § 141.86(d)(4)(ii). Second, the water system must show that it is maintaining optimal corrosion control treatment. It can show this by maintaining prescribed values for certain water-quality indicators,

including pH and other measures of the water's corrosivity. *Id.*; *see id.* § 141.82(f).

61. If each of these conditions is met for two consecutive monitoring periods, a state may allow the water system to reduce its monitoring frequency to once per year, and may reduce the required number of samples. *Id.* § 141.86(d)(4)(ii). If the water system continues to meet these conditions for additional monitoring periods, the water system may become eligible to reduce its monitoring frequency further, to once every three years. *Id.* § 141.86(d)(4)(iii).

62. If, for any monitoring period, the water system exceeds the lead action level, or if water-quality monitoring shows problems with the system's corrosion control treatment, the water system must resume collecting a set of tap water samples every six months. *Id.* § 141.86(d)(4)(vi)(B).

63. The Lead and Copper Rule requires water systems to report detailed information about their tap water monitoring to the state enforcement agency. *Id.* § 141.90. Water systems must also notify customers of the individual results of tap water samples collected from their homes. *Id.* § 141.85(d)(1)-(2).

64. EPA promulgated the Lead and Copper Rule because it understood the harmful effects that lead-contaminated drinking water can have on citizens. *See* 56 Fed. Reg. at 26,463-66, 26,467-71. The Rule's requirements are intended to force public water systems to remain vigilant about the possible infiltration of lead into drinking water, and to take critical steps in the event of contamination. *See id.* at 26,481-82.

State control over Flint

65. In November 2011, pursuant to Michigan's Local Financial Stability and Choice Act, Governor Snyder declared a financial emergency in Flint and placed the City in a state-controlled receivership.

66. A receivership is a process whereby local government officials are stripped of authority in favor of state-appointed personnel. Those state appointees control the local government's finances and operations. *See* Mich. Comp. Laws §§ 141.1549(1)-(2), .1551(1), .1552. Among the purposes of the receivership is to "assure the provision of necessary government services essential to public health, safety, and welfare." *Id.* § 141.1543(a).

67. After placing the City into receivership, Governor Snyder appointed an Emergency Manager to govern all of the City's operations. *See id.* §§ 141.1542(q), .1549(2). Through this appointment, Governor Snyder

removed authority from Flint's elected Mayor and City Council. The Emergency Manager served at the pleasure of the Governor and could not be removed by Flint voters. *Id.* § 141.1549(3)(d).

68. From November 2011 to April 2015, Flint had four successive emergency managers. The emergency managers were vested with "broad powers" to address the City's financial emergency. These powers included the authority to revise the City's budget; make, approve, or disapprove any contract; supervise heads of city departments; and exercise the powers of "any officer, employee, [or] department . . . of the local government, whether elected or appointed." *Id.* §§ 141.1552(1)(b), (g), (n), (ee), .1549(2). The power of the emergency managers was "superior to and supersede[d]" that of the City's employees, departments, and elected officials. *Id.* § 141.1552(1)(ee).

69. In early 2015, the Emergency Manager hired Defendant Natasha Henderson as City Administrator. The Emergency Manager gave Defendant Henderson full authority to direct and supervise the day-to-day operations of the City, including directing the head of the Department of Public Works and managing the operations of the Water System. The Utilities Department is located within the Department of Public Works and

is responsible for the supply and maintenance of water services. Defendant Henderson also must approve and cosign with the Mayor all contracts entered into, modified, or terminated by the City.

70. Since her appointment, Defendant Henderson has directed the operation of the Water System. For instance, she has managed the City's purchases of water meters, plumbing supplies, and chemicals to treat Flint River water at Flint's Water Treatment Plant. In March 2015, she decided that the City could hire a contractor to provide emergency leak detection services for the Water System, and allowed the City to accept a $900,000 state grant to pay for water-leak surveys. In April 2015, Defendant Henderson decided that the City could enter into a contract with consultants to provide design, procurement, and construction services to the Water Treatment Plant to install a new filter system.

71. On April 28, 2015, the Emergency Manager informed Governor Snyder that Flint's financial emergency had been rectified. *See* Mich. Comp. Laws § 141.1562(1). Governor Snyder then removed the Emergency Manager and, in his place, appointed the Receivership Transition Advisory Board to manage the City's affairs alongside city officials for the duration of Flint's receivership. *See id.* § 141.1563(1). The Board's members now

include Defendants Frederick Headen, Michael A. Townsend, David McGhee, Michael A. Finney, and Beverly Walker-Griffea.

72. The Board has had authority over the operations of the City since its creation last spring. It must approve all ordinances and resolutions adopted by the City Council before they take effect, and must approve purchases and contracts over $75,000. The City Administrator advises and reports to the Board. She is required to submit regular reports to the Board regarding her activities and the overall operation of the City. Approval of the Board is also required before the Mayor or City Council can change the responsibilities of the City Administrator.

73. Since its formation, the Board has made a number of decisions directing the operation of the Water System. For example, in August 2015, the Board decided that the City could enter into a multi-year environmental monitoring services contract with a testing laboratory and decided to allow the City to purchase chemicals to be used to treat water at Flint's Water Treatment Plant. In October 2015, the Board decided whether the City could purchase water distribution pipe repair parts for use in maintaining the Water System.

74. The Board is the primary but not exclusive state entity that

manages the City's operations during the City's receivership. The State Treasurer, Defendant Nick A. Khouri, also manages aspects of the City's operations. For example, during the pendency of the City's receivership, orders by the Emergency Manager may be amended only by the Board, but the State Treasurer's approval is also required. Similarly, the Mayor and City Council cannot amend the budget that was adopted by the Emergency Manager without approval of both the Board and the State Treasurer.

75. The State Treasurer also exerts control over the Water System, including by having the final authority to decide whether the Water System can make large operational changes that involve budget amendments. For instance, on information and belief, in early 2014, the State Treasurer decided whether the City could expend more than $3 million to upgrade its Water Treatment Plant to allow the City to use the Flint River as its primary drinking water source. The State Treasurer also exercised final decision-making power over the Water System's choices about where to get its drinking water.

76. Flint remains under the management of the Board and State Treasurer. The Mayor and City Council are stripped of all authority except as "specifically authorized in writing by the emergency manager" prior to

the elimination of his position last spring. Mich. Comp. Laws § 141.1549(2). The Mayor and City Council are powerless to change any decisions made by the Emergency Manager until one year after Governor Snyder terminates the City's receivership.

Changes in Flint's drinking water supply

77. Flint's Water System provides drinking water to nearly 100,000 people. The Water System includes the Flint Water Treatment Plant and more than 600 miles of water distribution pipes.

78. The Water System also has approximately 32,900 service line connections, points where household and building plumbing connect to main water distribution pipes. At least 15,000 of these connections are through lead service lines.

79. For decades prior to 2014, the Water System purchased pretreated or "finished" drinking water from the Detroit Water and Sewerage Department (Detroit), which draws water from Lake Huron.

80. "Finished" water is water that is ready to be delivered to customers for consumption without further treatment. *See* 40 C.F.R. § 141.2. The Water System received finished water from Detroit and distributed it through its pipes and service lines to customers. Detroit treated the water

with orthophosphate to reduce the amount of lead leaching from pipes and solder.

81. In March 2013, partially in response to rising water rates charged by Detroit, the City Council voted to join the Karegnondi Water Authority (KWA), a newly formed water supply system. The KWA plans to build a new pipeline to distribute Lake Huron water directly to mid-Michigan communities, including Flint. The KWA pipeline is scheduled for completion in June 2016.

82. The City Council's vote to join the KWA was not immediately effective because the City was in state receivership. Only the Emergency Manager and the State Treasurer had the power to authorize the City to enter into a contract to join the KWA. *See* Mich. Comp. Laws § 141.1552(1)(g), (3). The Emergency Manager authorized the KWA contract on March 29, 2013.

83. On April 16, 2013, after evaluating various options for the City's drinking water supply, the State Treasurer also authorized the KWA contract.

84. Although Detroit sought to avoid losing Flint as a customer, the Emergency Manager rejected Detroit's final offer to renegotiate rates.

Detroit then terminated its existing contract with Flint. Pursuant to the contract, the termination was scheduled to take effect a year later, in April 2014. This was at least eighteen months before the new KWA pipeline was expected to be ready.

85. Although Detroit offered to negotiate a short-term contract to supply drinking water to Flint during the interim period, the Emergency Manager declined Detroit's proposals.

86. In early 2014, the Emergency Manager and state officials decided that the Water System would use the Flint River as a primary drinking water source until the KWA pipeline was completed.

87. The Flint River suffers from significant water-quality problems. Industrial waste and agricultural runoff have contributed to excessive contamination. Fish in the River contain mercury, a potent neurotoxin, and polychlorinated biphenyls (PCBs), which are carcinogens. Swimming is not recommended in the River after rain due to elevated levels of bacteria.

88. Before switching to the Flint River as a water source, the Water System had not treated its own water on a regular basis for nearly fifty years. It had never undertaken the analysis required by the Safe Drinking Water Act to identify and understand how a water system optimizes

corrosion control treatment for drinking water. The Water Treatment Plant's staff had not previously been responsible for managing the treatment of water to control corrosion of lead pipes and solder.

89. In 2011, outside consultants for the City analyzed whether the Flint River could be used as the City's permanent primary source of drinking water. The consultants concluded that the Flint Water Treatment Plant would need about $50 million in upgrades to equipment and systems to assure reliable delivery of safe drinking water to customers. Nonetheless, the Water System did not perform all of the recommended upgrades in advance of distributing Flint River water to customers' homes in 2014.

90. On April 29, 2014, the Water System began pumping Flint River water through the System's distribution pipes and into customers' taps.

91. The Water System did not treat the river water at all to reduce its corrosivity and minimize the leaching of lead from pipes and solder into customers' drinking water.

The effects on customers' drinking water

92. In the months following the Water System's switch to the Flint River, customers reported that their tap water was discolored, laden with

sediment, and foul-smelling. Customers also reported skin rashes, hair loss, and vomiting after drinking and/or bathing in the water.

93. In the summer of 2014, testing conducted by the Water System showed elevated levels of total coliform bacteria, bacteria found in soil and in human and animal waste, in Flint's drinking water. The City was forced to issue boil-water notices to some of its customers.

94. To control the high levels of total coliform bacteria, the Water System increased its use of disinfectants.

95. In December 2014, MDEQ notified the Water System that it was in violation of the Safe Drinking Water Act after high levels of total trihalomethanes—byproducts of disinfection—were detected in the water. Trihalomethanes can cause serious health problems, including an increased risk of cancer.

96. Despite these Safe Drinking Water Act violations, city and state officials continued to tell Flint residents that their water was safe to drink.

97. Because the Water System had begun using a new water source, MDEQ instructed the System to conduct lead tap water monitoring for two six-month periods, gathering one hundred samples per period. MDEQ had the authority to require one hundred samples, even though in

2014 Flint's population had fallen below 100,000 for the first time since the 1920s. *See* 40 C.F.R. §§ 141.81(b)(iii), .86(d)(vii). The Water System initiated the first six-month monitoring period in July 2014, and the second in January 2015.

98. To collect these samples, the Water System instructed customers to flush their taps for at least five minutes and then allow the water to sit for at least six hours before drawing the sample. This practice, known as "pre-flushing," is intended to minimize the amount of lead captured in the sample and results in an under-reporting of the concentration of lead in drinking water.

99. Even though the Water System engaged in practices that underestimate lead concentrations in drinking water, certain tap water samples still returned high levels of lead. In February 2015, at least one customer's water contained lead concentrations of more than 100 ppb, more than six times the lead action level of 15 ppb. Subsequent testing at the same home revealed lead levels of nearly 400 ppb. Medical records showed that the blood lead level of the customer's child had more than tripled since the Water System began using Flint River water.

100. That customer, concerned about the high levels of lead in her

water, contacted EPA. After learning of her test results, staff in EPA's regional office told MDEQ that the results raised significant concerns about the corrosion of lead pipes within the Water System. An EPA Regulations Manager later wrote a memo raising a "serious concern" about the high lead levels detected in the Water System's drinking water and the System's failure to use any treatment to mitigate lead leaching from pipes and solder. EPA shared the memo with MDEQ.

101. By February 26, 2015, the Water System, state officials, and EPA staff were all aware of sampling results showing high levels of lead in Flint's drinking water. No one notified Flint residents.

102. In March 2015, in response to growing complaints from the community, the City Council voted to do "all things necessary" to end the use of the Flint River as a water source. This vote had no effect, because the City remained under the control of state-appointed officials. The Emergency Manager refused to approve the City Council's vote, asserting that Flint's tap water was safe to drink and calling the elected officials' effort to return to Detroit water "incomprehensible."

103. In July 2015, the Water System sent a letter to its customers stating that their tap water was safe to drink and in compliance with all

Safe Drinking Water Act requirements. The Water System nonetheless advised elderly residents, infants, and those with a severely compromised immune system to consult their doctors before drinking the water.

104. During the next two months, in response to intensifying citizen concerns about lead in the City's drinking water, researchers from Virginia Polytechnic Institute and State University (Virginia Tech) collected more than 250 tap water samples from homes in Flint. More than ten percent of the samples collected contained lead at levels over 25 ppb, well above the Lead and Copper Rule's action level for lead of 15 ppb. *See* 40 C.F.R. § 141.80(c)(1). Some samples collected by the Virginia Tech researchers contained lead levels more than ten times greater than the lead action level.

105. In response to these findings, state officials asserted that Virginia Tech's sampling showed far higher lead levels than sampling conducted by the Water System. Those officials questioned the reliability of Virginia Tech's results, and insisted that the City's water contained lead levels within allowable limits.

106. On September 24, 2015, a Flint pediatrician released the findings of a study showing that the proportion of Flint children with elevated blood lead levels had doubled since the Water System began

using the Flint River as a drinking water source. State officials and Governor Snyder's office attempted to discredit the pediatrician's data, calling her work "unfortunate" in a time of "near-hysteria." MDEQ continued to insist that Flint's water was safe to drink.

107. The following day, the City of Flint issued a Lead Advisory suggesting that residents flush their taps for at least five minutes prior to drinking the water; use only cold water for drinking, cooking, and making baby formula; and install water filters certified for lead removal. The Lead Advisory did not tell residents that Flint's water was unsafe to drink.

108. The Board of Commissioners in Genesee County, where Flint is located, issued a Public Health Advisory a few days later, also urging Flint residents to use filters certified to remove lead before drinking tap water, or to drink bottled water.

109. On September 30, 2015, Governor Snyder for the first time acknowledged that the City's water supply "appears" to have increased lead levels.

110. The Genesee County Board of Commissioners declared a Public Health Emergency in Flint on October 1, 2015. It advised Flint residents not to drink water from the Water System unless it had been run through a

filter certified to remove lead or tested to confirm the water does not contain elevated lead levels.

111. That same day, Plaintiffs submitted a petition to EPA asking it to issue an emergency order pursuant to its authority under the Safe Drinking Water Act. *See* 42 U.S.C. § 300i(a). Plaintiffs asked EPA to take immediate action to address the danger to Flint residents from lead in their water. EPA did not act.

112. In early October, tap water sampling conducted by MDEQ showed that three Flint schools had tap water with lead levels that exceeded the action level. Subsequent testing confirmed elevated lead levels in drinking water at seven of Flint's schools.

113. In mid-October, following a request from the City Administrator, the Board decided that the City could amend its budget to allow the Water System to return to Detroit's water supply. The same day, the Board also decided that the City Administrator could enter into agreements with Detroit and other local entities to execute the switch back to Detroit's water.

114. On information and belief, the State Treasurer then approved the budget appropriation for Flint to return to Detroit's water supply.

115. On October 16, 2015, the Water System resumed using Detroit's pretreated Lake Huron water as its drinking water.

116. After Flint's return to Detroit water, the water in Flint did not become safe to drink. The Water System's extended failure to treat the Flint River water with phosphates—combined with the highly corrosive nature of the water—had stripped the protective coating from the inside of the Water System's pipes and service lines. As this coating had taken years to build up, the damage to the Water System's infrastructure cannot be reversed right away, if ever, even though the System is again receiving water from Detroit pretreated with corrosion-inhibiting chemicals. This damage is allowing lead to continue to leach into Flint's drinking water.

117. In early December 2015, the Water System began supplementing Detroit's water treatment by adding more phosphates to further reduce the corrosivity of the water and control for the corrosion of lead pipes and solder.

118. Two weeks later, on December 14, 2015, Flint Mayor Karen Weaver declared a State of Emergency in Flint.

119. On January 5, 2016, Governor Snyder declared a State of Emergency in Genesee County. The next week, Governor Snyder activated

the National Guard and requested help from the federal government to address the lead-contamination crisis.

120. Days later, President Obama declared a federal emergency in Flint, authorizing the Federal Emergency Management Agency to provide disaster relief.

121. On January 21, 2016, EPA issued an Emergency Administrative Order declaring that the lead contamination in Flint posed an imminent and substantial endangerment to human health, and directing the City, the State of Michigan, and MDEQ to take certain remedial measures. EPA's action came nearly a year after it was first made aware of sampling results showing high levels of lead in Flint's drinking water, and nearly four months after Plaintiffs submitted a petition to the agency asking it to act under its emergency authority. While the City has stated it will comply with EPA's order, Michigan and MDEQ have challenged EPA's legal authority to require some of the actions that EPA demands.

122. Despite awareness at the local, state, and federal levels of the lead-contamination crisis in Flint, tap water distributed from the Water System remains unsafe to drink.

The Water System is failing to maintain optimal corrosion control treatment

123. The Water System is no longer "operat[ing] and maintain[ing] optimal corrosion control treatment" as required by the Lead and Copper Rule. 40 C.F.R. § 141.82(g).

124. Prior to the Water System's switch to the Flint River as a drinking water source, Detroit treated water delivered to Flint's customers to control the leaching of lead from pipes and solder.

125. In the early 1990s, Detroit conducted a multi-year study to determine the optimal approach to controlling lead in its system's drinking water. The study evaluated water-quality data and information about the system's pipe materials; identified and analyzed feasible treatment methods to control corrosion; and designed and pilot-tested the treatment alternatives. Detroit determined that its water should be treated with orthophosphate to optimize corrosion control, and, with MDEQ's approval, began implementing that treatment. The Water System coordinated with Detroit to ensure the System's compliance with the Lead and Copper Rule's requirement to implement an optimal corrosion control treatment program. The Water System relied on Detroit to treat the water with

orthophosphate before delivering the finished water to Flint. On information and belief, through Detroit's orthophosphate treatment, the Water System was able to minimize the amount of lead leaching from pipes and solder.

126. By coordinating with Detroit, the Water System optimized its corrosion control treatment program as of January 1999. The Water System's cooperation with Detroit did not exempt it from the Lead and Copper Rule's requirements, including the requirement to maintain optimal corrosion control treatment. *See* 56 Fed. Reg. at 26,497-98.

127. From April 29, 2014, when the Water System began distributing Flint River water, through at least October 16, 2015, the Water System failed to maintain optimal corrosion control treatment because it did not treat the river water with corrosion-inhibiting chemicals or any other form of treatment to minimize the amount of lead leaching from the System's pipes and solder.

128. Flint River water is highly corrosive. It is significantly more corrosive than water from Lake Huron. Because Flint River water is highly corrosive, the Water System's use of the river water without treatment to control corrosion destroyed the protective coating that had built up inside

the System's pipes and solder. The absence of this protective coating caused dangerous amounts of lead to enter Flint's drinking water.

129. Since October 16, 2015, when the Water System resumed distributing water from Detroit, the Water System has failed to maintain optimal corrosion control treatment because it has not minimized the concentration of lead at customers' taps. 40 C.F.R. § 141.2.

130. The corrosivity of the river water damaged the Water System's infrastructure, including by destroying the protective coating that had formed inside the System's water pipes over many years. As a result of this damage, the Water System is not currently maintaining optimal corrosion control treatment. On information and belief, because of this damage to the Water System's infrastructure, additional chemical treatment of Detroit's pretreated water is necessary to implement an optimal corrosion control treatment program.

131. On information and belief, the Water System's failure to treat the river water to control corrosion has caused and continues to cause dangerous levels of lead to enter customers' tap water.

132. The Water System plans to switch water sources again in summer of 2016. The Water System will use Lake Huron water distributed

through the KWA pipeline as its new water source.

133. After this switch, the Water System will be required to treat the Lake Huron water to control for the corrosion of lead pipes and solder.

134. On information and belief, the Water System has not gathered or analyzed background water chemistry information about the new KWA water source; has not evaluated corrosion control treatment options for the new KWA water source; has not conducted pilot-scale tests using lead pipes extracted from the System to determine the effectiveness of different corrosion control treatment alternatives; and has not procured the specialized equipment or developed the equipment operating skills necessary to maintain an optimal corrosion control treatment program.

135. On information and belief, the Water System's failure to maintain optimal corrosion control treatment is likely to continue until the System switches to the new KWA water source, and is likely to continue or recur when the System switches to the new KWA water source.

The Water System is failing to comply with the Lead and Copper Rule's monitoring requirements

136. The Water System is not monitoring for lead contamination in accordance with the Lead and Copper Rule. As a result, the Water System

cannot promptly or reliably detect elevated lead levels in its drinking water.

Sampling site selection

137. Before a water system begins monitoring for lead at household taps, it must identify a pool of targeted sampling sites. 40 C.F.R. § 141.86(a)(1). The sampling pool must target homes that have a high risk of lead contamination. *See id.* § 141.86(a)(3)-(8). For water systems like Flint's that regularly serve more than twenty-five people, this means that the sampling pool must, if possible, consist of single-family homes that are served by a lead service line and/or contain lead pipes or copper pipes with lead solder installed after 1982. *Id.* § 141.86(a)(3).

138. The pool must also be large enough to ensure that the water system can collect the required number of samples during each monitoring period. *Id.* § 141.86(a)(1).

139. During each monitoring period, a water system must collect the minimum required number of samples from homes that are part of the system's sampling pool. *Id.*

140. A water system that contains lead service lines must also collect half of its samples from homes served by a lead service line, and half from

homes that contain lead pipes or copper pipes with lead solder. *Id.* § 141.86(a)(8). If a water system cannot identify a sufficient number of homes served by lead service lines, then it must collect samples from all homes it has identified as being served by lead service lines. *Id.*

141. In addition to the tap water samples collected from the water system's targeted sampling pool, the system may collect more samples from homes not included in its pool at a customer's request. Those customer-requested samples do not count towards the system's minimum number of required samples under the Rule. *See id.* § 141.86(a)(1), (c). Customer-requested samples generally must, however, be included when the water system calculates whether more than ten percent of its total collected samples exceed the lead action level of 15 ppb.

142. After the Water System began using the Flint River as a water source, it collected household tap water samples during two six-month monitoring periods, between July and December 2014 and between January and June 2015. The Water System serves a sufficient number of single-family homes with a lead service line or lead pipes that its sampling pool must consist entirely of such homes.

143. During its July–December 2014 and January–June 2015

monitoring periods, the Water System requested that city employees volunteer to submit tap water samples, without regard to whether those employees lived in homes served by a lead service line or containing lead pipes.

144. At least six city employees submitted tap water samples during the City's January–June 2015 monitoring period. On information and belief, the Water System included these samples as part of its monitoring for lead without verifying or even inquiring whether these samples came from homes that are served by a lead service line or contain lead pipes.

145. The City's Utilities Administrator, Michael Glasgow, has stated that the Water System "throw[s] bottles out everywhere" to collect the required number of tap water samples, without regard to whether the homes from which samples are collected are served by a lead service line or contain lead pipes.

146. From July 2014 to the present, the Water System has not targeted and is not targeting homes at high risk of contamination when monitoring for lead.

147. Prior to the July–December 2014 monitoring period, the Water System did not identify a pool of targeted sampling sites large enough to

ensure that it could collect the number of tap water samples required by the Lead and Copper Rule. The Water System also failed to identify a targeted pool prior to the beginning of the January-June 2015 monitoring period.

148. The Water System did not select all of the sampled homes from an existing sampling pool during either monitoring period.

149. The Water System does not have comprehensive, reliable information identifying the locations of its more than 15,000 lead service lines. On information and belief, the Water System has not consistently used and does not consistently use the records it may have concerning the locations of lead service lines to confirm that its samples are collected from homes with lead service lines.

150. On information and belief, for monitoring conducted from July 2014 through the present, the Water System has not ensured or verified and is not ensuring or verifying that half of its samples are collected from homes served by a lead service line, and that half of its samples are collected from homes that have lead pipes or copper pipes with lead solder. Because of its lack of knowledge of where its lead service lines are located, the Water System cannot reliably ensure that during each

monitoring period, it collects at least half of its samples from homes served by a lead service line.

151. On information and belief, the Water System has yet to identify a pool of targeted tap water sampling sites that meet the high-risk criteria set forth in the Lead and Copper Rule and is large enough to ensure that the System can collect the required number of tap water samples during future monitoring periods.

152. On information and belief, the Water System will continue to monitor for lead in household tap water without using an existing, sampling pool of high-risk sites to select the homes from which it collects samples.

Sampling sites across monitoring periods

153. During each monitoring period, the Lead and Copper Rule requires water systems to collect samples from the same homes. 40 C.F.R. § 141.86(b)(4). If the water system cannot gain entry into a previously sampled home, or if a previously sampled home no longer fits the Rule's high-risk criteria, then the system may collect a sample from another home in its sampling pool. *Id.* The home selected as a replacement sampling site must be located near the previously sampled home and meet the same

high-risk criteria. *Id.*

154. For the January–June 2015 monitoring period, the Water System collected tap water samples from only thirteen of the one hundred homes used during the previous six-month monitoring period. Each of these thirteen sampling sites had lead levels below the lead action level during the previous monitoring period.

155. On information and belief, during the January–June 2015 monitoring period, for any homes sampled during the previous monitoring period into which the Water System could no longer gain entry or that no longer met the Rule's high-risk criteria, the System did not collect tap water samples from other homes selected from an existing sampling pool that were located nearby and met the same high-risk criteria.

156. On information and belief, the Water System is failing and/or will continue to fail to collect tap water samples at the same homes from which it collected samples during previous monitoring periods. The Water System is also failing and/or will continue to fail to replace homes in its sampling pool when necessary with homes that are nearby and meet the same high-risk criteria.

The Water System is failing to comply with the Lead and Copper Rule's reporting requirements

157. The Lead and Copper Rule requires water systems to report to state regulators all tap water sampling results for lead, including the location or "site" where each sample was collected. 40 C.F.R. § 141.90(a)(1)(i). For each sampling site, the water system must also report the basis on which the site was selected for the system's sampling pool, including whether the site is served by a lead service line or contains lead pipes. *Id.*; *see id.* § 141.86(a)(3)(i)-(ii).

158. If a water system does not collect tap water samples from the same sites across monitoring periods, the water system must mark or "designate" each site that was not sampled during the previous monitoring period, and explain why the sampling site changed. *Id.* § 141.90(a)(1)(v).

159. These requirements ensure that the water system is sampling in high-risk homes, and prevent the system from purposely avoiding sampling sites that have yielded high lead results in past monitoring periods.

160. The Water System is not accurately reporting to MDEQ whether its sampling sites are served by lead services lines or contain lead

pipes. For at least six tap water samples collected between July 1, 2014, and June 30, 2015, the Water System falsely reported to MDEQ that the sites were served by lead service lines, when in fact they were not.

161. On information and belief, the Water System does not have accurate information to identify whether its sampling sites are served by lead service lines or contain lead pipes. The Water System is likely to continue to fail to accurately report whether its sampling sites are served by lead service lines or contain lead pipes.

162. The Water System also is not reporting required information to MDEQ when the System fails to sample the same sites across monitoring periods.

163. For both the July–December 2014 and January–June 2015 monitoring periods, the Water System did not use the same sampling sites as in the previous monitoring periods. The Water System did not designate for MDEQ each new sampling site from which it collected a tap water sample during these monitoring periods. The Water System did not adequately explain—and in some cases, did not explain at all—the changes in its sampling sites from one monitoring period to the next.

164. The Water System is likely to continue its practice of not

designating each new sampling site from which it collects a tap water sample. The Water System is also likely to continue its practice of failing to explain changes in its sampling sites from previous monitoring periods.

The Water System is failing to comply with the Lead and Copper Rule's notification requirements

165. The Lead and Copper Rule requires water systems to notify the individuals residing at each sampling site of their tap water sampling results for lead. 40 C.F.R. § 141.85(d)(1). A water system must provide this notice "no later than 30 days after the system learns of the tap monitoring results." *Id.* § 141.85(d)(2).

166. On information and belief, for monitoring conducted from July 1, 2014, through June 30, 2015, the Water System failed to notify individuals residing at each sampling site of their tap water sampling results for lead within thirty days after the System learned of the results.

167. On information and belief, for monitoring conducted from July 1, 2015, through the present, the Water System is continuing to fail to notify individuals residing at each sampling site of their tap water sampling results for lead within thirty days after the System learns of the results.

FIRST CLAIM FOR RELIEF
(Violations of the Safe Drinking Water Act's requirement to operate and maintain optimal corrosion control treatment, 40 C.F.R. §§ 141.81-.82)

168. Plaintiffs incorporate by reference all of the preceding paragraphs.

169. Since April 2014, Defendants have violated and continue to violate the Safe Drinking Water Act and its implementing regulations by failing to operate and maintain optimal corrosion control treatment. 40 C.F.R. § 141.82(g).

SECOND CLAIM FOR RELIEF
(Violations of the Safe Drinking Water Act's requirements for monitoring tap water for lead, 40 C.F.R. § 141.86)

170. Plaintiffs incorporate by reference all of the preceding paragraphs.

171. Since April 2014, Defendants have violated and continue to violate the Safe Drinking Water Act and its implementing regulations by failing to comply with the Act's requirements to monitor household tap water for lead, including:

a. the requirement to identify a pool of targeted sampling sites prior to monitoring, 40 C.F.R. § 141.86(a)(1);

b. the requirement to select homes for sampling from an existing sampling pool, *id.*;

c. during each monitoring period, the requirement to collect half of the samples from homes served by a lead service line and half of the samples from homes containing lead pipes or copper pipes with lead solder, *id.* § 141.86(a)(8); and

d. the requirement to collect samples from the same homes or replacement homes that meet the Rule's criteria across monitoring periods, *id.* § 141.86(b)(4).

THIRD CLAIM FOR RELIEF
(Violations of the Safe Drinking Water Act's reporting requirements, 40 C.F.R. § 141.90)

172. Plaintiffs incorporate by reference all of the preceding paragraphs.

173. Since April 2014, Defendants have violated and continue to violate the Safe Drinking Water Act and its implementing regulations by failing to comply with the reporting requirements for monitoring household tap water for lead, including:

a. the requirement to report the results of all tap water samples, including the location of each sampled home and the high-risk

criteria under which the home was chosen for the water system's sampling pool, 40 C.F.R. § 141.90(a)(1)(i); and

b. the requirement to designate any home that was not sampled during the previous monitoring periods and explain why the homes sampled have changed, *id.* § 141.90(a)(1)(v).

FOURTH CLAIM FOR RELIEF
(Violations of the Safe Drinking Water Act's notification requirements, 40 C.F.R. § 141.85)

174. Plaintiffs incorporate by reference all of the preceding paragraphs.

175. Since April 2014, Defendants have violated and continue to violate the Safe Drinking Water Act and its implementing regulations by failing to comply with the requirement that water systems notify customers of the individual results of tap water samples collected and tested for lead within thirty days after the water system receives the results. 40 C.F.R. § 141.85(d)(1), (d)(2).

REQUEST FOR RELIEF

Plaintiffs respectfully request that this Court enter judgment against Defendants as follows:

A. Declaring that all Defendants are in violation of their

obligations under the Safe Drinking Water Act and its implementing regulations;

B. Enjoining all Defendants from ongoing and future violations of the Safe Drinking Water Act and its implementing regulations, including but not limited to the treatment, monitoring, reporting, and notification requirements of the Lead and Copper Rule;

C. Ordering that Defendants take all such actions as may be necessary, and all such actions as the Court may deem appropriate, to remedy these violations, comply with the Safe Drinking Water Act and its implementing regulations, and mitigate the harm caused by Defendants' violations of the Lead and Copper Rule's treatment, monitoring, reporting, and notification requirements.

D. Ordering that Defendants promptly complete full replacement of all lead service lines in the Water System at no cost to customers of the Water System, including replacement of those portions of the lead service lines that are privately owned, to the extent the Water System is able to obtain permission from the owner of the line after notifying the owner and offering to replace the owner's portion of the line at the Water System's expense;

E. Granting appropriate equitable relief to mitigate the health and medical risks and harm resulting from Defendants' violations;

F. Awarding Plaintiffs their reasonable costs and attorneys' fees; and

G. Granting such other and further relief as the Court deems just and proper.

Dated: January 27, 2016

Re: Notice of Intent to Sue Under the Safe Drinking Water Act, 42 U.S.C. § 300j-8(b)(1)(a), for Failure to Control Lead in Drinking Water in Flint, Michigan, and Failure to Assist Michigan Schools with Lead Testing and Remediation

We write on behalf of Concerned Pastors for Social Action, Melissa Mays, the American Civil Liberties Union of Michigan (ACLU of Michigan), and the Natural

Resources Defense Council (NRDC), nonprofit citizens' organizations and individuals working to secure safe drinking water for the residents of Flint, Michigan. Since April 2014, the City of Flint and Michigan state officials have failed to monitor and control for lead in Flint's drinking water, and to maintain a program to assist Michigan schools with lead testing and remediation, in violation of the Safe Drinking Water Act, 42 U.S.C. § 300f et seq. This letter provides notice pursuant to 42 U.S.C. § 300j-8(b)(1)(a) that we intend to sue the City of Flint; Rick Snyder, Governor of Michigan; Dan Wyant, Director of Michigan Department of Environmental Quality; Nick A. Khouri, Treasurer of Michigan; Frederick Headen, Chairperson of the Flint Receivership Transition Advisory Board (Board); Brian Larkin, David McGhee, Robert McMahan, and Beverly Walker-Griffea, Members, RTAB; and Natasha Henderson, Flint City Administrator, if these violations are not remedied within sixty days.[1]

Concerned Pastors for Social Action is an association of religious leaders from more than thirty churches and ministries in the Flint area that has advocated for the rights of the underserved for nearly fifty years. Melissa Mays is a Flint resident whose family has suffered from serious health problems as a result of the City's failure to provide safe drinking water. The ACLU of Michigan works in courts, legislatures, and communities to preserve the protections that our laws guarantee to all citizens. NRDC is a national membership organization committed to protecting public health and the environment and to reducing the exposure of all communities to toxic chemicals. These groups and individuals continue to be harmed by the violations of the Safe Drinking Water Act by the City and Michigan state officials, detailed below.

I. City and State officials have exposed and continue to expose Flint residents to dangerous amounts of lead in drinking water

A. The City, Emergency Manager, and State Treasurer chose the Flint River as a primary drinking-water source

In the fall of 2011, Michigan Governor Rick Snyder declared a financial emergency in the City of Flint and appointed an emergency manager to take control of the City's operations and finances.[2] Flint Mayor Dayne Walling and the City Council were stripped of all authority except as specifically allowed by the Emergency Manager, and the City was placed in state receivership.[3] Under Michigan's Local Financial Stability and Choice Act, an

---

[1] These individuals are noticed in their official capacities.

[2] *See* Mich. Comp. Laws § 141.1549; Letter from Gov. Rick Snyder to Mayor Dayne Walling and Flint City Council (Nov. 8, 2011), http://www.michigan.gov/documents/treasury/Flint-GovernorsDetermination-11-8-11_417435_7.pdf (attached as Ex. 1); Dawson Bell, *Governor names Flint native as city's emergency financial manager*, Detroit Free Press, Nov. 30, 2011, http://www.freep.com/article/20111130/NEWS06/111300370/Governor-names-Flint-native-city-s-emergency-financial-manager (attached as Ex. 2).

[3] Mich. Comp. Laws § 141.1549(2).

Emergency Manager has "broad powers" to "rectify the financial emergency and to assure fiscal accountability of the local government."[4]

While under control of the Emergency Manager, the City faced decisions about the future of its drinking-water supply. For fifty years, the City had purchased drinking water from the Detroit Water and Sewerage Department (Detroit), which sources water from Lake Huron.[5] In response to rising water rates charged by Detroit, in March 2013, the City Council voted to join the Karegnondi Water Authority (KWA), a newly formed municipal water supply system. The KWA was planning to build a pipeline to distribute water directly from Lake Huron to mid-Michigan communities, including Genesee County, where Flint is located.[6] The City Council's vote did not become effective until several weeks later, after both the Emergency Manager and State Treasurer approved the decision.[7]

The City's contract with Detroit was set to expire in April 2014, at least eighteen months before the KWA pipeline was scheduled to be completed.[8] Faced with a year-and-a-half gap in the City's water supply, the Emergency Manager declined to negotiate a short-term contract with Detroit and decided instead to use the Flint River as a primary drinking-water source.[9] The City had previously explored—and rejected—the Flint River as a primary drinking-water source. This is because the Flint Water Treatment Plant would have required fifty million dollars in upgrades to treat the river water and "produce finished water in conformance with the current federal and state drinking water regulations."[10]

Under the Safe Drinking Water Act's Lead and Copper Rule, Flint's water system could not use the Flint River as a water source without first obtaining approval from the Michigan Department of Environmental Quality (MDEQ). The Lead and Copper Rule required MDEQ to approve both the City's proposed addition of a new water source (the Flint River) and the long-term change in water treatment (from treatment through Detroit's water plant to treatment at the Flint Water Treatment Plant).[11] In April 2014, MDEQ approved the switch to river water.[12] The City immediately began pumping Flint River water through the City's distribution pipes and into residents' taps.

B. Dangerous lead contamination results from the City's switch to river water

In the twenty months following the switch in water sources, residents' drinking water has been at times cloudy, discolored, and foul-smelling.[13] Residents reported that they have experienced hair loss, skin rashes, and vomiting after drinking the water.[14] In the summer of 2014, the City was forced to issue several boil-water notices after tap water tested positive for total coliform bacteria.[15] The City's subsequent treatment of the water to kill disease-carrying pathogens resulted in elevated levels of total trihalomethanes, a disinfection byproduct that can cause serious health problems, including an increased risk of cancer.[16]

Because Flint River water is also highly corrosive, dangerous amounts of lead began to leach out of pipes and into the City's drinking water.[17] Lead in drinking water occurs primarily from corrosion of pipes and other plumbing materials that contain lead or lead solder.[18] The Lead and Copper Rule requires water systems to manage lead levels by controlling corrosion, which is often accomplished by adding corrosion-inhibiting chemicals.[19] Water systems must implement and maintain an "optimal" corrosion-control treatment program that "minimizes the lead . . . concentrations at users' taps."[20]

Flint did not consider how to control the corrosivity of the river water before switching water sources, nor did MDEQ require the City to implement any corrosion-control measures. Rather, beginning in April 2014, the City did not use any form of treatment to control corrosion.[21] The City waited until after its residents were drinking the river water to assess whether it posed a risk of increased lead exposure. MDEQ endorsed this approach. In June 2014, Flint's water system initiated the first of two six-month monitoring periods to test tap water for lead under the Lead and Copper Rule; the second six-month period ran from January to June 2015.[22] During these monitoring periods, the water system used flawed testing methods that appear to have been designed to underreport the lead content of residents' drinking water.[23]

Flint's monitoring data showed that some residents' water contained lead at concentrations above the federal "action level" of 15 parts per billion (ppb).[24] These high lead levels put residents at risk of a broad array of serious, irreversible health effects, including cognitive impairment, kidney damage, and increased blood pressure.[25] When the Environmental Protection Agency (EPA) learned of these high lead sampling results in February 2015, it notified MDEQ officials that the sampling results raised significant concerns about corrosion from lead pipes in Flint's distribution system.[26] Nonetheless, throughout the monitoring periods, the City and MDEQ maintained that these high lead levels were isolated and that the data, taken together, demonstrated Flint's compliance with the Lead and Copper Rule.[27]

C. Community advocacy and independent testing prompt long past due response from City and State officials

As the City concluded its second six-month round of sampling in July 2015, and notified some Flint residents of elevated lead levels in their tap water, the community became increasingly concerned. A small coalition of local groups, including Water You Fighting For and Concerned Pastors for Social Action, began working with researchers at Virginia Tech to conduct their own lead sampling of Flint's water. The Virginia Tech scientists found that ten percent of the more than 250 samples collected from Flint residences had lead levels of 25 ppb or more, well above the federal action level for lead.[28] Several samples exceeded 100 ppb, and one sample exceeded 1000 ppb.[29] Though aware of

the Virginia Tech sampling results, MDEQ officials continued to insist that Flint's water was safe to drink.[30]

In September 2015, a medical study conducted by a local pediatrician confirmed the kinds of adverse health impacts that residents had voiced concern about for months: the rate of Flint children with elevated blood lead levels had nearly doubled since the City changed its drinking-water source.[31] State officials and the Governor reacted by "downplay[ing] and in some cases attempt[ing] to discredit" the pediatrician's findings, and dismissing citizen concerns as "near-hysteri[cal]."[32]

Subsequent testing by MDEQ revealed that at least four schools in Flint had lead levels in their drinking water above the federal action level.[33] At Freeman Elementary School, water tested had lead levels over 100 ppb, more than six times the federal action level.[34] This increase in lead exposure is particularly dangerous in Flint, a community where residents are already at higher risk of elevated blood lead levels and lead poisoning. Michigan ranks fifth worst in the country for harmful exposures to lead.[35] Low income is a risk factor for lead poisoning, and more than a third of families in Flint live below the poverty level, three times the national average.[36] Children in Flint also face high risk of lead

exposure from lead-paint dust, as nearly ninety percent of Flint's housing stock was built before 1978 (when the federal ban on high-lead paint went into effect).[37]

Finally, in late September 2015, the City abandoned its assertions that Flint's drinking water was safe. Nearly seven months after the City first saw dangerously high levels of lead in some residents' water, Flint issued a drinking-water advisory and called for state financial assistance to switch the water system back to Detroit's supply.[38] Two weeks later, Governor Snyder requested six million dollars from the state legislature to reconnect the Flint water system to Detroit.[39] With additional funding from the City and a private foundation, the switch was completed in mid-October.[40]

Following the switch back to Detroit water, some government officials began to ask questions about what went wrong in the course of Flint's change in water sources.[41] Governor Snyder created a task force to review water management and testing in Flint,[42] and EPA established its own task force "to provide the Agency's technical expertise through regular conversations" with the City and MDEQ.[43] Governor Snyder has also announced

plans to launch an "education campaign soon to help schools statewide learn how to get their water tested" for lead.[44]

Despite this proliferation of task forces and campaigns, neither the City nor MDEQ has announced changes in the City's lead monitoring practices in the wake of Flint's public-health crisis. Rather, Flint and MDEQ have maintained that these practices are accurate and adequate, despite the near certainty that they are underrepresenting lead contamination in many of Flint's high-risk homes.

II. City and State officials are in violation of the Safe Drinking Water Act's Lead and Copper Rule

The Safe Drinking Water Act (the Act) authorizes citizens to sue any governmental entity "who is alleged to be in violation of any requirement" under the statute.[45] These requirements include the national primary drinking-water regulations for lead and copper set forth in the Lead and Copper Rule.[46] The Lead and Copper Rule obligates water systems to monitor and control for lead in drinking water.[47]

Since April 2014, Flint's water system has failed to comply with the Lead and Copper Rule's requirements for monitoring water for lead, notifying the public of tap-water monitoring results, reporting monitoring results to MDEQ, and controlling corrosion from lead pipes.[48] These violations systematically result in the City's underestimating lead levels in its drinking water, masking a public-health crisis. The violations are ongoing and likely to recur in the future: Flint's water system presently is obligated to monitor for lead every six months, and there is no indication that Flint has changed or disavowed its inadequate approach to monitoring.[49]

---

[44] *See* Lori Higgins, *Michigan to launch lead education effort statewide*, Detroit Free Press, Oct. 13, 2015, http://www.freep.com/story/news/local/michigan/2015/10/13/lead-water-flint-michigan-testing/73871480/ (attached as Ex. 51).

[45] 42 U.S.C. § 300j-8(a)(1).

[46] *See id.* § 300g-1(b)(1)(A); 40 C.F.R. § 141.80(a)(1).

[47] *See, e.g.*, 40 C.F.R. § 141.86.

[48] Flint's water system is subject to the requirements of the Lead and Copper Rule because it is a "community water system" not otherwise exempted from the regulations. 40 C.F.R. §§ 141.80(a)(1), 141.2.

[49] *See Tamaska v. City of Bluff City*, 26 F. App'x 482, 485 (6th Cir. 2002) (citing *Chesapeake Bay Found. v. Gwaltney of Smithfield*, 844 F.2d 170, 171–72 (4th Cir.1988)). A water system is required to monitor tap water for lead every six months if it (1) exceeds the action level for any monitoring period, or (2) "fails to operate at or above the minimum value or within the range of values for the water quality parameters specified by the State ... for more than 9 days in any six-month period." 40 C.F.R. § 141.86(d)(4)(vi)(B). Flint's water system failed to maintain applicable values of orthophosphate and/or pH designated as the optimal water quality parameters by MDEQ. In addition, had the water system conducted monitoring in compliance with the Lead and Copper Rule during the January to June 2015 period, it likely would have exceeded the lead action level.

Under the Act, a "supplier of water" is "any person who owns or operates a public water system."[50] The City of Flint owns Flint's water system.[51] Upon information and belief, the State officials administering Flint's receivership and the City presently operate Flint's water system. As discussed above, Flint's Emergency Manager exercised the authority of the local government in the place of Flint's mayor and city council. The Emergency Manager managed the water system and conducted its affairs, including making the decision to use the Flint River as a primary drinking-water source.[52] In April 2015, Governor Snyder removed the Emergency Manager and appointed a Receivership Transition Advisory Board to oversee the City's affairs until the receivership is terminated.[53] The Board has control over the City's budget, and must approve all decisions adopted by the City Council.[54] The Michigan Local Financial Stability and Choice Act requires the State Treasurer to sit on a receivership transition advisory board for any municipality for which the governor appoints such a board, and Governor Snyder has appointed the State Treasurer (or his designee) to chair Flint's Board.[55] The City Administrator reports to the Board, manages the City's daily administrative operations, and directs City department heads in carrying out the daily activities of the City.[56] To date, the City remains in receivership, and its actions remain subject to approval of the Board.[57]

Accordingly, the City of Flint; Governor Snyder; Dan Wyant, Director of MDEQ; Nick A. Khouri, Treasurer of Michigan; Frederick Headen, Chairperson of the Flint Receivership Transition Advisory Board; Brian Larkin, David McGhee, Robert McMahan,

[56] Emergency Manager Order 3 ¶¶ 4-6, 25 (adopted Apr. 10, 2015), https://www.cityofflint.com/wp-content/uploads/Order-No.-3.pdf (attached as Ex. 56). The City Administrator was appointed by the Emergency Manager and can be removed only with the Board's consent.

[57] *Id.*

and Beverly Walker-Griffea, Members of the Board; and Natasha Henderson, Flint City Administrator, are responsible for the violations of the Act by Flint's water system which have endangered and will continue to endanger the health of Flint's residents.

A. Flint's water system is in violation of the Lead and Copper Rule's tap-water monitoring, reporting, and notification requirements

The Lead and Copper Rule requires water systems to identify a pool of sampling sites prior to the commencement of a monitoring period.[58] This requirement is designed to target residences at high risk of lead contamination in drinking water, such as homes served by lead service lines.[59] In violation of the Rule, Flint's water system does not select sampling sites for lead monitoring based on a pre-established sampling pool. For Flint's most recent completed monitoring period, January–June 2015, the Director of the City's Department of Public Works admitted that Flint "thr[ew] bottles out everywhere just to collect as many [samples] as we can, to try and hit our number."[60] Similarly, email correspondence shows that the City has, during several monitoring periods, asked its own employees to submit tap-water samples, without regard to whether the employees were part of a pre-selected sampling pool.[61]

Under the Lead and Copper Rule, water systems that contain lead service lines also must draw fifty percent of their tap-water samples from sites served by a lead service line.[62] Flint's water system does not comply with this requirement. The water system reported to MDEQ that all the sample sites it used during the January–June 2015 monitoring period were residences served by lead service lines.[63] Flint's Utilities Administrator, however, admitted that he was not able to verify that all homes sampled were served by lead service lines.[64] This is because City records concerning the locations of lead service lines in the distribution system are stored on 45,000 paper notecards. Flint began converting these notecards into an electronic spreadsheet this fall, well after the January–June 2015 monitoring period.[65]

Flint's water system has also failed to sample the same sites across monitoring periods or document the reasons for declining to sample the same sites, as the Lead and Copper Rule requires.[66] Sampling new sites from one monitoring period to the next is permitted only if a site "is no longer accessible" to the water system or "no longer fits the requirements of a priority site."[67] Records show that in the January–June 2015 monitoring period, Flint's water system retested only thirteen of the one hundred sites it sampled in the previous monitoring period.[68] It did not provide the required explanation for these departures from the previous monitoring period's sampling sites.[69] Upon information and belief, Flint's water system concentrated its monitoring in areas where it anticipated low lead levels, due to recent infrastructure improvements, and selectively retested sites that had previously yielded low lead levels. Such selective sampling violates the Lead and Copper Rule's intention that water systems "do not use only those sampling locations with the lowest lead or copper levels."[70]

Flint's instructions to residents for the collection of tap-water samples also violate the Lead and Copper Rule. The Rule allows residents to collect the tap-water samples used to monitor lead in drinking water, so long as the water system instructs residents of the sampling procedures required by the regulations.[71] Tap-water samples must be "first-draw samples," meaning that the sample must be collected after water in the tap has stood motionless in the plumbing system for at least six hours.[72] Flint's instructions direct residents to flush their taps for five minutes prior to letting the water sit for the six required hours. This "pre-flushing" has been shown to "result in the minimization of lead capture and significant underestimation of lead levels in drinking water."[73] The water system's pre-flush instruction "negates the intent of the [Lead and Copper Rule] to collect compliance

samples under 'worst-case' conditions,"[74] and goes "against the intent of the monitoring protocol, since it changes the normal water use of the homeowners in the sample."[75]

Flint's water system is violating the Lead and Copper Rule's reporting requirements by representing to MDEQ that Flint's monitoring practices are in compliance with the Rule. The City's water system did not provide documentation to MDEQ justifying its selection of new sample sites in the January–June 2015 monitoring period, and, upon information and belief, is not accurately reporting information concerning whether sampled sites meet required regulatory criteria.[76]

The Lead and Copper Rule also requires Flint's water system to notify each resident whose tap water was sampled of the lead results.[77] Upon information and belief, Flint has failed and continues to fail to properly notify all residents whose tap water was tested for lead of the individual monitoring results.

B. Flint's water system has failed to maintain optimal corrosion-control treatment

The Lead and Copper Rule required all large public water systems, including Flint's water system, to install an "optimal corrosion control treatment" program by January 1, 1997.[78] After a system has optimized its corrosion-control treatment, the regulations require the system to "continue to operate and maintain optimal corrosion control treatment."[79] Since April 2014, Flint's water system has not maintained an optimal corrosion-control treatment program. Historically, the water system complied with the corrosion-control requirements by purchasing treated water from Detroit. When Flint switched its water source to the Flint River in April 2014, it did nothing to treat the Flint River water to control corrosion. This failure to maintain optimized corrosion control violates the Lead and Copper Rule.

Although Flint's water system has resumed its purchase of treated water from Detroit, it has not disavowed its erroneous interpretation of the Lead and Copper Rule's corrosion-control requirements. Nor has it committed to maintaining optimized corrosion control when it switches water sources again this summer to the KWA pipeline. Flint's water system's failure to maintain an optimized corrosion-control treatment program is likely to recur in the future.

III. The State of Michigan's failure to maintain a schools testing and remediation program violates the Safe Drinking Water Act

The Act requires each state to establish a program "to assist" schools and day care centers in "testing for, and remedying, lead contamination in drinking water."[80] Test results must be made available at schools, with notification to parents and teachers.[81] Michigan, upon information and belief, does not maintain a program for school lead testing, remediation, and notification.[82] Accordingly, Governor Snyder and MDEQ Director Wyant are presently in violation of the Act's schools provision.[83]

IV. Intent to Sue

The City of Flint and Michigan state officials have been and continue to be in violation of the Lead and Copper Rule's requirements for monitoring and sampling tap water for lead, notifying the public of and reporting to the State tap-water monitoring results, and corrosion control. Governor Snyder and MDEQ Director Dan Wyant are in violation of the Act's requirement to maintain a program to assist Michigan schools with testing and remediating lead in school drinking water. These violations are likely to continue and to recur in the future absent a judicial decree ordering City and State officials to comply with the Act. If the City of Flint and the Michigan state officials identified above fail to cure their noncompliance with the Act within sixty days, Concerned Pastors for Social Action, Melissa Mays, ACLU of Michigan, and NRDC will file suit in federal district court seeking declaratory relief, injunctive relief, and litigation costs, as appropriate.

The name, address, and telephone number of each person giving notice pursuant to this letter are:

Subject: Flint Consultant Selection Process

Good Morning Randy:
Per my voicemail to you this morning, the EPA's Order, in part, requires a "publicly transparent process" to get nationally recognized water treatment experts on board as mentioned in item 4 on the second page of US EPA Administrator McCarthy's letter to Governor Snyder, attached.

In regard to item 5 of Ms. McCarthy's letter regarding the "affirmative determination" that Flint has the "technical, managerial, and financial capacity" to make the transition to the KWA, the Flint Drinking Water Task Force's recommendations, attached, recommend that "Flint develop and implement a Performance Assessment Plan prior to distribution of water from the KWA...".

Tetra Tech has the expertise to provide the required services and desires information regarding the process that will be used for consultant selection.

Thank you for any assistance you can provide.

Best regards,
Vic

Flint Drinking Water Task Force (FTF 15-5)

Task Force Recommendations Regarding Flint Drinking Water Treatment Performance Evaluation

For protection of public health, Flint must avoid significant distribution system issues similar to those experienced following the source water switch to the Flint River and subsequent operation of Flint's water treatment plant.

The EPA Flint Safe Drinking Water Task Force recommends that Flint develop and implement a Performance Assessment Plan prior to distribution of water from the Karegnondi Water Authority (KWA) source. The plan must address how the treatment plant will be brought on-line, and how finished drinking water will be introduced to the distribution system. This plan is particularly important given the City has no experience treating the KWA-supplied water, and is operating a distribution system that is still recovering from the past upset.

Flint should work with its consultant and MDEQ to establish objective water quality and plant performance criteria. The plan must include operation of Flint's drinking water treatment plant for a reasonable period of time to treat KWA-supplied water until:

(1) the treated water meets finished water quality goals;
(2) the finished water quality is consistently maintained;
(3) potential plant operational and mechanical start-up issues are identified and addressed; and
(4) water plant operations staff are proficient in treating the new source.

KWA water should not be distributed to the public until these conditions are satisfied.

During this performance evaluation period, Flint must distribute to the public water from an alternate source. As water is already received from Detroit (Great Lakes Water Authority), that is an obvious and appropriate choice for that interim period. The length of the performance evaluation period will be dependent on the amount of time it takes for the treatment plant to consistently and reliably meet the performance criteria.

Because of similarities in source water and in treatment processes with Detroit's Huron plant, the Flint water plant will likely be configured to produce treated water with similar quality to that of the water currently being received from Detroit. Continued use of Detroit water during the performance evaluation period will minimize the risk of distribution system upsets.

We encourage Flint and the City's consultant to perform a number of assessments prior to the completion of the KWA pipeline and availability of the Lake Huron source water to expedite the plant transition period. For example, the planned bench-scale jar tests will be helpful in establishing full-scale treatment plant operating parameters. Assessment of corrosion control treatment using Detroit source water with lead pipe loop rigs in advance of switching to the KWA source may also be transferrable to the KWA source water. Pipe loops rigs operated during the performance assessment period will help predict whether lead release will be an issue when the new plant goes on line. EPA will work with the City to set up pipe loops at the Flint treatment plant.

Thanks Terry.

The state's top priority right now is making sure the people of Flint immediately have access to safe, clean water, and that includes reaching every home to supply water, filters, replacement filter cartridges and water testing kits. The administration is also working with independent experts on testing of the water and will continue to work with them going forward.

Dave...

We generally don't comment on litigation, especially lawsuits we have either just received or have not been able to review.

That said, seems we should (after noting we do t comment on litigation) point to on-going State efforts etc.

If you agree, could you provide a couple sentences that would reflect consistently with what the administration has been saying in relation to on-going State efforts?

Please advise and thanks.

Terry

Subject: Bullet Points for State

Good morning, Mr. Vaughn.

Please find below a summary of three of the top critical needs/concerns currently facing the City of Flint as a result of the Water Crisis.

1. Cash Flow - The City's cash flow continues to decline at an increasing rate as a result of decrease collections and reduced water rates.

a. Collection Rate - By not performing shut offs, the City's collection rate has dropped drastically. This trend is confirmed by the steadily decreasing number of payments received each day which is tracked on a daily basis.

b. Billed Revenue - The City was required to reduce its water and sewer rates as a result of the Preliminary Injunction Order issued by Judge Hayman. Although the amended order authorizes the City to restore rates to those included in the EM adopted Master Fee Schedule, the City has not implemented any changes at this time. This has resulted in an average loss of monthly billed revenue of over $600,000. However, billed revenue is meaningless if it cannot be collected (see bullet point 1).

c. Delinquent Accounts prior to August 17, 2015 - As a result of the original preliminary injunction order, the City was prohibited from performing shut offs on any delinquent accounts as of the date of the Order. The City was forced to effectively "set aside" all past due accounts as of August 17 in the amount of $10.2 million.

2. Capital Needs - All scheduled FY2016 capital improvement projects for General Fund, Water and Sewer postponed or cancelled as well as those necessary to prepare for receipt of KWA water and all water infrastructure replacement and repairs related to removal of lead lines.

3. Litigation - Shears litigation costs and litigation costs of emerging class action lawsuits against the City as a result of the lead water crisis.

I have also attached a Summary of Water Crisis Financial Needs provided to the Governor on January 15, 2016.

Please let me know if you have any questions or require any additional information.

Best regards,

Jody N. Lundquist

CITY OF FLINT
SUMMARY OF WATER CRISIS FINANCIAL NEEDS

Shears v. City of Flint Litigation

Description	Amount
Loss in monthly billed revenue The Preliminary Injunction Order issued by Honorable Judge Archie Hayman on August 17, 2015 required the City to reduce water and sewer rates to exclude the September 16, 2011 rate increases This resulted in a loss of monthly billed revenue of approximately $616,000 per month for approximately 5 months	$ 3,080,000
Loss in monthly revenue collections As a result of the City's inability to enforce payment through shut offs, which was later accelerated by the declaration of the water emergency, the City's collection rate has fallen from 98% in August to 75% in November before improving slightly in December The average collection rate for the period August to December is now 84% The City issued its first round of shut off notices in November but has not resumed processing as of January 14, 2015 No disconnection of service for nonpayment on active accounts has occurred since August 2015 Based on the reduced average monthly billed revenue of $4 6 million and the increased delinquency rate, the City's allowance for uncollectible accounts must be increased The collection rate is expected to remain low until shut off notice processing is resumed and processed consistently ($4 6 million x 15% x 7 months)	$ 4,830,000
Loss due to uncollectible delinquent accounts at August 17, 2015 The original preliminary injunction order enjoined the City from disconnecting any accounts for non payment for which the delinquency arose between September 16, 2011. This effectively forced the City to set aside approximately $10.9 million in outstanding customer balances as uncollectible	$ 10,890,947
Rate increase for the period September 16, 2011 through June 30, 2012 Judge Hayman has stated in open court that the rate increase from September 16, 2011 to June 30, 2012 was illegal While a ruling regarding this matter is anticipated, the increase to rates and charges during that time period resulted in approximately $15 million of billed revenue Should the judge order the City to repay these billings or provide credits to customer accounts in that amount, the City's current revenue will need to offset this enormous cost Collections for the period October 2011-July 2012 for which the September 16, 2011 rate increase would have been billed in received total $46 million Refunding the amount of collections during that period resulting from the rate increase will cost the City over $16 million	$ 16,100,000
Capital Improvement Projects removed from Fiscal Year 2016 Budget As a result of the immediate and drastic impact of the preliminary injunction order, the City issued a spending freeze for all non-critical items. In order to offset the reduction in billed revenue and collections, the City reviewed its capital improvement plan and cancelled or postponed nearly all projects with the exception of those necessary to prepare for the Karegnondi Water Authority (KWA) The removal of $3.9 million and $1 7 million in planned capital improvement projects for the Sewer and Water funds, respectively, were included in the adopted FY16 First Quarter Budget Amendments	$ 5,600,000
Legal costs associated with litigation The State has agreed to reimburse the City 75% of legal costs associated with this litigation not to exceed a total reimbursement of $300,000 Total legal expense of representation by external legal counsel is anticipated to reach $600,000 leaving a gap of $300,000 borne entirely by the City (25% of the first $400,000 = $100,000 plus an additional $200 000 through final ruling)	$ 300,000
TOTAL FINANCIAL IMPACT OF SHEARS V. CITY OF FLINT LITIGATION	**$ 40,800,947**

CITY OF FLINT
SUMMARY OF WATER CRISIS FINANCIAL NEEDS

Declaration of State of Water Emergency

Description	Amount
Additional Corrosion Control Procedures Implementation of the additional corrosion control procedures totaled approximately $45,000 and is being maintained at an estimated cost of $100/day ($45,000 + $100/day x 365 days/year x 5 years)	$ 227,500
Purchase of DWSD Water The City expended $2 million towards the $10 million escrow required by the Detroit Water and Sewage Department (DWSD) to resume purchasing water through June 30, 2016. It is expected that the City will need to continue purchasing water from Great Lakes Water Authority (formerly DWSD) for an additional three months until the City is ready to begin receiving water through KWA.	$ 6,000,000
Backflow system necessary for testing and future back flow supply As a result of switching the City's water supply to DWSD, the pipe that would have been used to transport raw water from Lake Huron to the City's water plant is in use The City must develop an alternate path from which to receive water during the period for which raw water must be tested prior to full conversion to KWA as the City's water supplier	$ 6,342,326
PSI contractor for locating and mapping lead lines Historical data maintained by the City is incomplete and inaccurate. A third party contractor has been engaged to assist in locating lead lines and testing water samples obtained from those sites Additional services may include integrating the results of their efforts with the City's GIS maps	$ 75,000
University of Michigan for data compilation The University of Michigan has agreed to assist the City in its efforts to compile historical data on the location of lead lines and any additional data obtained through the course of this emergency	$ 3,600
Excavation of residential service lines The excavation of 6 residential services lines is necessary for additional testing ($5,000/line x 6 lines)	$ 30,000
Replacement of service lines Replacement cost included in other estimates provided to the State of Michigan detailed each residential line to cost $1,500 to replace ($1,500/line x 15,000 lines)	$ 22,500,000
8" residential water mains and 24" transmission mains It is estimated that there are approximately 600 miles of 8" residential lines and 60 miles of 24" transmission mains needing replacement. Preliminary estimates place replacement of residential lines at $145 per foot and $800 per foot for transmission mains ($145/foot x 600 miles x 5,280 feet/mile plus $800/foot x 60 miles x 5,280 feet/mile)	$ 712,800,000
Loss of monthly County backup revenue ($40,000/month x 9 months) As a result of the media coverage and declaration of a health emergency, Genesee County has decided to discontinue its contractual payment to the City per its backup agreement. The City has not received payment since September 2015 Assuming another agreement for backup supply is negotiated with Genesee County, $360,000 in revenue adopted in the City's FY16 budget will be lost or remain uncollectible without litigation	$ 360,000
Fire Department overtime The Fire Department is now operating an additional fire station as a distribution center 7 days per week With the necessity to designate staff to the EOC and overseeing distribution at each of the other sites, overtime costs are being incurred daily ($2,000/day x 180 days)	$ 360,000
PTO's for counter ($3,000/month x 6 months) In order to carryout staffing of the EOC and distribution counter at City Hall, civilian staff within the police department has been assigned to fulfilling this specific function Additional wages are estimated at $3,000 per month ($3,000/month x 6 months)	$ 18,000
TOTAL FINANCIAL IMPACT OF DECLARATION OF WATER EMERGENCY	**$ 748,716,426**

STATE OF MICHIGAN
EXECUTIVE OFFICE
LANSING

RICK SNYDER
GOVERNOR

BRIAN CALLEY
LT. GOVERNOR

EXECUTIVE ORDER
No. 2016 – 1

CREATION OF
FLINT WATER INTERAGENCY COORDINATING COMMITTEE

MICHIGAN DEPARTMENT OF STATE POLICE

WHEREAS, Section 1 of Article V of the Michigan Constitution of 1963 vests the executive power of the state of Michigan in the Governor; and

WHEREAS, Section 2 of Article V of the Michigan Constitution of 1963 empowers the Governor to make changes in the organization of the Executive Branch or in the assignment of functions among its units that he considers necessary for efficient administration; and

WHEREAS, municipal water in the City of Flint showed elevated lead levels after the City of Flint switched its water source to the Flint River; and

WHEREAS, the County of Genesee and the City of Flint have taken actions to cope with the situation, including but not limited to, switching back to the Detroit water system on October 16, 2016, declaring local states of emergency, activating the emergency response and recovery aspects of their emergency operations plan, marshaling and distributing required resources on a city-wide level, and issuing emergency public information and bulletins; and

WHEREAS, the Flint Water Advisory Task Force was formed as an independent advisory task force charged with reviewing actions regarding water use and testing in Flint; and

WHEREAS, the Flint Water Advisory Task Force has made an interim recommendation that the state government should coordinate a sustained, public-health focused response to remedy, to the fullest extent possible, the impacts on the Flint community; and

WHEREAS, on January 5, 2016, the Governor issued a proclamation declaring a state of emergency in the County of Genesee and the City of Flint; and

WHEREAS, multiple state departments and local authorities share the responsibility for ensuring safe drinking water and the coordination of efforts to address the consequences resulting from the presence of elevated lead levels in drinking water; and

WHEREAS, ensuring safe drinking water and addressing the consequences of elevated lead levels in drinking water will require collaboration and communication between state departments, local governments, and subject matter experts; and

WHEREAS, the establishment of a Flint Water Interagency Coordinating Committee within the Michigan Department of State Police will facilitate the collaboration and

communication between state departments, local governments, and subject matter experts necessary to effectively coordinate a response and recovery effort;

NOW, THEREFORE, I, Richard D. Snyder, Governor of the state of Michigan, by virtue of the power and authority vested in the Governor by the Michigan Constitution of 1963 and Michigan law, order the following:

I. CREATION OF THE FLINT WATER INTERAGENCY COORDINATING COMMITTEE

A. The Flint Water Interagency Coordinating Committee ("Coordinating Committee") is created as an advisory body within the Michigan Department of State Police (the "Department").

B. The Coordinating Committee shall be composed of the following seventeen (17) members who shall serve an initial term expiring on December 31, 2018.

- The Director of Office of Urban Initiatives within the Executive Office of the Governor;
- The Deputy State Director of Emergency Management and Homeland Security within the Michigan Department of State Police;
- The Director of the Department of Environmental Quality, or his or her designee;
- The Director of the Department of Health and Human Services, or his or her designee;
- The Director of the Department of Licensing and Regulatory Affairs, or his or her designee;
- The State Treasurer, or his or her designee;
- The Superintendent of Public Instruction, or his or her designee;
- The elected Mayor of the City of Flint who shall be appointed to the Coordinating Committee by the Governor;
- Three (3) additional representatives of the City of Flint who shall be submitted by the Mayor of the City of Flint and appointed to the Coordinating Committee by the Governor;
- Three (3) representatives of Genesee County who shall be submitted by the Genesee County Board of Commissioners and appointed to the Coordinating Committee by the Governor; and
- Three (3) subject matter experts who shall be appointed to the Coordinating Committee by the Governor.

After the initial appointments, members of the Coordinating Committee appointed under this subsection shall serve terms of three years.

C. A vacancy on the Coordinating Committee occurring other than by expiration of a term shall be filled in the same manner as the original appointment for the balance of the unexpired term. A member may continue serving until his or her successor is appointed. A member may serve successive terms if reappointed.

II. CHARGE TO THE COORDINATING COMMITTEE

A. The Coordinating Committee shall act in an advisory capacity to the Governor and subject to the Governor's review and approval, shall do all of the following:

1. Create an incident action plan designed to assist state and local authorities in ensuring safe drinking water for the residents of the City of Flint and addressing the consequences of elevated lead levels in drinking water.

2. Review recommendations made by the Flint Water Advisory Task Force and propose statutory, regulatory, or contractual actions necessary for implementation of such recommendations.

3. Identify staff with competencies in emergency planning, operations, logistics, and finance as outlined under the National Incident Management System (NIMS) to work with the Coordinating Committee to track resource requests and document progress on the incident action plan.

4. Establish a standard process for sharing pertinent information between all members including use of the NIMS and Unified/Incident Command as appropriate.

5. Establish routine communications protocols at the local, executive, and legislative levels as appropriate.

6. Establish a public information protocol to effectively inform the community.

7. Make recommendations for acceptable standards for potable water.

8. Make recommendations regarding the health impacts for the affected population.

9. Assess the status of infrastructure and determine feasible actions to upgrade the water system.

10. Establish subcommittees among its members to specifically address, at a minimum, each of the three following topic areas: Water Quality, Community Health, and Education.

11. Assist the Governor and the Department in implementing appropriate operations permitted under the Michigan Emergency Management Act or the federal Stafford Disaster Relief and Emergency Assistance Act, including local emergency operations plans and guides.

12. Explore any avenues of funding for response and recovery efforts including federal grants, legislative appropriations, and private partners.

B. The Coordinating Committee shall provide other information or advice as requested by the Governor or the Department.

III. OPERATIONS OF THE COORDINATING COMMITTEE

A. The Coordinating Committee shall be staffed and assisted by personnel from the Department as directed by the Department Director. Any budgeting, procurement, and related management functions of the Coordinating Committee shall be performed under the direction and supervision of the Department Director.

B. The Director of Office of Urban Initiatives within the Executive Office of the Governor and the Deputy State Director of Emergency Management and Homeland Security shall together serve as the Statewide Coordinators responsible for the administrative functions of the Coordinating Committee.

C. The Coordinating Committee may utilize subcommittees and advisory panels composed of its members to assist in completing the functions of the Coordinating Committee. The Coordinating Committee may request public participation on advisory panels as the Coordinating Committee deems necessary.

D. When making recommendations to the Governor, a majority of the serving members of the Coordinating Committee must concur.

E. The Coordinating Committee shall meet at the call of either of the Statewide Coordinators and as may be provided in procedures adopted by the Coordinating Committee.

F. The Coordinating Committee may, as appropriate to perform its duties, make inquiries, conduct studies, consult with outside experts and federal agencies, and receive comments from the public.

G. Members of the Coordinating Committee shall serve without compensation but may receive reimbursement for necessary travel and expenses according to relevant statutes and the rules and procedures of the Civil Service Commission, and the Department of Technology, Management and Budget, subject to available funding.

H. The Coordinating Committee may accept donations of labor, services, or other items of value from any public or private agency or person. Any donations shall be expended in accordance with applicable laws, rules, and procedures.

I. Members of the Coordinating Committee shall refer all legal, legislative, and media contacts to the Department.

J. A writing prepared, owned, used, in the possession of, or retained by the Coordinating Committee in the performance of an official function is subject to the Freedom of Information Act, 1976 PA 442, as amended, MCL 15.231 to 15.246.

IV. MISCELLANEOUS

A. All departments, committees, commissioners, or officers of this state or of any political subdivision of this state may give to the Coordinating Committee, or to any member or representative of the Coordinating Committee, any necessary assistance required by the

Coordinating Committee, or any member or representative of the Coordinating Committee, in the performance of the duties of the Coordinating Committee so far as is compatible with its, his or her duties.

B. Any suit, action, or other proceeding lawfully commenced by, against, or before any entity affected under this Order shall not abate by reason of the taking effect of this Order.

C. The invalidity of any portion of this Order shall not affect the validity of the remainder of the Order.

The Executive Order shall become effective upon filing.

Given under my hand and the Great Seal of the state of Michigan this 11th day of January, in the year of our Lord, Two Thousand Sixteen

Larry Steckelberg
Division Administrator
Property Services Division
Michigan Department of Treasury
(517) 241-3733

DRAFT V2 01/27/16

FLINT WATER FACTS

- Water user revenue for fiscal year 2015 was $33.7M. Collection rate averaged 98%.
- Water user revenue for fiscal year 2016 assuming a conservative collection rate of 85% and a fee increase of 22% would result in approximately $26.4M.
- City estimates a collection rate of 65% for the period of January 2016 through June 2016.
- City estimates a collection rate of 45% for the period of July 2016 through December 2016.
- **Absent normal collection rates and a fee increase, the City projects a cash flow shortfall beginning September 2016.** Overall, cash flow shortage through December 2016 is estimated to be $8.5M.
- If the City were to experience normal collection rates and realize a fee increase, the City estimates a cash balance of a positive $5.3M. Therefore, total cash shortage is $13.8M ($8.5M + $5.3M).
- Based on a fact sheet of the water system updated by Flint in March 2015, the water system:
    - Had 31,000 users in 2014 compared to 46,000 users in 2006.
    - Has 600 miles of distribution mains.
- Based on numerous media reports, the average water bill is $140 per month.

Treasury's Role in Three Primary Areas

Flint has critical needs in many areas. We see our role in three primary areas.

- Infrastructure development and finance.
- Fiscal stability of both the water/sewer and overall city government.
    - Short term (cash)
    - Long term
- Flint's economic development.

Infrastructure Development and Finance

- Treasury's goal is to work with others to develop a long-term water infrastructure investment plan for distressed local units.
- Once a quality study is created to determine an accurate picture of the scope and cost for the necessary system improvements, Treasury is confident we can come up with a method to help finance improvements.
- We will look at alternative funding sources, including bonds, surcharges, and existing Federal and State dollars.

Fiscal Stability

- In April of 2015, Flint was on a path to exit financial emergency with its funds showing comfortable cash balances.
- The cash balance in the water system was $20 million in July 2015. Now, the system is in the red and Flint's water system will potentially be out of cash as early as September. The sewer fund faces a similar situation. Eventually this will become an obligation of the city's general fund.
- Develop strategies to stabilize near term finances of water and sewer system.
- Doing all we can to make sure Flint's water rates are affordable.
- Assist city in continuing on path to financial stability across all accounts.

Economic Development

- We need to address the long term impact of the recent months on the city's economic development.
- Start by assessing the impact on property values and business location decisions.
- Partner with economic development agencies to assist in growing Flint's economy.
- The support needs to be targeted to the needs of the city.

Treasury Role in Flint

Near Term Goals

Stabilizing Cash Flow for Water and Sewer

- Complete cash flow analysis
- Compile data on declining pay rates
- Develop strategies to stabilize finances

Infrastructure Financing

- Explore avenues for affordable infrastructure development
- Assist in financial planning and implementation

Economic Development

- Partner with economic development agencies to assist in growing Flint's economy.
- Assist with project financing.

To: Stanton, Terry A. (Treasury); Khouri, Nick (TREASURY)
Cc: Doyle, Maureen (Treasury)
Subject: RE: Lawsuit re Flint

From a legal standpoint, I would prefer that the statement simply be "we do not comment on current litigation." However, I appreciate there may be a need to emphasize corrective steps that have been, or that are being, taken. The Governor's Office likely will not receive a copy of the complaint. Although he was named in the November 16, 2015, Notice of Intent to Sue, he was removed as a defendant from the complaint as it was filed today.

-----Original Message-----

Subject: Lawsuit re Flint

A couple reporters have asked for comment on a lawsuit filed this am against Nick and the Flint RTAB, the city of Flint and Natasha Henderson to comply with the safe drinking water act, including the replacement of lead service lines.

After conferring with the Gov's office, they suggest the following:

"We have not received or reviewed the lawsuit at this time and do not comment on current litigation.

That said, the state's top priority is making sure the people of Flint immediately have access to safe, clean water, and that includes reaching every home to supply water, filters, replacement filter cartridges and water testing kits. The administration is also working with independent experts on testing of the water and will continue to work with them going forward."

Want to be sure you are comfortable with this response.

Please advise.

T. Chubb (Flint)

Not Present:
Mayor Weaver (Flint)
F. Headen (Treasury)
W. Lamphier (Treasury)

1. Water Update:

EPA ORDER/WATER TESTING:

- Released recently, was exhaustive (200 pages). Requires the city to do significant water testing daily.
- **City feels that it does not have the capacity to complete all of what the EPA has in its order,** will be meeting with them Thursday January 28th, 2016, and will address that with them. Will ask the EPA to consider hiring a contractor to help with water testing.
- City is currently taking 400 samples a day to Lansing for the state to test (twice daily).
- Lead levels are "way down", only a few areas in the city are still over the maximum threshold.
- Unclear when the community will feel safe drinking the water after this.

- Governor has a committee on safe drinking water that includes Mark Edwards (Virginia Tech) that will make a public announcement that it is safe to drink the water again.

BLOOD LEAD LEVEL TESTING

- Hurley Medical Center and Mott Children's are testing blood lead levels, it is unclear whether or not this will be a coordinated effort, or sporadic.

SAFE DRINKING WATER REVOLVING LOAN FUND

- Representative from the federal component of this loan program will be visiting along with other EPA officials on January 28th, 2016.
- N. Henderson had made it clear that the city could not repay any of the money that they are requesting in this loan fund, and hopes that the fund administrators would consider a 100% forgivable loan.
- **Intend to submit their executive summary by February 1st, 2016**
- City's application asks for $25M a year for five years to remove/replace priority water infrastructure. Will specifically address where water has been sitting for longer periods of time, and right sizing the system as a whole. *Per previous call, Rowe Engineering is helping them with this application*

DWSD WATER CONSUMPTION

- The city is consuming almost precisely how much water it estimated that it would be
- The city's water consumption rate has not decreased at all, even after the lead issue, people appear to still be consuming about the same amount of water as they did before.

MML SEARCH

- Hopes that the MML will have the position posted this morning
- The city had it posted for the last week, and have so far received 11 resumes

WATER DISTRIBUTION/RELIEF EFFORTS

- City is trying to find some different locations for the EOC to distribute water and filters, because of traffic, several of the fire stations are not good locations for this effort, and continued use of those facilities might diminish the city's capacity to respond to fires.
- City suspects that the need for bottled water will decrease in the next few months
- The city suggests that they would prefer donations and contributions to be financial, instead of sending more bottled water. Donations can be made to the Greater Flint Community Foundation through their website.

2. Litigation issues

FINANCIAL REIMBURSEMENT

- **City is submitting another letter to the treasury to ask to be reimbursed for additional legal fees. The city suggests that the number of lawsuits that they will be defending against will be increasing significantly.**

SHEARS V FLINT

- A revision was issued on January 11th, 2016 that negated much of the financial impacts of the original lawsuit
- City will be able to collect past due bills going all the way back to July 2012
- Rate hikes between September, 2011 and July 2012 are still an issue, because the city raised rates in a manner that was inconsistent with city charter. T. Chubb suggests that after a motion that he recently filed, he might be able to get that piece dismissed as well.
- Val Washington (attorney for plaintiff) has a meeting scheduled with the city to discuss a settlement, T. Chubb believes that it is because V. Washington feels that he no longer has a case.

KINCAID V FLINT

- T. Chubb expressed that he feels this case is very similar to Shears v Flint.
- Thinks that V. Washington is pursuing this case because it was filed earlier, and therefore it can address water rates that go back to 2006 because it was filed in 2012.

MAYS V FLINT/SNYDER

- Coordinating with the Attorney General's office, will have their "12B6's" filed in the beginning of February, 2016.

- Governor has a committee on safe drinking water that includes Mark Edwards (Virginia Tech) that will make a public announcement that it is safe to drink the water again.

BLOOD LEAD LEVEL TESTING

- Hurley Medical Center and Mott Children's are testing blood lead levels, it is unclear whether or not this will be a coordinated effort, or sporadic.

SAFE DRINKING WATER REVOLVING LOAN FUND

- Representative from the federal component of this loan program will be visiting along with other EPA officials on January 28th, 2016.
- N. Henderson had made it clear that the city could not repay any of the money that they are requesting in this loan fund, and hopes that the fund administrators would consider a 100% forgivable loan.
- **Intend to submit their executive summary by February 1st, 2016**
- City's application asks for $25M a year for five years to remove/replace priority water infrastructure. Will specifically address where water has been sitting for longer periods of time, and right sizing the system as a whole.

DWSD WATER CONSUMPTION

- The city is consuming almost precisely how much water it estimated that it would be
- The city's water consumption rate has not decreased at all, even after the lead issue, people appear to still be consuming about the same amount of water as they did before.

MML SEARCH

- Hopes that the MML will have the position posted this morning
- The city had it posted for the last week, and have so far received 11 resumes

WATER DISTRIBUTION/RELIEF EFFORTS

- City is trying to find some different locations for the EOC to distribute water and filters, because of traffic, several of the fire stations are not good locations for this effort, and continued use of those facilities might diminish the city's capacity to respond to fires.
- City suspects that the need for bottled water will decrease in the next few months
- The city suggests that they would prefer donations and contributions to be financial, instead of sending more bottled water. Donations can be made to the Greater Flint Community Foundation through their website.

2. Litigation issues

FINANCIAL REIMBURSEMENT

- **City is submitting another letter to the treasury to ask to be reimbursed for additional legal fees.**

SHEARS V FLINT

- A revision was issued on January 11th, 2016 that negated much of the financial impacts of the original lawsuit
- City will be able to collect past due bills going all the way back to July 2012

- Rate hikes between September, 2011 and July 2012 are still an issue, because the city raised rates in a manner that was inconsistent with city charter. T. Chubb suggests that after a motion that he recently filed, he might be able to get that piece dismissed as well.
- Val Washington (attorney for plaintiff) has a meeting scheduled with the city to discuss a settlement, T. Chubb believes that it is because V. Washington feels that he no longer has a case.

KINCAID V FLINT

- T. Chubb expressed that he feels this case is very similar to Shears v Flint.
- Thinks that V. Washington is pursuing this case because it was filed earlier, and therefore it can address water rates that go back to 2006 because it was filed in 2012.

MAYS V FLINT/SNYDER

- Coordinating with the Attorney General's office, will have their "12B6's" filed in the beginning of February, 2016.

Lindsey...

You may attribute the following to me.

We have received and are reviewing the lawsuit but we do not comment on current litigation.

That said, the state's top priority is making sure the people of Flint immediately have access to safe, clean water, and that includes reaching every home to supply water, filters, replacement filter cartridges and water testing kits. The administration is also working with independent experts on testing of the water and will continue to work with them going forward.

Thanks, Terry

Hey there Terry, Happy New Year. Hope you're doing ok.

I'm just sending this along in some offhand chance Dept of Treasury wants to comment. It was only filed today so I *assume* not, but figured I should at least ask. The suit names much of the RTAB in Flint and Khouri in addition to the City of Flint. Let me know either way if you could. Thanks.

Best~

A Fix for Flint: Groups File Federal Lawsuit to Secure Safe Drinking Water in Flint

Concerned Pastors for Social Action, Melissa Mays, ACLU of Michigan, and NRDC Ask Court to Intervene to Fix Flint's Water Crisis

FLINT, Mich. (January 27, 2016)- A coalition of local citizens and national groups filed suit today seeking federal court intervention to secure access to safe drinking water for the people of Flint, Michigan.

Alleging violations of the federal Safe Drinking Water Act, the complaint was filed in the U.S. District Court for the Eastern District of Michigan by the Natural Resources Defense Council, the ACLU of Michigan, Concerned Pastors for Social Action and Flint resident Melissa Mays.

"The water in Flint is still not safe to drink because City and State officials are violating the federal law that protects drinking water. In doing so, they are exposing the people of Flint to lead, a powerful toxin that can be devastating to young children. We are asking a federal court to step in because the people of Flint simply cannot rely on the same government agencies that oversaw the destruction of its infrastructure and contamination of its water to address this crisis," said Dimple Chaudhary, Senior Attorney with the Natural Resources Defense Council.

The lawsuit asks a federal court to compel the City and state officials to follow federal requirements for testing and treating water to control for lead and to order the prompt replacement of all lead water pipes at no cost to Flint residents. The groups and Ms. Mays also seek appropriate relief to remedy the health and medical harms to Flint residents from the lead contamination. The lawsuit is not seeking monetary damages.

"Everyone in this country deserves and expects safe drinking water, regardless of your race, economic status or zip code. The residents of Flint were stripped of their democratically elected authority and, in the name of

The information contained below is factual and correct.

Loans are awarded quarterly as the community directs their need for the funding. No loans have been awarded in the DWRF program to date for the current fiscal year. We expect to close on 2 loans in the second quarter. Attached is a list of what's to be funded this year.

Flint can apply immediately for DWRF funding. Staff from the Revolving Loan programs have been in recent contact with the consultant engineer Flint hired to prepare their project plan for DWRF. The amended intended use plan that DEQ will submit to EPA must include a description of the project that Flint intends to construct as well as the associated dollar amount. There is current funding available within the DWRF (as confirmed with the Michigan Finance Authority) for Flint to quickly begin work; Flint does NOT need to wait for the 2016 EPA funding to be awarded to the DEQ. EPA and DEQ have been in discussion and will work to expedite the plan and its review to get the money awarded. There is no estimate of when to expect the project plan from Flint.

Thanks, Mel. I'm wondering whether the FY16 loans have been dispersed yet? I'd like to get an idea how soon, for instance, Flint can apply for the FY17 program and an estimate of how soon they could have that in hand to start working on, say, lead line replacement. Has the EPA indicated that it would expedite their consideration of Michigan's plan for how to spend the FY17 money?

Is there an estimate of when the project plan will be submitted by the city?

Hi Melissa -
Based on a conversation with EPA, the $80 million referenced in recent media outlets is not new funding.

The federal funds are provided each year to support the state's water infrastructure revolving loan programs. The federal funds ($59 million for wastewater and $27 million for drinking water) plus the $17 million of state match and loan repayments from prior years are used to support new infrastructure loans.

In 2016, the DEQ has committed to 33 loans totaling $240 million to various communities, including Detroit, Burton, Pontiac, and others. In addition, the DEQ received applications for 45 additional projects totaling $247 million. Flint did not apply for funding in 2016. The totals are more than the $80 million due to the fact of local repayments by other communities.

Staff are working with the City of Flint and consulting engineers on a project plan. The project plan will be the top priority in relation to the other projects should/once the City submits a plan.

Hi Mel,

I am the Washington correspondent for the Detroit News. I just left you a voicemail about a story that I'm working on about the Drinking Water Revolving Loan program.

I had a few questions about the $80M for FY 17 mentioned by Obama last week, and how soon the DEQ may start accepting loan applications, etc, from municipalities, and what determines

whether the loans are forgivable.

I also understand that there's ongoing discussions between Flint and DEQ regarding loans that the city could use for replacing lead service lines on private property. EPA approved this last fall as a permissible use of the federal Revolving Loan Fund. I'd like to know what the status of those conversations are, and how soon the city could potentially be securing loan funds to begin such work?

Thanks,
Melissa Burke

Importance: High

Angela,

Here is what I did regarding approvals related to City water:

1. **April 13, 2015** – Lockwood, Andrews and Newnam for GAC Filters to assist in reducing the levels of TTHM: **$1,601,740**
2. **December 11, 2014** – Purchase of 594 water meters from Metron-Farnier, LLC: **$110,811**
3. **August 28, 2014** – Purchase of water testing supplies from Idexx Distribution: **$70,000**
4. **May 30, 2014 – Approval to sell a 72"** pipeline: **$3,987,700**

If additional information is desired, please let me know.

Thanks,

Rob

Attachments: Water Fund Revenue Report 7-1-14 through 6-30-15.xlsx

Good evening, Cary.

Please find attached a revenue report generated out of the City's accounting software. I have subtotaled line items to that tie directly to the amounts shown on the CAFR. You are likely to notice that July 2014 has negative amounts. This is a function of accruing billed revenue to the appropriate fiscal year. Just as there are negative amounts in July 2014, there are larger amounts in June 2015 as a result of the year end closing process. I have included a second tab FYE-2014-2015. The total water revenue compiled from billing reports maintained by the City's Treasury Department is highlighted in blue. The sum of these monthly billings is $32,839,437. This figure correlates to the "Meter Water Sales" line item on the Revenue Report. There are items contained in the GL report that are not included in Treasury's FYE-2014-2015 billing summary. The amounts used to generate Treasury's summary were recorded by Treasury for internal use.

I will be in meetings from 8:30-10, 11-12 and 1-2:30. I am happy to speak with you before 8:30 and will be available at any other time aside from those specified.

Re: *Water Related Civil Litigation*

Dear Treasurer Khouri:

In our letter of December 10, 2015, we requested the State of Michigan's financial assistance with the cost of defending the *Shears, et al v City of Flint, et al* lawsuit. As stated in that letter, if plaintiffs were to be successful in that litigation, the financial impact on the City of Flint (City) would be catastrophic.

As you are aware, the City hired the law firm of Miller Canfield to aid in its defense. Since the firm became involved defending this suit, the City has won favorable rulings before Circuit Court Judge Archie Hayman. These rulings included an amendment scaling back the scope of the August 17, 2015, preliminary injunction. Prior to this ruling the City was forecasting financial insolvency as early as this summer. Now, the City is permitted to charge water and sewer rates consistent with the Revenue Bond Act and the biennial budget adopted by former Emergency Manager Gerald Ambrose. Additionally, Judge Hayman has acknowledged that the City is not obligated to repay 15.7 million dollars from its general fund to its water and sewer fund. Put simply, while the costs to retain Miller Canfield have not been insubstantial, it has been money well spent.

These rulings are clear victories for the City. They are a key step in ensuring Flint's overall financial health and stability – both now and in the future. While these triumphs are important, the City has also moved to have the case dismissed. Although Judge Hayman denied the motion, the City believes it has strong grounds for appellate review. That appeal is currently pending before the Michigan Court of Appeals, and the City expectantly awaits a favorable ruling.

Despite the successes in *Shears*, the City must still overcome significant economic challenges. Our City is confronting the most dire water related emergency faced by a municipality in recent memory. This is not hyperbole. Both Governor Snyder and President Obama have declared states of emergency in the City because of the water. What is more, our City's infrastructure, reputation, and people have been irreparably damaged.

As a result of this situation, the City is facing a significant amount of civil litigation. Several lawsuits have already been filed against the City. These include two class action suits. The first, *Mays v Snyder, et al* was brought in the Eastern District of Michigan; the second, *Collins v Snyder*, was brought against the City in Genesee County Circuit Court. The City expects to incur significant legal

fees and costs in defending these two suits. Moreover, we believe these suits are only the first wave of suits to be filed. It is very likely that additional plaintiffs will file suits against the City in the future.

As is the case with the *Shears* litigation, if the plaintiffs in any water related lawsuits are successful, the financial impact on the City would be catastrophic. Certainly, the financial progress and accomplishments achieved by emergency managers over the last four years are at risk. Avoiding this catastrophic result must be a priority. And, given the potential liability posed by these cases all funds expended on competent, qualified legal counsel will be money well spent.

We again acknowledge that under Public Act 436, the State does not assume liability for the actions of an emergency manager. However, without State assistance, the City simply cannot cope with the voluminous number of lawsuits it will soon be facing. Our City needs the resources and expertise of proven legal counsel, such as Miller Canfield. Unfortunately, the City cannot afford these costs. Therefore, we are asking the State to provide the necessary funding for outside legal counsel.

The City and its residents have sacrificed much to attain fiscal stability and end the financial emergency. Our budget, which is already thin, has been stretched to the breaking point by the water crisis. Again, we need the State's help. We would ask that you provide us with the financial assistance necessary to deal with all water related litigation both now and in the future.

Respectfully submitted,

Karen W. Weaver

> I expect we will be talking with Jody in the morning to see if reaching back to the audited July 2014-August 2015 numbers will create a baseline on monthly billings. We can know what was billed in October or November of last year, but we have to project what will be billed in February going forward. It may be that the actual billings in the previous fiscal year can be our guide. Those were actually billed and that helps us avoid the need for speculation. More to follow in the morning and we can meet to discuss the numbers when you have time.

To: Steckelberg, Larry (TREASURY) ; Vaughn, Cary J. (Treasury)
Subject: Fwd: Water Bill Relief Strategy

Good morning, Gentleman.

I'm not sure what is being communicated on the State's side, but yesterday in a meeting between Governor Snyder, Treasurer Khouri, Mayor Weaver and City Administrator Henderson, the Treasurer informed the Governor that he is not receiving information from the City.

I believe that I have been incredibly timely in providing complete, accurate, and quality information as soon as it is requested by Treasury. Although I'm obviously dismayed by his comment, I continue to strive to provide all necessary information to ensure that the City is able to obtain the financial resources it so desperately needs.

I kindly ask that you assist in notifying all relevant parties that we are actively working together and if there is information still necessary that you simply let me know. Please let me know if there is any area that may be improved to facilitate this effort.

Thanks,

Jody N. Lundquist

As I will report during our meeting this morning, the Governor's office has requested that we undertake an analysis to provide critical information by the close of business on Friday to position the options regarding water bill relief.

We would like to meet at 9:30am after the Flint Forward Committee meeting.

I don't know why it wasn't dated. I believe there are communications between EPA and DEQ where EPA estimates the timeframe for the letter. I may be mistaken, but I think EPA provided the letter in response to an inquiry from DEQ. I'll check.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON D C 20460

THE ADMINISTRATOR

The Honorable Rick Snyder
Governor of Michigan
P.O. Box 30013
Lansing, Michigan 48909

Dear Governor Snyder

Thank you for your time today to talk about our shared concerns for the people of Flint. As we discussed, today I am issuing an Order, pursuant to Section 1431 of the Safe Drinking Water Act, directing the Michigan Department of Environmental Quality and the City of Flint to take immediate action to address serious and ongoing concerns with the safety of Flint's drinking water system. The U.S. Environmental Protection Agency is deeply concerned by continuing delays and lack of transparency and has determined that the actions required by the Order – the key elements of which are summarized below – are essential to ensuring the safe operation of Flint's drinking water system and the protection of public health. The Order, which has been transmitted separately, directs that the state notify the EPA in writing within one day of its intent to comply. Recognizing that you have made changes to the leadership at MDEQ, it is imperative that our respective teams set up a meeting no later than next week to begin the work that is before the state, the city and the EPA.

The EPA and other federal agencies are working closely with the state and city to address the public health emergency that is now unfolding as a result of the failure to properly operate Flint's system, leading to multiple health-based drinking water violations and unsafe lead levels in the city's drinking water. As part of these efforts, this past October the EPA established the Flint Safe Drinking Water Task Force (the "EPA Task Force"), composed of EPA scientists who are recognized experts in the field of corrosion control in drinking water systems. The EPA Task Force has provided written recommendations to the city and MDEQ, clearly addressing specific steps needed to re-optimize corrosion control, as well those needed to ensure that the system maintains optimal corrosion control throughout the transition of Flint's water supply from the Great Lakes Water Authority (Detroit) to the Karegnondi Water Authority (KWA) that the city is planning for the summer of 2016. These recommendations have been publicly posted at http://www.epa.gov/mi/flint-drinking-water-documents.

As you and I discussed, some progress has been made in addressing these recommendations; but there continues to be inadequate transparency and accountability with regard to provision of test results and actions taken and those are critical for the people of Flint. In addition, there is an increasing concern about capacity to carry out the recommended actions and to safely manage Flint's drinking water system – especially in the context of the intended transition to KWA water in summer 2016. The EPA Task Force, the city, and the state have had to devote substantial effort to issues related to the planned

Recycled/Recyclable ... Post-Consumer Process Chlorine Free Recycled Paper

transition from treated water purchased from Detroit to untreated water from KWA. That transition presents complex technical and managerial challenges, above and beyond those related to the immediate need to reduce lead levels in Flint's drinking water, that have serious implications for drinking water safety and public health. Finally, it must be recognized that the EPA Task Force's expertise and technical advisory role are narrowly focused on corrosion control, and that there is a much broader set of issues that must be addressed to ensure the safety of drinking water provided by the Flint system.

For these reasons, the EPA's Order requires the state and the city to take a number of actions, summarized below, to ensure that Flint's drinking water system is re-optimized for corrosion control, that the city establishes the capacity to safely and effectively operate its drinking water system, and that there is public transparency and accountability with regard to these actions:

1. Promptly provide the EPA and the public with official, public and timely responses to the recommendations of the EPA Task Force, including status and plans with regard to implementation of recommended actions

2. Fully implement the EPA Task Force's recommendations with regard to lead sampling; promptly and continuously share the results of all lead sampling and other relevant Flint drinking water data with the EPA and the public, with proper protections for personally identifiable information; and cooperate with the independent EPA sampling effort described below.

3. Ensure, including through the provision of state resources as necessary, that the city has the full complement of qualified professionals needed to safely operate Flint's drinking water system.

4. Obtain, through a publicly transparent process and with the support of state resources as necessary, advice from independent, nationally-recognized experts on drinking water treatment, sampling, and distribution system operation – in order to ensure safe and effective management of that system and to restore public confidence.

5. Prior to implementing any transition to KWA water, make an affirmative determination, with appropriate expert advice and an opportunity for public input, that the city has the technical, managerial, and financial capacity to safely and effectively operate its drinking water system, and that all necessary infrastructure upgrades, analysis, and testing have been completed, in order to ensure a safe transition to KWA.

To help ensure transparency and accountability, the EPA will work with the city in the near term to oversee and participate in the collection of Lead and Copper Rule drinking water samples by Flint residents, will have these samples analyzed in a certified laboratory, and will provide this data to the public, with appropriate protections for personally identifiable information. Further, the EPA will conduct additional, sequential sampling at locations throughout the distribution system, which will be used to further inform the treatment optimization process. The EPA underscores that the state and city ultimately will need to work with independent recognized experts to undertake a broader effort to fully assess and verify the safety of Flint's drinking water system-wide.

The steps outlined above are essential to fulfill our shared interest in the protection of public health against further harm from drinking water contamination, and to restoring public confidence that the ongoing drinking water crisis will be promptly and fully remedied. I expect to receive prompt written notice of the state's intention to promptly and fully comply with the requirements of the Order.

Sincerely,

Gina McCarthy

Matt,

This can be our good news story for tomorrow. The discussion today was to turn it into a news release and to also make it a web/social media story I would recommend assigning this to Frank Provenzano tomorrow to prep it as a news release, and then ask Ryan Gajewski to draft some tweets and Facebook posts.

It will need approval from DEQ and MDHHS, as well as the State Director.

I've copied in Trevor because I think Meegan asked him to take some photos previously.

Thanks,
Shanon

Meegan Holland
Director of Communications for Gov. Rick Snyder
Office: 517-335-6397
Mobile: 517-420-2714

When state experts sat down with Flint planners two days after Gov. Rick Snyder declared a water emergency, they asked about the locations of lead water pipes connecting to residents' homes.

The information was mostly there, on paper, filed in a large vault. There are hundreds of hand-drawn plat maps from the 1980s and hand-written notes on thousands of cards about updates to home plumbing systems.

Over the years, a dedicated Flint city employee has been translating inspectors' handwritten notes about plumbing updates into an Excel spreadsheet. But like many cities with limited budgets, Flint doesn't have a robust staff converting the information from paper to searchable data.

All that paper is now being be digitized so the State Emergency Operations Center can figure out where safe water is needed.

Five GIS analysts are working on the project – including one from FEMA, which entered the picture after President Obama granted Gov. Snyder's request for a federal emergency on Jan. 16.

Mapping infrastructure to this depth of detail is highly unusual, said James Tchorzynski, manager of the GIS analysts for the Emergency Management and Homeland Security Division of the Michigan State Police.

In a disaster like severe flooding, "You're used to watching the water rise and you count the houses. Here, it's all underground."

Once the maps are in digital format, they're synched with 2015 parcel data. Then they can be overlayed with Census information and infrastructure information, allowing analysts to pinpoint which inhabited homes have lead service lines.

That has been the job of Scott Bailey, a FEMA GIS analyst, for the past several days.

"The state is doing a great job of collecting the data," said Scott Bailey, a GIS data analyst with FEMA helping with the mapping project. "That's going to be a success story that comes out of this. They're able to upload large amounts of data in a matter of hours."

Credit goes to the ArcGIS Online app that the state is using to upload home data in real time.

Teams going door to door to deliver water supplies to residents are armed with iPads and the app, which feeds into the GIS system, noting whether there are children in the household and which ones have been provided with bottled water, a water test kit, a water filter and replacement cartridges.

//// GIVE UPDATED NUMBERS HERE – HOW MANY PARCELS 56,254, HOW MANY HOMES 38,144, HOW MANY SO FAR WITH LEAD SERVICE LINES? 3,600 OUT OF 26,000??////

The app information also helps Nikkia Anderson, a Michigan State Police GIS data analyst who is determining the number of inhabited homes in a city severely affected by blight.

From the old data, it appears there may be a street full of residents, but "sometimes when we look at the houses on Google street view, the homes are clearly vacant," she said.

When the state and FEMA complete this project, the information will be shared with the city. But it still may not be perfect because "on some homes, it's unknown what kind of service line there is," says Anderson. "It could be copper, iron, lead – we have no idea."

The state GIS analysts have worked on multiple emergencies, including the Enbridge oil spill, the flooding in SE Michigan and in Grand Rapids, and the high wind storm in Leelanau and Grand Traverse County last summer.

"This one is different, in its duration and intensity," Anderson says. "In the past, we'd get requests for a couple GIS maps to use as a visual aid. This time, it's 'Tell us where these people are so we can help them.' Our mission is much more critical."

Subject: RE: Use of SRF to replace lead service lines

Hi Sonya,
Because it is an eligibility question, there is probably no specific regulation to address it, but HQ issued a memo (attached). Although is not dated, it was still draft in 2012, so is probably 2012/2013. We may be able to find a more precise date from HQ. Just FYI, there is a reference on page 2 to a 2003 memo – the link to the 2003 memo is: http://water.epa.gov/grants_funding/dwsrf/upload/2008_04_10_dwsrf_memos_memo_dwsrf_policy_2003-07-25.pdf.

I hope this helps.
Please let me know if you have any questions.
Thanks.

To: Wyant, Dan (DEQ)
Subject: Use of SRF to replace lead service lines

Hi Dan –

Here's a quick answer to your question about using SRF to replace lead service lines. Under the federal SRF program, SRF funds can be used to replace lead service lines on both public and private property. (We don't know if Michigan rules allow for the use of SRF funding on private property, but presumably you know whether that's the case.) If you have additional questions, your staff can follow up with Steve Marquardt, Chief of the R5 Water Division State and Tribal Program Section. His number is 312-353-3214.

Please keep me posted on the time for the event later this week.

Thanks,

Susan

MEMORANDUM

SUBJECT: Eligibility of Replacement of Lead Service Lines on Private Property Under the DWSRF.

FROM: Joanne Hogan
Attorney- Advisor
Civil Rights and Financial Law Office
Office of General Counsel

THROUGH: Wendel Askew
Assistant General Counsel
Civil Rights and Financial Law Office
Office of General Counsel

Ken Redden
Deputy Associate General Counsel
Civil Rights and Financial Law Office
Office of General Counsel

TO: Peter Shanaghan
Team Leader
Drinking Water State Revolving Fund Team
Office of Ground Water and Drinking Water, Office of Water

Question Presented.

You have asked whether financial assistance from a State's Drinking Water State Revolving Loan Fund can be used by eligible entities to fund projects that involve replacing lead service lines that may be on private property and that connect to private dwellings.

Brief Answer

We believe that lead service line projects, regardless of the ownership of the property on which the pipe is placed, may be funded by a State's DWSRF so long as the loans are made to an eligible entity and all other requirements of the DWSRF are met.

Analysis

The statute and the regulatory provisions governing the use of State DWSRF funds, though defining which entities may receive funds, do not require the Public Water System to have control over all portions of a project that is funded by the DWSRF. Congress gave EPA's Administrator the clear authority to determine which projects would be eligible under §1452: "Financial assistance. . . may be used. . . only for expenditures of a type or category which the Administrator has determined, through guidance, will facilitate compliance with national primary drinking water regulations." PHSA §1452 (a)(2). The only broad statutory limitations on the types of projects that cannot be funded are projects which include monitoring, operation, or maintenance expenditures, or projects for the acquisition of real property unless the purchase is made from a willing seller and the acquisition is integral to the project.

40 CFR §35.3520 (b)(2) sets forth the categories of projects that can be funded by a DWSRF. This provision includes the transmission and distribution of water to be a category of eligible projects. Specifically, the regulation provides examples of such projects to include: "installation or replacement of transmission and distribution pipes to improve water pressure to safe levels or to prevent contamination caused by leaks or breaks in the pipes." See 40 CFR §35.3520 (2)(ii).

Lead pipes can contaminate water at any point, including on its way to a private home. Allowing a public water system to use its funds to replace such pipes is consistent with this allowable category of projects, and is similarly consistent with the overall health protections of the Safe Drinking Water Act. See PHSA 1452 (a)(1)(A). Note that if a Public Water System wishes to purchase and retain an easement so that it maintains control of such infrastructure, that purchase is authorized as well: "Funds shall not be used for real property or interests therein unless the acquisition is integral to the project authorized... and the purchase is from a willing seller. . ." PHSA 1452(a)(2).

This determination that replacement of lead pipes on privately owned property is an eligible project cost so long as it otherwise complies with the PHSA is consistent with prior approved eligible projects, such as water efficiency projects, that do not require all elements of a project to be under the control of a Public Water System. In a Memorandum dated July 25, 2003, then Assistant Administrator for Water G. Tracy Mehan III informed Water Division Directors in the regions that projects such as the installation or retrofit of plumbing fixtures and appliances, installation of water meters, and implementation of incentive programs to conserve water, such as rebates or conservation rate structures were all eligible projects under the DWSRF. Therefore, so long as the assistance is given to an eligible entity, and the project otherwise meets the requirements of the DWSRF, the project may be funded regardless of ownership or control of the resulting infrastructure.

Water Resource Sites Open Daily from 9 a.m. – 9 p.m.
Audio Available from Governor Snyder's Tele-Town Hall

FOR IMMEDIATE RELEASE
January 28, 2016
Release #: 21

Flint, Mich. – As efforts continue to ensure Flint residents have safe drinking water, Governor Snyder last night held a live tele-town hall where he and other state officials fielded questions from residents on the state's actions. A recording of the conversation can be heard here.

One of the most visible aspects of the response continues to be the distribution of bottled water, filters, water replacement cartridges and water testing kits by National Guard members at five of the city's fire stations.

As part of the distribution process, residents seeking water filters and replacement cartridges are asked to share their address. This data is being collected and mapped in real-time to assist with long-term recovery and help water response teams know where to focus their door-to-door efforts. It is important to note that no resident will be denied resources if an address is not provided, and a photo identification is not required.

Since Jan. 9, 2016, the following resources have been distributed to residents, both at the water resource sites and by water response teams:

- 207,055 cases of water

- 97,342 water filters
- 30,801 water testing kits

Water response teams also continued door-to-door delivery efforts. Today, 125 American Red Cross and other volunteers visited 1,768 homes providing free bottled water, filters, water replacement cartridges and water testing kits.

Earlier this afternoon, a coalition of public-private partners announced Flint's coordinated recycling program for empty water bottles and used water filter cartridges. Residents can learn more here.

Water resource sites remain open daily from 9 a.m. to 9 p.m. and are located at:

Fire Station #1 (also a water bottle recycling site)
310 East 5th St.

Fire Station #3
1525 Martin Luther King Ave.

Fire Station #5 (also a water bottle recycling site)
3402 Western Rd.

Fire Station #6
716 West Pierson Rd.

Fire Station #8 (also a water bottle recycling site)
202 East Atherton Rd.

All water filters distributed by the State of Michigan are certified by NSF International for lead reduction. Individuals wishing to verify that a specific filter is NSF-certified can do so via the NSF website.

The State of Michigan continues to coordinate response efforts in partnership with the city of Flint, Genesee County and local community organizations.

Additional information is available at www.michigan.gov/flintwater, by calling 211 or visiting www.helpforflint.com.

Subject: FW: Flint, MI Amendment

Attached is the summary and the language we are working with. If you want to hope on a quick call I can walk you all through it real quick.

Bottom line

- Up to $640m in loans paid back in 35 years, at subsidy cost to US Treasury of $64m paid for out the Leaking Underground Storage Tank Trust Fund
- Up $160 in SRF loans paid back in 5 years paid for out the Leaking Underground Storage Tank Trust Fund
- Authorization for $20m in loan forgiveness for the State to offer to the City of Flint
  Instead of the $200m for the Centers for Excellence on Lead Exposure, directs Agency for Toxic Substance and Disease Registry ("ATSDR") to establish a lead exposure registry for Flint, Michigan and to provide health consultations for the citizens of Flint. (I will point out that even if the loans are amendable to the Ds, this Centers for Excellence is a major Stabenow priority and will be what she says she has to have). We have engaged with the HELP Committee on working an HHS/nutrition solution that may serve as an alternative.

Alex
202-224-8260

Flint, Michigan Emergency Disaster Relief-summary.

(a) Finding of Emergency. The intent of the emergency finding is to distinguish the situation in Flint from every other city with infrastructure issues.

(b) State Revolving Loan Fund Assistance

Under current law, the federal government capitalizes state drinking water revolving loan funds to allow states to give loans to drinking water systems for infrastructure improvements.

(1) Under current law, the Safe Drinking Water Act authorizes forgiveness of principal for disadvantaged communities. This paragraph gives the State the authority to forgive the approximately $20 million in outstanding loans to Flint from the state drinking water revolving loan fund.

(2) Under current law, states provide loans to cities for drinking water infrastructure. This paragraph authorizes State of Michigan to provide $160,000,000 in loans from the state drinking water revolving loan fund to the City of Flint, Michigan, for the purpose of addressing lead in drinking water, including repair and replacement of public and private drinking water infrastructure. This assistance may include principal forgiveness.

(c) Water Infrastructure Financing.

(1) This paragraph authorizes EPA to make use of the new WIFIA authority enacted as part of WRRDA 2014, to make secured loans to the State of Michigan to provide assistance to Flint. Under current law, a WIFIA loan may only cover 49% of project costs. This paragraph allows the loan to cover up to 80% of reasonably anticipated project costs.

(2) This paragraph makes it clear that any remaining project costs may be paid for with an SRF loan, as is the intent of current law.

(d) Funding.

(1) Additional SRF Capitalization Grant.

(A) This subparagraph makes $160,000,000 [transferred from the Leaking Underground Storage Trust Fund] available to EPA to provide an additional grant to Michigan to capitalize its state drinking water revolving loan fund.

(B) This subparagraph requires the state to reimburse that additional grant.

(C) This subparagraph uses the reimbursement to create a new emergency infrastructure fund.

(2) WIFIA Funding.

This paragraph provides $64,000,000 [transferred from the Leaking Underground Storage Tank Trust Fund] to EPA to allow it to make secured loans to Michigan under the WIFIA program. Because these secured loans are treated by Treasury as accounts receivable, only the credit/default risk scores. A municipal project of this nature, secured by the state of Michigan as obligor will likely yield a much lower credit risk assessment from OMB when loan is processed than 10%; however we are establishing a 10% default risk, which will support loans of up to $640,000,000. If the credit risk is less (as is likely), then less than $64,000,000 is needed to support $640,000,000 in loans and the remainder can be returned to the Leaking Underground Storage Tank Trust Fund.

(e) Emergency Infrastructure Fund.

This subsection creates an "Emergency Water Infrastructure Fund," with the $160,000,000 paid back by Michigan. If the emergency fund is not used within 10 years, the balance of the fund is returned to the Leaking Underground Storage Tank Trust Fund.

(f) Offset.

The offset for the assistance provided in this section is a transfer from the Leaking Underground Storage Tank Trust Fund.

(g) City of Flint, Michigan Lead Exposures Registry.

This subsection directs ATSDR to establish a lead exposure registry for Flint, Michigan and to provide health consultations for the citizens of Flint.

(h) Notification

Placeholder on notification to users of lead levels in drinking water [S.2466?]

(i) Asset Management

Placeholder requiring Flint to carry out an asset management program to provide appropriate operation and maintenance of the infrastructure funded in this section.

Committee to Examine Flint, MI Water Crisis

"Examining Federal Administration of the Safe Drinking Water Act in Flint, Michigan"

PURPOSE:

- To examine the ongoing situation in Flint, Michigan.
- To review the Environmental Protection Agency's (EPA) administration of the Safe Drinking Water Act in Flint, Michigan.

BACKGROUND:

- Prior to April 2014, the city of Flint, Michigan received its drinking water from the City of Detroit's system.
- In the months following the switch, the Flint River water began testing high in chloride levels, which caused it to be highly corrosive.
    - One serious effect of corrosion is that it causes water pipes made of lead to leach into the water.
    - Furthermore, the water tested positive for disease-carrying bacteria.
    - Reports indicated that the EPA, which has oversight over state and local water systems under the Safe Drinking Water Act, had known about contamination as early as June of 2015, detailed in an internal EPA memo.
- EPA Region 5 Administrator Susan Hedman announced her resignation effective February 1, 2016 and the EPA Office of Inspector General launched an investigation into the crisis.
- The Committee previously examined mismanagement at the EPA with hearings held April 30 and July 29 in 2015.

DETAILS:

WHAT: *"Examining Federal Administration of the Safe Drinking Water Act in Flint, Michigan"*
WHERE: 2154 Rayburn House Office Building
WHEN: Wednesday, February 3, 2016
TIME: 9:00 a.m. ET

LIST OF INVITED WITNESSES:

***additional witnesses may be added*

Mr. Joel Beauvais

January 29, 2016

Mr. Darnell Earley
Former Emergency Manager
City of Flint, Michigan

Dear Mr. Earley:

The Committee on Oversight and Government Reform hereby requests your testimony at a hearing titled, "Examining Federal Administration of the Safe Drinking Water Act in Flint, Michigan" on Wednesday, **February 3, 2016, at 9:00 a.m.** in room 2154 of the Rayburn House Office Building.

This hearing will examine the ongoing situation in Flint, Michigan, and the implementation of the Safe Drinking Water Act by federal agencies. You should be prepared to provide a five-minute opening statement and answer questions posed by Members.

The enclosed Witness Instruction Sheet provides information for witnesses appearing before the Committee. In particular, please note the procedures for submitting written testimony at least two business days prior to the hearing. If you have questions, please contact Bill McGrath of the Committee staff at (202) 225-5074.

Sincerely,

Jason Chaffetz
Chairman

Elijah E. Cummings
Ranking Minority Member

Enclosure

Witness Instruction Sheet
Governmental Witnesses

1. Witnesses should provide their testimony via e-mail to Sharon Casey, Deputy Chief Clerk, Sharon.Casey@mail.house.gov, no later than 10:00 a.m. two business days prior to the hearing.

2. Witnesses should also provide a short biographical summary and include it with the electronic copy of testimony provided to the Clerk.

3. At the hearing, each witness will be asked to summarize his or her written testimony in five minutes or less in order to maximize the time available for discussion and questions. Written testimony will be entered into the hearing record and may extend to any reasonable length.

4. Written testimony will be made publicly available and will be posted on the Committee's website.

5. The Committee does not provide financial reimbursement for witness travel or accommodations. Witnesses with extenuating circumstances, however, may submit a written request for such reimbursements to Robin Butler, Financial Administrator, 2157 Rayburn House Office Building, at least one week prior to the hearing. Reimbursements will not be made without prior approval.

6. Witnesses with disabilities should contact Committee staff to arrange any necessary accommodations.

7. Committee Rules governing this hearing are online at www.oversight.house.gov.

For inquiries regarding these rules and procedures, please contact the Committee on Oversight and Government Reform at (202) 225-5074.

Thanks for the call Bill. I'm available all weekend. The more I think about it, this can also be a great opportunity to explain how PA 436 works in relationship to local government decision making, among other things.

Flint Water Daily Update
Updated Jan. 29

Current Issues Talking Points

Governor and DEQ encourage home water testing

- The health and safety of Flint residents remains a top priority. Pregnant and nursing mothers and young children should continue to drink bottled water as a precaution.
- It is essential that all Flint residents have the water in their homes tested as soon as possible.
- Free water testing kits are available at Fire Stations 1, 3, 5, 6, and 8. Water Samples should be returned to the fire stations for testing.
- Until water is declared safe, continue to follow established safety protocols.

Governor secures emergency supplemental to immediately aid Flint residents

- Snyder signs $28M Flint bill, hopes for safe water soon (Detroit News)
- The $28 million in funding will help address immediate needs for the people and families of Flint. It is a necessary next step in ongoing recovery efforts for the city.
- The Governor signed the legislation at the first possible opportunity, following its unanimous approval in both the House and Senate.
- The Flint water crisis was a failure of government at all levels – city, state and local. The governor has apologized and taken responsibility for the state's role in this failure.
    - Accepted the resignation of top DEQ officials and suspended two pending a civil service investigation.
    - Approved two emergency funding bills to support Flint residents (This $28 million and a previous $9.3 million in Oct. 2015).
    - Declared and extended a state of emergency for the city and activated the National Guard.
- To date, the Governor and Legislature have approved a total of $37.3 million in emergency funding for Flint while the federal government has earmarked only $5 million in assistance.
    - The Governor will continue to call on the federal government and our Congressional partners to secure additional funding to help address the long-term needs of the city.

- This $28 million in emergency aid will help:
    - Supply free bottled water, faucet filters, and testing kits for Flint residents;
    - Put nine nurses in local schools to monitor student health and well-being;
    - Provide better nutrition for students and infants through WIC and in-school nutrition programs;
    - Replace fixtures in schools, daycares, nursing homes and hospitals;
    - Provide for an infrastructure study using independent experts;
    - Treat any children who have high lead levels in the blood, using diagnostic testing, nurse visits and environmental assessments in the home;
    - Provide additional community education opportunities within the Genesee County Health Department;
    - Compensate the Michigan National Guard's work to support water distribution;
    - Assist with home lead abatement costs;
    - Help the City of Flint with utility issues;
    - Provide operational funding for the Flint Interagency Advisory Committee.
- This funding package is just one step of many. Additional long-term resources will be needed as we work together to strengthen the city of Flint moving forward.

Fresh water in State of Michigan Flint office building was for all

- Amid denials state workers in Flint got clean water (Detroit Free Press)
- Fresh water in Flint State building was for all (ABC News)
- In January 2015, as a customer of Flint water, DTMB received a notification that the water system in Flint's state office building was found to be in violation of a drinking water standard.
- DTMB made the decision to provide an alternative drinking option for both building employees and public visitors.
    - Health of visitors was a top priority.
    - Approximately 500 visitors sign into the Flint office building every day. Many of which enter the building for access to DHHS services.
    - Those with an increased risk included people with severely compromised immune systems, infants, or the elderly. A large number of the clients using the DHHS services fall within those demographics.
- After receiving information from the city, verbally, in July 2015 that the water system issue had been addressed, the water coolers were removed.
- It wasn't until late Sept/Oct 2015 when the presence of lead in the water was confirmed that the water coolers were replaced.

> Hello Randy,
>
> I have finished reviewing the follow-up questions that you sent to me, and after reviewing all of our documents, here are my responses:
>
> **Timeline questions follow-up**
>
> **Response**
> 1. Most of these dates involve DEP et al in which we/Treasury did not play a role i.e., someone else [DEQ] would need to confirm their accuracy
>
> 2. Just quickly, items we would question from the document or need to investigate further...
>
> **3. 12/20/12 (p.1) – we don't have the notification that is referenced**
> **"The City of Flint notifies the Treasury that it is no longer considering using the Flint River as a water supply"**
> - Cannot find documentation that this occurred.

- During that time period, the Treasury was analyzing the report from Tucker and Young study, and had not even received a proposal from DWSD.

4. 3/29/13 (p.2) – we are not aware of any veto by Kurtz
"EM Kurtz Vetoes Flint City Council's changes to the KWA resolution, and signs an executive order to join KWA"

- We were able to confirm that the City Council voted to connect to water from KWA
- No Executive Order was filed with the Treasury overriding the City Council's changes to the KWA agreement, nor was there an Executive Order filed with the Treasury to join the KWA

5. The early offers by DWSD to reconnect were rejected because of the add'l cost, they were long term and the fact the city had executed a contract with KWA. On Jan 12 '15 they waived the reconnect fee but were still issues re length/term of commitment.

- Per Jerry Ambrose's memo dated 3/3/15 (attached), the water from DWSD would still cost the city an additional estimated $12M annually, which would have raised water rates by an additional 30%. As such, he strongly disagreed with restoring the water to DWSD at the time.

6. 3/12/15 – The Veolia report did mention corrosion control but the focus was on TTHM which was chlorination issue not related to the lead problem. I believe Treasury funded the study.

- No documentation was found to conclude that this study was funded by the Treasury.

Attachment #20

CITY OF FLINT

OFFICE OF THE EMERGENCY MANAGER

Gerald Ambrose
Emergency Manager

TO: Wayne Workman, Deputy Treasurer
Treasury Department
State of Michigan

FROM: Jerry Ambrose, Emergency Manager
City of Flint

DATE: March 3, 2015

As the Emergency Manager for the City of Flint, I am charged with restoring the City government to financial solvency, and working to assure that the City moves forward on a financially sustainable basis. The steps taken over the past three years have been difficult. Taxes and fees have been raised, services and workforce reduced, and ongoing costs, including legacy costs, have been constrained.

The current controversy surrounding the provision of water, and the path for resolution, has a potentially significant impact on the progress that is being made. I am satisfied that the water provided to Flint users today is within all MDEQ and EPA guidelines, as evidenced by the most recent water quality results conducted for MDEQ. We have a continuing commitment to maintain water safety and to improve water quality, and have dedicated resources to assure this commitment will be made.

The oft-repeated suggestion that the City should return to DWSD, even for a short period of time, would, in my judgment, have extremely negative financial consequences to the water system, and consequently to the rate payers. By the most conservative estimates, such a move would increase costs by at least $12 million annually, with that amount achieved only by eliminating virtually all budgeted improvements in the system. For a system with Unrestricted Assets of only $740,745, according to the June 30, 2014 audited financial statements, the only recourse within the City's control would be to increase revenues significantly. And in my judgment, that would come from raising rates for water by 30% or more . Further, changing the *source* of the city's water would not necessarily change any of the *aesthetics* of the water, including odor and discoloration, since those appear to be directly related to the aging pipes and other infrastructure that carry water from the treatment facility to our customers.

This direction of discussion also deviates from what, in my judgment, should be the focus: How can we not only operate and maintain a system to assure the delivery of safe and quality water dependably, but significantly reduce the cost of water and sewer to the users? At an average of $149 per month for water and sewer service for a residential user, the cost is extremely high in comparison to surrounding areas, as well as most areas across the state, and creates a significant financial burden for many users. In my judgment, we should all be concentrating on how to reduce rates by 50% or more. Unfortunately, there are no easy or evident answers, and continuation of the status will be an impediment to the sustainable recovery of the City of Flint. It is a conversation that I expect we will have with the recently created Water Quality Advisory Committee.

My reasoning for this conclusion is as follows:

One of the decisions made in the context of beginning to eliminate deficits and to restore financial stability to the City of Flint was to increase water and sewer rates significantly – the only choice available to financially stabilize a system that as of June 30, 2012, had a deficit of $8,758,091. Another was to leave DWDS for the KWA because it offered the opportunity to lower future rate increases. A third decision was to utilize the Flint River on an interim basis when DWSD unilaterally terminated the City's contract for water purchase. That decision was made because it also offered an immediate cost savings opportunity which translated into the ability to upgrade the Water Treatment Plant without having to seek financing. It was a reasonable decision because of our experience in using the river in a back-up capacity, including test runs on a quarterly basis for several decades.

Unfortunately, the switch to the river as a primary source was more challenging than anticipated, and the harsh winter of 2013-2014 resulted in much more damage to the aging water infrastructure than in previous years. The result was the issuance of required notices that water exceeded established guidelines for safety as it could affect certain vulnerable populations, and some users of the system experienced unpleasant odors and discoloration. Some users also appeared to have had some negative reactions to the new source of water. However, as soon as the test results were known, City staff took immediate actions to address the concerns. These actions are evidenced today by the fact that MDEQ has certified that our most recent testing shows water from all testing sites to be well within acceptable guidelines. Additionally, the City is continuing to taking the necessary actions to assure that the water supply remains safe and that water quality continues to improve.

As the City has moved to address the situation, the suggestion continues to be made that the City should re-engage with DWSD and purchase water at least until the KWA pipeline is supplying water. As evidenced by the most recent letter from DWSD, such a decision would immediately increase the City's cost by $846,700 per month, or $10,160,400 per year, just for the fixed cost portion of the price. The actual *purchase* of water would be an additional fee, and dependent upon

the quantity purchased. We estimate the actual water purchase cost to average more than $1 million per month, for a grand total of approximately $22 million per year. Finally, the DWSD offer is conditioned upon the City (or presumably the KWA) agreeing to negotiate a long term contract (30 years) for back-up.

The $22 million annual estimate of increased costs to purchase water from DWSD would be minimally offset by an approximate $3 million in reduced operating costs, and could be further offset by an additional $9 million, but only if all funding for capital improvements to the system are eliminated. To eliminate all funding dedicated to repairing, stabilizing, and improving the system would be totally irresponsible and would have long term negative consequences to the City and to future rate payers.

As you are aware we have recently brought in outside expert assistance to evaluate the steps we have taken to assure that the water is safe and to continue to improve water quality. We are expecting specific recommendations within the next few weeks, and are committed to implementing those recommendations in a timely manner. Many steps have already been taken. I am confident that implementing their recommendations will assure a continuing supply of safe water as well as improved quality, and at far less cost than re-engaging DWSD.

We have also created a 40-member Water Advisory Committee and a 13-member Technical Advisory Committee to assure two-way communication with the public and users of the system. Those committees will begin to meet this week, and we look forward to answering their questions and receiving their input.

It is unfortunate that problems and concerns with quality have arisen, and we are working every day to address the issues that caused them. Maintaining safe water and improving quality is a top priority as we work to make the City of Flint an attractive place to live, work, study, and play.

I have finished reviewing the follow-up questions that you sent to me, and after reviewing all of our documents, here are my responses:

Timeline questions follow-up

Response

1. Most of these dates involve DEP et al in which we/Treasury did not play a role i.e., someone else [DEQ] would need to confirm their accuracy

2. Just quickly, items we would question from the document or need to investigate further...

3. 12/20/12 (p.1) – we don't have the notification that is referenced
"The City of Flint notifies the Treasury that it is no longer considering using the Flint River as a water supply"

- Cannot find documentation that this occurred.
- During that time period, the Treasury was analyzing the report from Tucker and Young study, and had not even received a proposal from DWSD.

4. 3/29/13 (p.2) – we are not aware of any veto by Kurtz
"EM Kurtz Vetoes Flint City Council's changes to the KWA resolution, and signs an executive order to join KWA"

- We were able to confirm that the City Council voted to connect to water from KWA
- No Executive Order was filed with the Treasury overriding the City Council's changes to the KWA agreement, nor was there an Executive Order filed with the Treasury to join the KWA

5. The early offers by DWSD to reconnect were rejected because of the add'l cost, they were long term and the fact the city had executed a contract with KWA. On Jan 12 '15 they waived the reconnect fee but were still issues re length/term of commitment.

- Per Jerry Ambrose's memo dated 3/3/15 (attached), the water from DWSD would still cost the city an additional estimated $12M annually, which would have raised water rates by an additional 30%. As such, he strongly disagreed with restoring the water to DWSD at the time.

6. 3/12/15 – The Veolia report did mention corrosion control but the focus was on TTHM which was chlorination issue not related to the lead problem. I believe Treasury funded the study.

- No documentation was found to conclude that this study was funded by the Treasury.

Responding to Flint and Michigan's Needs

How EY can provide support

January 2016

EY

Building a better working world

Overview

- Ensuring residents of Flint are receiving safe water is priority number one.
- As a result, FEMA is providing commodities and emergency services.
- Michigan should receive reimbursement through FEMA as a result of the President's Emergency Declaration, and EY can assist in this initial area.
- EY's expertise in *Insurance and Federal Claims Services, Infrastructure Advisors, Construction Consulting and Construction & Real Estate Services* can assist the State and City on current and future activities around:
  - Federal grants
  - Emergency management
  - Project management
  - Infrastructure & construction
  - Financial review and other necessary measures

EY provides financial expertise in key areas to assist Flint and the State is this emergency

Flint Issue	EY Service Offering	Key Tasks / Value Added	Relevant Experience
Administration of Federal and State financial aid	▸ Insurance & Federal Claims Services (IFCS)	▸ Assist in oversight (funds spent appropriately), grant and contract management, compliance, documentation, reimbursement process and loss prevention	▸ Flood recovery claim preparation for automotive manufacturing facility
Feasibility of infrastructure solutions	▸ EY Infrastructure Advisors (EYIA)	▸ Team up with engineering firm to identify and assist in the selection of viable projects to address emergency ▸ Strategic advisory and financial assessment	▸ Fargo-Moorhead Area Diversion ▸ Miami Intermodal Center ▸ Rialto Water Services
Construction management	▸ Construction and Real Estate Services	▸ Conduct risk assessment to identify issues ▸ Develop process controls for construction project ▸ Project status and progress reviews	▸ New York DEP water and wastewater project ▸ Major Northeast Utility
Project funding sources and impact on City's financial situation	▸ EY Infrastructure Advisors ▸ Transaction Advisory Services	▸ Identify alternative funding sources ▸ Model financial impact on Flint's financial situation ▸ Rate analysis	▸ National private water company ▸ City of Flint 5-year plan and valuation of WSC ▸ City of Detroit Water and Sewer rates

City of Flint

- Mayor
- City Council
- Water Service Center

Genesee County

- Board of Commissioners

Oversight boards

- Transition Advisory Board
- **Flint Water Interagency Coordinating Committee**

State of Michigan

- Governor
- Legislature
- Office of Urban Initiatives
- Emerg. Mgmt. and Homeland Sec.
- Dep. of Environmental Quality
- Health and Human Services
- Licensing and Regulatory Affairs
- Treasury
- Department of Education

Federal Government

- Executive Branch
- FEMA

Key advisors

Function	Legal advisor	Engineering firm	Financial advisor	Communications advisor
Area of expertise	Emergency Management	FEMA/grant compliance	Construction Services	Project Management	Financial Projections	Rate Development

Key attributes of financial advisor:

- Independent
- Brand recognition
- Public sector expertise
- Comprehensive service offering
- Relevant expertise
- Senior level attention

☐ EY Service offerings

EY

Insurance & Federal Claims Services (IFCS)

Areas of support	Description of capabilities

Disaster Recovery	► Assist all levels of government on presidentially declared emergencies and disasters
	  ► Oversight to ensure that disaster relief funds were spent appropriately
	  ► Assist federal funding recipients on grants management, contract management, accounting, internal controls, documentation, audit resolution, and a wide range of other services
	► Manage disaster-related compliance and emergency management performance assessments
	► Knowledge and understanding of FEMA's Public Assistance (PA) program and other federal funding sources, and activities required for compliance

Federal reimbursement	► The City and State should be receiving reimbursement for some of their activities as a result of the President's Emergency Declaration.
	► EY can support reimbursement efforts in the areas of:
	  ► **Disaster grant services** including project worksheet development, locating, assembling, reviewing and organizing documentation, review of grant documentation, and other services related to the emergency
	  ► **Loss prevention strategies to improve emergency accountability** through internal control reviews, compliance and cost eligibility reviews, and advising state officials on state and federal funding
	► EY fees may be partially reimbursable under direct administrative and management costs

EY Infrastructure Advisors (EYIA)

Areas of support	Description of capabilities

Government Support	▸ EY's Infrastructure Advisors (EYIA) provides practical solutions through sound financial and other advisory services for clients seeking to:
	  ▸ Rebuild and modernize existing infrastructure
	  ▸ Invest wisely in new infrastructure to address new and changing needs, enable growth and achieve a higher quality of life for communities
	▸ Bring innovation, foresight and sound economic stewardship to their major projects, programs and investments
	▸ Identify and attract the funding and financing required to invest in infrastructure

About EY
EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital markets and in economies the world over. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In so doing, we play a critical role in building a better working world for our people, for our clients and for our communities.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. For more information about our organization, please visit ey.com.

Ernst & Young LLP is a client-serving member firm of Ernst & Young Global Limited operating in the US.
